Determination and Proposed Action

If protests are not filed pursuant to OAR 690-382-0900, the modification will be approved.

If Groundwater Registration Modification T-13556 is approved, the final order will include the following:

1. *The modification to Registration Application GR-1055 (Certificate of Registration GR-1017) proposed in Groundwater Registration Modification Application T-13556 is recognized. Recognition of the modification shall not be construed as a final determination of the right to appropriate groundwater under the certificate of registration or modification. Such a determination will occur in an adjudication proceeding under ORS 537.670 to 537.695.*
2. *The use of the water is restricted to beneficial use at the place of use described and is subject to all other conditions and limitations contained in Registration Application GR-1055 (Certificate of Registration GR-1017) and any related decree.*
3. *Approval of this groundwater registration modification application does not constitute nor grant legal access onto or through another person's property for purposes of accessing the new point of appropriation.*
4. *Water shall be acquired from the same aquifer (water source) as the original point of appropriation.*

5. *The combined quantity of water diverted at the proposed additional point of appropriation (WELL #1), together with that diverted at the original point of appropriation (PUMP WELL #2), shall not exceed the quantity of water lawfully available at the original point of appropriation (PUMP WELL #2).*

SUBJECT: Groundwater Registration Modification T-13556

Please find enclosed the Proposed Final Order indicating that, based on the information available, the Department intends to approve application T-13556. This document is an intermediate step in the approval process; water may not be used legally as proposed in the groundwater registration modification application until a Final Order has been issued by the Department. Please read this entire letter carefully to determine your responsibility for additional action.

A public notice is being published in the Department's weekly publication, simultaneously with issuance of the Proposed Final Order. The notice initiates a period in which any person may file either a protest opposing the decision proposed by the Department in the Proposed Final Order or a request for party status supporting the Department's decision. The protest period will end 45 days after the Department's notice.

If no protest is filed, the Proposed Final Order will become a Final Order 33 days after the protest period ends, without any further action by the Department.

If a protest is filed, the application may be referred to a contested case proceeding. A contested case provides an opportunity for the proponents and opponents of the decision proposed in the Proposed Final Order to present information and arguments supporting their position in a quasi-judicial proceeding.

Please do not hesitate to contact me at if I may be of assistance.

Sincerely,

Water Rights Transfer Specialist
Transfers and Conservation Section
