Explain in your own words what you propose to accomplish with this transfer application, and why:

The proposed transfer does not change the place of use, character of use, priority, rate, or authorized acreage of any included water right. The transfer is limited solely to aligning the certificated point(s) of diversion with the historically used diversion location within the same source.

All water rights included in this application divert from the West Branch of Bridge Creek and function as part of a single, integrated diversion system. This application includes multiple water rights subject to transfer that divert from the same source and operate within this unified system; therefore, it qualifies to be submitted as a single application under OAR 690-380-3220.

If you need additional space, continue on a separate piece of paper and attach to the application as "Attachment 1".

System capacity: 4.2 cubic feet per second (cfs) OR

_____ gallons per minute (gpm)

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines, and sprinklers used to divert, convey, and apply the water at the authorized place of use. Water is diverted out of West Branch Bridge Creek to river left and down an open ditch to a fish screen. Water is then routed through an open ditch to the agricultural fields.
