Authority

Oregon Administrative Rules (OAR) 690-380-5140(2) authorizes the Department to grant an extension of time to complete a transfer.

OAR 690-380-6020 establishes an application process and criteria for the review of extensions of time to complete a transfer as authorized by a final order issued under OAR Division 380.

OAR 690-380-6020 (3) establishes that extensions are granted for one year, from October 1 to October 1 of each year. Extensions may be granted for longer time if the applicant can justify the need for a longer period of time by submission of pertinent evidence.

Findings of Fact

1. On January 5, 2026, the Department received an application for extension of time for Transfer Application T-13364.
2. On April 29, 2021, the Department signed an order, which was mailed on April 30, 2021, approving Transfer Application T-13364 for change in places of use, points of diversion, and add additional points of diversion. The order was recorded in Special Order Volume 120, Pages 309-316. The order set a transfer completion date of October 1, 2022.
3. On February 10, 2023, the Department signed an order, which was mailed on February 13, 2023, approving an extension of time. The order was recorded in Special Order Volume 127, Pages 356-357. The order extended the transfer completion date to October 1, 2025.

NOTICE OF RIGHT TO PETITION FOR RECONSIDERATION OR JUDICIAL REVIEW

This is an order in other than a contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-0080, you may petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

4. Since the approval of the previous extension of time, the applicant has completed installation of wheel lines, pivots, a head gate, and flow meter.
5. To fully complete the change, the applicant needs to install an ODFW approved fish screen and make full beneficial use of the water.
6. The applicant has requested that the time for completion of beneficial use be extended to October 1, 2030. Consistent with OAR 690-380-6020, the applicant provided sufficient justification in the extension application to grant an extension for more than one year. The Department will extend the transfer completion date to October 1, 2030.

Conclusions of Law

Pursuant to OAR 690-380-6020, the Director of the Water Resources Department concludes the applicant has shown reasonable diligence to complete the transfer within the time period established by the order approving Transfer Application T-13364.

Hi Stacy,

I think we decided that we would have liked the transfer to be different but can't change or cancel it now. They are working on the fish screens so I guess we have to push it through.

Thanks

Matt

Transfer Review Criteria (OAR 690-380-4010)

21. Water has been used within the last five years prior to the submittal of Transfer Application T-13364 according to the terms and conditions of the rights. There is no information in the record that would demonstrate that the rights are subject to forfeiture under ORS 540.610.
22. A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing rights were present within the five-year period prior to submittal of Transfer Application T-13364.
23. The proposed changes as conditioned would not result in enlargement of the rights.
24. The proposed changes would not result in injury to other water rights.
25. The Oregon Department of Fish and Wildlife (ODFW) has determined that a fish screen is necessary at the new point of diversion to prevent fish from entering the diversion and that the diversion is not currently equipped with an appropriate fish screen. This diversion may be eligible for screening cost-share funds.
26. All other application requirements are met.

Conclusions of Law

The additional points of diversion, change in points of diversion, and change in places of use proposed in Transfer Application T-13364 are consistent with the requirements of ORS 537.705 and 540.505 to 540.580 and OAR 690-380-5000.

Now, therefore, it is ORDERED:

1. The additional points of diversion, changes in points of diversion, and change in places of use proposed in Transfer Application T-13364 are approved.
2. The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificates 5276, 7624, 38348, 41095, and 62705 and any related decree.
3. Water right Certificates 5276, 7624, 38348, 41095, and 62705 are cancelled. A new certificate will be issued describing that portion of Certificate 5276 not affected by this transfer.
4. The quantity of water diverted at the new points of diversion shall not exceed the quantity of water lawfully available at the original point of diversion.
5. The quantity of water diverted at the proposed additional points of diversion, together with that diverted at the original point of diversion, shall not exceed the quantity of water lawfully available at the original point of diversion.
6. The former places of use of the transferred rights shall no longer receive water under the rights.

7. Prior to diverting water, the water user shall install a headgate to control and regulate the quantity of water diverted. The type and plans of the headgate must be approved by the Department prior to beginning construction and shall be installed under the general supervision of the Department. The water user shall maintain the headgate as required by the Department.
8. Water use measurement conditions:
 - a. **Before water use may begin** under this order, the water user shall install a **weir** or, an instantaneous and totalizing flow meter, or with prior approval of the Director, another suitable measuring device, at each point of diversion (new and existing).
 - b. The water user shall maintain the meters or measuring devices in good working order.
 - c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.
9. Prior to diverting water, the water user shall install an approved fish screen at the new point of diversion and shall provide to the OWRD a written statement from Oregon Department of Fish and Wildlife (ODFW) that the installed screen meets the state's criteria, or that ODFW has determined a screen is not necessary.

The water user shall operate and maintain the fish screen at the new point of diversion consistent with ODFW's operational and maintenance standards. If ODFW determines the screen is not functioning properly, and is unsuccessful in working with the water user to meet ODFW standards, ODFW may request that OWRD regulate the use of water until OWRD receives notification from ODFW that the fish screen is functioning properly.
10. Full beneficial use of the water shall be made, consistent with the terms of this order, on or before **October 1, 2022**. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the changes and full beneficial use of the water.
11. After satisfactory proof of beneficial use is received, new certificates confirming the rights transferred will be issued.

1. For irrigation calculate cfs for each water right involved as follows:
 - a. Divide total authorized cfs by total acres in the water right (for C12345, $1.25 \text{ cfs} \div 100 \text{ ac}$); then multiply by the number of acres to be transferred to get the transfer cfs ($\times 45 \text{ ac} = 0.56 \text{ cfs}$).
 - b. If the water right certificate does not list total cfs, but identifies the allowable use as $1/40$ or $1/80$ of a cfs per acre; multiply number of acres proposed for change by either 0.025 ($1/40$) or 0.0125 ($1/80$). (For C87654, $45.0 \text{ ac} \times 0.0125 \text{ cfs/ac} = 0.56 \text{ cfs}$)
2. Add cfs for the portions of water rights on all the land included in the transfer; however **do not count cfs for supplemental rights on acreage for which you have already calculated the cfs fee for the primary right on the same land**. The fee should be assessed only once for each "on the ground" acre included in the transfer. (In this example, blank 5a would be only 0.56 cfs , since both rights serve the same 45.0 acres. Blank 5b would be 0 and Line 5 would then also become 0).

Subject: Water right transfer for the Cogswell Creek project

Date: 1/16/20

The Cogswell Creek fish passage project involves improvements to fish passage in Cogswell Creek to enable native redband trout to migrate from Goose Lake through more than five irrigation diversions.

The attached transfer submitted by Robin Vincent will enable the project to reduce the number of diversions currently in use. The reduced number of diversions provides a significant cost savings to the OWEB project.

Sincerely,

Brandi Neider

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). Additional remarks: Certificate 41095 is supplemental to Certificate 7624 with priority date of May 15, 1925 and Certificate 38348 with priority date of May 11, 1965. This transfer proposes to make this water right supplemental to Certificate 5276 with a priority date of December 31, 1872. The justification for switching the water right this right is supplemental to is that being supplemental to a more senior water right will mean the supplemental right will be used with less frequency, therefore using less of the supplemental source.

SUBJECT: Water Right Transfer Application T-13364

Please find enclosed the Preliminary Determination indicating that, based on the information available, the Department intends to approve application T-13364. This document is an intermediate step in the approval process; water may not be used legally as proposed in the transfer application until a Final Order has been issued by the Department. Please read this entire letter carefully to determine your responsibility for additional action.

A public notice is being published in the Department's weekly publication and in the Lake County Examiner newspaper, simultaneously with issuance of the Preliminary Determination. The notice initiates a period in which any person may file either a protest opposing the decision proposed by the Department in the Preliminary Determination or a standing statement supporting the Department's decision. The protest period will end 30 days after the last date of newspaper publication.

If no protest is filed, the Department will issue a Final Order consistent with the Preliminary Determination. You should receive a copy of the Final Order about 30 days after the close of the protest period.

If a protest is filed, the application may be referred to a contested case proceeding. A contested case provides an opportunity for the proponents and opponents of the decision proposed in the Preliminary Determination to present information and arguments supporting their position in a quasi-judicial proceeding.

Please do not hesitate to contact me at 503-986-0892 or Joan.M.Smith@oregon.gov if I may be of assistance.

Sincerely,

for Joan Smith

Authority

Oregon Revised Statutes (ORS) 537.705 and 540.505 to 540.580 establish the process in which a water right holder may submit a request to transfer the point of appropriation, place of use, or character of use authorized under an existing water right. Oregon Administrative Rules (OAR) Chapter 690, Division 380 implement the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

Transfer Review Criteria (OAR 690-380-4010)

20. Water has been used within the last five years prior to the submittal of Transfer Application T-13364 according to the terms and conditions of the rights. There is no information in the record that would demonstrate that the rights are subject to forfeiture under ORS 540.610.
21. A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing rights were present within the five-year period prior to submittal of Transfer Application T-13364.
22. The proposed changes as conditioned would not result in enlargement of the rights.
23. The proposed changes would not result in injury to other water rights.

24. The Oregon Department of Fish and Wildlife (ODFW) has determined that a fish screen is necessary at the new point of diversion to prevent fish from entering the diversion and that the diversion is not currently equipped with an appropriate fish screen. This diversion may be eligible for screening cost-share funds.
25. All other application requirements are met.

Determination and Proposed Action

The additional points of diversion, change in points of diversion, and change in places of use proposed in Transfer Application T-13364 appear to be consistent with the requirements of ORS 537.705 and 540.505 to 540.580 and OAR 690-380-5000. If protests are not filed pursuant to OAR 690-380-4030, the application will be approved.

If Transfer Application T-13364 is approved, the final order will include the following:

1. *The additional points of diversion, changes in points of diversion, and change in places of use proposed in Transfer Application T-13364 are approved.*
2. *The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificates 5276, 7624, 38348, 41095, and 62705 and any related decree.*
3. *Water right Certificates 5276, 7624, 38348, 41095, and 62705 are cancelled. A new certificate will be issued describing that portion of Certificate 5276 not affected by this Transfer.*
4. *The quantity of water diverted at the additional points of diversion shall not exceed the quantity of water lawfully available at the original point of diversion..*
5. *The quantity of water diverted at the new additional points of diversion, together with that diverted at the original point of diversion, shall not exceed the quantity of water lawfully available at the original point of diversion.*
6. *The former places of use of the transferred rights Certificates 5276, 7624, 38348, 41095, and 62705 shall no longer receive water under the rights.*
7. *Prior to diverting water, the water user shall install a headgate to control and regulate the quantity of water diverted. The type and plans of the headgate must be approved by the Department prior to beginning construction and shall be installed under the general supervision of the Department. The water user shall maintain the headgate as required by the Department.*

8. *Water use measurement conditions:*

- a. *Before water use may begin under this order, the water user shall install a weir or, an instantaneous and totalizing flow meter, or with prior approval of the Director, another suitable measuring device, at each point of diversion (new and existing).*
- b. *The water user shall maintain the meters or measuring devices in good working order.*
- c. *The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.*

9. *Prior to diverting water, the water user shall install an approved fish screen at the new point of diversion and shall provide to the OWRD a written statement from Oregon Department of Fish and Wildlife (ODFW) that the installed screen meets the state's criteria, or that ODFW has determined a screen is not necessary.*

The water user shall operate and maintain the fish screen at the new point of diversion consistent with ODFW's operational and maintenance standards. If ODFW determines the screen is not functioning properly, and is unsuccessful in working with the water user to meet ODFW standards, ODFW may request that OWRD regulate the use of water until OWRD receives notification from ODFW that the fish screen is functioning properly.

10. *Full beneficial use of the water shall be made, consistent with the terms of this order, on or before **October 1, 2022**. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the changes and full beneficial use of the water.*

11. *After satisfactory proof of beneficial use is received, new certificates confirming the rights transferred will be issued.*

Also we will appreciate having you let us know if there are typographical errors that need to be corrected.
2. A report of landownership for the lands to which the water right(s) are appurtenant (the FROM lands) is required. **The report must be prepared by a title company and meet the criteria below.** (*Reports may be called by various names, such as Customer Service Report, Property Analysis Report (PAR), List Pack, Lot Book Report, etc.*)
 - a) The title company's report must either be:
 - i) prepared within 3 months of the draft Preliminary Determination showing current ownership, or
 - ii) prepared within 3 months of recording of a water right conveyance agreement, or
 - iii) prepared at any time, but showing ownership at the time a water right conveyance agreement was recorded.
 - b) The ownership report shall include:
 - i) Date the ownership report was generated or prepared; and
 - ii) List of owners at that time; and
 - iii) Legal description of the property where the water right to be transferred is currently located.
 - c) You will need to submit a notarized statement of consent from any landowner listed in the ownership report who is not already included in the transfer application, or other information such as a water right conveyance agreement, if applicable.

3. Notice of this transfer will need to be published in a newspaper with general circulation in the area where the water rights are currently located. You will be responsible for the charges. Please confirm the Lake County Examiner as the newspaper you prefer to publish in so we can get an accurate estimate of the cost.

Conditions to your water right...

The Watermaster has required a water measurement devices at the new diversion points prior to diversion of water. Enclosed is a contact information sheet to assist you in pursuing additional information or approval of the required (or alternate) device(s).

This transfer will require installation of a fish screen at the new diversion points **prior to diversion of water. You may not divert water prior to installation and approval of the fish screen by the Oregon Department of Fish and Wildlife (ODFW).** You may wish to contact the ODFW staff person listed on the enclosed contact sheet for more information about the screen and to determine a reasonable timeline.

Please note the proposed date by which all conditions must be met: October 1, 2022. If the required completion date is insufficient to comply with any of the conditions, you may extend the date at no cost to you during this stage of processing. Please let me know by the comment deadline so we can make the proper arrangements to get you the time you need.

What happens next...

Once the Preliminary Determination is issued a publication period is required. Because there is more than ¼ mile between the new and the authorized points of diversion, the Department will publish notice of the transfer in a local newspaper having a general circulation in the area of the water right at least once per week for two consecutive weeks. You are responsible for sending a check to cover the cost of publication prior to the issuance of the Preliminary Determination and publication of notice.

Issuance of the Preliminary Determination will occur shortly after we receive:

1. Your written response to the conditions and proposed action in the draft Preliminary Determination (e-mail is acceptable); and
2. Report of ownership, and affidavits of consent from any landowners shown in the ownership report who have not signed the transfer application;

If we do not receive the items listed above by December 21, 2020, a Preliminary Determination may be issued denying the application as incomplete.

Please do not hesitate to contact me at 503-986-0892 or Joan.M.Smith@oregon.gov if I may be of assistance.

Sincerely,

Transfer Specialist

Oregon Department of Fish and Wildlife
Water Right and Diversion Transfer Comment Form
(ODFW provides to WRD so that WRD can make findings according to statutory requirements.)

Reference Transfer #: T-13364, Vincent

Date of review: 2-11-20

A. Please check box if you believe there is a potential for injury to an instream water right.

☐ The Oregon Department of Fish and Wildlife (ODFW) believes this proposed transfer may injure an instream water right(s) on stream, tributary to _____, because _____.

(Please attach any available supporting information.)

Note: This will prompt WRD to make a determination whether the transfer will injure an instream water right. (OWRD makes the determination of injury to a water right, while ODFW's role is to raise concerns, and to evaluate proposed mitigation and net benefit to the resource if OWRD consents to injury of an instream water right.)

B. Please check one of the following five boxes related to fish screen requirements pursuant to ORS 540.525 or 540.532:

☐ **1. Screen Maintain**

[Select this option if the new Point of Diversion (POD) requires a fish screen and is currently equipped with an appropriate fish screen that will still be in compliance if the transferred water is diverted from this POD.]

Note: This option will yield the following:

Finding of Fact: The Oregon Department of Fish and Wildlife has determined that a fish screen is necessary at the new point of diversion to prevent fish from entering the diversion and that the diversion is currently equipped with an appropriate fish screen.

Condition: The water user shall operate and maintain an approved fish screen at the new point of diversion. If Oregon Department of Fish and Wildlife (ODFW) determines the screen is not functioning properly, and is unsuccessful in working with the water user to meet ODFW standards, ODFW may request that OWRD regulate the use of water until OWRD receives notification from ODFW that the fish screen is functioning properly.

☒ **2. Screen Now**

[Option 2 should generally be selected if listed fish species are present at the point of diversion and/or the originating water right diversion is currently screened. If Option 2 is selected, provide contact information on the "Fish Screening and Passage Information" sheet. The new diversion may be eligible for cost-share.]

Note: This option will yield the following:

Finding of Fact: The Oregon Department of Fish and Wildlife (ODFW) has determined that a fish screen is necessary at the new point of diversion to prevent fish from entering the diversion and that the diversion is not currently equipped with an appropriate fish screen. This diversion may be eligible for screening cost-share funds.

Condition: Prior to diverting water, the water user shall install an approved fish screen at the new point of diversion and shall provide to the OWRD a written statement from Oregon Department of Fish and Wildlife (ODFW) that the installed screen meets the state's criteria, or that ODFW has determined a screen is not necessary.

The water user shall operate and maintain the fish screen at the new point of diversion consistent with ODFW's operational and maintenance standards. If ODFW determines the screen is not functioning properly, and is unsuccessful in working with the water user to meet ODFW standards, ODFW may request that OWRD regulate the use of water until OWRD receives notification from ODFW that the fish screen is functioning properly.

*Please return all 3 pages to: Transfers Section, Water Resources Department,
725 Summer St. NE, Suite A, Salem, OR 97301-1266*

☐ **3. Screen 2 Year**

[Option 3 may be checked if the change is from an unscreened diversion to a HISTORIC POD or an existing POD in use for another water right, and cost-share funds are not currently available. It should NOT be checked if listed fish species are present at the point of diversion, the originating water right diversion is screened, cost-share funds are currently available, or the diversion is not eligible for ODFW's cost-share program. Please provide contact information on the "Fish Screening and Passage Information" sheet.] If extraordinary circumstances are present, please explain: _____

Note: This option will yield the following:

Finding of Fact: The Oregon Department of Fish and Wildlife (ODFW) has determined that a fish screen is necessary at the new point of diversion to prevent fish from entering the diversion and that the diversion is not currently equipped with an appropriate fish screen. Listed fish species are not present at the point of diversion, the originating water right diversion is not screened, cost-share funds are not currently available, and the proposed diversion may be eligible for ODFW's cost-share program. A grace period of two years is appropriate until such time as cost-share funds become available to assist in the construction of a fish screen. If cost-share funds do not become available, the water user must screen within the indicated time period regardless of the availability of cost-share funding.

Condition: By October 1, 20__ [Within two years after the date of this order] the water user shall install an approved fish screen at the new point of diversion. The water user may withdraw water at the new point of diversion without a screen until October 1, 20__. The water user shall provide to OWRD a written statement from Oregon Department of Fish and Wildlife (ODFW) that the installed screen meets the state's criteria, or that ODFW has determined a screen is not necessary.

The water user shall maintain and operate the fish screen at the new point of diversion consistent with ODFW's operational and maintenance standards. If ODFW determines the screen is not functioning properly, and is unsuccessful in working with the water user to meet ODFW standards, ODFW may request that OWRD regulate the use of water until OWRD receives notification from ODFW that the fish screen is functioning properly.

☐ **4. Screen Future**

[Use this option if fish are not currently present, but might possibly be at some future time.]

Note: This option will yield the following:

Finding of Fact: The Oregon Department of Fish and Wildlife has determined that the diversion is not currently equipped with an appropriate fish screen, but a fish screen may be required in the future at the new point of diversion to prevent fish from entering the diversion.

Condition: The Oregon Department of Fish and Wildlife (ODFW) may require the water user to install an approved fish screen at the new point of diversion within one year after receiving written notification that a fish screen is required. Once installed the water user shall maintain and operate the fish screen at the new point of diversion according to ODFW's operational and maintenance standards. If ODFW determines the screen is not functioning properly, and is unsuccessful in working with the water user to meet ODFW standards, ODFW may request that OWRD regulate the use of water until OWRD receives notification from ODFW that the fish screen is functioning properly.

☐ **5. No Screen Needed**

[Check this box if fish are not currently present, and are not expected in the future.]

Additional Fish Screening and Passage Information for the Applicant
(To be completed by ODFW for WRD to provide to the applicant.)

Transfer #: T-13364, Vincent

The applicant should be aware that fish screening and passage may be required for certain changes in point of diversion if the boxes below are checked.

- ☒ Fish screening is required as a condition of this transfer. The fish screen must meet ODFW's design, construction, operational and maintenance standards.

Pursuant to ORS 498.306, cost-share funds may be available to assist in the installation of fish screening.

The applicant should contact the ODFW staff member below to obtain additional information on the design, construction, operational, and maintenance standards for the fish screen and to obtain information about ODFW's cost-sharing program for screening. **Prior to installation, the water user must obtain written approval from ODFW that the required screen meets ODFW's criteria.**

Address: 4034 Fairview Industrial Dr. SE

City/State/Zip: Salem, OR 97302

Phone: (503) 947-6256

- ☒ This transfer may trigger requirements for fish passage under ORS 509.585 because a new point of diversion will be constructed, an existing point of diversion's capacity will be increased, or an existing point of diversion will be abandoned. The applicant should contact the ODFW staff member below for a determination of whether native migratory fish are or were present at the applicable location, which will determine whether fish passage must be addressed.

On February 10, 2020, we received your water right Transfer application. The application was accompanied by \$2610.00. Our receipt number 131865 is enclosed.

By copy of this letter, we are asking the Watermaster for a report regarding the potential for injury to existing water rights which may be caused by the requested change. A review form will also be sent to Oregon Department of Fish and Wildlife to determine if a fish screen is needed.

This application may require publication of a notice for two consecutive weeks in a newspaper with general circulation in the area where the water right is located. If it is determined that newspaper notice will be required, the Department will prepare the notice and notify you of the cost. You will be responsible for submitting payment to the Department prior to publication of the notice.

Except as provided under ORS 540.510(3) for municipalities, you may not use water in the new place of use or from the new point of diversion until a final order approving the transfer application has been issued by the Department. In order to avoid any possible forfeiture of the water right, you should continue to use the water as described by your existing water right.

If the land is sold before the application is approved, the buyer's consent to the application will be required unless a recorded deed or other legal document clearly established that the water right was not conveyed in the sale.

Refer to the following page for a chart showing the steps and expected timelines for the processing of your application.

If you have any questions, please contact the Transfer Section at (503) 986-0815.

1. For irrigation calculate cfs for each water right involved as follows:
 - a. Divide total authorized cfs by total acres in the water right (*for C12345, 1.25 cfs ÷ 100 ac*); then multiply by the number of acres to be transferred to get the transfer cfs (*x 45 ac = 0.56 cfs*).
 - b. If the water right certificate does not list total cfs, but identifies the allowable use as 1/40 or 1/80 of a cfs per acre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (*For C87654, 45.0 ac x 0.0125 cfs/ac = 0.56 cfs*)
2. Add cfs for the portions of water rights on all the land included in the transfer; however **do not count cfs for supplemental rights on acreage for which you have already calculated the cfs fee for the primary right on the same land**. The fee should be assessed only once for each "on the ground" acre included in the transfer. (*In this example, blank 5a would be only 0.56 cfs, since both rights serve the same 45.0 acres. Blank 5b would be 0 and Line 5 would then also become 0*).

Additional remarks: Certificate 41095 is supplemental to Certificate 7624 with priority date of May 15, 1925 and Certificate 38348 with priority date of May 11, 1965. This transfer proposes to make this water right supplemental to Certificate 5276 with a priority date of December 31, 1872. The justification for switching the water right this right is supplemental to is that being supplemental to a more senior water right will mean the supplemental right will be used with less frequency, therefore using less of the supplemental source.

To: Oregon Water Resources Department

From: Brandi Neider, Stream and Riparian Coordinator

Subject: Water right transfer for the Cogswell Creek project

Date: 1/16/20

The Cogswell Creek fish passage project involves improvements to fish passage in Cogswell Creek to enable native redband trout to migrate from Goose Lake through more than five irrigation diversions.

The attached transfer submitted by Robin Vincent will enable the project to reduce the number of diversions currently in use. The reduced number of diversions provides a significant cost savings to the OWEB project.

Sincerely,

Brandi Neider
