Authority

ORS 540.524 establishes the process in which a water right holder may submit a request to substitute a supplemental water right from a ground water source for a primary water right from a surface water source. OAR Chapter 690, Division 380 implements the statutes and provides the Department's procedures and criteria for evaluating an application for a water right substitution.

Findings of Fact

Background

1. On August 20, 2007, Terry Anderson on behalf of ANDERSON LAND AND LIVESTOCK, INC. filed an application to substitute a portion of a supplemental ground water permit under Permit G-13106 for a portion of a primary right to use surface water under Certificate 63285. The Department assigned the application number T-10453.
2. On October 10, 2007, the Department received an amended map that identified the authorized point of diversion under Certificate 63285 and the points of appropriation under Permit G-13106.
3. The supplemental ground water permit to be substituted for the primary surface water right is as follows:

Permit: G-13106 in the name of ANDERSON LAND AND LIVESTOCK, INC. (submitted as application G-13610)

Use: SUPPLEMENTAL IRRIGATION of 25.4 ACRES

Priority Date: FEBRUARY 1, 1994

NOTICE OF RIGHT TO PETITION FOR RECONSIDERATION OR JUDICIAL REVIEW

This is an order in other than a contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60 day time period specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-0080, you may either petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

4. The transfer application map submitted with T-10453 describes the location of the points of appropriation differently than authorized in the permit. This order may not be construed as a confirmation of a change in location of the point of appropriation.

5. The portion of the primary surface water right to be used as a supplemental right under the substitution with Permit G-13106 is as follows:

Certificate: 63285 in the name of ANDERSON LAND AND LIVESTOCK (perfected under Permit S-42032)

6. Notice of the application for transfer was published on September 18, 2007, pursuant to OAR 690-380-4000. No comments were filed in response to the notice.

Transfer Review Criteria (OAR 690-380-4010)

7. Water has been used within the last five years according to the terms and conditions of the right and permit, and there is no information in the record that would demonstrate that the right or permit are subject to forfeiture under ORS 540.610.
8. A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing right and permit were present within the five-year period prior to submittal of Transfer Application T-10453.
9. The proposed change would not result in enlargement of the right or permit.
10. The proposed change would not result in injury to other water right or permit.

Conclusions of Law

The substitution of ground water Permit G-13106 for a portion of the primary surface water right evidenced by Certificate 63285 as proposed in Transfer Application T-10453 is consistent with the requirements of ORS 540.524 and OAR 690-380-5000.

Now, therefore, it is ORDERED:

1. The substitution of ground water Permit G-13106 for a portion of primary surface water right (Certificate 63285) is approved.
2. The portion of the supplemental ground water (Permit G-13610) described in Finding of Fact #3 may be substituted for the portion of the primary right (Certificate 63285) described in Finding of Fact #4 which may in turn be exercised as supplemental irrigation on the lands therein described.
3. The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificate 63285 and Permit G-13106 and any related decree.
4. The water user shall maintain and operate the existing measurement device and shall make such improvements as may be required by the Department.

5. The substitution of a supplemental ground water permit for a primary water right may be terminated upon a request by the water right holder. The substitution also may be terminated by an order of the Director if the Department determines the use of the ground water as the primary water right causes injury to other water rights. Upon termination, the substituted primary and supplemental water right or permit shall revert to their original status.

Dated at Salem, Oregon this 14th day of November, 2007.

- (b) A copy of written notification of the proposed transfer provided by the applicant to all lien holders on the subject lands unless the report of ownership and lien information shows that a water right conveyance agreement has been recorded for the subject lands. *If a water right conveyance agreement has been recorded for the subject lands, a copy of the agreement and identification of the owner of the lands at the time the agreement was recorded must be submitted; and*
- (c) If the landowner identified in the report of ownership and lien information is not the applicant, a **notarized statement consenting to the transfer** (*attached*) signed by the landowner identified in the report or an authorized representative of the entity to whom the interest in the water right has been conveyed as identified in a water right conveyance agreement or other documentation demonstrating that the applicant is authorized to pursue the transfer in the absence of the consent of the landowner.

I (we) affirm that the applicant is a municipality, as defined in ORS 540.510(3)(b), and that the right is in the name of the municipality or a predecessor. Therefore, pursuant to OAR 690-380-3000(13)(b), the applicant is NOT required to provide the above described report of ownership and lien information.

I (we) affirm that the applicant is an entity with the authority to condemn property and is acquiring the property to which the water right proposed for transfer is appurtenant by condemnation. Documentation is provided with this application supporting this statement. Therefore, pursuant to OAR 690-380-3000(13)(c), the applicant is NOT required to provide the above described report of ownership and lien information. (*NOTE: Such an entity may only apply for a transfer under this subsection if it has filed a condemnation action to acquire the property.*)

▪ I (we) affirm that the information contained in this application is true and accurate.

CERTIFICATE OF WATER RIGHT

THIS CERTIFICATE ISSUED TO
ANDERSON LAND AND LIVESTOCK
43 S.E. THIRD STREET
PENDLETON, OREGON 97801

confirms the right to use the waters of MCKAY CREEK, NORTH FORK MCKAY CREEK AND SOUTH FORK MCKAY CREEK, a tributary of UMATILLA RIVER, for the purpose of IRRIGATING 64.1 ACRES.

The right has been perfected under Permit 42032. The date of priority is AUGUST 5, 1977. The right is limited to not more than 0.81 CUBIC FOOT PER SECOND; BEING 0.48 CFS FROM MCKAY CREEK, 0.01 CFS FROM NORTH FORK MCKAY CREEK, AND 0.32 CFS FROM SOUTH FORK MCKAY CREEK, or its equivalent in case of rotation, measured at the point of diversion from the source.

The points of diversion are located as follows:

NW 1/4 SW 1/4, SECTION 4, T 1 S, R 33 E, W.M.; NW 1/4 NW 1/4, SECTION 6, NW 1/4 SW 1/4, SECTION 7, T 1 S, R 34 E, W.M.; MCKAY CREEK - 1950 FEET NORTH AND 1350 FEET WEST FROM THE SOUTH 1/4 CORNER OF SECTION 4; NORTH FORK - 450 FEET SOUTH AND 600 FEET EAST FROM THE NW CORNER OF SECTION 6; SOUTH FORK - 1740 FEET NORTH AND 20 FEET EAST FROM THE SW CORNER OF SECTION 7.

The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, shall be limited to ONE-EIGHTIETH of one cubic foot per second per acre, or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 3.0 acre-feet per acre for each acre irrigated during the irrigation season of each year.

The right shall conform to such reasonable rotation system as may be ordered by the proper state officer.

A description of the place of use under the right, and to which such right is appurtenant, is as follows:

SECTION 7		
TOWNSHIP 1 SOUTH, RANGE 34 EAST, W.M.		

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order.
- B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.
- C. The Director may require the permittee to keep and maintain a record of the amount (volume) of water used and may require the permittee to report water use on a periodic schedule as established by the Director. In addition, the Director may require the permittee to report general water use information, the periods of water use and the place and nature of use of water under the permit. The Director may provide an opportunity for the permittee to submit alternative reporting procedures for review and approval.

If substantial interference with a senior water right occurs due to withdrawal of water from any well listed on this permit, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interferences.

To monitor the effect of water use from the well(s) authorized under this permit, the Department requires the water user to make and report annual static water level measurements. The static water level shall be measured in the month of March. Reports shall be submitted to the Department within 30 days of measurement.

Measurements must be made according to the following schedule:

Before Use of Water Takes Place
Initial and Annual Measurements

The Department requires the permittee to submit an initial water level measurement in the month specified above once well construction is complete and annually thereafter until use of water begins; and

After Use of Water has Begun**Seven Consecutive Annual Measurements**

Following the first year of water use, the user shall submit seven consecutive annual reports of static water level measurements. The first of these seven annual measurements will establish the reference level against which future annual measurements will be compared. Based on an analysis of the data collected, the Director may require that the user obtain and report additional annual static water level measurements beyond the seven year minimum reporting period. The additional measurements may be required in a different month. If the measurement requirement is stopped, the Director may restart it at any time.

All measurements shall be made by a certified water rights examiner, registered professional geologist, registered professional engineer, licensed well constructor or pump installer licensed by the Construction Contractors Board and be submitted to the Department on forms provided by the Department. The Department requires the individual performing the measurement to:

- (A) Identify each well with its associated measurement; and
- (B) Measure and report water levels to the nearest tenth of a foot as depth-to-water below ground surface; and
- (C) Specify the method used to obtain each well measurement; and
- (D) Certify the accuracy of all measurements and calculations submitted to the Department.

The water user shall discontinue use of, or reduce the rate or volume of withdrawal from, the well(s) if annual water level measurements reveal any of the following events:

- (A) An average water level decline of three or more feet per year for five consecutive years; or
- (B) A water level decline of 15 or more feet in fewer than five consecutive years; or
- (C) A water level decline of 25 or more feet; or
- (D) Hydraulic interference leading to a decline of 25 or more feet in any neighboring well with senior priority.

The period of non or restricted use shall continue until the annual water level rises above the decline level which triggered the action or until the Department determines, based on the permittee's and/or the Department's data and analysis, that no action is necessary because the aquifer in question can sustain the observed declines without adversely impacting the resource or senior water rights. The water user shall in no instance allow excessive decline, as defined in Commission rules, to occur within the aquifer as a result of use under this permit. If more than one well is involved, the water user may submit an alternative measurement and reporting plan for review and approval by the Department.

This right is limited to any deficiency in the available supply of any prior right existing for the same land.

STANDARD CONDITIONS

The wells shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine water level elevation in the well at all times.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

Prior to receiving a certificate of water right, the permit holder shall submit the results of a pump test meeting the department's standards, to the Water Resources Department. The Director may require water level or pump test results every ten years thereafter.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

The Director finds that the proposed use(s) of water described by this permit, as conditioned, will not impair or be detrimental to the public interest.

Actual construction of the well shall begin within one year from permit issuance, and shall be completed on or before October 1, 1999. Complete application of the water to the use shall be made on or before October 1, 2000.

Watermaster Review Form: Water Right Transfer

Transfer Application: T-10453

Review Due Date: 10-17-2007

Applicant Name: Anderson Land and Livestock

Proposed Changes: POU POD POA USE OTHER

Reviewer(s): Tony Justus

Date of Review: Oct. 8, 2007

1. Do you have information suggesting that the water rights may be subject to forfeiture?
 Yes No If "Yes", describe the information and indicate if you intend to file a cancellation affidavit or if you need additional time to determine if a cancellation affidavit should be filed: _____
2. Is there a history of regulation on the source that serves the right proposed for transfer that has involved the right and downstream water rights? Yes No Generally characterize the frequency of any regulation or explain why regulation has not occurred:
Regulation of McKay Creek occurs annually for those rights below McKay Reservoir. Generally, regulation of rights above McKay Reservoir would not benefit the users below McKay Reservoir on McKay Creek. We had a request for regulation in 2007 and it was determined to be a futile call due to several miles of dry stream bed.
3. Check here if it appears that downstream water rights benefit from return flows resulting from the current use of the right? If you check the box, generally characterize the locations where the return flows likely occur and list the water rights that benefit most:
Return flow would return to the creek in the area of the fields due to there close proximity to the stream.
4. Are there upstream water rights that would be affected by the proposed change?
 Yes No If "Yes", describe how the rights would be affected and list the rights most affected: _____
5. For POD changes and instream transfers, check here if there are channel losses between the old and new PODs or within the proposed instream reach? If you check the box, describe and, if possible, estimate the losses: _____
6. Would distribution of water for the right after the proposed change result in regulation of other water rights that would not have occurred if use of the existing right was maximized?
 Yes No If "Yes", explain: _____
7. For POU changes, would the original place of use continue to receive water from the same source? Yes No N/A If "Yes", explain: This is a substitution not a change in POU. The lands would continue to receive water from a well source.

8. For POU or USE changes, would use of the existing right at "full face value," result in the diversion of more water than can be used beneficially and without waste? Yes No
 If "Yes", explain: _____
9. Are there other issues not identified through the above questions? Yes No If "Yes", explain: Would the change result in affects (injury) to users of the groundwater source.
10. What alternatives may be available for addressing any issues identified above: The priority date of the primary right from McKay Creek is 1977. If we were to regulate this part of the Creek by priority, this right would be regulated off early in the year. I would not expect the season allowed on the well and therefore the use, if the substitution were allowed, would change significantly from what would be allowed if we regulated the creek surface water rights by priority.
11. Have headgate notices been issued for the source that serves the right? Yes No
12. What water control and measurement conditions should be included in the transfer:

Measurement Devices	<input checked="" type="checkbox"/> Present and should be maintained.	<input type="checkbox"/> Should be required prior to diverting water.	<input type="checkbox"/> May be required in the future.
Headgates	<input type="checkbox"/> Present and should be maintained.	<input type="checkbox"/> Should be required prior to diverting water.	<input type="checkbox"/> May be required in the future.

Susan, I put your question to Terry Anderson's consultant. His answer is below. Looks like the map has the accurate locations, not the permit.

Let me know if you need more clarification or have other concerns/questions.

All of the wells are developed near the areas described in the Permit and the descriptions on the map are the actual locations that the wells were developed.

Hello,

The amended map's point of appropriation coordinates do not match the survey coordinates on the permit. For example, well 3 is listed on the permit as 430' North and 1120' east from the sw corner of section 7. The amended map lists this same well as 190 feet north and 950 feet east from the sw corner of section 7. Well 1 also has differing coordinates. Well 2 - I can understand the n/s directional change but the distance east is off. Were these wells developed at a location other than what's on the permit?

REFERENCE: Transfer Application T-10453

We are examining your water right transfer application. There are some problems that need to be resolved before we can continue processing your application.

1. The map submitted with the application lacks an original Certified Water Rights Examiner's (CWRE) signature. Please refer to Oregon Administrative Rules 690-380-3100(2)(b).
2. The map also lacks identification of one of the authorized points of appropriation listed on Page 3 of Supplemental Form A. More specifically, this point of appropriation is described on the permit as Well #2, 2640' South and 660' East from the NW corner of Section 7. Please have the cartographer add this point.

Please submit a revised map that contains an original CWRE signature and displays the location of the point of appropriation noted in #2 above **by October 26, 2007**, to Susan Douthit, Water Resources Department, 725 Summer St. NE, Suite A, Salem, OR 97301-1271. If you have any questions, please call me at 503-986-0858.

Reference: Water Right Substitution T- 10453

On September 5, 2007, we received your application requesting approval of the substitution of a ground water supplemental right for the primary right for the use of water from NORTH FORK MCKAY CREEK, tributary to MCKAY CREEK. The fees for this application were deducted from the Oregon Water Trust customer account.

By copy of this letter, we are asking the Watermaster for his report regarding the potential for injury to existing water rights which may be caused by the change.

Your application will be examined to determine if additional information is needed. You will be contacted following this examination.

We will notify you if additional information or corrections to the application or map are required.

If you have any questions, please call the Transfer Section, (503)986-0900.

The holder of a water right may apply to permanently change an existing water use subject to transfer. A transfer application may involve any of the following changes: Point of diversion or appropriation (POD; POA); Additional point of diversion or appropriation (APOD; APOA); Historic POD (HIST); Place of use (POU); Character of use (USE); Instream (ISWR); Substitution (SUB); or Exchange (EXCH).

The holder of a water right subject to transfer may request to temporarily change the place of use of the water for up to 5 years and, if necessary to convey the water, to temporarily change the point of diversion or appropriation.

The holder of a water right permit may apply to change a point of diversion (POD) or appropriation (POA) or to change the place of use (POU).

Any person who provides comments within the comment period will receive a copy of the Department's preliminary determination of whether the application should be approved or rejected after the Department has completed a review of the application and will be provided an opportunity to protest the application and preliminary determination at that time. Comments should be sent to the Transfers Section at the Department's Salem office.

10. SIGNATURES

▪ Check one of the following, as appropriate, and sign the application in the signature box below:

In accordance with OAR 690-380-3000(13)(a), I (we) understand that prior to Department approval of a permanent transfer and upon my receipt of a draft Preliminary Determination for the proposed transfer, I (we) will be required [pursuant to OAR 690-380-4010(5)] to provide the following landownership information and evidence demonstrating that I (we) are authorized to pursue the transfer:

- (a) A report of ownership and lien information that has been prepared by a title company *within the last three months*;
- (b) A copy of written notification of the proposed transfer provided by the applicant to all lien holders on the subject lands unless the report of ownership and lien information shows that a water right conveyance agreement has been recorded for the subject lands. *If a water right conveyance agreement has been recorded for the subject lands, a copy of the agreement and identification of the owner of the lands at the time the agreement was recorded must be submitted; and*
- (c) If the landowner identified in the report of ownership and lien information is not the applicant, a **notarized statement consenting to the transfer** (*attached*) signed by the landowner identified in the report or an authorized representative of the entity to whom the interest in the water right has been conveyed as identified in a water right conveyance agreement or other documentation demonstrating that the applicant is authorized to pursue the transfer in the absence of the consent of the landowner.

I (we) affirm that the applicant is a municipality, as defined in ORS 540.510(3)(b), and that the right is in the name of the municipality or a predecessor. Therefore, pursuant to OAR 690-380-3000(13)(b), the applicant is **NOT** required to provide the above described report of ownership and lien information.

I (we) affirm that the applicant is an entity with the authority to condemn property and is acquiring the property to which the water right proposed for transfer is appurtenant by condemnation. Documentation is provided with this application supporting this statement. Therefore, pursuant to OAR 690-380-3000(13)(c), the applicant is **NOT** required to provide the above described report of ownership and lien information. (*NOTE: Such an entity may only apply for a transfer under this subsection if it has filed a condemnation action to acquire the property.*)

▪ I (we) affirm that the information contained in this application is true and accurate.
