REFERENCE: Transfer Application T-10448

Enclosed is a copy of the final order approving your water right transfer application.

The time allowed to complete the transfer is specified in the final order. YOU SHOULD GIVE PARTICULAR ATTENTION TO THE TIME LIMIT. The water right for any portion of the authorized change in character of use or change in place of use NOT carried out within the time allowed will be lost.

An extension of the time limit can be allowed only upon a showing that diligent effort has been made to complete the actual change(s) within the time allowed.

You are required to hire a Certified Water Rights Examiner (CWRE) to complete a Claim of Beneficial Use report and map which must be submitted to this Department within one year of the date you complete the change(s) or within one year of the completion date authorized in the transfer final order, whichever occurs first.

If you have any questions related to the approval of this transfer, you may contact me by telephone at (503) 986-0883 or by e-mail at Sarah.A.Henderson@ wrd.state.or.us.

Twp	Rng	Mer	Sec	Q-Q	Survey Coordinates
14 S	10 E	WM	35	SE NW	1390 FEET SOUTH AND 1790 FEET EAST FROM THE NW CORNER OF SECTION 35

5. Notice of the application for transfer was published on September 4, 2007, pursuant to OAR 690-380-4000. No comments were filed in response to the notice.
6. On May 7, 2009, the Department mailed a copy of the draft Preliminary Determination proposing to approve Transfer Application T-10448 to the applicant. The draft Preliminary Determination cover letter set forth a deadline of June 10, 2009, for the applicant to respond. The applicant requested that the Department proceed with issuance of a Preliminary Determination and provided the necessary information to demonstrate that the applicant is authorized to pursue the transfer, including a notarized affidavit consenting to the proposed transfer from the co-owner (Lori H. Larson) of the property to which water right Certificate 83142 is appurtenant.
7. On August 27, 2009, the Department issued a Preliminary Determination proposing to approve Transfer Application T-10448 and mailed a copy to the applicant. No protests were filed in response to the notice.

Transfer Review Criteria (OAR 690-380-4010)

8. Water has been used within the last five years according to the terms and conditions of the right. There is no information in the record that would demonstrate that the right is subject to forfeiture under ORS 540.610.
9. A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing right were present within the five-year period prior to submittal of Transfer Application T-10448.

10. The proposed change would not result in enlargement of the right.
11. The proposed change would not result in injury to other water rights.

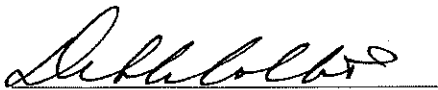

Conclusions of Law

The change in point of appropriation proposed in Transfer Application T-10448 is consistent with the requirements of ORS 537.705 and 540.505 to 540.580 and OAR 690-380-5000.

Now, therefore, it is ORDERED:

1. The change in point of appropriation proposed in Transfer Application T-10448 is approved.
2. The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificate 83142 and any related decree.
3. Water right certificate 83142 is cancelled.
4. The quantity of water diverted at the new point of appropriation shall not exceed the quantity of water lawfully available at the original point of appropriation.
5. The Director may require the water user to install a totalizing flow meter or other suitable measuring devices at each point of appropriation. If the Director notifies the water user to install totalizing flow meters or other measuring devices, the water user shall install such devices specified by the Director within the period allowed in the notice. Once installed, the water user shall maintain the meters or measuring devices in good working order and shall allow the Watermaster access to the meters or measuring devices.
6. Water shall be acquired from the same aquifer (water source) as the original point of appropriation.
7. The approved change shall be completed and full beneficial use of the water shall be made on or before **October 1, 2011**. A Claim of Beneficial Use prepared by a Certified Water Rights Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the change and full beneficial use of the water.
8. When satisfactory proof of the completed change is received, a new certificate confirming the right transferred will be issued.

Dated at Salem, Oregon this 2nd day of October 2009.

Attach each well log available for the well (include the log for the original well and any subsequent alterations, reconstructions, or deepenings)

2. Point of diversion/appropriation source and, if from surface water, the tributary:

POD/POA NAME OR NUMBER	SOURCE	TRIBUTARY
Well	A well within Deschutes basin	NA

3. Developed use(s), period of use, and rate for each use:

POD/POA NAME OR NUMBER	USES	IF IRRIGATION, LIST CROP TYPE	SEASON OR MONTHS WHEN WATER WAS USED	RATE OR VOLUME FOR USE (CFS, GPM, OR AF)
Well	Irrigation	Pasture & landscaping	June through October	0.47 cfs
Total Quantity of Water Used				0.47 cfs

4. Provide a general narrative description of the distribution works. This description must trace the water system from each point of diversion or appropriation to the place of use:

A 7½-hp submersible pump and a 4-inch-diameter mainline are used to divert groundwater from the well to a pond that serves as a bulge in the system. Although not required, there is a flowmeter located near the well that records the amount of water diverted to the bulge as well as to a pond on another property.

A 7½-hp centrifugal pump (Forwarding Pump 1) forwards water from the bulge to the pasture irrigation system via 4-inch-diameter buried mainlines. The irrigation system is reported to have 13 zones with 11 to 13 sprinkler heads per zone. The heads are all reported to be Rainbird Falcon 6504 04MR10 sprinklers (the manufacturer's markings on sprinklers observed on the property were worn and not legible). The locations of the buried mainlines and laterals are unknown because the previous landowner installed the system and did not provide any information to the current owners.

A separate 3-hp centrifugal pump (Forwarding Pump 2) forwards water from the bulge to the landscape irrigation system and to a waterfall feature at the bulge. The irrigation system has 14 zones. The nozzles are all reported to be Hunter sprinklers that deliver about 1½ gpm; the number of nozzles per zone is unknown. There are also some drip nozzles.

Hi Gerry,

On behalf of Tim Larson and Dr. Craig Stephenson, I would like to request a waiver for showing the irrigation mainlines on the Claim maps for T-10448 and T-10449. Mr. Larson and Dr. Stephenson bought their respective properties after the underground irrigation systems were installed and do not have any documentation on the piping layouts.

The pop-up nozzles for portions of the irrigation systems were operating at the time I did the site inspections (September 7 and 8) and it was clear from the pasture conditions that the underground systems are functional.

Thank you for your assistance with this matter.

Regards,
Steve

SUBJECT: Water Right Transfer Application T-10448

Please find enclosed the Preliminary Determination indicating that, based on the information available, the Department intends to approve application T-10448. This document is an intermediate step in the approval process; water may not be used legally as proposed in the transfer application until a Final Order has been issued by the Department.

A public notice is being published in the Department's weekly publication simultaneously with issuance of the Preliminary Determination. The notice initiates a 30-day period in which any person may file either a protest opposing the decision proposed by the Department in the Preliminary Determination or a standing statement supporting the Department's decision.

If no protest is filed, the Department will issue a Final Order consistent with the Preliminary Determination. You should receive a copy of the Final Order about 30 days after the close of the protest period.

If a protest is filed, the application may be referred to a contested case proceeding. A contested case provides an opportunity for the proponents and opponents of the decision proposed in the Preliminary Determination to present information and arguments supporting their position in a quasi-judicial proceeding.

Please do not hesitate to contact me at (503) 986-0890 or Dorothy.I.Pedersen@wrđ.state.or.us if I may be of assistance.

Sincerely,

Dorothy Pedersen

If Transfer Application T-10448 is approved, the final order will include the following:

1. The change in point of appropriation proposed in Transfer Application T-10448 is approved.
2. The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificate 83142 and any related decree.
3. Water right certificate 83142 is cancelled.
4. The quantity of water diverted at the new point of appropriation shall not exceed the quantity of water lawfully available at the original point of appropriation.
5. The Director may require the water user to install a totalizing a flow meter or other suitable measuring devices at each point of appropriation. If the Director notifies the water user to install totalizing flow meters or other measuring devices, the water user shall install such devices specified by the Director within the period allowed in the notice. Once installed, the water user shall maintain the meters or measuring devices in good working order and shall allow the Watermaster access to the meters or measuring devices.
6. Water shall be acquired from the same aquifer (water source) as the original point of appropriation.
7. The approved change shall be completed and full beneficial use of the water shall be made on or before **October 1, 2010**. A Claim of Beneficial Use prepared by a Certified Water Rights Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the change and full beneficial use of the water.
8. When satisfactory proof of the completed change is received, a new certificate confirming the right transferred will be issued.

Dated at Salem, Oregon this 27 day of August 2009.

SUBJECT: Water Right Transfer Application T-10448

On May 7, 2009, a draft of our Preliminary Determination regarding Transfer Application T-10448 was send to you. The document reflects the Department's conclusion that, based on the information currently available, the transfer will be approved. That draft was intended to provide you with an opportunity to comment on our findings and conclusions should you wish to do so. It as that you please review the draft carefully to evaluate whether the document is consistent with your intent in seeking the transfer, and whether you agree with the proposed action.

At that time, it stated you must submit a report of ownership and lien information for the lands to which the water right are appurtenant that has been prepared within the last three months by a title company. You will need to submit a notarized statement of consent from any landowner listed in the report who is not already included in the transfer application. If there are additional lienholders identified in the report that have not previously been notified of the transfer, you must send notice of the transfer to them, and submit copies of each such notice to the Department to document that each lienholder has been informed of the transfer.

As of June 19, 2009, the rules for this report changed to a report of ownership without the lien information for the lands to which the water right is appurtenant.

Issuance of the Preliminary Determination will occur shortly after we receive both your written response and the report of ownership. If we do not receive your response and the report by July 10, 2009, a Preliminary Determination may be issued denying the application as incomplete.

Please do not hesitate to contact me at 541-883-4182 or Vernon.L.Church@wrd.state.or.us if I may be of assistance.

Sincerely,

Vern Church

SUBJECT: Water Right Transfer Application T-10448

Please find enclosed a draft of our Preliminary Determination regarding Transfer Application T-10448. The document reflects the Department's conclusion that, based on the information currently available, the transfer will be approved. This draft is intended to provide you with an opportunity to comment on our findings and conclusions should you wish to do so. Please review the draft carefully to evaluate whether the document is consistent with your intent in seeking the transfer, and whether you agree with the proposed action.

At this time, you must submit a report of ownership and lien information for the lands to which the water right are appurtenant that has been prepared within the last three months by a title company. You will need to submit a notarized statement of consent from any landowner listed in the report who is not already included in the transfer application. If there are additional lienholders identified in the report that have not previously been notified of the transfer, you must send notice of the transfer to them, and submit copies of each such notice to the Department to document that each lienholder has been informed of the transfer.

Issuance of the Preliminary Determination will occur shortly after we receive both your written response and the report of ownership and lien information. If we do not receive your response and the report by June 10, 2009, a Preliminary Determination may be issued denying the application as incomplete.

Please do not hesitate to contact me at 541-883-4182 or Vernon.L.Church@wr.d.state.or.us if I may be of assistance.

Sincerely,

Vern Church

Authority

ORS 537.705 and 540.505 to 540.580 establish the process in which a water right holder may submit a request to transfer the point of appropriation, place of use, or character of use authorized under an existing water right. OAR Chapter 690, Division 380 implements the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

Applicant

TIMOTHY P. LARSON

Findings of Fact

Background

1. On August 27, 2007, STEVE KEETON filed an application to change the point of appropriation under Certificate(s) 83142. The Department assigned the application number T-10448.
2. On June 27, 2008, a request for assignment form was submitted to change the applicant to Timothy P. Larson.

3. The right to be transferred is as follows:

Certificate: 83142 in the name of STEVE KEETON (perfected under Permit G-10624)
Use: IRRIGATION of 10.56 ACRES
Priority Date: JANUARY 16, 1985
Rate: 0.13 CUBIC FOOT PER SECOND
Limit/Duty: The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second, or its equivalent for each acre irrigated, and shall be further limited to a diversion of not to exceed 3

acre-feet per acre for each acre irrigated during the irrigation season of each year.

Authorized Point of Appropriation:

Twp	Rng	Mer	Sec	Q-Q	Survey Coordinates

14 S	10 E	WM	35	NE NW	10.18
14 S	10 E	WM	35	SE NW	0.38

1. Transfer Application T-10448 proposes to move the authorized point of appropriation approximately 18 feet South and 344 feet East from the existing point of appropriation to:

Twp	Rng	Mer	Sec	Q-Q	Survey Coordinates
14 S	10 E	WM	35	SE NW	1390 FEET SOUTH AND 1790 FEET EAST FROM THE NORTH WEST CORNER OF SECTION 35

2. Notice of the application for transfer was published on September 4, 2007, pursuant to OAR 690-380-4000. No comments were filed in response to the notice.

Transfer Review Criteria (OAR 690-380-4010)

3. Water has been used within the last five years according to the terms and conditions of the right. There is no information in the record that would demonstrate that the right is subject to forfeiture under ORS 540.610.
4. A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing right(s) were present within the five-year period prior to submittal of Transfer Application T-10448.
5. The proposed change would not result in enlargement of the right(s).
6. The proposed change would not result in injury to other water rights.

Determination and Proposed Action

The change in point of appropriation proposed in Transfer Application T-10448 appears to be consistent with the requirements of ORS 537.705 and 540.505 to 540.580 and OAR 690-380-5000. If protests are not filed pursuant to OAR 690-380-4030, the application will be approved.

If application T-10448 is approved, the final order will include the following:

7. *The change in point of appropriation proposed in application T-10448 are approved.*
8. *The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificate 83142 and any related decree.*
9. *Water right certificate 83142 is cancelled.*
10. *The quantity of water diverted at the new point of appropriation, shall not exceed the quantity of water lawfully available at the original point of appropriation.*
11. *The Director may require the water user to install a totalizing a flow meter or other suitable measuring devices at each point of appropriation. If the Director notifies the water user to install totalizing flow meters or other measuring devices, the water user shall install such devices specified by the Director within the period allowed in the notice. Once installed, the water user shall maintain the meters or measuring devices in good working order and shall allow the Watermaster access to the meters or measuring devices.*
12. *Water shall be acquired from the same aquifer (water source) as the original point of appropriation.*
13. *The well shall be maintained in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon..*
14. *The approved change(s) shall be completed and full beneficial use of the water shall be made on or before **October 1, 2010**. A Claim of Beneficial Use prepared by a Certified Water Rights Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the change(s) and full beneficial use of the water.*
15. *When satisfactory proof of the completed change is received, a new certificate confirming the right transferred will be issued.*

On August 27, 2007 we received your water right transfer application. The application was accompanied by \$350.00. Our receipt 89376 is enclosed.

By copy of this letter, we are asking the Watermaster for a report regarding the potential for injury to existing water rights which may be caused by the change.

Your application will be examined to determine if additional information is needed. You will be contacted following this examination. A number of other transfer applications are also awaiting review. As a result, it may be some time before we are able to process your application. If you wish to have your application processed more quickly, you may want to consider use of the Department's reimbursement authority. Under this authority an applicant may receive expedited review by paying the full cost for a pre-qualified contractor to process the applications. For more information on the Reimbursement Authority program, see our website at http://www.wrd.state.or.us/OWRD/mgmt_reimbursement.shtml or call the transfer section.

Except as provided under ORS 540.510(3) for municipalities, you may not use water for the new use, in the new place of use or from the new point of diversion until the transfer application has been approved. In order to avoid any possible forfeiture of the water right, you should continue to use the water as described by your existing water right. If the land is sold before the transfer is approved, the buyer's consent to the transfer will be required unless a recorded deed or other legal document clearly established that the water right was not conveyed in the sale.

We will notify you if additional information or corrections to the application or map are required.

If you have any questions, please call the Transfer Section, (503)986-0883.
