Enclosed is a copy of the final order approving your water right transfer application.

The time allowed to complete the transfer is specified in the final order. YOU SHOULD GIVE PARTICULAR ATTENTION TO THE TIME LIMIT. The water right for any portion of the authorized change in character of use or change in place of use NOT carried out within the time allowed will be lost.

An extension of the time limit can be allowed only upon a showing that diligent effort has been made to complete the actual change(s) within the time allowed.

You are required to hire a Certified Water Rights Examiner (CWRE) to complete a Claim of Beneficial Use report and map which must be submitted to this Department within one year of the date you complete the change(s) or within one year of the completion date authorized in the transfer final order, whichever occurs first.

If you have any questions related to the approval of this transfer, you may contact your caseworker, Kim French, by telephone at (503) 979-9607 or by e-mail at Kim.r.french@water.oregon.gov.

17. The proposed changes, as conditioned, would not result in enlargement of the rights.
18. The proposed changes, as conditioned, would not result in injury to other existing water rights.
19. All other application requirements are met.

Conclusions of Law

The change in points of appropriation, additional points of appropriation, and change in places of use proposed in Transfer Application T-13951 are consistent with the requirements of ORS 537.705 and 540.505 to 540.580 and OAR 690-380-5000.

Now, therefore, it is ORDERED:

1. The change in points of appropriation, additional points of appropriation, and change in places of use proposed in Transfer Application T-13951 are approved.
2. The rights to the use of the water is restricted to beneficial use at the places of use described and are subject to all other conditions and limitations contained in Certificates 75897, 75912 and 94178 and any related decree.
3. Approval of this transfer application does not constitute nor grant legal access onto or through another person's property for purposes of accessing the new points of appropriation or the new places of use.
2. Water right Certificates 75897, 75912; and to change the place of use under Certificate and 94178 are cancelled. A new certificate will be issued describing that portion of Certificate 94178 not affected by this transfer.
3. For Certificate 75897, the quantity of water diverted at the new additional point of appropriation (Well #3), together with that diverted at the original point of appropriation (Well #1), shall not exceed the quantity of water lawfully available at the original point of appropriation (Well #1).
4. For Certificate 75912, the quantity of water diverted at the new point of appropriation for 6.36 acres (Well #2) shall not exceed the quantity of water lawfully available at the original point of appropriation (Well #1).
5. For Certificate 75912, the quantity of water diverted at the additional point of appropriation for 3.26 acres (Well #3), together with that diverted at the original point of appropriation (Well #1), shall not exceed the quantity of water lawfully available at the original point of appropriation (Well #1).

6. Water shall be acquired from the same aquifer (water source) as the original points of appropriation.
7. The former places of use of the transferred rights shall no longer receive water under the rights.
8. Water Use Measurement Conditions:
 - a. Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device, at each point of appropriation (new and existing).
 - b. The water user shall maintain the meters or measuring devices in good working order.
 - c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.
9. Full beneficial use of the water shall be made, consistent with the terms of this order, on or before **October 1, 2026**. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the changes and full beneficial use of the water.
10. After satisfactory proof of beneficial use is received, new certificates confirming the rights transferred will be issued.

SUBJECT: Water Right Transfer Application T-13951

Please find enclosed the Preliminary Determination indicating that, based on the information available, the Department intends to approve application T-13951. This document is an intermediate step in the approval process; water may not be used legally as proposed in the transfer application until a Final Order has been issued by the Department. Please read this entire letter carefully to determine your responsibility for additional action.

A public notice is being published in the Department's weekly publication, simultaneously with issuance of the Preliminary Determination. The notice initiates a period in which any person may file either a protest opposing the decision proposed by the Department in the Preliminary Determination or a standing statement supporting the Department's decision. The protest period will end 30 days after the Department's notice.

If no protest is filed, the Department will issue a Final Order consistent with the Preliminary Determination. You should receive a copy of the Final Order about 30 days after the close of the protest period.

If a protest is filed, the application may be referred to a contested case proceeding. A contested case provides an opportunity for the proponents and opponents of the decision proposed in the Preliminary Determination to present information and arguments supporting their position in a quasi-judicial proceeding.

Please don't hesitate to contact me at 503 979-9607 or Kim.R.French@water.oregon.gov, if I may be of assistance.

Oregon Water Resources Department

This Preliminary Determination was prepared by Kim French. If you have questions about the information in this document, you may reach me at 503-979-9607 or Kim.R.French@water.oregon.gov.

Protests

Under the provisions of ORS 540.520(6) & (7) and OAR 690-380-4030, within 30 days after the last date of publication of the newspaper notice or the Department's weekly notice as prescribed by OAR 690-380-4020, whichever is later, any person may file, jointly or severally, a protest expressing opposition of approval of the transfer application and disagreement with this Preliminary Determination or a standing statement in support of this Preliminary Determination. If this Preliminary Determination determines that a change in point of diversion or appropriation would result in injury, the applicant may file a notification of intent to pursue approval of the transfer under OAR 690-380-5030 to 690-380-5050. Protests and standing statements must be received by the Water Resources Department within 30 days after the last date of publication of the newspaper notice or the Department's weekly notice as prescribed by OAR 690-380-4020, whichever is later.

Protests must be in writing and received in hard copy form with the appropriate statutory protest filing fee; protests cannot be filed by electronic mail. [OAR 690-002-0025(3) and 690-380-0100(9)]. The protest must include the following:

- The person's name, address, and telephone number;
- All reasonably ascertainable issues and all reasonably available arguments supporting the person's position by the close of the protest period. Failure to raise a reasonably ascertainable issue in a protest or failure to provide sufficient specificity to afford the Department an opportunity to respond to the issue may preclude consideration of the issue during the hearing;
- If you are the applicant, a protest fee of \$480 required by ORS 536.050; and
- If you are not the applicant, a protest fee of \$950 required by ORS 536.050 and proof of service of the protest upon the applicant.

Requests for Standing

Under the provisions of OAR 690-380-4030(5), the Department shall provide to persons who have filed standing statements as defined under OAR 690-380-0100(11) notice of any differences between the Department's Preliminary Determination and the Final Order, notice of a hearing on the application under OAR 137-003-0535, and an opportunity to request limited party status or party status in the hearing.

Requests for standing must be received in the Water Resources Department no later than 30 days after the last date of publication of the newspaper notice or the Department's weekly notice as prescribed by OAR 690-380-4020, whichever is later. Requests for standing must be in writing, and must include the following:

- The requester's name, mailing address and telephone number;
- If the requester is representing a group, association or other organization, the name, address and telephone number of the represented group;
- A statement that the requester supports the preliminary determination as issued.

After the protest period has ended, the Director will either issue a Final Order or schedule a contested case hearing. The contested case hearing will be scheduled only if a protest has been filed under OAR 690-380-4030. In accordance with OAR 690-380-4200, notice and conduct of the hearing shall:

- Be under the applicable provisions of ORS 183.310 to 183.550, pertaining to contested cases, and the hearing shall be held in the area where the rights are located unless all parties stipulate otherwise; and
- If a protest has asserted that a water right to be transferred has been forfeited through non-use, include the notice and procedures described in OAR 690-017-0500 to 690-017-0900.

If after hearing the Department issues a proposed Final Order finding that a change in point of diversion or appropriation will result in injury, the applicant may file a notification of intent to pursue approval of the transfer under OAR 690-380-5030 to 690-380-5050 within 15 days of receipt of the proposed order. Notwithstanding 690-002-0175, if the applicant files a notification of intent to pursue approval of the transfer under 690-380-5030 to 690-380-5050, the deadline for filing exceptions to the proposed order shall be 30 days after the Department provides notice to the parties that the transfer does not meet the requirements of 690-380-5030 to 690-380-5050.

If you do not request a hearing within 30 days after the close of the protest period, or if you withdraw a request for a hearing, notify the Department or the administrative law judge that you will not appear, or fail to appear at a scheduled hearing, the Director may issue a final order by default. If the Director issues a Final Order by default, the Department designates the relevant portions of its files on this matter, including all materials that you have submitted relating to this matter, as the record for purpose of proving a *prima facie* case upon default.

You may be represented by an attorney at the hearing. Legal aid organizations may be able to assist a party with limited financial resources. Generally, partnerships, corporations, associations, governmental subdivisions, or public or private organizations are represented by an attorney. However, consistent with OAR 690-002-0020 and OAR 690-137-0555, an agency representative may represent partnerships, corporations, associations, governmental subdivisions or public, or private organizations if the Department determines that appearance of a person by an authorized representative will not hinder the orderly and timely development of the record in this case.

Reference: Water Right Transfer Application T-13951

Your water right transfer is in the first of three phases of processing. Enclosed is a draft of the Department's Preliminary Determination regarding Transfer Application T-13951. The document reflects the Department's conclusion that, based on the information currently available, the transfer will be approved. Your response and submittal of the items outlined below are required by September 12, 2024.

Required items needing your immediate attention:

1. Please carefully review the Draft Preliminary Determination to verify that it accurately reflects the changes you intend to make and to become familiar with the proposed conditions.
2. **Respond in writing** by SEPTEMBER 12, 2024, with acknowledgement that you agree to the proposed action and conditions.
3. If you find any errors, please let me know.
4. **REQUIRED:** You must submit a **Report of Ownership** for the lands where the water rights are currently located (i.e., the FROM lands). This report:
 - a) Must be prepared by a title company;
 - b) Shall include a "prepared by" statement and the date the title company prepared the report printed on the cover sheet;
 - c) Must:
 - i. Be prepared no earlier than 3 months prior to the date of issuance of the Draft Preliminary Determination showing current ownership; **OR**
 - ii. Be prepared within 3 months of the date the water right conveyance agreement was recorded; **OR**
 - iii. Show ownership for the FROM land at the time a water right conveyance agreement was recorded.

If water right conveyance agreements are involved, it is helpful to provide copies of those agreements along with the Report of Ownership.

IMPORTANT: In order for the Department to clearly understand the date that the title company prepared the Report of Ownership, the title company must indicate/state the date that they prepared the report on the coversheet and/or first page of the report.

- d) Must include a list of owners at the time the report was generated; **AND**
 - e) Must include a legal description of the property where the water right to be transferred is currently located (i.e., the FROM lands).
5. You must provide a notarized statement of consent signed by any landowner listed in the Report of Ownership who is not already included in the transfer application. The Department's statement of consent form (**Consent By Deeded Landowner**) is available at: [https://www.oregon.gov/OWRD/WRDFormsPDF/consent to transfer form.pdf](https://www.oregon.gov/OWRD/WRDFormsPDF/consent%20to%20transfer%20form.pdf)

Conditions of your water right...

The Watermaster has required water measurement devices at the new diversion point prior to diversion of water. Enclosed is a contact information sheet to assist you in pursuing additional information or approval of the required (or alternate) devices.

Please note the proposed date by which all conditions must be met: October 1, 2025. If the required completion date is insufficient to comply with any of the conditions, you may request more time, at no cost to you, during this stage of processing. **Please let me know by the comment deadline if you will need more time and explain the reasons why.**

What happens next...

Once the preliminary determination is issued a publication period is required. The Department will publish a notice in their weekly publication, which opens a 30-day period in which the transfer can be protested.

Issuance of the Preliminary Determination will occur shortly after we receive:

1. Your written response to the conditions and proposed action in the Draft Preliminary Determination (e-mail is acceptable); and
2. The Report of Ownership, including affidavits of consent from any landowners shown in the ownership report who have not signed the transfer application. The title company must indicate/state the date that they prepared the ownership report on the coversheet and/or first page of the report.

If we do not receive the items listed above by September 12, 2024, a Preliminary Determination may be issued denying the application as incomplete.

Please don't hesitate to contact me at 503-979-9607 or Kim.R.French@water.oregon.gov if I may be of assistance.

Sincerely,

If protests are not filed pursuant to OAR 690-380-4030, the application will be approved.

If Transfer Application T-13951 is approved, the final order will include the following:

- 1. The additional points of appropriation, change in points of appropriation and changes in place of use proposed in Transfer Application T-13951 are approved.*
- 2. The right to the use of the water is restricted to beneficial use at the place of use described and is subject to all other conditions and limitations contained in Certificates 75912; to change the place of use under Certificate , 75912 and 94178 and any related decree.*
- 3. Approval of this transfer application does not constitute nor grant legal access onto or through another person's property for purposes of accessing the new points of appropriation or the new places of use.*
- 4. Water right Certificates 75912; to change the place of use under Certificate , 75912 and 94178 are cancelled. A new certificate will be issued describing that portion of Certificate 94178 not affected by this transfer.*
- 5. For Certificate 75897, the quantity of water diverted at the new additional point of appropriation (Well #3), together with that diverted at the original point of appropriation (Well #1), shall not exceed the quantity of water lawfully available at the original point of appropriation (Well #1).*
- 6. For Certificate 75912, the quantity of water diverted at the new point of appropriation and the new additional point of appropriation (Well #2 and Well #3), together with that diverted at the original point of appropriation (Well #1), shall not exceed the quantity of water lawfully available at the original point of appropriation (Well #1).*
- 7. Water shall be acquired from the same aquifer (water source) as the original point of appropriation.*
- 8. The former place of use of the transferred right shall no longer receive water under the right.*

 - c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.*

10. *Full beneficial use of the water shall be made, consistent with the terms of this order, on or before **October 1, 2025**. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the changes and full beneficial use of the water.*

The information provided in the application is insufficient to evaluate whether the proposed transfer may be approved because:

- ☐ The water well reports provided with the application do not correspond to the water rights affected by the transfer.
- ☐ The application does not include water well reports or a description of the well construction details sufficient to establish the ground water body developed or proposed to be developed.
- ☐ Other _____

1. Basic description of the changes proposed in this transfer: _____

This transfer application relates to three water right certificates (75912, 94178, & 75897) for authorized and proposed POU, POA/POD, and APOA located in T29S/R17R-sec 23 & 24 in the north Summer Lake Valley area. The proposed transfer location is about 4 miles south of the Fort Rock Groundwater Classified Area boundary.

The transfer application proposes moving, adjusting POU segments (20.16 acres total) located in T29S/R17R-sec 23 & 24.

The transfer application proposes adjusting 0.25 cfs (113.11 gpm) pumping by moving, adjusting, and adding pumping among three POA/POD wells (existing wells LAKE 4037 & LAKE 52627, and proposed well #3) located in T29S/R17R-sec 23 & 24.

2. Will the proposed POA develop the same aquifer (source) as the existing authorized POA?
☒ Yes ☐ No Comments: _____

Apparently yes, the "same aquifer" (source) given the existing and proposed POA/POD wells obtain groundwater from the likely higher permeability predominantly volcanic rock and sediment unit below the likely lower permeability predominantly basin-fill sediment unit. This is true for existing well LAKE 4037 (owner well #2) and appears true for the proposed construction of proposed owner well #3 (not yet constructed). It is uncertain for existing well LAKE 52627 given that well has no construction or lithologic information, but it is assumed true.

Additionally, groundwater levels related to wells in the north Summer Lake Valley area are similar and show similar decline with time (see attached hydrograph). The groundwater level at well LAKE 1445 near Silver Lake within the Fort Rock Groundwater Limited area is generally several feet higher than at the north Summer Lake Valley area wells, and the groundwater level at well LAKE 1477 west of Ana Spring Reservoir is generally 10 or more feet lower than at the other north Summer Lake Valley area wells.

3. a) Is there more than one source developed under the right (e.g., basalt and alluvium)?
☐ Yes ☒ No _____

Apparently no. See discussion in part 2 above.

b) If yes, estimate the portion of the right supplied by each of the sources and describe any limitations that will need to be placed on the proposed change (rate, duty, etc.): _____

No estimate made and no limitation recommended given item 2 and 3a above.

4. a) Will this proposed change, at its maximum allowed rate of use, likely result in an increase in interference with another ground water right?
☒ Yes ☐ No Comments: _____

The proposed POA well change will move groundwater pumping closer to adjacent groundwater right POA well pair within T29S/R17-sec 23 (SE qtr). The calculated maximum additional seasonal groundwater level drawdown at that POA pair is less than 0.02 feet. That POA well pair should be able to accommodate the seasonal drawdown change. The maximum additional seasonal groundwater level drawdown at other POA wells further away will be less.

The long-term impact on the groundwater system should be the same.

b) If yes, would this proposed change, at its maximum allowed rate of use, likely result in another groundwater right not receiving the water to which it is legally entitled?

☐ Yes ☒ No If yes, explain: _____

See discussion in part 4a above.

5. a) Will this proposed change, at its maximum allowed rate of use, likely result in an increase in interference with **another surface water source**?

☒ Yes ☒ No Comments: _____

Yes for Johnson Creek and for Ana Spring.

Yes for Johnson Creek: The POA changes moves the net pumping closer to Johnson Creek. The seasonal drawdown at the Johnson Creek reach closest to proposed POA/POD wells is calculated to increase less than 0.005 feet. The long-term interference at the creek should be the same.

Yes for Ana Spring: The POA changes moves the net pumping closer to Ana Spring. The seasonal drawdown at the spring is calculated to increase less than 0.001 feet, a possible seasonal spring discharge decrease up to 0.0015 cfs (about 0.67 gpm). The long-term interference at the spring should be the same.

- b) If yes, at its maximum allowed rate of use, what is the expected change in degree of interference with any **surface water sources** resulting from the proposed change?

Stream: Johnson Creek ☒ Minimal ☐ Significant

Stream: Ana Spring ☒ Minimal ☐ Significant

Provide context for minimal/significant impact: _____

See comment in part 5a above.

6. For SW-GW transfers, will the proposed change in point of diversion affect the surface water source similarly (as per OAR 690-380-2130) to the authorized point of diversion specified in the water use subject to transfer?

☐ Yes ☒ No Comments: _____

Not Applicable. No SW-GW transfer.

7. What conditions or other changes in the application are necessary to address any potential issues identified above: _____

Note: the proposed transfer location is about 4 miles south of the Fort Rock Groundwater Classified Area boundary.

The following are technical groundwater review recommendations. It is recognized that one or more technically recommended conditions may or may not be allowed under the transfer process rules and statutes. This technical groundwater review relies on other appropriate and authorized Department staff to make that determination.

"Large" flow meter condition for any proposed "To" POA and/or APOA well. Require the flow meter for any POA and/or APOA well to be properly installed and maintained. Each meter shall be either within 50 feet of the well head with a clearly visible monument adjacent to the meter or a surveyed location shall be provided and a clearly visible monument adjacent to the meter shall be installed for each meter more than 50 feet from the well head.

Condition 7P (well tag condition) for all the "To" and "From" POA wells.

Condition 7T (modified) for all "To" POA wells: "Prior to use, all POA wells shall be configured to allow a strictly clean water (no oil) static water level measurements with an electric-tape. That can include measurement access via an unobstructed vertical discharge pipe that allows the groundwater level to fluctuate freely within the discharge pipe (no valves, etc.). Otherwise, a dedicated measuring tube must be installed prior to use. The tube must be unobstructed, have a diameter of 3/4 inch (0.75 inch) or greater, and pursuant to figure 200-5 in OAR 690-200."

Well construction condition for the APOA well to ensure same geologic source (existing well LAKE 4037 (owner well #2) meets the condition and existing well LAKE 52627 (owner well #1) is assumed to meet this condition): "The T-13951 proposed APOA well (proposed owner well #3) shall obtain groundwater solely from the predominantly basalt-volcanic rock and sediment unit (which may contain some sedimentary layers) that underlies the predominantly basin-fill sediment unit (which may contain some basalt layers). Each well shall have continuous casing and continuous seal from land surface, through the predominantly basin-fill unit, and 5 feet into the predominantly basalt-volcanic rock and sediment unit at minimum. Note: the depth to the predominantly basalt-volcanic rock and sediment unit varies with location."

8. Any additional comments: _____

No additional comments.

Ana Spring Flow Change:

$$Q(\text{change}) = Q(\text{original}) - (Q(\text{original}) * ((h(\text{original}) - h(\text{change})) / h(\text{original})))$$

Q(change) = change in flow rate at Ana Spring (ft³/s)

Q(original) = Ana Spring flow rate observed by Brown (1957) = 90 ft³/s

h(original) = GW head above Ana Reservoir lake lake observed by Brown (1957) = 54 ft

h(change) = calculated drawdown at Ana Spring

Note: Given the equation above, a positive value is a decrease in flow and a negative value is an increase in flow

Note: the change in Ana Spring flow is about 1.87 ft³/s per 1.0 foot of groundwater level change using the Brown (1957) methodology

Reference: Application T-13951

On March 18, 2022, OWRD received your water right Permanent Transfer Application. The application was accompanied by \$4560.00. Our receipt number 137715 is enclosed.

By copy of this letter, we are asking the Watermaster for a report regarding the potential for injury to existing water rights which may be caused by the requested change. A review form will also be sent to our groundwater staff to determine whether the proposed well accesses the same source of water as the original well or as the original POD.

This application may require publication of a notice for two consecutive weeks in a newspaper with general circulation in the area where the water right is located. If it is determined that newspaper notice will be required, the Department will prepare the notice and notify you of the cost. You will be responsible for submitting payment to the Department prior to publication of the notice.

Except as provided under ORS 540.510(3) for municipalities, you may not use water for the new use, in the new place of use or from the new point of diversion/appropriation until a final order approving the transfer application has been issued by the Department. In order to avoid any possible forfeiture of the water right, you should continue to use the water as described by your existing water right.

If the land is sold before the application is approved, the buyer's consent to the application will be required unless a recorded deed or other legal document clearly established that the water right was not conveyed in the sale.

Refer to the following page for a chart showing the steps and expected timelines for the processing of your application.

If you have any questions, please contact the Transfer Section at (503) 979-9931.

Please be sure that the transfer application map you submit includes all the required items and matches the existing water right map. Check all boxes that apply.

- ☒ ☐ N/A Certified Water Right Examiner (CWRE) Stamp and Original Signature. For a list of CWREs, see http://apps.wrd.state.or.us/apps/wr/cwre_license_view/. CWRE stamp and signature are not required for substitutions.

1. For irrigation calculate cfs for each water right involved as follows:
 - a. Divide total authorized cfs by total acres in the water right (*for C12345, 1.25 cfs ÷ 100 ac*); then multiply by the number of acres to be transferred to get the transfer cfs (*x 45 ac = 0.56 cfs*).
 - b. If the water right certificate does not list total cfs, but identifies the allowable use as 1/40 or 1/80 of a cfs per acre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (*For C87654, 45.0 ac x 0.0125 cfs/ac = 0.56 cfs*)
2. Add cfs for the portions of water rights on all the land included in the transfer; however **do not count cfs for supplemental rights on acreage for which you have already calculated the cfs fee for the primary right on the same land**. The fee should be assessed only once for each "on the ground" acre included in the transfer. (*In this example, blank 5a would be only 0.56 cfs, since both rights serve the same 45.0 acres. Blank 5b would be 0 and Line 5 would then also become 0.*)
