4. The application requests an allocation of conserved water under Certificate 74135, in the name of Squaw Creek Irrigation District. Squaw Creek Irrigation District has changed its name, and is now know as Three Sisters Irrigation District (TSID).
5. TSID operates and maintains the water delivery system for the benefit of the landowners in the area.
6. TSID has an allocation of conserved water policy pursuant to OAR 690-018-0025.
7. Water has been used within the last five years according to the terms and conditions of the right, and no evidence is available that would demonstrate that the right is subject to forfeiture under ORS 540.610.
8. A diversion structure and ditch or a pump, pipeline and sprinkler system sufficient to use the full amount of water allowed under the existing right are present.
9. The portion of Certificate 74135 involved in the allocation of conserved water is as follows:
 Source: WYCHUS CREEK (formerly known as Squaw Creek)

Priority Date	Irrigation Acres	Pond Equivalent Acres	Total Equivalent Acres	Irrigation Maximum Rate (cfs)	Pond Maximum Rate (cfs)	Total Maximum Rate (cfs)
1895	1581.05	4.50	1585.55	31.62	0.09	31.71
1899	39.00	0.00	39.00	0.78	0.00	0.78

On-Farm Rate: ONE-FIFTIETH cfs per acre
 Type of Use: IRRIGATION and POND MAINTENANCE

10. The conservation project involves replacing a portion of the Black Butte Canal by burying 7,166 feet of 18-inch HDPE pipe and 6,244 feet of 24-inch HDPE pipe. The replacement of open, unlined ditches with pipelines is a proven technology for conserving water.
11. Public notice was published in the Department's weekly notice on May 16, 2006, and in the Bend Bulletin on May 12, 19 and 26, 2006, as required under OAR 690-018-0050. No comments were received in response to the notice.
12. Pursuant ORS 537.485, the applicant requests that the priority dates of the conserved water be the same as the originating right.
13. The proposed allocation of conserved water, once complete, will result in the conservation of 1.51 cfs. The quantity of water allowed for diversion under Certificate 74135 will be reduced by this quantity, as described below:

Priority Date	Rate (cfs)
1895	1.20
1899	0.03
1904	0.28
<i>Total</i>	1.51

14. Pursuant to OAR 690-077-0015, the proposed instream right is not a measurable portion of the Deschutes River and therefore cannot be extended from Wychus Creek, the source stream, into the receiving stream, the Deschutes River.
15. The proposed allocation of conserved water will not harm existing rights because the instream reach is limited to Wychus Creek, and there are no return flows to Wychus Creek. The return flows begin to enter the Deschutes River at approximately River Mile 130.8.
16. The application includes land use information forms completed and signed by representatives of Deschutes and Jefferson Counties planning departments demonstrating that the application is compatible with the local comprehensive land use plan.
17. Since no harm will occur to other water rights, no reduction in the quantity of conserved water to be allocated is required to mitigate for effects on other water rights.
18. After the allocation of conserved water, the water right held by the applicant will allow use of the following quantities of water:

Certificate	Originating Right Priority Date	Before Project Maximum Rate (cfs)	After Project Maximum Rate (cfs)	Conserved Water Rate (cfs)
74135	1895	31.71	30.51	1.20
	1899	0.78	0.75	0.03
	1904	7.56	7.28	0.28
	<i>Subtotal</i>	<i>40.05</i>	<i>38.54</i>	<i>1.51</i>

19. In consultation with the Oregon Department of Fish and Wildlife, Department of Environmental Quality, and Oregon Parks and Recreation Department, the Department has determined that conserved water is needed to support instream uses in Wychus Creek to provide for the conservation, maintenance and enhancement of aquatic and fish life, wildlife, fish and wildlife habitat and other ecological values.

20. Pursuant to OAR 690-018-0012(1), the applicant's propose that 80 percent of the conserved water be allocated to the State for an instream water right and that 20 percent be reserved for use by the Lower Bridge Sub-District #2 of Three Sister Irrigation District. The applicant further requests that 100 percent of the 1895 conserved water be allocated to the State for an instream water right and that 100 percent of the 1899 and 1904 conserved water be allocated to the Lower Bridge Sub-District #2 of Three Sister Irrigation District.

21. The amounts of water to be allocated to the applicant for new out-of-stream use, and the amount of water to be allocated to the State for an instream water right are:

Certificate	Priority Date	Conserved Water Rate (cfs)	New Lands Out-of-Stream Rate (cfs)	Instream Water Right Rate (cfs)
74135	1895	1.20	0.00	1.20
	1899	0.03	0.03	0.00
	1904	0.28	0.28	0.00
	<i>Subtotal</i>	<i>1.51</i>	<i>0.31</i>	<i>1.20</i>

22. The applicant's conserved water may be used for irrigation, pond maintenance, industrial use, and stock water within the Lower Bridge Sub-District #2 of Three Sister Irrigation District.

23. The stream reach for state's instream water right is from the previously authorized point of diversion, being:

Authorized Point of Diversion:

Twp	Rng	Mer	Sec	Q-Q	Survey Coordinates
15 S	10 E	WM	21	SW SW	998 FEET NORTH AND 1211 FEET EAST FROM THE SW CORNER OF SECTION 21

to the mouth of Wychus Creek, at River Mile 0.0.

24. The instream use shall allow the use and protection of flows from April 1 through October 31, and at other times when TSID is diverting water.

25. The applicant has not completed the project. Upon filing notice of completion of the conservation measures, the applicant request that the project be finalized pursuant to OAR 690-018-0062.

26. No other conditions or limitations are needed to prevent or mitigate for harm to existing water rights.

Conclusion of Law

The project described in the application CW-44 for allocation of conserved water is consistent with the criteria in ORS 537.455 to 537.500, as amended by 2003 HB 2456, and OAR Chapter 690, Division 18. Water will be conserved that can be allocated without harming other water rights.

Now, therefore, it is ORDERED:

1. The applicant has until December 31, 2009, to file a notice of completion of the conservation measures, unless the Director grants an extension of time.
2. When the applicant files the notice of completion, the project will be finalized, unless the applicant requests additional time to finalize the project and the Director grants an extension of time for the purposes of finalization.

On submittal of notice of completion the conservation project described in the application for allocation of conserved water, the Department shall:

3. Modify Certificate 74135. A new superseding certificate shall be issued to Three Sisters Irrigation District for the remaining portion of Certificate 74135 upon a determination that it is necessary to produce a certificate to confirm that remaining portion of the water right. Approval of this allocation of conserved water reduces the amount of water lawfully available under the remaining portion of Certificate 74135 as described below:

Priority Date	Rate (cfs)
1895	1.20
1899	0.03
1904	0.28
<i>Total</i>	1.51

The acreage, rate, duty, and priority dates are subject to modification by any previously approved transfers, cancellations, corrections, allocation of conserved water, or other prior modification to Certificate 74135. The associated priority date and rate of the remaining right shall be approximately:

Priority	Maximum CFS
1869	0.96
1885	1.58
1887	3.00
1889	4.03
1893	0.79
1895	113.14
1899	2.15
1900	1.08
1901	0.45
1903	7.21
1904	17.13

The maximum per acre rate of the acres affected by this allocation of conserved water, described below, is reduced from 1/50 cfs per acre to 1/52 cfs per acre.

Section 18

Township 14 South, Range 12 East, W.M.

The place of use shall be those lands described under Certificate 74135, as modified by any transfers completed pursuant to ORS 540.580 or other prior modifications.

All other conditions and limitations of the existing water right and any related decree shall be included in the superseding certificate.

4. The conserved water held by Lower Bridge Sub-District #2 of Three Sister Irrigation District may be used to irrigate a maximum of 16.11 acres of new land, being 1.56 equivalent-acres with a 1899 priority date and 14.55 equivalent-acres with a 1904 priority date, within Lower Bridge Sub-District #2 of Three Sister Irrigation District that are served by the Three Sisters Irrigation District point of diversion for Certificate 74135, being:

Authorized Point of Diversion:

Twp	Rng	Mer	Sec	Q-Q	Survey Coordinates
15 S	10 E	WM	21	SW SW	998 FEET NORTH AND 1211 FEET EAST FROM THE SW CORNER OF SECTION 21

The maximum rate for the lands shall be 1/52 cfs per acre-equivalent.

5. The conserved water held by Lower Bridge Sub-District #2 of Three Sister Irrigation District shall be reserved instream until a permanent place of use is determined. The priority date and rate that shall be reserved instream are:

Priority Date	Rate (cfs)
1899	0.03
1904	0.28
<i>Total</i>	0.31

This water will be protected in Wychus Creek from the authorized point of diversion (approximately River Mile 23.5) for Certificate 74135 at:

Authorized Point of Diversion:

Twp	Rng	Mer	Sec	Q-Q	Survey Coordinates
15 S	10 E	WM	21	SW SW	998 FEET NORTH AND 1211 FEET EAST FROM THE SW CORNER OF SECTION 21

to the mouth of the Wychus Creek, at River Mile 0.0.

6. Once a permanent place of use is determined for the applicant's share of the conserved water, Lower Bridge Sub-District #2 of Three Sister Irrigation District shall submit a statement consistent with OAR 690-018-0062 (3)(a) that identifies:
- The name and address of the person using the water;
 - A description of the type of beneficial use of the water;
 - A legal description of the place of use; and
 - A map that meets the standards in OAR 690-310-0050.

Prior to water being used at the new location, approval must be obtained from the Department. Once water has been used at the new location, if the applicant notifies the Department that the respective right has become appurtenant to the specified lands and provides satisfactory proof, the Department shall issue a certificate for the use of water at the identified location. If the water is to be permanently protected instream at the location described in #5 above, then the applicant does not need to submit proof that the water right has become appurtenant to the "specified lands." Instead, the applicant must notify the Department in writing of their desire to permanently have the water protected instream.

When required by the Department, the water user shall install and maintain a headgate, an in-line flow meter, weir, or other suitable device for measuring and recording the quantity of water diverted. The type and plans of the headgate and measuring device must be approved by the Department prior to beginning construction and shall be installed under the general supervision of the Department.

All other conditions and limitations of the existing water right, Certificate 74135, and any related decree shall be included in the new certificate.

7. A new instream certificate shall be issued for conservation, maintenance and enhancement of aquatic and fish life, wildlife, fish and wildlife habitat and other ecological values in Wychus Creek from the authorized point of diversion (approximately River Mile 23.5) for Certificate 74135 at:

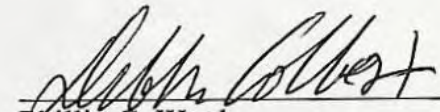

Authorized Point of Diversion:

Twp	Rng	Mer	Sec	Q-Q	Survey Coordinates
15 S	10 E	WM	21	SW SW	998 FEET NORTH AND 1211 FEET EAST FROM THE SW CORNER OF SECTION 21

to the mouth of the Wychus Creek, at River Mile 0.0.

The instream water right shall be for a total of 1.20 cfs, with a 1895 priority date, and shall replace a portion of instream water rights established pursuant to ORS 537.341 or 537.346 and shall be in addition to any instream water rights established pursuant to ORS 537.348 or 537.470, unless otherwise specified by a subsequent order establishing a new instream water right. The rights shall allow for the use and protection of flows from April 1 through October 31 and at other times when Three Sisters Irrigation District, or its successor, is diverting water.

RE: McKenzie Canyon Black Butte and Association Canal Conserved Water Project

Dear Bob:

Enclosed please find an application for an Allocation and Use of Conserved Water. The Deschutes River Conservancy (DRC) is the Agent for the Three Sisters Irrigation District (TSID) for this application and is acting as the primary point of contact for comments and questions that you may have. In addition to the complete application, I have enclosed the following exhibits for your information.

- Exhibit A: Evidence of Use Affidavit
- Exhibit B: Map of McKenzie Piping Project
- Exhibit E: Confirmation of District Approval
- Exhibit F: TSID Conserved Water Policy
- Exhibit G: Land-Use Information Form
- Exhibit H: Ownership and Lien Information
- Agency Support Letters
- Exhibit L: Water Right Holders Signature Pages

Please deduct the \$350 fee from our account with OWRD. If you have any questions about the application please feel free to contact me at 541.382.4077 ext. 17, or scott@deschutesrc.org.

Sincerely,

Scott McCaulou

3. IRRIGATION & WATER CONTROL DISTRICTS

Is the project within the boundaries of an irrigation district or water control district?
 Yes No

If yes, include Exhibit E and list the name and mailing address of the district:
Lower Bridge Sub-district #2 of TSID
PO Box 2230
Sisters, OR 97759

Did an irrigation district organized under ORS Chapter 545 or a water control district organized under ORS Chapter 553 file this allocation of conserved water?

Yes No

If yes, when was the District's OAR 690-018-0025 allocation of conserved water policy adopted? 7/12/05

4. CURRENT WATER RIGHT INFORMATION

A separate page providing the information in Section 4 must be completed for each certificate, permit, decree, or other right involved in the proposed allocation of conserved water

Water Right Subject to Transfer (check and complete one of the following):

Certificated Right 74135 Squaw Creek Decree

	Certificate Number	Permit Number or Decree Name
<input type="checkbox"/> Adjudicated, Un-certificated Right	_____	_____
	Name of Decree	Page Number
<input type="checkbox"/> Permit for which Proof has been Approved	_____	_____
	Permit Number	Date Claim of Beneficial Use Submitted
<input type="checkbox"/> Transferred Right for which Proof has been Filed	_____	_____
	Previous Transfer Number	Date Claim of Beneficial Use Submitted

Name on Permit, Certificate, or Decree: Squaw Creek Irrigation District

County: Deschutes & Jefferson

Provide the following information about the water right of record:

1. Priority Date: 1895, 1899, & 1904
2. Source of Water: Squaw Creek
3. Type of Use: irrigation, pond maintenance, and stock water

Does the application involve a water right on lands under more than one ownership?

Yes No

If yes, are all owners applicants to this allocation of conserved water?

Yes No. If no, see Exhibit J

A) What is the maximum rate and annual duty (volume) of water that may be diverted as stated on the water right of record? *(If the water right is only limited by rate, do not list a duty, and conversely, if the water is only limited by duty, do not list a rate.)*

1. Rate* (cfs): 40.05 (33.24 cfs 1895, 0.80 cfs 1899, 6.01 cfs 1904)

Note: 1 miner's inch = 1/40 cfs; 1 cfs = 448.8 gpm

2. Duty* (acre feet): _____

Note: 1 cfs = 1.98 ac-ft/day

* If there are multiple **Priority Dates** on the water right, list the rate and duty by priority date.

B) What is the maximum amount of water that can be diverted using the pre-project facilities? *(If the water right is only limited by rate, do not list a duty, and conversely, if the water is only limited by duty, do not list a rate.)*

1. Rate (cfs): 40.05

2. Duty (acre feet): _____

C) Describe the pre-project water delivery system. Include information on the diversion structure, pumps, and conveyance facilities (including canals, pipelines and sprinklers used to divert, convey and apply the water at the authorized place of use). *Provide sufficient detail to confirm that the applicant is ready, willing, and able to exercise the right.*

The total project (phases 1-5) will affect only the lower portion of the TSID delivery system which provides water to irrigate 2002.65 acres on 31 farms. Phase 5, of which this application pertains to, will pipe the end portion (13,410 ft.) of the McKenzie Canyon Black Butte Canal; the existing canal is currently an open lateral ditch. The Bureau of Reclamation's 1997 study, "Upper Deschutes Basin Water Conservation Study", quantifies seepage losses in the Black Butte Canal (BBC) as 0.60 to 0.064 ft³/ft²/day. Water rights served by the BBC total 40.045 cfs.

Water is diverted from Squaw Creek and then passed through McKenzie Reservoir and released through a Broad Crested Weir (designed by BOR) into the BBC. Over the last ten

years TSID has released an average of 7,860 AF of water into the BBC, of that only 4,830 AF (average) have been delivered to farm take-outs. All on-farm deliveries are measured with a weir or meter and are measured daily during the irrigation season.

5. CONSERVATION MEASURES

A) Describe the type of project, check all that apply:

- On-Farm efficiency project
- Distribution project, such as a ditch piping or lining project
- Other, _____

B) Describe the proposed changes to the physical system, operations and application methods that will result in the conservation of water. If these proposed changes will change the point of diversion, see point of diversion requirement for Exhibit B. *Provide sufficient detail for public noticing of the project.*

During the construction of this project 7,166 ft. of 18" HDPE and 6,244 ft. of 24" HDPE pipe will be buried in place of an open ditch, the Black Butte Canal, that serves 2002.65 acres in the Three Sisters Irrigation District. The project is expected to yield 1.45 cfs of conserved water, 100% (83% 1895, 2% 1899, 15% 1904) will be dedicated to instream use. The POD will remain the same, the water savings will come from reduced seepage due to piping an open ditch.

C) Place of Use*:

Township Range Section Quarter/Quarter Total No. Acres

** Not required for a distribution project that does not propose to affect the on-farm rate or duty.
If the entire water right is being affected, just state "entire right affected."*

6. CONSERVED WATER

A) What amount of water will be needed for the existing, authorized use after implementing conservation measures? *(If the water right is only limited by rate, do not list a duty, and conversely, if the water is only limited by duty, do not list a rate.)*

1. Rate* (cfs): 38.59 (30.83 cfs 1895, 0.77 cfs 1899, 5.79 cfs 1904)
2. Duty* (acre feet): _____

** If there are multiple Priority Dates on the water right, list the rate and duty by priority date.*

B) What amount of water will be conserved as a result of the implementation of the conservation measures? Subtract 6A from the smaller of 4A or 4B under "irrigation system" above.

1. Rate* (cfs): 1.20 (1895), 0.03 (1904), .22 (1899)
2. Duty* (acre feet): _____

** If there are multiple Priority Dates on the water right, list the rate and duty by priority date.*

C) What portions of the conserved water will be allocated to the state and applicant?

1. Portion going to the state (list by percent, rate and duty):

83%(1895)_Percent 1.20 (1895, protected instream from April 1st to November 1st and all other times when TSID is diverting)_Rate (cfs) n/a_Duty (AF)

2. Portion going to the applicant (list by percent, rate and duty):

17% (2% 1899, 15% 1904)_Percent 0.25 cfs total (0.03 1899, 0.22 1904)
Rate (cfs) n/a_Duty (AF)

D) The priority for the conserved water is requested to be:

- The same as the original right, or
 One minute junior to the original right.

- E) If all or part of the applicants' portion of the conserved water is to be used for an out-of-stream use at an identified location:
1. Name and address of the person using the water: _____
 2. Description of the type of beneficial use of the water: _____
 3. Legal description of the place of use: _____
- F) If all or part of the applicants' portion of the conserved water is to be leased*, dedicated or temporarily reserved instream, a statement identifying the quantity of water to be managed as an instream water right: 0.22 cfs (1904) and 0.03 cfs (1899) will be leased instream by Lower Bridge Sub-district #2 of TSID
- * Water can be temporarily protected instream without filing an OAR 690-077 Short-Term Instream Lease application.

7. LOCATION OF PROPOSED USE

- A) For new out-of-stream uses, describe the boundaries of the expected area within which the diversion structures and places of use of the applicants' conserved water right would be located. This is land other than that to which this water right is appurtenant. See Exhibit B.

- B) For instream uses, to the extent possible, identify the stream reach(es) for which the state's portion of the conserved water should be managed under an instream water right. Be as explicit as possible, by giving river miles, or other identifying information that might be included in the instream certificate.
From the Three Sisters Irrigation District diversion on Squaw Creek (approx. RM 23.5) to the mouth of Squaw Creek (RM 0) and to RM 120 near Lake Billy Chinook on the Deschutes River.
- C) Describe the proposed benefit to instream uses.
 for instream use for conservation, maintenance and enhancement of aquatic and fish life, wildlife, fish and wildlife habitat and other ecological values.
 other, please describe: _____

8. MITIGATION

- A) Describe any expected effects on other water rights from the proposed allocation of conserved water. Identify what currently happens to the water that is proposed to be conserved.
No effects to other appropriators are expected from the proposed allocation of conserved water. The water to be conserved is lost from the system through seepage and evaporation and is not available to other appropriators on Squaw Creek.
- B) Describe any mitigation or other measures that are planned to avoid harm to other water rights.
No harm to other water rights will occur from this project.

9. FUNDING

If more that 25% of the conserved water is proposed to be allocated to the applicant then provide Exhibit C and identify what portion of project funds (expressed as a percentage) come from federal or state public sources that are not subject to repayment. n/a

Does the Oregon Watershed Enhancement Board (OWEB) have a contractual interest in this project?

Yes No

If yes, what is the OWEB project number? #203-181

10. PROJECT SCHEDULE

If project is not yet complete:

Proposed date construction has/will begin: March 2006

Proposed date construction will be completed and notice of project completion will be filed: December 2006

Proposed date the project will be finalized: upon completion

If project is already complete:

Date it was implemented: _____ (Provide Exhibit K)

The applicant requests:

That the allocation be finalized, or

Additional time be granted to prove that the project worked to the applicant's satisfaction before finalizing the allocation of conserved water. Indicate the amount of time desired _____ (up to five years after completion of the project may be allocated).

11. ACKNOWLEDGMENT OF FORFEITURE

Complete this if the Certified Water Right Examiner's map shows less acreage has been irrigated over the past five years than allowed under the right.

I am aware that _____ acre(s) have not been irrigated for the last five years and I am abandoning that portion of the water right and make no further claim for the water. I ask that this _____ acre(s) portion of the right be permanently canceled.

12. EXHIBITS

Check each of the following attachments included with this application. All attachments are required unless otherwise noted. The application will be returned if all required attachments are not included.

Exhibit (Form) A – Evidence of Use

Affidavits

At least one Evidence of Use Affidavit documenting that the right has been used during the last five years or that the right is not subject to forfeiture under ORS 540.610 is attached. The affidavit provided must be the original, not a copy. The form is available at

Exhibit H - Ownership & Lien Information

Provide if application involves:

- on-farm efficiency project, and/or
- distribution project affecting specified lands.

Provide a report of ownership and lien information or a current recorded deed to the subject lands.

(Name) Marc & Pamela Thalacker
(Mailing address) 70625 Lower Bridge Way
(City, State, Zip Code) Terrebonne, OR 97760
(Telephone number) (541) 923-6227

If additional landowners, enter landowner information below

Note: The numbering associated with this form corresponds to that found on the "Standard Instream Lease Application" form. The "Pooled Lease" form and "Pooled Landowner" form(s) are used to provide the same information as the "Standard Instream Lease Application" form. Consequently, the numbering on this form is not always sequential.

~I~ Ownership and Water Right Information

1.1 Lessor #1 is the owner, or authorized agent for owner of property located at: Township 14, Range 12, Section 07 SW/SE and Tax Lot number 01401, 14-12-07 SE/SE-01401, 14-12-18 NW/NE-01401, 14-12-18 NE/NE, 14-12-18 SE/NE, 14-12-18 SW/NE, 14-12-18 NW/SE, 14-12-17 SW/NW-01401. If the water right appurtenant to these lands is also appurtenant to lands owned by others, then Attachment 1, (tax lot map of lessor's property) needs to be included.

1.3 For the lands being leased, list all water rights appurtenant to the lessor's property. Indicate if there are any supplemental or overlying rights.

Certificate No. 74135 p. 6

1.4 Are some or all of the lands being leased part of a Conservation Reserve Enhancement Program. Yes No

1.5 **Subject Water Rights.** Landowner proposes to lease the water rights shown on the map attached as Exhibit 5-B (this information may be included on Exhibit 5-A, or an additional map may be attached). (Crosshatch the area of water rights being leased). Attached map(s) must identify property owner, Township, Range, Section and 1/4 1/4, tax lot number, map orientation and scale.

Additional Subject Water Rights? (Please use Additional Landowner Information form.)

Conditions or other limitations, if any: N/A

If you need to enter another leased right, please use the additional water rights form.

1.6 **Validity of rights.** Lessor(s) attests (mark one) that:

- The water has been used over the past five years according to the terms and conditions of the owner's water right certificate or as an instream water right or
- The water has not been used over the past five years according to the terms and conditions of the owner's water right certificate, however the water right is not subject to forfeiture under ORS 540.610(2)()(include necessary supporting documentation as Attachment 3).

~II~ Instream Water Right Information

2.3 **Term of lease.** This lease shall terminate on July 14th. (If there is a conflict between the Pooled District Form and this form, the Pooled District Form will be the official term of the lease.)

~III~ Other Information

3.1 **Accuracy.** The Undersigned Lessor/s, Lessee and Trustee declare that, to the best of their knowledge and belief, the information contained in this lease is true, correct and complete. If after the lease is signed, any information is determined to be false, the lease may be modified or terminated. This lease only exercises the water rights being leased; for the term of the lease; it shall not be construed to overcome any claim that the water right may otherwise be subject to forfeiture for nonuse pursuant to ORS 540.610 during the period of time prior to the execution of the lease.

3.2 **Lease.** All Lessors agree to lease the water rights listed in 1.4 for instream use for the term of this Agreement through Lessee to Trustee, the Oregon Water Resources Department, pursuant to the provisions of ORS 537.348(2) and OAR 690-077-0077.

new injury review shall be required, and a prior short term lease shall not set a precedent for the amount of water to be leased or transferred instream.

3.4 Suspension of original use. During the period of the lease, the owner agrees to suspend use of water allowed under the subject water rights and under any water right that is supplemental to the subject water rights. In the event that a supplemental water right is not part of this lease, it may be subject to forfeiture.

3.5 Termination provision.

- For multiyear leases, lessor *shall* have the option of terminating the lease each year, prior to the lease being exercised (_____), with 30 day written notice to the Department provided by the Irrigation District, Other Water Purveyor or Lessee (if different than Department). The lessor must contact the Irrigation District, Other Water Purveyor, or Lessee (if different than Department) to indicate their interest in terminating the lease agreement.
- For multiyear leases, lessor *shall not* have the option of terminating the lease each year, prior to the lease being exercised, with written notice to the Department.

3.6 Modification to prevent injury. Allocation of water to the instream use described in Section 2.2 during the term of this lease is not reasonably expected to cause injury to other rights to use water from the same source. If injury is found after this lease is signed, the lease may be modified or terminated to prevent injury.

DESCHUTES
WATER EXCHANGE

**Deschutes Water Exchange
Mitigation Water Leasing Program 2004
Squaw Creek Irrigation District**

Participating landowners represent and warrant that they own the land to which the water rights are appurtenant, that they have the authority to lease the water rights, that the water rights are free and clear of liens, claims or encumbrances that restrict landowner's ability to enter into the lease and that, to the best of their knowledge, the water rights have been beneficially used over the past five years and are valid and eligible to be leased.

Landowner agrees to lease their water rights to the Deschutes Water Exchange - a project of the Deschutes Resources Conservancy - for use as a groundwater mitigation lease under OAR Chapter 690, Division 515 for the 2004 irrigation season in consideration of a payment of \$7.00 per acre foot delivered instream.

Payment will be made by the DRC to the District upon approval of the lease by the Water Resources Department. The District shall thereupon promptly credit the landowner's account.

Re: Utilization of Water Rights for 6.8 acres, McKenzie Canyon
T:14, R:11, S:23, Qtr SW, Tax Lot # 1400

On July 2-4, 2005 and August 20-21, 2005 we irrigated our pasture utilizing our Honda 5 hp gas powered 1400 HD portable irrigation pump. We were assisted in this project by Dian Forster in July and by David Partlow in August.

On July 15-16, 2006 Thompson Pumps of Bend, OR will be installing a permanent electronic irrigation pump and main line on property.

Please let me know if I can be of any further assistance.

Three Sisters Irrigation District

Conserved Water Policy

Adopted July 5th, 2005

A. Authority & Purpose. The Board of Directors (the "**Board**") of the Three Sisters Irrigation District (the "**District**") is required to adopt this Conserved Water Policy (this "**Policy**") pursuant to Oregon Administrative Rule ("**OAR**") 690-018-0025 if the district wants to allocate conserved water. The rule requires that if the District seeks allocations of conserved water pursuant to ORS 537.455 to 537.500, then it must adopt a policy that, at a minimum:

- Describes how water saved by conservation measures will be allocated by the District
- Describes how the District will address the allocation of conserved water percentages under ORS 537.470
- Provides District patrons the opportunity to fund a share of the conservation project that is proportionate to the patron's share of the water rights involved in the allocation of conserved water and to receive a corresponding share of the conserved water
- Provides District patrons an opportunity to petition for a vote by all District patrons on this Policy
- Provides District patrons an opportunity to appeal a proposed District conservation project to the Board for failure to follow this Policy

The purpose of this Policy is to provide District patrons with the information required by OAR 690-018-0025 and to set the procedures by which this Policy will be implemented.

B. Definitions. The following definitions shall apply in this Policy.

1. "**Commission**" means the Water Resources Commission.
2. "**Conservation**" means the reduction of the amount of water diverted to satisfy an existing beneficial use achieved either by improving the technology or method for diverting, transporting, applying or recovering the water or by implementing other approved conservation measures.
3. "**Conserved Water**" means that amount of water that results from conservation measures, measured as the difference between:
 - a. The smaller of the amount stated on the water right or the maximum amount of water that can be diverted using the existing facilities; and

RECEIVED

APR 13 2006

WATER RESOURCES DEPT
SALEM, OREGON

- b. The amount of water needed after implementation of conservation measures to meet the beneficial use under the water right certificate.
4. **“District Allocation”** means the amount of Conserved Water allocated to the District by the Commission.
5. **“Funding Patron”** means a patron or patrons of the District that funds all or a portion of a water conservation project as provided in paragraph C of this Policy.
6. **“Funding Partner”** means a granting agency including Federal, State or local agencies as well as non-profits that fund a portion of the water conservation project. Examples include but not limited to DRC- Deschutes River Conservancy, OWEB- Oregon Watershed Enhancement Board, NFWF- National Fish and Wildlife Foundation, BOR- Bureau of Reclamation, NRCS- National Resources Conservation Service, USFS – United States Forest Service, Soil & Water Conservation Districts, Watershed Councils, PGE, Tribes of Warm Springs, Bonneville Environmental Foundation, Northwest Power Conservation Council, Oregon Water Trust, etc.
- C. **Applicability.** This Policy applies only to applications for allocations of conserved water filed with the Oregon Water Resources Department by the District after November 5, 2004. This Policy does not apply to applications for allocations of conserved water filed by individuals, including District patrons.
- D. **Conservation Projects with Funding Partners.** For funding partners, conserved water will be divided into 2 portions. Saved water portion and conserved water application portion. The saved water will be used to firm up supply of the deliveries to existing water rights in the district. The conserved water application portion will be used to secure grant funding from funding partners to pay for the materials needed for the conservation project.

For a Funding Partner:

Total project cost	\$600,000.00
Total conserved water	1,000 acre feet
Funding partners contribution	\$300,000.00
Conserved water portion	500 acre feet
(covers 25% in stream required by statute)	
District in-kind Contribution	\$300,000.00
Saved water portion	500 acre feet
(shared by all patrons)	
For funding partners cost per acre ft	\$600.00

- E. **Patrons May Fund Part of Water Conservation Project.** Patrons may fund a water conservation project in an amount that is proportionate to the patron’s share of the water rights involved in the allocation of Conserved Water. Patrons that provide funding to the District for a water conservation project in advance, or within one year of, the District

first making expenditures for the conservation project shall be a Funding Patron and receive the portion of the District Allocation to which Funding Patron is entitled under this Policy. Proportionate costs will include all costs associated not only with the completion of the project, but those costs associated with the planning and design of the project, all accompanying and necessary application and processing fees, including but not limited to legal and consulting fees to secure the Final Order from the Oregon Water Resources Department, and/or to respond to any legal challenges subsequent to receipt of the Final Order until conclusively resolved as determined by the Board of Directors.

For a Patron Funding 100% of Project:

Total project costs	\$600,000.00
Total conserved water	1,000 acre feet
Minimum in-stream contribution (required by statute)	250 acre feet – 25%
Net available acre feet to funding patron	750 acre feet
For funding patrons cost per acre ft	\$800.00

- F. **Allocation of Conserved Water.** Except for a Funding Patron, no patron shall be entitled to any of the District Allocation other than the amount necessary to maintain the patron's full delivery rate at its regular turn out(s). A Funding Patron shall be entitled to a portion of the District Allocation equal to the percentage of the funding for the water conservation project paid to the District by the Funding Patron.

- G. **Petitions to Vote on Policy.** District patrons may petition the Board to hold a vote of all District patrons on the approval of this Policy. The petition must be signed by fifty or more qualified electors within the District pursuant to ORS 545.199(1)(b) to be valid and to cause the District to hold a vote. Upon receiving a valid petition, the District shall hold a vote of all District patrons. The vote shall be whether to approve or reject this Policy. The vote shall be conducted according to the laws and procedures that govern District elections.

- H. **Approval of Project by Board.** Proposed water conservation projects shall be discussed and approved by the Board at any one of its regularly scheduled Board meetings. The Board shall limit its consideration to whether the proposed water conservation project complies with this Policy. Patrons may comment on the compliance of the proposed water conservation project with the conservation policy during the Board meeting at which it is discussed.

- I. **Appeal of Water Conservation Projects.** If the Board approves the proposed water conservation project, any patron in good standing may appeal the Board's decision in writing within two weeks from the date of the Board's decision. The appeal shall include the name, address, and telephone number of the patron appealing the Board's decision, a concise statement of the reasons the patron believes the proposed water conservation project does not comply with this Policy, and a concise statement of how the water conservation project should be modified to comply with this Policy. The Board shall consider a properly filed appeal at its next regularly scheduled meeting. The patron

appealing the Board's decision shall have an opportunity to address the Board concerning the patron's appeal. The Board may take any of the following actions: (1) grant the appeal and reject the proposed water conservation project, (2) modify the proposed water conservation project as proposed by the appealing patron to comply with this Policy, (3) direct the District Manager to modify the proposed water conservation project so as to comply with this Policy, or (4) reject the appeal and approve the proposed water conservation project as proposed.

- J. Policy Review and Updates.** The Board shall review and update this Policy at the first regularly scheduled Board meeting following every fifth anniversary of the Board either adopting or reviewing and updating this Policy. The Board may, in its sole discretion, review and update this Policy at any other Board meeting. The Board shall follow the process and provisions of this Policy, as required by OAR 690-018-0025(2), whenever reviewing and updating this Policy.

Re: McKenzie Canyon Conserved Water Application

Dear Danielle;

The Oregon Department of Fish and Wildlife (ODFW) is writing in support of the conserved water application and proposed instream water transfer associated with the McKenzie Canyon piping project implemented in cooperation with the Three Sisters Irrigation District (TSID).

It is ODFW understanding that the project will result in piping of 7166 feet of open canal and reduce seepage losses by 1.45 cfs. The applicants propose to transfer and permanently protect 1.20 cfs of the conserved water instream from the TSID diversion on Whychus Creek downstream to Lake Billy Chinook. The remaining water would be leased instream in the same stream reach. This proposed transfer will result in improved habitat for redband trout, brown trout, and bull trout in Whychus Creek and the Deschutes River from the TSID diversion downstream to Lake Billy Chinook and provide benefits to steelhead, Chinook, and redband trout in the lower Deschutes River.

Thank you for the opportunity to provide comments.

Sincerely,

Steven Marx

RE: TSID Piping Project resulting in Conserved Water

Dear Ms. MacBain,

Thank you for the opportunity to comment on your application to the Water Resources Department to conserve, permanently and in-stream, 1.20cfs of water with a priority date of 1895.

The Oregon Parks and Recreation Department (OPRD) is supportive of projects that result in permanent, instream flows. This project will help improve the condition of Whychus Creek and the Middle Deschutes River Scenic Waterway.

The OPRD supports this piping project for the purposes of the conserved water program.

Sincerely,

Jan E. Houck
Water Recreation Program Coordinator
