RE: APPLICATION FOR TEMPORARY TRANSFER OF THREE CERTIFICATES (64106, 87605, & 60446)

Dear OWRD Staff,

CwM-H2O, LLC is submitting this temporary water right transfer application on behalf of Martin Farms, Inc. and 3 Rivers Farm, Inc., the Applicants. The transfer proposes a change in the place of use (POU) of portions of three water rights – Certificates 64106, 87605, and 60446 – to four center pivot irrigation circles for a period of five years. This proposed change in POU does not require any structural changes to the existing distribution system, it has no corresponding changes to points of appropriation (POAs), nor are their proposed changes to the character of use. The changes are based on planned crop rotations over the farming operation.

The items included in the application package are as follows:

Application for a Permit to Use Groundwater:

- An application for the Transfer Reimbursement Authority (RA) and check for \$125,
- A \$3,072.50 check for the transfer application fee,
- A signed application form document,
- A stamped temporary transfer map (Attachment 1),
- Completed Evidence of Use Affidavits (Attachment 2),
- Legal descriptions of the "from" lands (Attachment 3),
- Map scale waiver emails from OWRD (Attachment 4),
- Available well logs for relevant POAs (Attachment 5).

The application package included herein has scanned copies of the Applicants' signatures and notarized affidavits. The original signatures will be mailed to OWRD separately following this submittal in case they are required by the Department.

Please let us know if there are any issues with processing this application or any questions about the contents therein.

Sincerely,

CwM H2O, L.L.C.

Part 2 of 4 – Temporary Transfer Application Map Checklist

OWRD

Your temporary transfer application will be returned if any of the map requirements listed below are not met.

Please be sure that the temporary transfer application map you submit includes all the required items and matches the existing water right map. Check all boxes that apply.

- ☐ ☒ N/A If **more than three** water rights are involved, separate maps are needed for each water right.
- ☒ Permanent quality printed with dark ink on good quality paper.
- ☒ The size of the map can be 8½ x 11 inches, 8½ x 14 inches, **11 x 17 inches**, or up to 30 x 30 inches. For 30 x 30 inch maps, one extra copy is required.
- ☒ A north arrow, a legend, and scale.
- ☒ The scale of the map must be: 1 inch = 400 feet, 1 inch = 1,320 feet; the scale of the Final Proof/Claim of Beneficial Use Map (the map used when the permit was certificated); the **scale of the county assessor map** if the scale is not smaller than 1 inch = 1,320 feet; or a scale that has been pre-approved by the Department. Scale waiver → **ATTACHMENT 4**
- ☒ Township, Range, Section, ¼ ¼, DLC, Government Lot, and other recognized public land survey lines.
- ☒ Tax lot boundaries (property lines) are required. Tax lot numbers are recommended.
- ☒ Major physical features including rivers and creeks showing direction of flow, lakes and reservoirs, roads, and railroads.
- ☒ Major water delivery system features from the point(s) of diversion/appropriation such as main pipelines, canals, and ditches.
- ☒ Existing place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions. If less than the entirety of the water right is being changed, a separate hachuring is needed for lands left unchanged.
- ☒ ☐ N/A Proposed temporary place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions.
- ☒ Existing point(s) of diversion or well(s) with distance and bearing or coordinates from a recognized survey corner. This information can be found in your water right certificate or permit. – available well logs are included as **ATTACHMENT 5**
- ☐ ☒ N/A If you are proposing a change in point(s) of diversion or well(s) to convey water to the new temporary place of use, show the proposed location and label it clearly with distance and bearing or coordinates. If GPS coordinates are used, latitude-longitude coordinates may be expressed as either degrees-minutes-seconds with at least one digit after the decimal (example – 42°32'15.5") or degrees-decimal with five or more digits after the decimal (example – 42.53764°).

Explain in your own words what you propose to accomplish with this transfer application and why:

The Applicants wish to temporarily transfer portions of the places of use for three water rights certificates (Cert. 64106, Cert. 87605, and Cert. 60446) to cover areas of four center-pivots with primary water rights for the next five irrigation seasons. The Applicants plan to grow high-value crops in these areas and require temporary movement of these water rights. The distribution system is fully integrated such that each certificate's POA can provide water to the proposed "to" lands.

****A LUCS form is not required for this proposed temporary transfer, as it meets all conditions for a LUCS waiver (POU change only, no structural changes, just irrigation, and all within EFU-zoned land).***

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands? ☒ Yes ☐ No

If YES, list the certificate, water use permit, or ground water registration numbers: G-18144

Pursuant to ORS 540.523, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for temporary transfer can be included in the transfer or remain unused on the authorized place of use. If the primary water right does not revert soon enough to allow use of the supplemental right within five years, the supplemental right shall become subject to cancellation for nonuse under ORS 540.610.

If a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation is necessary to convey the water to the new temporary place of use you must provide:

- ☐ Well log(s) for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map. For Place of Use Changes

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands? ☒ Yes ☐ No

If YES, list the certificate, water use permit, or ground water registration numbers: G-18144

Pursuant to ORS 540.523, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for temporary transfer can be included in the transfer or remain unused on the authorized place of use. If the primary water right does not revert soon enough to allow use of the supplemental right within five years, the supplemental right shall become subject to cancellation for nonuse under ORS 540.610.

If a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation is necessary to convey the water to the new temporary place of use you must provide:

- ☐ Well log(s) for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map. (**Tip:** You may search for well logs on the Department's web page at: http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx)

AND/OR

- ☒ Describe the construction of the authorized and proposed well(s) in Table 3 below for any well that does not have a well log. For a *proposed well(s) not yet constructed or built*, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the Department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.

Klamath Basin/County Drought Transfer Applications

Table 4. Klamath Basin/County Well Information (DROUGHT TRANSFER APPLICATIONS ONLY)

Is there currently a flowmeter installed on each of the POAs listed in Table 1 of this application? ☐ Yes ☐ No*

**Please note that watermaster staff will visit the well to confirm flowmeter presence. Where possible, watermaster staff will take a static water level measurement. Alterations to the well head may be required in order to make the water level measurements.*

For each well, please provide a description of the flowmeter location, the serial number, the current flowmeter reading and the date the reading was taken in the table below.
