**BEFORE THE WATER RESOURCES DEPARTMENT
OF THE
STATE OF OREGON**

In the Matter of Transfer Application	)	FINAL ORDER APPROVING TEMPORARY
T-14691, Jackson County	)	CHANGES IN PLACE OF USE AND POINT
	)	OF DIVERSION

Authority

Oregon Revised Statute (ORS) 540.505 to 540.580 establish the process in which a water right holder may submit a request to temporarily transfer the place of use and, if necessary to convey the water to the temporary place of use, the point of diversion authorized under an existing water right.

Oregon Administrative Rule (OAR) Chapter 690, Division 380 implements the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

Applicant

L & Z FARM LLC (Min Lin)
3941 SAMS VALLEY RD
GOLD HILL, OR 97525

Findings of Fact

1. On June 27, 2025, L & Z Farm LLC (Min Lin), filed an application to temporarily change the place of use and to change the point of diversion to serve the proposed place of use under Certificate 30957 for a period of 5 years. The Department assigned the application number T-14691.
2. Notice of the application for transfer was published on July 8, 2025, pursuant to OAR 690-380-4000.
3. The right to be temporarily transferred is as follows:

Certificate:	30957 in the name of S. A. NELSON (perfected under Permit S-27201)
Use:	IRRIGATION of 1.7 ACRES
Priority Date:	FEBRUARY 14, 1961
Rate:	0.02 CUBIC FOOT PER SECOND (cfs)

This is a final order in other than a contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-0080, you may petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

Limit/Duty: The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, shall be limited to ONE-EIGHTIETH of one cubic foot per second per acre, or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 4.5 acre-feet per acre for each acre irrigated during the irrigation season of each year from direct flow and storage from reservoir constructed under Permit number R-2589; provided further that the right to the use of the direct flow is limited to the period when the flow of the Rogue River is more than 1000 cfs at Raygold, more than 1000 cfs immediately above Savage Rapids Dam and more than 735 cfs at its mouth.

Source: UNNAMED STREAM and NELSON RESERVOIR constructed under Application number R-34621, Permit number R-2589 a tributary of TABLE ROCK CREEK (SAMS CREEK)

Authorized Point of Diversion:

Twp	Rng	Mer	Sec	Q-Q
35 S	2 W	WM	32	NW NE

Authorized Place of Use:

Twp	Rng	Mer	Sec	Q-Q	Acres
35 S	2 W	WM	32	NW NE	1.7

4. The Department has received information from the applicant that better describes the authorized point of diversion under Certificate 30957, as follows:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
35 S	2 W	WM	32	NW NE	#1 - 626 FEET SOUTH AND 1811 FEET WEST FROM THE NE CORNER OF SECTION 32

5. Temporary Transfer Application T-14691 proposes to temporarily change the place of use of the right to:

Twp	Rng	Mer	Sec	Q-Q	Acres
35 S	2 W	WM	32	NW NE	1.7

6. A change in points of diversion is necessary to convey the water to the proposed temporary place of use. Temporary Transfer Application T-14691 proposes to move the authorized point of diversion approximately 80 feet downstream to:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
35 S	2 W	WM	32	NW NE	#2 - 579 FEET SOUTH AND 1726 FEET WEST FROM THE NE CORNER OF SECTION 32

Temporary Transfer Review Criteria

7. Water has been used within the last five years according to the terms and conditions of the right. There is no evidence available that would demonstrate that the right is subject to forfeiture under ORS 540.610.

8. A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing right is present.
9. The proposed changes would prevent the lands from which the water right is removed during the period of the temporary transfer from receiving water under the transferred right, as required by ORS 540.523(7).
10. The proposed changes would not result in injury to other water rights. This finding is made through an abbreviated review recognizing that the transfer may be revoked under ORS 540.523(5) if the Department later finds that the transfer is causing injury to any existing water right.

Conclusions of Law

The temporary changes in place of use and point of diversion to convey water to the temporary place of use proposed in Temporary Transfer Application T-14691 are consistent with the requirements of ORS 540.523 and OAR 690-380-8000.

Now, therefore, it is ORDERED:

1. The temporary change in place of use and change in point of diversion to convey water to the temporary place of use proposed in Temporary Transfer Application T-14691 are approved.
2. The former place of use **shall not** be irrigated as part of this water right during the 2025, 2026, 2027, 2028, and 2029 irrigation seasons.
3. The use shall revert to the authorized place of use at the end of the 2029 irrigation season. The authorization to use the additional point of diversion shall be terminated concurrently.
4. The approval of this temporary transfer may be revoked or modified if the Department finds the changes cause injury to any existing water right.
5. The quantity of water diverted at the proposed temporary point of diversion shall not exceed the quantity of water lawfully available at the original points of diversion.
6. A subsequent application for permanent transfer of Certificate 30957 shall be subject to a full and complete review to determine consistency with the requirements of OAR Chapter 690, Division 380. Approval of this temporary transfer does not establish a precedent for approval of a subsequent application filed for a permanent transfer.
7. The use of water at the temporary place of use authorized by this transfer shall be in accordance with the terms and conditions of Certificate 30957.

8. The time during which water is used under this approved temporary transfer does not apply toward a finding of forfeiture under ORS 540.610.

Proposed Changes: ☒ POU ☒ POD ☐ POA ☐ USE ☐ OTHER

Reviewer(s): Hailey Conner

Date of Review: 07/16/2025

1. Do you have evidence that the right has not been used in the last 5 years and that the presumption of forfeiture would not likely be rebuttable? ☐ Yes ☒ No If "Yes", attach evidence (e.g. dated aerial photo showing pavement or building on the land for >5 yrs.)
2. Is there a history of regulation on the source that serves this (or these) right(s) that has involved the transferred right(s) and downstream water rights? ☐ Yes ☒ No Generally characterize the frequency of any regulation or explain why regulation has not occurred:

Generally ground water rights are not regulated in this area. However, this water right is within Sams Creek drainage in which regulation occurs every year for surface water.
3. Have headgate notices been issued for the source that serves the transferred right(s)?
☐ Yes ☒ No ☐ Records not available.
4. In your estimation, after the proposed change, would distribution of water for the right(s) result in regulation of other water rights that would not have occurred if use under the original right(s) was/were maximized? ☐ Yes ☒ No If "Yes", explain:
5. In your estimation, if the proposed change is approved, are there upstream water rights that would be affected? ☐ Yes ☒ No If "Yes", describe how the rights would be affected and list the rights most affected:

6. Check here ☐ if it appears that downstream water rights benefit from return flows resulting from the current use of the transferred right(s)? If you check the box, generally characterize the locations where the return flows likely occur and list the water rights that benefit most:

☒ N/A

7. For POD changes and instream transfers, check here if there are channel losses between the old and new PODs or within the proposed instream reach? If you check the box, describe and, if possible, estimate the losses:

☒ N/A

8. For instream transfers that propose protection of a reach beyond the mouth of the source stream:

☒ N/A Would the quantity be measureable into the receiving stream consistent with OAR 690-077-0015(8)? ☐ Yes ☐ No

9. For POU changes: ☐ N/A Is it likely the original place of use would continue to receive water from the same source? ☐ Yes ☐ No If "Yes", explain:

10. For POU or USE changes: ☐ N/A In your best judgment, would use of the existing right at "full face value," result in the diversion of more water than can be used beneficially and without waste?

☐ Yes ☒ No If "Yes", explain:

11. For POU changes that involve micro-irrigation: ☒ N/A

- a. Has the applicant made changes (absent a transfer) to convert to micro-irrigation within the current place of use boundary of the water right proposed for transfer, and previously demonstrated to the Department through monitoring and site inspections by the Watermaster that the proposed transfer will not result in injury or enlargement?

☐ Yes ☐ No If "Yes", explain:

- b. Has a temporary transfer of this nature been previously filed and approved on the same lands (or portions thereof) as those lands involved in this transfer?

☐ Yes ☒ No If "Yes", answer the following:

- i. Were there any problems with more acres being irrigated (or wetted) than were authorized under the temporary transfer? ☐ Yes ☐ No If "Yes", explain:
- ii. Did the designated areas that were to remain dry (or not wetted) under the temporary transfer actually remain dry? ☐ Yes ☐ No If "No", explain:
- iii. Did the applicant comply with and meet all of the conditions of the temporary transfer? ☐ Yes ☐ No If "No", explain:
- iv. Do you have any other observations regarding the temporary transfer?
☐ Yes ☐ No If "Yes", describe:
- v. Did the applicant demonstrate to the Department through monitoring and site inspections by the Watermaster that neither injury nor enlargement occurred as a result of the temporary transfer? ☐ Yes ☐ No If "No", explain:

- c. To the best of your knowledge, if this transfer is approved, does it appear that:

- i. "Injury" will occur to other water rights that share the same source?

☐ Yes ☒ No If "Yes", explain:

- ii. "Enlargement" of the water right being transferred will occur?

☐ Yes ☒ No If "Yes", explain:

12. Are there other issues not identified through the above questions that should be considered in determining whether the change "can be effected without injury to other rights"?

☐ Yes ☒ No If "Yes", explain:

13. What alternatives may be available for addressing any issues identified above:

14. Do conditions need to be included in the transfer order to avoid enlargement of the right or injury to other rights? ☐ No ☒ Yes, as checked and provided below:

☐ For POU changes that involve micro-irrigation, provide the monitoring and reporting conditions necessary to prevent injury/enlargement:

☐ A Headgate should be required prior to diverting water.

☒ Measurement Devices for POD or POA: (if this condition is selected, also fill in the top sections of Page 4)

a. Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device, ☒ at each point of diversion/appropriation (new and existing) OR at each new point of diversion/appropriation ☐ with the exception that water rights issued to the Bureau of Reclamation or an irrigation district (or similar entity) are not subject to this condition.*

b. The water user shall maintain the meters or measuring devices in good working order.

c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.

☐ Reservoir water use measurement: (if this condition is selected, also fill in the top sections of Page 4)

a. Before water use may begin under this order, the water user shall install staff gages, or, with prior approval of the Director, other suitable measuring devices, that measure the entire range and stage between empty and full in each reservoir. Staff gages shall be United States Geological Survey style.*

b. Before water use may begin under this order, if the reservoir is located in channel, weirs or other suitable measuring devices must be installed upstream and downstream of the reservoir, and, an adjustable outlet valve must be installed. The water user shall maintain such devices in good working order. A written waiver may be obtained, if in the judgment of the Director, the installation of weirs or other suitable measuring devices, or the adjustable outlet valve, will provide no public benefit.

* The following alternative device(s) should be substituted for the bold, underlined device in the above selected condition:

☐ Weir
☐ Parshall Flume
☐ Other: ____

☐ Submerged Orifice
☐ Flow Restrictor

On June 27, 2025, the Department received your water right Temporary Transfer Application. The application was accompanied by \$954.59.

By copy of this letter, we are asking the Watermaster for a report regarding the potential for injury to existing water rights which may be caused by the requested change.

Except as provided under ORS 540.510(3) for municipalities, you may not **temporarily** use water at the new place of use or from the new point of diversion until a final order approving the temporary transfer application has been issued by the Department. Additionally, pursuant to OAR 690-380-8010, the lands **from** which an irrigation water right is to be temporarily transferred and the land **to** which the right is to be temporarily transferred may not both receive water during the same season. If the temporary transfer is approved during an irrigation season and water has already been used at the currently authorized location during that season, then the temporary transfer will not take effect until the following season.

If the land is sold before the temporary transfer is approved, the buyer's consent to the temporary transfer will be required unless a recorded deed or other legal document clearly established that the water right was not conveyed in the sale.

If you have any questions, please contact the Transfer Section at (503) 986-0935.

Part 2 of 5 – Temporary Transfer Application Map Checklist

OWRD

OWRD

Your temporary transfer application will be returned if any of the map requirements listed below are not met.

Please be sure that the temporary transfer application map you submit includes all the required items and matches the existing water right map. Check all boxes that apply.

- ☐ ☒ N/A If more than three water rights are involved, separate maps are needed for each water right.
- ☒ Permanent quality printed with dark ink on good quality paper.
- ☒ The size of the map can be 8½ x 11 inches, 8½ x 14 inches, 11 x 17 inches, or up to 30 x 30 inches. For 30 x 30 inch maps, one extra copy is required.
- ☒ A north arrow, a legend, and scale.
- ☒ The scale of the map must be: 1 inch = 400 feet, 1 inch = 1,320 feet; the scale of the Final Proof/Claim of Beneficial Use Map (the map used when the permit was certificated); the scale of the county assessor map if the scale is not smaller than 1 inch = 1,320 feet; or a scale that has been pre-approved by the Department.
- ☒ Township, Range, Section, ¼ ¼, DLC, Government Lot, and other recognized public land survey lines.
- ☒ Tax lot boundaries (property lines) are required. Tax lot numbers are recommended.
- ☒ Major physical features including rivers and creeks showing direction of flow, lakes and reservoirs, roads, and railroads.
- ☒ Major water delivery system features from the point(s) of diversion/appropriation such as main pipelines, canals, and ditches.
- ☒ Existing place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions. If less than the entirety of the water right is being changed, a separate hachuring is needed for lands left unchanged.
- ☒ ☐ N/A Proposed temporary place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions.
- ☒ Existing point(s) of diversion or well(s) with distance and bearing or coordinates from a recognized survey corner. This information can be found in your water right certificate or permit.
- ☒ ☐ N/A If you are proposing a change in point(s) of diversion or well(s) to convey water to the new temporary place of use, show the proposed location and label it clearly with distance and bearing or coordinates. If GPS coordinates are used, latitude-longitude coordinates may be expressed as either degrees-minutes-seconds with at least one digit after the decimal (example – 42°32'15.5") or degrees-decimal with five or more digits after the decimal (example – 42.53764°).

FEE WORKSHEET for TEMPORARY DROUGHT TRANSFERS			
1	Base Fee (includes drought application and recording fee for up to 1 cfs)	1	\$200.00
2	Enter the cfs for the portions of the rights to be transferred (see example below*): _____ (2a) Subtract 1.0 from the number in 2a above: _____ (2b) If 2b is 0, enter 0 on line 2 » » » » » » » » » » » » » » » » If 2b is greater than 0, round up to the nearest whole number: _____ (2c) and multiply 2c by \$50, then enter on line 2 » » » » » » » » » » » » » » » »	2	
3	Add entries on lines 1 through 2 above » » » » » » » » » » » » » » » » Transfer Fee:	3	

***Example for Line 2a calculation** to transfer 45.0 acres of Primary Certificate 12345 (total 1.25 cfs for 100 acres) and 45.0 acres of Supplemental Certificate 87654 (1/80 cfs per acre) on the same land:

1. Divide total authorized cfs by total acres in the water right (for C12345, $1.25 \text{ cfs} \div 100 \text{ ac}$); then multiply by the number of acres to be transferred to get the transfer cfs ($\times 45 \text{ ac} = 0.56 \text{ cfs}$).
2. If the water right certificate does not list total cfs, but identifies the allowable use as 1/40 or 1/80 of a cfs per acre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (For C87654, $45.0 \text{ ac} \times 0.0125 \text{ cfs/ac} = 0.56 \text{ cfs}$)
3. Add cfs for the portions of water rights on all the land included in the transfer; however **do not count cfs for supplemental rights on acreage for which you have already calculated the cfs fee for the primary right on the same land**. The fee should be assessed only once for each "on the ground" acre included in the transfer. (In this example, blank 2a would be only 0.56 cfs, since both rights serve the same 45.0 acres. Blank 2b would be 0 and Line 2 would then also become 0).

For Place of Use Changes

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands? ☐ Yes ☒ No

If YES, list the certificate, water use permit, or ground water registration numbers:

Pursuant to ORS 540.523, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for temporary transfer can be included in the transfer or remain unused on the authorized place of use. If the primary water right does not revert soon enough to allow use of the supplemental right within five years, the supplemental right shall become subject to cancellation for nonuse under ORS 540.610.

If a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation is necessary to convey the water to the new temporary place of use you must provide:

- ☐ Well log(s) for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map. (Tip: You may search for well logs on the Department's web page at: http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx)

AND/OR

- ☐ Describe the construction of the authorized and proposed well(s) in Table 3 below for any well that does not have a well log. For a *proposed well(s) not yet constructed or built*, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the Department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.

Note to Local Government Representative:

Please complete this form and return it to the applicant. For new water right applications only, if you are unable to complete this form while the applicant waits, you may complete this receipt and return it to the applicant. If you sign the receipt, you will have 30 days from the date of OWRD's Public Notice of the application to submit the completed Land Use Information Form to Oregon Water Resources Department. Please note while OWRD can accept a signed receipt as part of intake for an application for a new permit to use or store water, a completed Land Use Information Form is required for all other applications.

Use	Notice	Not Met
1) Use: The marijuana production is approved as indicated on the approved plot plan. Any development not represented in this approval may require further review.		
Fire Safety (at Time of Permits)	Notice	Not Met
3) At the time of application for building permits, evidence must be provided to Planning demonstrating the proposed improvement will meet the following Fire Safety Standards as required by JCLDO Section 8.7.1:		
a. Roof Coverings: All structures shall have Class A or B roofing according to Section 1504 of the State of Oregon Structural Specialty Code. This prohibits wood roofing of any type, including pressure treated wood shingle or shakes.		
b. All chimneys for new dwellings, or other significant outbuildings, shall have a spark arrester.		
Fire Safety Inspection		Met
"Prior to issuance of building permits*, the Jackson County Fire Safety Inspector must inspect the property to verify that the Wildfire Safety Standards of Section 8.7.1 are in place. A Fire Safety Inspection must be requested and paid for at Development Services when all requirements have been met. An information sheet with a complete checklist of all requirements is available at Development Service or on-line on the Development Services page under ""Planning Guides.""		
The following is a summary of the requirements that must be in place prior to the inspection request:		
A) A plot plan indicating the proposed structure(s) must be on record in the Planning Department.		
B) The proposed structure(s) must be staked out on the site.		
C) Address signs must be installed at the driveway entrance (visible from both directions) and at all forks in the drive, with directional arrows as needed.		
D) Driveway access to within 150' of all exterior first story walls of all buildings must be constructed to support a gross vehicle weight of 50,000 pounds and an occasional 60,000 pound load to accommodate heavy firefighting equipment. The driveway must terminate in an approved turnaround arrangement that meets the same load carrying capacity. A 22' fuelbreak including the driving surface is required along private accessways, driveways, private roads, and private access easements in accordance with Section 8.7.1(B)(1).		
E) A 100-foot/150-foot fuelbreak must be developed and maintained around all new construction. If the 100-foot/150-foot fuelbreak extends onto an adjoining parcel(s), then either a fuelbreak easement(s) must be recorded and submitted or a fuelbreak reduction application must be approved by the County.		
Warning: No understory vegetation or tree canopy may be removed in order to comply with the fuelbreak requirements of Section 8.7.1(B), which are superseded by the requirements of this Section within the area in which the riparian setback applies.		
Under circumstances where the approved use and or structure is found to be exempt from building permits, the conditions stated above must be met prior to initiating the approved use and/or prior to initiating construction of said structure.		
Plan Approval	Notice	Not Met
5) All plans must be reviewed and approved by planning staff prior to authorization of permits.		

IF ANY INFORMATION RELIED UPON FOR THIS SUMMARY HAS CHANGED, THIS DOCUMENT WILL BE NULL AND VOID.
ALL CHANGES TO THE PROPOSED USE MUST BE APPROVED BY THE PLANNING DIVISION PRIOR TO ISSUANCE OF PERMITS.

RE: Temporary Transfer Application:

The Water Resources Department received your Application for Temporary Water Right Transfer. Unfortunately, we are unable to accept your application because it does not meet the minimum filing requirements outlined in Oregon Administrative Rules Chapter 690, Division 380. Below are the specific reasons your application cannot be accepted at this time. Please read each item carefully:

1. The Department's Land Use Information form was not included with the application. I have included a copy of the form. This form is required under OAR 690-380-3000 and must be submitted to the Department along with the transfer application as outlined below:
 - OAR 690-380-3000(19) Land use information as outlined in the Department's Land Use Planning Procedures Guide, except for those transfers that meet the following four requirements:
 - a. Where existing and proposed water uses would be located entirely within lands zoned for exclusive farm use as provided in ORS 215.203 or within irrigation districts;
 - b. That involve changes in place of use only;
 - c. That do not involve the placement or modification of structures including but not limited to water diversion, impoundment, or distribution facilities, water wells, and well houses; and
 - d. That involve irrigation water uses only.
2. Please also see the attached fee calculator, the fee was slightly off.

Please let me know if you have any questions at 503-979-3129 or arla.l.davis@water.oregon.gov.

Sincerely,

Arla L Davis
