Subject: Assignment Inquiry T-9005

You don't often get email from apatch@summitwr.com. [Learn why this is important](#)

Good morning Mary,

I am working with a client to certificate [Transfer T-9005](#). Before this can be done, an assignment will be completed assigning all interests to **only** Tony and Stephanie Arriola.

Northwest Farm Credit Services is listed as an encumbrance holder on the Transfer application under Land Ownership. However, Northwest Farm Credit Services is not listed as a Current Holder of Record on the Transfer Final Order.

1. Am I required to submit an assignment for Northwest Farm Credit Services?
2. If so, Northwest Farm Credit Services has merged with another entity to form AgWest Farm Credit. What is the most efficient way to go about an assignment in this case?

Thanks, and let me know if you would like any additional information,

I have reviewed your transfer application for a change in use. A few items must be addressed in order to process the transfer.

Page two of the transfer application should list only those acres proposed for a change. Therefore, 2.3 acres in the SE $\frac{1}{4}$ SE $\frac{1}{4}$ should be listed rather than all the acres listed on the certificate. You may send written authorization for me to make amendments to the application.

The application map graphically displays cranberry bogs. If that is the remaining right it should be indicated as such and the acres quantified. Changes to the application map must be made by a Certified Water Right Examiner.

Finally, the Watermaster has determined the change may be made as long as the standard limitations for cranberries are included as a condition of the transfer. The water right shall be limited as follows; for temperature control, 0.15 cubic foot per second per acre; for flood harvesting or pest control, 0.05 cubic foot per second per acre; for irrigation of cranberries, one-fortieth of one cubic foot per second per acre and 3.0 acre-feet per acre for each acre irrigated during the irrigation season of each year.

Notice of the transfer application must be published in the local newspaper having general circulation in the area of the water right. The notice must be published at least once a week for three consecutive weeks. Enclosed is the notice to be published. Please have the newspaper insert the last date of publication in the appropriate place in the notice. Following the last date of publication, please submit the affidavit of publication supplied by the newspaper to the Regional Office in Grants Pass.

Feel free to call (541) 471-2886, ext. 228 if you have any questions.

On 01-14-2002 we received your water right transfer application requesting a **change in Use** for use of water from **Wells**. The application was accompanied by \$ 200.00. Our receipt 50397 is enclosed.

By copy of this letter, we are asking the Watermaster for his usual report regarding the potential for injury to existing water rights which may be caused by the change.

Your application will be examined to determine if additional information is needed. You will be contacted following this examination. If you have a specific reason why your application should be examined ahead of other applications, please send us a letter describing your reason. We may be able to examine your application ahead of others.

You may not use water for the new use, in the new place of use or from the new point of diversion until the transfer application has been approved. In order to avoid any possible forfeiture of the water right, you should continue to use the water as described by your existing water right. If the land is sold before the transfer is approved, you will need to obtain consent from the buyer to complete the transfer.

We will notify you if additional information or corrections to the application or map are required.

If you have any questions, please call the Transfer Section, (503)378-3739.
