Hey Greg and Doann,

It has been two weeks since the GW team got back to you regarding T-14568. I will grant you another 2 weeks (December 4, 2025) to reach back out with additional information for the transfer, or to have the applicant withdraw the application. Groundwater Transfer Review Summary Form

Transfer/PA # T- 14568 (RA)

GW Reviewer Travis Brown Date Review Completed: 1/13/2025

Summary of Same Source Review:

☐ The proposed change in point of appropriation is not within the same aquifer as per OAR 690-380-2110(2).

Summary of Water Level Decline Condition Review:

☐ Water levels at the original point(s) of appropriation have exceeded the allowed decline threshold defined by conditions in the originating water right.

Summary of Injury Review:

☒ The proposed transfer will result in another, existing water right not receiving previously available water to which it is legally entitled or result in significant interference with a surface water source as per 690-380-0100(3).

Summary of GW-SW Transfer Similarity Review:

☐ The proposed SW-GW transfer doesn't meet the definition of "similarly" as per OAR 690-380-2130.

This is only a summary. Documentation is attached and should be read thoroughly to understand the basis for determinations.

Date of Review: 1/13/2025

Date Reviewed by GW Mgr. and Returned to WRSD: JTI 2/4/25

The information provided in the application is insufficient to evaluate whether the proposed transfer may be approved because:

- ☐ The water well reports provided with the application do not correspond to the water rights affected by the transfer.
- ☐ The application does not include water well reports or a description of the well construction details sufficient to establish the ground water body developed or proposed to be developed.
- ☐ Other _____

-
1. Basic description of the changes proposed in this transfer: Applicant proposes to amend Permit G-18903 to add an APOA – Well A (MARI 774). Permit G-18903 currently authorizes Supplemental Irrigation of 29.2 acres at a maximum rate of 0.16 cfs from a single authorized POA – Well H (not constructed). Permit G-18903 is the result of a previous, approved transfer, T-13915, which removed a second authorized POA – Well G (not constructed) – from Permit G-18538. Both the authorized POA – Well H (not constructed) – and the proposed APOA – Well A (MARI 774) – are also authorized POA on Permits G-875 and G-1170 per Inchoate Transfer T-13384. Per Inchoate Transfer T-13384, Well A (MARI 774) is authorized for Irrigation of 24.0 acres at a maximum rate of 0.195 cfs associated with Permit G-875 and 66.7 acres at a maximum rate of 0.82 cfs associated with Permit G-1170. Therefore, the maximum combined rate for Well A (MARI 774) would be 1.175 cfs as a result of the this proposed transfer (T-14568).
 2. Will the proposed POA develop the same aquifer (source) as the existing authorized POA?
☒ Yes ☐ No Comments: Both the authorized POA and proposed APOA produce groundwater from the alluvial aquifer system.

3. a) Is the existing authorized POA subject to a water level decline condition?
☒ Yes ☐ No Comments: Permit G-18903 contains a water level decline condition.
- b) If yes, for each POA identify the reference level, most recent spring-high water level, and whether an applicable permit decline condition has been exceeded: Because the authorized POA Well H has not yet been constructed, an initial water level measurement for Well H has not been reported and, therefore, no reference level has been established.
4. a) Is there more than one source developed under the right (e.g., basalt and alluvium)?
☐ Yes ☒ No Comments: The authorized POA produces groundwater only from the alluvial aquifer system.
- b) If yes, estimate the portion of the right supplied by each of the sources and describe any limitations that will need to be placed on the proposed change (rate, duty, etc.): N/A
5. a) Will this proposed change, at its maximum allowed rate of use, likely result in an increase in interference with **another ground water right**?
☒ Yes ☐ No Comments: Neighboring well MARI 773 – authorized POA on Claim GR-1614 – is ~2,530 ft northwest of proposed APOA Well A (MARI 774) and ~4,206 ft northwest of authorized POA Well H. The closer proximity of Well A (MARI 774) will likely increase interference with MARI 773.
- b) If yes, would this proposed change, at its maximum allowed rate of use, likely result in another groundwater right not receiving the water to which it is legally entitled?
☐ Yes ☒ No If yes, explain: Given the intervening distance between proposed APOA Well A (MARI 774) and neighboring well MARI 773, as well as the relatively high storage and transmissivity of the alluvial aquifer system and the presumed efficient hydraulic connection with nearby surface water, the proposed change is unlikely to result in injury of MARI 773 or similarly located wells.
6. a) Will this proposed change, at its maximum allowed rate of use, likely result in an increase in interference with **another surface water source**?
☒ Yes ☐ No Comments: Proposed APOA Well A (MARI 774) is ~1,000 ft south of a perennial unnamed tributary to the Pudding River, while the authorized POA Well H is ~2,630 ft south of the same unnamed tributary. Authorized POA Well H is also ~1,550 ft from the mainstem Pudding River (its nearest surface water source), meaning proposed APOA Well A (MARI 774) is closer to any surface water source than the authorized POA. The closer proximity to a surface water source will likely result in a seasonal increase in interference with surface water due to the proposed change. However, both the authorized POA and the proposed APOA will, over the long term, derive all of their pumped water from surface water capture.
- b) If yes, at its maximum allowed rate of use, what is the expected change in degree of interference with any **surface water sources** resulting from the proposed change?
Stream: Unnamed tributary to Pudding River ☐ Minimal ☒ Significant
Provide context for minimal/significant impact: The proposed APOA is less than ¼ mile from a surface water source (unnamed tributary to the Pudding River) to which it is hydraulically connected. The original groundwater review for Application G-18983 (which became Permit G-18538 and subsequently the subject Permit G-18903) found the Potential for Substantial Interference (PSI) between proposed Well G and the Pudding River due to that well being within ¼ mile of the Pudding River. The applicant then modified their

application by moving Well G (and lowering the requested rate) to avoid the finding of PSI. Because proposed APOA Well A is also within ¼ mile of a hydraulically connected surface water source, and therefore would have led to a finding of PSI were it included in the original water right application, the expected change in degree of interference with a surface water source (unnamed tributary to Pudding River) due to the proposed change is significant.

7. For SW-GW transfers, will the proposed change in point of diversion affect the surface water source similarly (as per OAR 690-380-2130) to the authorized point of diversion specified in the water use subject to transfer?
☐ Yes ☐ No Comments: N/A
8. What conditions or other changes in the application are necessary to address any potential issues identified above: _____
9. Any additional comments: _____

2. Is there a history of regulation on the source that serves this (or these) right(s) that has involved the transferred right(s) and downstream water rights? ☐ Yes ☒ No Generally characterize the frequency of any regulation or explain why regulation has not occurred:
3. Have headgate notices been issued for the source that serves the transferred right(s)?
☐ Yes ☒ No ☐ Records not available.
4. In your estimation, after the proposed change, would distribution of water for the right(s) result in regulation of other water rights that would not have occurred if use under the original right(s) was/were maximized? ☐ Yes ☒ No If "Yes", explain:
5. In your estimation, if the proposed change is approved, are there upstream water rights that would be affected? ☐ Yes ☒ No If "Yes", describe how the rights would be affected and list the rights most affected:

6. Check here ☐ if it appears that downstream water rights benefit from return flows resulting from the current use of the transferred right(s)? If you check the box, generally characterize the locations where the return flows likely occur and list the water rights that benefit most:

☐ Yes ☐ No If "Yes", explain:

12. Are there other issues not identified through the above questions that should be considered in determining whether the change "can be effected without injury to other rights"?

*Example for Line 5a calculation to transfer 45.0 acres of Primary Permit S-12345 (total 1.25 cfs for 100 acres) and 45.0 acres of Supplemental Permit S-87654 (1/80 cfs per acre) on the same land:

- For irrigation calculate cfs for each permit involved as follows:
 - Divide total authorized cfs by total acres in the permit (*for S-12345, 1.25 cfs ÷ 100 ac*); then multiply by the number of acres to be changed to get the application cfs (*x 45 ac = 0.56 cfs*).
 - If the water right permit does not list total cfs, but identifies the allowable use as 1/40 or 1/80 of a cfs per acre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (*For S-87654, 45.0 ac x 0.0125 cfs/ac = 0.56 cfs*)
- Add cfs for the portions of permits on all the land included in the application; however **do not count cfs for supplemental permits on acreage for which you have already calculated the cfs fee for the primary permit on the same land**. The fee should be assessed only once for each "on the ground" acre included in the application. (*In this example, blank 5a would be only 0.56 cfs, since both permits serve the same 45.0 acres. Blank 5b would be 0 and Line 5 would then also become 0*).

Explain in your own words what you propose to accomplish with this permit amendment; and why:

We prepared an additional groundwater Application-19338 using Well G. We realized having Well G on Permit G-18538 would conflict with our new arrangement and removed Well G from Permit G-18538 under permit amendment T-13915 issuing the new Permit G-18903. We have decided we now wish to add Well A to this Permit G-18903

If you need additional space, continue on a separate piece of paper and attach to the application as "Attachment 1".

☐ Check this box if this project is fully or partially funded by the American Recovery and Reinvestment Act. (Federal stimulus dollars)

Is the applicant the permit holder of record? ☒ Yes ☐ No

If NO, include either:

- ☐ A completed assignment form (with required statutory assignment fee), assigning all or a portion of the permit to the applicant(s), OR
- ☐ An affidavit of consent from the permit holder(s) of record that gives permission for the applicant to amend the permit.

Has the Completion ("C") Date of the permit(s) in this application expired? ☐ Yes ☒ No

If YES, this application will not be accepted by the Department.

If NO, what are the completion dates of the permit(s)? April 9, 2026

- If the permit completion date expires while the Permit Amendment Application is pending, the Department will not approve the Permit Amendment Application until an Extension of Time Application is approved for the permit.
- You may consider using the Reimbursement Authority process to expedite the processing of this Permit Amendment Application if the completion date of the permit expires within 6 months of the date of filing this application.

By my signature below, I confirm that I understand:

- Prior to Department approval of the permit amendment, I may be required to submit payment to the Department for publication of a notice in a newspaper with general circulation in the area where the permit is located, once per week for two consecutive weeks. If more than one qualifying newspaper is available, I suggest publishing the notice in the following newspaper: Woodburn Independent.

Are there other water rights certificates, water use permits or ground water registrations associated with the "from" or "to" lands? ☐ Yes ☐ No ☒ NA

If YES, list the other certificate, permit, or ground water registration numbers: _____

If the permit(s) are for irrigation or supplemental irrigation use, other water rights existing on the same land for irrigation that are subject to transfer must either change concurrently or be cancelled. Any change to a water right certificate or ground water registration must be filed separately in a water right transfer application or ground water registration modification application, respectively.

For a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation:

- ☐ Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map. - ☒ Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For *proposed wells not yet constructed or built*, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.
