Subject: Draft Public Notice for Fryrear Conserved Water Application

Attached is a draft of the Fryrear conserved water application that I propose to have noticed in the Bend Bulletin. I would appreciate any comments or suggestions on the language proposed in the public notice. (I've turned the red-line feature on to make editing easy.) Pursuant to OAR 690-018-0050(1) and (3) the notice will have to be published at least once a week for three successive weeks, and I propose closing the public notice period 30 days after the last date it's noticed.

The notice publication will have to be paid by the applicants. **Scott**, please tell me how you would like to handle the payment. Options include:

- 1) Using the DRC customer account to pay the notice cost, or
- 2) Having the DRC or TSID pay the cost directly.

I would like to get the application notice ASAP, but would first like to hear from the DRC, TSID, and Matt regarding the contents of the notice. Thanks for everyone's assistance.

Applications for Allocation Of Conserved Water

The following applications for allocation of conserved water have been received pursuant to ORS 537.455 to 537.500 and OAR Chapter 690, Division 18. In reviewing the applications, the Department will consider whether the diversion for the uses allowed under the original water right will be reduced by the conservation project, whether existing water rights will be protected from injury, and whether the project is in compliance with local comprehensive land use plans.

The Deschutes River Conservancy filed an application with the Oregon Water Resources Department on behalf of Three Sisters Irrigation District for an allocation of conserved water under ORS 537.470.

The project involves the water right confirmed by certificate 74135 in the name of the Squaw Creek Irrigation District. The right allows the use of water from Squaw Creek, tributary to the Deschutes River, for the irrigation of 7,567.76 acres, pond maintenance, industrial use, and stock water. The project is on the Fryrear Ditch section of the Squaw Creek Irrigation District delivery system. The applicants are conserving water by replacing approximately 19,400 feet of the ditch with a pipeline. The project is expected to yield 1.5 cfs of 1895 priority conserved water, with the on-farm rate being unchanged.

The applicants propose that the conserved water be allocated to an instream water right in Squaw Creek from the districts existing point of diversion in the SW 1/4 SW 1/4, Section 21, Township 15 South, Range 10 East, W.M. (approximately RM 23.5) to the mouth of Squaw Creek.

Any interested person may comment in writing on the application, which has been assigned number C-34. Comments must be received by Bob Rice, Water Resources Department, 725 Summer Street NE, Suite A, Salem, OR 97301-1271 by June 9, 2005. Comments may be faxed to 503-986-0903. The Department will review all comments received when determining whether to approve the proposed allocation of conserved water.

A copy of the application and other information on the allocation and use of conserved water may be obtained from the Department by contacting Bob Rice at 503-986-0885 or Robert.D.Rice@wrd.state.or.us.

LEGAL NOTICE NOTICE OF APPLICATION FOR ALLOCATION OF CONSERVED WATER

The Deschutes River Conservancy filed an application with the Oregon Water Resources Department on behalf of Three Sisters Irrigation District for an allocation of conserved water under ORS 537.470.

The project involves the water right confirmed by certificate 74135 in the name of the Squaw Creek Irrigation District. The right allows the use of water from Squaw Creek, tributary to the Deschutes River, for the irrigation of 7,567.76 acres, pond maintenance, industrial use, and stock water.

The project is on the Fryrear Ditch section of the Squaw Creek Irrigation District delivery system. The applicants are conserving water by replacing approximately 19,400 feet of the ditch with a pipeline. The project is expected to yield 1.5 cfs of 1895 priority conserved water, with the on-farm rate being unchanged.

The applicants propose that the conserved water be allocated to an instream water right in Squaw Creek from the district's existing point of diversion in the SW 1/4 SW 1/4, Section 21, Township 15 South, Range 10 East, W.M. (approximately RM 23.5) to the mouth of Squaw Creek.

Any interested person may comment in writing on the application, which has been assigned number C-34. Comments must be received by Bob Rice, Water Resources Department, 725 Summer Street NE, Suite A, Salem, OR 97301-1271 by June 9, 2005. Comments may be faxed to 503-986-0903. The Department will review all comments received when determining whether to approve the proposed allocation of conserved water.

A copy of the application and other information on the allocation and use of conserved water may be obtained from the Department by contacting Bob Rice at 503-986-0885 or

WATER RESOURCES DEP^T
SALEM, OREGON

RE: Fryrear Project Application for Allocation and Use of Conserved Water

The Deschutes River Conservancy and the Three Sisters Irrigation District request amendments to their Application for Allocation and Use of Conserved Water for the Fryrear ditch project.

Specifically, the DRC and TSID request the following changes be made to the application:

- ✓1. Section 3.B.2. – Eliminate reference to duty.
- ✓2. Section 5.A.2 – Eliminate reference to duty.
- ✓3. Section 5.B.2 – Eliminate reference to duty.
- ✓4. Section 5.C.1 – Change the priority date to be 1895 for 1.5 cfs of water.
- ✓5. Exhibit C – Please remove and replace with the attached revised Exhibit C
- ✓6. Exhibit D – Eliminate the attachment of the Minutes and any reference thereof.
- ✓7. Exhibit G - Eliminate the attachment of the Agreement and any reference thereof.
8. Clarify that the on-farm rate will be unchanged and that the conserved water rate should be reduced from the total amount of the TSID's rate.
9. Indicate that the Project has been completed and that water was conserved in the amount anticipated and is ready to be finalized by the Water Resources Department.
10. Indicate that the priority date and time of all ensuing conserved water rights shall be the same as the source water rights.

If you have any questions about the requested changes, please give me a call. Thanks for your assistance this important project.

Sincerely,

Scott McCaulou

**BEFORE THE WATER RESOURCES DEPARTMENT
OF THE
STATE OF OREGON**

In the Matter of the Proposed Allocation of) FINAL ORDER APPROVING
Conserved Water by Three Sisters Irrigation) ALLOCATION OF CONSERVED
District, for certificate 74135, Deschutes County,) WATER
Oregon)

ORS 537.455 to 537.500 as amended by 2003 HB 2456, and OAR Chapter 690, Division 018, authorize and establish the process and criteria for allocations of conserved water.

Findings of Fact

1. On September 30, 2003, the Deschutes Resources Conservancy filed an application for an allocation of conserved water on behalf of, and with the approval of, Squaw Creek Irrigation District. The Department assigned the application number C-34.
2. Squaw Creek Irrigation District is the named holder of the certificated water right. Squaw Creek Irrigation District operates and maintains the water delivery system for the benefit of the landowners in the area.
3. Since this application was filed both the Deschutes Resources Conservancy and the Squaw Creek Irrigation District have changed their names. Their new names are the Deschutes River Conservancy (DRC) and Three Sisters Irrigation District (TSID), respectively.
4. On April 12, 2005, the DRC and TSID amended the application by eliminating references to duty, changing and clarifying the priority date of the conserved water, eliminating some attachments, and clarifying that the maximum on-farm rate will be unchanged.
5. The application, as amended, requests an allocation of conserved water under certificate 74135 in the name of Squaw Creek Irrigation District.
6. The right allows the use of the waters of Squaw Creek, tributary to the Deschutes River, for irrigation, pond maintenance, industrial use, and stock water as follows:

Priority Date	Acres (equivalent)	Maximum Rate (cfs)
1869	48.00	0.96
1885	79.05	1.58
1887	150.00	3.00
1889	201.50	4.03
1893	39.50	0.79
1895	5,716.75	114.33*
1899	108.80	2.18
1900	54.00	1.08
1901	22.30	0.45
1903	360.60	7.21
1904	870.60	17.41
Totals	7,651.10	153.02

The maximum per acre rate associated with this right is 1/50 cfs/ac. There is no duty limitation.

*Certificate 74135 allows 114.34 cfs under a priority date of 1895. However, a discrepancy between the total rate allowed under the certificate and the total of the rates assigned to each priority date was introduced as a result of rounding errors in the calculations during issuance of the certificate. The quantity listed is adjusted so that the total of the rates allowed under each priority date equal the total rate allowed under the certificate.

7. The conservation project described involved replacement of approximately 7,700 feet of open ditch with 24-inch diameter pipe, and 11,700 feet of open ditch with 18-inch diameter pipe. The replacement of open, unlined ditches with pipelines is a proven technology for conserving water.
8. The water conserved by this pipelining project is seepage losses from the ditches operated by TSID. To the extent that the seepage losses eliminated by pipelines are in excess of the quantities of conserved water to be allocated, the project also will provide for more reliable delivery of water for the beneficial purposes under the water right.
9. On April 26, 2005, the Department provided public notice as required under OAR 690-018-0050. On April 29, May 2, and May 9, 2005, the Bend Bulletin published a public notice inviting public comments on the application. No comments were received.
10. On July 25, 2005, a Notice of Determination and Proposed Final Order was issued by the Department proposing to approve this allocation of conserved water application. No protests were received.
11. The application includes land use information forms completed and signed by Deschutes County demonstrating that the required land use approvals have been obtained by the applicant.

12. Pursuant to OAR 690-018-0020(4), the quantity of water conserved under the project is 1.50 cfs with a priority date of 1895.
13. Pursuant to OAR 690-018-0012(1), the applicant's propose that 100 percent of the conserved water be allocated to the state for an instream water right.
14. Pursuant ORS 537.485, the applicant's request that the priority dates of the conserved water be the same as the originating rights.
15. After the allocation of conserved water, the water right held by the district and the state's instream water right will allow use of the following quantities of water:

Priority Date	Acres (equivalent)	Before Project Maximum District Rate (cfs)	Conserved Water (cfs)	After Project District Maximum Rate (cfs)	Instream Water Right (cfs)
1869	48.00	0.96		0.96	
1885	79.05	1.58		1.58	
1887	150.00	3.00		3.00	
1889	201.50	4.03		4.03	
1893	39.50	0.79		0.79	
1895	5,716.75	114.33	1.50	112.83	1.50
1899	108.80	2.18		2.18	
1900	54.00	1.08		1.08	
1901	22.30	0.45		0.45	
1903	360.60	7.21		7.21	
1904	870.60	17.41		17.41	
Totals	7,651.10	153.02	1.50	151.52	1.50

16. The project conservation measures were implemented on April 1, 2003.
17. The TSID is located in an area that is underlain by highly permeable, fractured basalts. The canal seepage that is conserved by the project likely would have entered the regional ground water system that discharges near or into Lake Billy Chinook. The ground water flows in the area are generally parallel to Squaw Creek. As a result, the canal seepage did not return to Squaw Creek and did not become available to other water users in Squaw Creek.
18. Instream water rights have been established in Squaw Creek through the application process established pursuant to OAR 537.341 and through water right transfers. The instream rights established through the application process are confirmed under certificates 73223 and 73224 with priority dates of October 11, 1990.
19. The Oregon Department of Fish and Wildlife has indicated that additional streamflows are needed in Squaw Creek to provide for the conservation, maintenance and enhancement of aquatic and fish life and fish habitat. The Department of Environmental

Quality has indicated that additional instream water in Squaw Creek is needed to help decrease instream temperatures for the benefit of instream aquatic life. The Oregon Parks and Recreation Department has also indicated that additional instream water in Squaw Creek is needed.

Ultimate Findings of Fact

Pursuant to OAR 690-018-0050, in reviewing the application for allocation of conserved water the Department has determined the following:

- A. The proposed allocation of conserved water will result in a reduced diversion for the uses allowed under the original rights of 1.50 cfs as established in Finding of Fact 14.
- B. Consistent with in Finding of Fact 9, 10 and 17, the proposed allocation will not harm other water rights.
- C. The application is compatible with the local comprehensive land use plan as established in Finding of Fact 11.
- D. As no harm will occur to other water rights, no reduction in the quantity of conserved water to be allocated is required to mitigate for affects on other water rights.
- E. Consistent with Finding of Fact 6, the original water right does not have a duty. The allocation of conserved water does not change this. Consistent with Finding of Fact 14, the new rate for the portions of the water rights affected by the allocation of conserved water shall be:

Priority Date	Acres (equivalent)	Rate (cfs)
1869	48.00	0.96
1885	79.05	1.58
1887	150.00	3.00
1889	201.50	4.03
1893	39.50	0.79
1895	5,716.75	112.83
1899	108.80	2.18
1900	54.00	1.08
1901	22.30	0.45
1903	360.60	7.21
1904	870.60	17.41
Totals	7,651.10	151.52

- F. The state's portion of the conserved water is needed to improve aquatic resources and their habitat in Squaw Creek between the TSID diversion at approximately river-mile 23.5 to the mouth of Squaw Creek.

- G. The applicant is requesting that 100 percent of the conserved water be allocated to an instream water right to be held in trust by the Water Resources Department for the people of Oregon and that the priority dates of the conserved water rights are the same as the originating rights.
- H. The state's portion of the conserved water shall be allocated to instream water rights for the support of aquatic life and shall provide for the protection of flows in Squaw Creek from the authorized point of diversion for TSID at

Twp	Rng	Mer	Sec	Q-Q	Survey Coordinates
15 S	10 E	WM	21	SW SW	998 FEET NORTH & 1211 FEET EAST FROM SW CORNER, SECT. 21

(approximately river mile 23.5) to the mouth of Squaw Creek. The instream water right shall be for 1.5 cfs, with an 1895 priority date, and shall replace a portion of instream water rights established pursuant to ORS 537.341 or 537.346 and shall be in addition to any instream water rights established pursuant to ORS 537.348 or 537.470, unless otherwise specified by a subsequent order establishing a new instream water right. The rights shall allow for the use and protection of flows from April 1 through October 31, and at other times when TSID is diverting water.

- I. Consistent with in Finding of Fact 16, the applicant has completed the conservation project, which was completed within five years prior to the date of filing the application, and has requested finalization of the allocation of the conserved water.
- J. No other conditions or limitations are needed to prevent or mitigate for harm to existing water rights.

Conclusion of Law

The project described in the application C-34 for allocation of conserved water is consistent with the criteria in ORS 537.455 to 537.500, as amended by 2003 HB 2456, and OAR Chapter 690, Division 018. Water will be conserved that can be allocated without harming other water rights.

Now, therefore, it is ORDERED:

1. Certificate 74135 is modified. A new superseding certificate shall be issued to TSID for the remaining portion of Certificate 74135 upon a determination that it is necessary to produce a certificate to confirm that remaining portion of the water right. Approval of this allocation of conserved water reduces the amount of water lawfully available under the remaining portion of certificate 74135 by 1.5 cfs under the 1895 priority date. The associated priority date and rate of the remaining right shall be approximately:

Priority Date	Acres (equivalent)	Rate (cfs)
1869	48.00	0.96
1885	79.05	1.58
1887	150.00	3.00
1889	201.50	4.03
1893	39.50	0.79
1895	5,716.75	112.83
1899	108.80	2.18
1900	54.00	1.08
1901	22.30	0.45
1903	360.60	7.21
1904	870.60	17.41
Totals	7,651.10	151.52

The maximum per acre rate associated with these rights is 1/50 cfs/ac. There is no duty limitation. The place of use shall be those lands described under certificate 74135, as modified by any transfers completed pursuant to ORS 540.580. The acreage, rate, duty, authorized uses, and priority dates are subject to modification by any approved transfers, cancellations, corrections, allocation of conserved water, or other prior modification to Certificate 74135. All other conditions and limitations of the existing water right shall be included in the superseding certificate.

2. A new instream water right certificate, Certificate 81607, shall be issued for conservation, maintenance and enhancement of aquatic and fish life, wildlife, fish and wildlife habitat and other ecological values in Squaw Creek from the authorized point of diversion for TSID at

Twp	Rng	Mer	Sec	Q-Q	Survey Coordinates
15 S	10 E	WM	21	SW SW	998 FEET NORTH & 1211 FEET EAST FROM SW CORNER, SECT. 21

(approximately river mile 23.5) to the mouth of Squaw Creek. The instream water right shall be for 1.5 cfs, with an 1895 priority, and shall replace a portion of instream water rights established pursuant to ORS 537.341 or 537.346 and shall be in addition to any instream water rights established pursuant to ORS 537.348 or 537.470, unless otherwise specified by a subsequent order establishing a new instream water right. The rights shall allow for the use and protection of flows from April 1 to October 31, and at other times when TSID is diverting water.

Dated at Salem, Oregon this 13th day of October 2005.

For 
Phillip C. Ward
Director

Mailing Date: OCT 19 2005

STATE OF OREGON
COUNTY OF DESCHUTES
CERTIFICATE OF WATER RIGHT

THIS CERTIFICATE ISSUED TO

STATE OF OREGON
WATER RESOURCES DEPARTMENT

confirms the right to use the waters of the SQUAW CREEK, a tributary of the DESCHUTES RIVER, for instream use for conservation, maintenance and enhancement of aquatic and fish life, wildlife, fish and wildlife habitat and other ecological values.

This right was confirmed by decree of the Circuit Court of the State of Oregon for Crook County. The decree is of record at Salem in the Order Record of the Water Resources Director, in Volume 1, at pages 121, 122, 123, 124, 435, 438, 445, 472, and 473. The date of priority is 1895. The amount of water to which this right is entitled is limited to an amount actually beneficially used, and shall not exceed 1.5 CUBIC FEET PER SECOND during the specified April 1 through October 31 irrigation season, and at other times when Three Sisters Irrigation District is diverting water.

The description of the stream reach in which flows are to be maintained is as follows:

From the location of the diversion authorized previously under Certificate 74135, located at:

Twp	Rng	Mer	Sec	Q-Q	Survey Coordinates
15 S	10 E	WM	21	SW SW	998 FEET NORTH & 1211 FEET EAST FROM SW CORNER, SECTION 21

being approximately at river mile 23.5.

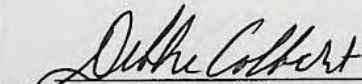

To the MOUTH OF SQUAW CREEK.

The instream right established by this ALLOCATION OF CONSERVED WATER shall replace a portion of instream water rights established pursuant to ORS 537.341 or 537.346 and shall be in addition to instream water rights established pursuant to ORS 537.348 or 537.470, unless otherwise specified by a subsequent order establishing a new instream water right.

This certificate is issued to confirm an ALLOCATION OF CONSERVED WATER approved by an order of the Water Resources Director recorded in Special Order Volume 67, Page 265, approving conserved water application C-34. This right replaces a portion of the right described under Certificate 74135, State Record of Water Right Certificates.

The right is subject to all other terms and conditions of Certificate 74135, and any related decree.

WITNESS the signature of the Water Resources Director, affixed October 13, 2005.

Phillip C. Ward, Director

This is a final order in other than a contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60 day time period specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-0080 you may either petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

**BEFORE THE WATER RESOURCES DEPARTMENT
OF THE
STATE OF OREGON**

In the Matter of the Proposed Allocation of)
 Conserved Water by Three Sisters Irrigation)
 District, for certificate 74135, Deschutes County,)
 Oregon)

NOTICE OF DETERMINATION
 and PROPOSED FINAL ORDER
 APPROVING ALLOCATION OF
 CONSERVED WATER

ORS 537.455 to 537.5
 authorize and establish

Chapter 690, Division 018,
 conserved water.

Findings of Fact

1. On September 30, 2005, the Deschutes Resources Conservancy and the Squaw Creek Irrigation District filed an application for an allocation of conserved water under certificate number C-34.
2. Squaw Creek Irrigation District requested an allocation of conserved water right for the benefit of the lands owned by the Deschutes Resources Conservancy and the Squaw Creek Irrigation District. The application was filed on 8/25/05.
3. Since this application was filed, the Deschutes Resources Conservancy and the Squaw Creek Irrigation District have changed their names. Their new names are the Deschutes River Conservancy (DRC) and Three Sisters Irrigation District (TSID), respectively.
4. On April 12, 2005, the DRC and TSID amended the application by eliminating references to duty, changing and clarifying the priority date of the conserved water, eliminating some attachments, and clarifying that the maximum on-farm rate will be unchanged.
5. The application, as amended requests an allocation of conserved water under certificate 74135 in the name of Squaw Creek Irrigation District.
6. The right allows the use of the waters of Squaw Creek, tributary to the Deschutes River, for irrigation, pond maintenance, industrial use, and stock water as follows:

Priority Date	Acres (equivalent)	Maximum Rate (cfs)
1869	48.00	0.96
1885	79.05	1.58
1887	150.00	3.00

Pursuant to OAR 690-018-0050(5), any person objecting to the proposed allocation may protest this notice of determination and proposed final order to the Water Resources Commission within 60 days of the mailing of this determination.

**BEFORE THE WATER RESOURCES DEPARTMENT
OF THE
STATE OF OREGON**

In the Matter of the Proposed Allocation of Conserved Water by Three Sisters Irrigation District, for certificate 74135, Deschutes County, Oregon))))	NOTICE OF DETERMINATION and PROPOSED FINAL ORDER APPROVING ALLOCATION OF CONSERVED WATER
--	------------------	---

ORS 537.455 to 537.500 as amended by 2003 HB 2456, and OAR Chapter 690, Division 018, authorize and establish the process and criteria for allocations of conserved water.

Findings of Fact

1. On September 30, 2003, the Deschutes Resources Conservancy filed an application for an allocation of conserved water on behalf of, and with the approval of, Squaw Creek Irrigation District. The Department assigned the application number C-34.
2. Squaw Creek Irrigation District is the named holder of the certificated water right. Squaw Creek Irrigation District operates and maintains the water delivery system for the benefit of the landowners in the area.
3. Since this application was filed both the Deschutes Resources Conservancy and the Squaw Creek Irrigation District have changed their names. Their new names are the Deschutes River Conservancy (DRC) and Three Sisters Irrigation District (TSID), respectively.
4. On April 12, 2005, the DRC and TSID amended the application by eliminating references to duty, changing and clarifying the priority date of the conserved water, eliminating some attachments, and clarifying that the maximum on-farm rate will be unchanged.
5. The application, as amended requests an allocation of conserved water under certificate 74135 in the name of Squaw Creek Irrigation District.
6. The right allows the use of the waters of Squaw Creek, tributary to the Deschutes River, for irrigation, pond maintenance, industrial use, and stock water as follows:

Priority Date	Acres (equivalent)	Maximum Rate (cfs)
1869	48.00	0.96
1885	79.05	1.58
1887	150.00	3.00

Pursuant to OAR 690-018-0050(5), any person objecting to the proposed allocation may protest this notice of determination and proposed final order to the Water Resources Commission within 60 days of the mailing of this determination.

Priority Date	Acres (equivalent)	Maximum Rate (cfs)
1889	201.50	4.03
1893	39.50	0.79
1895	5,716.75	114.33*
1899	108.80	2.18
1900	54.00	1.08
1901	22.30	0.45
1903	360.60	7.21
1904	870.60	17.41
Totals	7,651.10‡	153.02

The maximum per acre rate associated with this right is 1/50 cfs/ac. There is no duty limitation.

*Certificate 74135 allows 114.34 cfs under a priority date of 1895. However, a discrepancy between the total rate allowed under the certificate and the total of the rates assigned each priority was introduced as a result of rounding errors in the calculations during issuance of the certificate. The quantity listed is adjusted so that the total of the rates allowed under each priority equal the total rate allowed under the certificate.

‡There is a discrepancy on certificate 74135, between the total acreage served by this certificate (“irrigating 7,567.76 acres, pond maintenance, industrial use, and stock water”) and the tabulated sum of the total equivalent acres, being 7,651.10.

7. The conservation project described involved replacement of approximately 7,700 feet of open ditch with 24-inch diameter pipe, and 11,700 feet of open ditch with 18-inch diameter pipe. The replacement of open, unlined ditches with pipelines is a proven technology for conserving water.
8. The water conserved by this pipelining project is seepage losses from the ditches operated by TSID. To the extent that the seepage losses eliminated by pipelines are in excess of the quantities of conserved water to be allocated, the project also will provide for more reliable delivery of water for the beneficial purposes under the water right.
9. Public notice was published as required under OAR 690-018-0050. No comments were received.
10. The application includes land use information forms completed and signed by Deschutes County demonstrating that the required land use approvals have been obtained by the applicant.
11. Pursuant to OAR 690-018-0020(4), the quantity of water conserved under the project is 1.50 cfs with a priority date of 1895.
12. Pursuant to OAR 690-018-0012(1), the applicant’s propose that 100 percent of the conserved water be allocated to the state for an instream water right.

13. Pursuant ORS 537.485, the applicant's request that the priority dates of the conserved water be the same as the originating rights.
14. After the allocation of conserved water, the water right held by the district and the state's instream water right will allow use of the following quantities of water:

Priority Date	Acres (equivalent)	Before Project Maximum District Rate (cfs)	Conserved Water (cfs)	After Project District Maximum Rate (cfs)	Instream Water Right (cfs)
1869	48.00	0.96		0.96	
1885	79.05	1.58		1.58	
1887	150.00	3.00		3.00	
1889	201.50	4.03		4.03	
1893	39.50	0.79		0.79	
1895	5,716.75	114.33	1.50	112.83	1.50
1899	108.80	2.18		2.18	
1900	54.00	1.08		1.08	
1901	22.30	0.45		0.45	
1903	360.60	7.21		7.21	
1904	870.60	17.41		17.41	
Totals	7,651.10	153.02	1.50	151.52	1.50

15. The project conservation measures were implemented on April 1, 2003.
16. The TSID is located in an area that is underlain by highly permeable, fractured basalts. The canal seepage that is conserved by the project likely would have entered the regional ground water system that discharges near or into Lake Billy Chinook. The ground water flows in the area are generally parallel to Squaw Creek. As a result, the canal seepage did not return to Squaw Creek and did not become available to other water users in Squaw Creek.
17. Instream water rights have been established in Squaw Creek through the application process established pursuant to OAR 537.341 and through water right transfers. The instream rights established through the application process are confirmed under certificates 73223 and 73224 with priority dates of October 11, 1990.
18. The Oregon Department of Fish and Wildlife has indicated that additional streamflows are needed in Squaw Creek to provide for the conservation, maintenance and enhancement of aquatic and fish life and fish habitat. The Department of Environmental Quality has indicated that additional instream water in Squaw Creek is needed to help decrease instream temperatures for the benefit of instream aquatic life. The Oregon Parks and Recreation Department has also indicated that additional instream water in Squaw Creek is needed.

Ultimate Findings of Fact

Pursuant to OAR 690-018-0050, in reviewing the application for allocation of conserved water the Department has determined the following:

- A. The proposed allocation of conserved water will result in a reduced diversion for the uses allowed under the original rights of 1.50 cfs as established in Finding of Fact 14.
- B. Consistent with in Finding of Fact 9 and 16, the proposed allocation will not harm other water rights.
- C. The application is compatible with the local comprehensive land use plan as established in Finding of Fact 10.
- D. As no harm will occur to other water rights, no reduction in the quantity of conserved water to be allocated is required to mitigate for affects on other water rights.
- E. Consistent with Finding of Fact 6, the original water right does not have a duty. The allocation of conserved water does not change this. Consistent with Finding of Fact 14, the new rate for the portions of the water rights affected by the allocation of conserved water shall be:

Priority Date	Acres (equivalent)	Rate (cfs)
1869	48.00	0.96
1885	79.05	1.58
1887	150.00	3.00
1889	201.50	4.03
1893	39.50	0.79
1895	5,716.75	112.83
1899	108.80	2.18
1900	54.00	1.08
1901	22.30	0.45
1903	360.60	7.21
1904	870.60	17.41
Totals	7,651.10	151.52

- F. The state's portion of the conserved water is needed to improve aquatic resources and their habitat in Squaw Creek between the TSID diversion at approximately river-mile 23.5 to the mouth of Squaw Creek.
- G. The applicant is requesting that 100 percent of the conserved water be allocated to an instream water right to be held in trust by the Water Resources Department for the people of Oregon and that the priority dates of the conserved water rights are the same as the originating rights.

- H. The state's portion of the conserved water shall be allocated to instream water rights for the support of aquatic life and shall provide for the protection of flows in Squaw Creek from the authorized point of diversion for TSID at

Twp	Rng	Mer	Sec	Q-Q	Survey Coordinates
15 S	10 E	WM	21	SW SW	998 FEET NORTH & 1211 FEET EAST FROM SW CORNER, SECT. 21

(approximately river mile 23.5) to the mouth of Squaw Creek. The instream water right shall be for 1.5 cfs, with an 1895 priority, and shall replace a portion of instream water rights established pursuant to ORS 537.341 or 537.346 and shall be in addition to any instream water rights established pursuant to ORS 537.348 or 537.470, unless otherwise specified by a subsequent order establishing a new instream water right. The rights shall allow for the use and protection of flows from April 1 to October 31, and at other times when TSID is diverting water.

- I. Consistent with in Finding of Fact 15, the applicant has completed the conservation project and has requested finalization of the allocation of the conserved water.
- J. No other conditions or limitations are needed to prevent or mitigate for harm to existing water rights.

Conclusion of Law

The project described in the application C-34 for allocation of conserved water is consistent with the criteria in ORS 537.455 to 537.500, as amended by 2003 HB 2456, and OAR Chapter 690, Division 018. Water will be conserved that can be allocated without harming other water rights.

Now, therefore, it is ORDERED:

1. Certificate 74135 is cancelled. A new superseding certificate shall be issued to TSID for irrigating approximately 7,567.76 acres, pond maintenance, industrial use, and stock water. The acreage, rate, duty, and priority dates are subject to modification by any transfers, cancellations, corrections, allocation of conserved water, or other prior modification to Certificate 74135. (See Finding of Fact 5.) The associated priority date and rate shall be approximately:

Priority Date	Acres (equivalent)	Rate (cfs)
1869	48.00	0.96
1885	79.05	1.58
1887	150.00	3.00
1889	201.50	4.03
1893	39.50	0.79
1895	5,716.75	112.83
1899	108.80	2.18
1900	54.00	1.08
1901	22.30	0.45
1903	360.60	7.21
1904	870.60	17.41

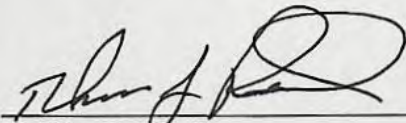

The maximum per acre rate associated with these rights is 1/50 cfs/ac. There is no duty limitation. The place of use shall be those lands described under certificate 74135, as modified by any transfers completed pursuant to ORS 540.580. The acreage, rate, duty, and priority dates are subject to modification by any transfers, cancellations, corrections, allocation of conserved water, or other prior modification to Certificate 74135. (See Finding of Fact 6.) All other conditions and limitations of the existing water right shall be included in the superseding certificate.

2. A new instream water right certificate shall be issued for conservation, maintenance and enhancement of aquatic and fish life, wildlife, fish and wildlife habitat and other ecological values in Squaw Creek from the authorized point of diversion for TSID at

Twp	Rng	Mer	Sec	Q-Q	Survey Coordinates
15 S	10 E	WM	21	SW SW	998 FEET NORTH & 1211 FEET EAST FROM SW CORNER, SECT. 21

(approximately river mile 23.5) to the mouth of Squaw Creek. The instream water right shall be for 1.5 cfs, with an 1895 priority, and shall replace a portion of instream water rights established pursuant to ORS 537.341 or 537.346 and shall be in addition to any instream water rights established pursuant to ORS 537.348 or 537.470, unless otherwise specified by a subsequent order establishing a new instream water right. The rights shall allow for the use and protection of flows from April 1 to October 31, and at other times when TSID is diverting water.

Dated at Salem, Oregon this 25th day of July 2005.

 For Phillip C. Ward
 Director

Protests should be addressed to Bob Rice

Date of Mailing: _____

JUL 27 2005

Protest Rights:

Under the provisions of OAR 690-018-0050, any person may protest this order by filing a protest with the Department within 60 days of the mailing of the determination.

If no protests are received the Director shall issue an order consistent with this determination.

Application for Allocation and Use of Conserved Water

Please type or print in dark ink. If your application is found to be incomplete or inaccurate, we will return it to you. If any requested information does not apply to your application, insert "n/a." If you need additional space to answer any of the questions, attach a separate sheet of writing paper and reference the section number and question.

1. APPLICANT INFORMATION

Applicant: Deschutes Resources Conservancy, on behalf of Squaw Creek Irrigation District
First Last

Co-applicant: Bruce Aylward (contact)
First Last

Mailing address: P.O. Box 1560
Bend OR 97709
City State Zip

Phone: 541-382-4077
Home Work Other

Fax: 541-382-4078 E-Mail address: bruce@deschutesrc.org

2. WATER RIGHT

A) What is the name on the water right? Squaw Creek Irrigation District

B) Describe the water right:

- Certificate Number(s): 74135
- Priority Date: 1869, 1885, 1887, 1889, 1893, 1895, 1899, 1900, 1901, 1903, 1904
- Source of Water: Squaw Creek, a tributary of the Deschutes River
- Type of Use: Irrigation, Pond Maintenance, Industrial use, stock water
- Place of Use: 7, 567.76 acres across several townships: see Exhibit J
township range section quarter/quarter total no. acres

3. IRRIGATION SYSTEM

A) What is the maximum rate and annual duty (volume) of water which may be diverted as stated on the water right certificate?

1. Rate: 153.02 cfs cfs, gpm, or miners inches 2. Duty: none acre feet

B) What is the maximum amount of water that can be diverted using the existing facilities?

1. Rate: 153.02 cfs cfs, gpm, or miners inches 2. Duty: 110,858.9 af acre feet
None BR

RECEIVED

SEP 30 2003

WATER RESOURCES DEPT.
SALEM, OREGON

C) Describe the present system including diversion structures, pumps, conveyance facilities, and application methods which will be affected by the proposed project. Provide sufficient detail to confirm the system's capacity (use separate sheet if necessary).

This project will affect the Fryrear Ditch Section of the Squaw Creek Irrigation District Delivery System. The Fryrear Ditch is an open lateral approximately 39,600 ft. long that conveys irrigation water to approximately 475 acres. The ditch is 5 ft. wide, has a water depth of 1.5 ft and a side slope of 1.5 ft.

4. CONSERVATION MEASURES

A) Describe the proposed changes to the physical system and operations that will result in the conservation of water. If these proposed changes will change the point of diversion, locate the new point of diversion by distance to a quarter corner, and show the change on your map.

The Fryrear Ditch Project will pipe the first 19,400 ft of ditch, including sections traveling across Forest Service Lands. The ditch will be replaced by 7,700 ft of 24 inch pipe and 11,700 ft of 18 inch pipe. There will be no POD change and no change to water application systems on the acres served by the pipeline.

5. CONSERVED WATER

A) What amount of water will be needed after implementing conservation measures?

1. Rate: 151.52 cfs
cfs, gpm, or miners inches

2. Duty: 109,772.2
acre feet
NONE BR

B) What amount of water will be conserved as a result of the implementation of the conservation measures? Subtract 5A from the smaller of 3A or 3B under IRRIGATION SYSTEM, above.

1. Rate: 1.5 cfs
cfs, gpm, or miners inches

2. Duty: 636.7 af
acre feet
NONE BR

C) What portions of the conserved water will be allocated to the state and applicant?

1. Portion going to the state: 1.5 cfs (100%), of which 0.03 cfs (1885), 1.2 cfs (1895)
% or (cfs)
BR and 0.27 cfs (1904)

2. Portion going to the applicant: _____
% or (cfs)

D) Proposed use of the conserved water allocated to the applicant: _____

E) How is the water to be measured at the applicant's point of diversion? via the gauge on the Squaw Creek Canal (WRD operated)

RECEIVED

SEP 30 2003

WATER RESOURCES DEPT.
SALEM, OREGON

6. PROJECT SCHEDULE

Indicate the anticipated dates that the following construction tasks should begin. If construction task have already begun, or is completed, please indicate that date.

Proposed date construction will begin: Sept. 1, 2002

Proposed date construction will be completed: June 2003

Proposed date beneficial water use will begin: Upon approval of this application

7. MITIGATION

A) Describe any expected effects on other appropriators from the proposed allocation of conserved water. Identify what currently happens to the water that is proposed to be conserved.

No effects on other appropriators are expected from the proposed allocation of conserved water. The water to be conserved is lost from the system through seepage and evaporation, and is not available to other appropriators on Squaw Creek.

B) Describe any mitigation or other measures that are planned to avoid harm to other water rights.

The project will cause no harm to other water rights; more water will be available to SCID water users.

8. LOCATION OF PROPOSED USE

A) Describe the boundaries of the expected area within which the diversion structures and places of use of the applicants' conserved water right would be located. This is land other than that to which this water right is appurtenant.

B) To the extent possible, identify the stream reach for which the state's portion of the conserved water should be managed under an instream water right. Give river miles, if known.

The instream reach will be
from the existing SCID POD
at RM 23.5 (approximately) to
the mouth of Squaw Creek, RM 0.0

C) Describe the proposed benefit to instream uses.

The additional instream flow
in Squaw Creek will provide for
the conservation, maintenance,
and enhancement of aquatic
and fish life, particularly the
improvement of spawning and
rearing habitat for redband trout.

9. ACKNOWLEDGMENT OF FORFEITURE

Complete this if the Certified Water Right Examiner's map shows less acreage has been irrigated over the past five years than allowed under the right.

I am aware that _____ acre(s) have not been irrigated for the last five years and I am abandoning that portion of the water right and make no further claim for the water. I ask that this _____ acre(s) portion of the right be permanently canceled.

10. SIGNATURE

All statements made and information provided in this application are true and correct to the best of my knowledge:

[Signature]
 Signature of Applicant

9/18/03
 Date

 Signature of Co-applicant

 Date

Marie Chalack 9/18/03
Manager SCID Allocation of Conserved Water/ 4

Please include the following exhibits:

- A) A map with sufficient detail to locate and describe the facilities and areas affected by the conservation measures.
- B) Identify any federal or state public sources of project funds and, if federal or state public funds which are not subject to repayment will be used in the project, information showing the estimated project costs and anticipated sources of funds for the project including:
 1. The total costs of project engineering and construction;
 2. Any cost(s) that are incurred on a regular basis (i.e. monthly, semi annually, annually) that are a result of the project, and which would not be incurred in the absence of the project;
 3. The amount of funding and the value of any in-kind contributions for project engineering and construction and for any incremental changes in the costs of operations and maintenance to be paid from federal or state public funds which are not subject to repayment; and
 4. The amount of funding and the value of any in-kind contributions for project engineering and construction and for any incremental changes in the costs of operations and maintenance to be provided from other funds.
- C) If construction of the project has begun or been completed and if more than 25% of the project costs have been expended before applying for allocation of conserved water, evidence that the applicant has attempted to identify and resolve the concerns of water right holders in the area, governmental entities, or other organizations who have asked to be consulted regarding the allocation of conserved water.
- D) A letter showing irrigation district or water control district approval if the conservation project is within the boundaries of the of the district.
- E) A land use information form stating that the change is in accordance with the local planning laws and applicable comprehensive plan.
- F) A copy of the current recorded deed to the subject lands.
- G) Affidavits from any other landowners or encumbrance holders with interest in the original water right stating that they do not object to the proposed transfer.
- H) A letter from Department of Environmental Quality, Parks and Recreation, or the Department of Fish and Wildlife stating that the change will be a benefit to instream uses.
- I) Evidence that the water has been used within the last five years.
- J) Copy of the water right certificate(s).

Exhibit B:

Fryrear Piping Project, Application for Allocation of Conserved Water

Identify any federal or state public sources of project funds and, if federal or state public funds which are not subject to repayment will be used in the project, information showing the estimated project costs and anticipated sources of funds for the project including:

- 1. The total cost of project engineering and construction;**
- 2. Any costs that are incurred on a regular basis that are a result of the project and which would not be incurred in the absence of the project;**
- 3. The amount of funding and the value of any in-kind contributions for project engineering and construction and for any incremental changes in the costs of operations and maintenance to be paid from federal or state public funds which are not subject to repayment; and**
- 4. The amount of funding and the value of any in-kind contributions for project engineering and constructions and for any incremental changes in the costs of operations and maintenance to be provided from other funds.**

The total project cost is \$546,983.00 dollars. Of that, \$125,000.00 are federal funds distributed by the Deschutes Resources Conservancy, \$25,000 are federal funds from the National Fish and Wildlife Foundation distributed by the Deschutes Co. SWCD, and \$120,983.00 are state funds granted by the Oregon Watershed Enhancement Board. Project Engineering was donated by the Bureau of Reclamation and the Natural Resources Conservation Service, and is valued at \$5,000. The balance of funds (\$271,000.00) took the form of an in-kind contribution by the Squaw Creek Irrigation District. The public funds used in the project are not subject to repayment.

1. The total cost of materials and installation was \$546,983.00.
2. All maintenance of the pipeline will be provided by Squaw Creek Irrigation District. There will be no ongoing public cost.
3. Project engineering was donated by the Bureau of Reclamation and National Resources Conservation Service. Total value of this in-kind donation was:\$5,000. Project construction is to be accomplished without the use of public funds.
3. Squaw Creek irrigation district is providing in-kind contributions in constructing the project. The value of this contribution is \$271,000.

RECEIVED

WATER RESOURCES DEPT.
SALEM, OREGON

Exhibit C:

If construction of the project has begun or been completed and if more than 25% of the project costs have expended before applying for allocation of conserved water, evidence that the applicant has attempted to identify and resolve the concerns of other water right holders in the area, governmental entities, or other organizations who have asked to be consulted regarding the allocation of conserved water.

The Three Sisters Irrigation District has contacted the affected water right holders directly to discuss the Fryrear project and the allocation of conserved water. The Deschutes River Conservancy invited all Fryrear water users to participate in a workshop where the allocation of conserved water was discussed. The Three Sisters Irrigation District and the Deschutes River Conservancy consulted with other water users in the district, the Oregon Department of Fish and Wildlife, the U.S. Bureau of Reclamation, the Oregon Department of Environmental Quality and the U.S. Forest Service prior to finalizing this application.

Mr. Doug Parrow
Oregon Department of Water Resources
158 12th Street NE
Salem, OR 97301-4172

Dear Mr. Parrow:

This is a letter of support for the Application for Allocation and Use of Conserved Water submitted to you by the Deschutes Resources Conservancy on behalf of the Squaw Creek Irrigation District. We believe that securing additional in-stream water for Squaw Creek will help to decrease in-stream temperatures, benefiting in-stream aquatic life. Salmonid spawning and rearing are the most sensitive beneficial uses in the Upper Deschutes Subbasin.

Squaw Creek is included on the State's 303(d) list (1998) of water quality limited streams for exceeding the State's temperature standard. On the 1998 303(d) list, Squaw Creek was listed for exceeding the 64°F criterion for salmonid rearing from Alder Springs (approximately river mile 1.5) to Maxwell Ditch (approximately river mile 24). In the draft 2002 303(d) list (currently out for public review), the creek is additionally listed for exceeding the 55°F salmonid spawning criterion during the period September 1-June 30.

The Oregon Department of Environmental Quality is presently developing a Total Maximum Daily Load (TMDL) plan for the Upper Deschutes Subbasin, including Squaw Creek. Although we have not yet completed our thermal modeling of Squaw Creek, we anticipate that the modeling will demonstrate that increasing in-stream flows will have the biggest impact on decreasing in-stream temperatures. This relationship has been shown in numerous other TMDLs that we have completed around the state. Because we do not have the regulatory authority to require increased in-stream flows to improve water quality, we are very supportive of voluntary efforts to do so. We commend the Squaw Creek Irrigation District and the Deschutes Resources Conservancy for developing and implementing the proposed piping project.

Thank you for the opportunity to comment on this important project. Please let me know if you need any additional information. I can be reached at (541) 388-6146, ext. 251.

Sincerely,

Dick Nichols, Manager
Bend Water Quality Section

STATE OF OREGON
COUNTY OF DESCHUTES
CERTIFICATE OF WATER RIGHT

THIS CERTIFICATE ISSUED TO

SQUAW CREEK IRRIGATION DISTRICT
PO BOX 2230
SISTERS, OREGON 97759

+ 78.35 + 5.0

confirms the right to use the waters of SQUAW CREEK, a tributary of THE DESCHUTES RIVER, for IRRIGATING 7,567.76 ACRES, POND MAINTENANCE, INDUSTRIAL USE, AND STOCK WATER.

= 7651.11

This right was confirmed by decree of the Circuit Court of the State of Oregon for CROOK County. The decree is of record at Salem, in the Order Record of the WATER RESOURCES DIRECTOR, in Volume 1, at Pages 121, 122, 123, 124, 435, 438, 445, 472, and 473. The dates of priority are 1869, 1885, 1887, 1889, 1893, 1895, 1899, 1900, 1901, 1903, and 1904.

The amount of water to which this right is entitled is limited to an amount actually beneficially used and shall not exceed 153.02 CUBIC FEET PER SECOND, BEING 151.35 CFS FOR IRRIGATION, 1.57 CFS FOR POND MAINTENANCE AND 0.10 CFS FOR INDUSTRIAL USE, or its equivalent in case of rotation, measured at the point of diversion from the source. The maximum diversion rate by priority date is:

WRIS
7638.6 ac

Priority	Acres (equivalent)	Maximum CFS
1869	48.00	0.96
1885	79.05	1.58
1887	150.00	3.00
1889	201.50	4.03
1893	39.50	0.79
1895	5716.75	114.34
1899	108.80	2.18
1900	54.00	1.08
1901	22.30	0.45
1903	360.60	7.21
1904	870.60	17.41
	<u>7651.02</u>	<u>153.02</u>

The point of diversion is located as follows:

SW 1/4 SW 1/4, SECTION 21, T. 15 S., R. 10 E., W.M.; 998 FEET NORTH AND 1211 FEET EAST FROM THE SW CORNER OF SECTION 21.

The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, is limited to ONE-FIFTIETH of one cubic foot per second per acre, or its equivalent for each acre irrigated during the irrigation season of each year.

A description of the place of use to which this right is appurtenant is as follows:

WATER RESOURCES DEPT.
SALEM, OREGON

This certificate is issued to confirm changes in use and place of use approved by an order of the Water Resources Director entered DEC 29 1997, in Special Order Volume 51, Page 1408, approving the Squaw Creek Irrigation District petition for water rights mapping under ORS 541.325 to 541.333. This certificate also confirms the transfers and supersedes the certificates listed in the above order.

The right to the use of the water for the above purposes is restricted to beneficial use on the lands or place of use described and is subject to all other conditions and limitations contained in said decree.
