Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-0080, you may petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

6. The change would not result in injury to other water rights.
7. The change, as conditioned, does not enlarge the permit.
8. The change does not alter any other terms of the permit.

Conclusions of Law

The additional point of appropriation proposed by Permit Amendment Application T-10499 is consistent with the requirements of ORS 537.211.

Now, therefore, it is ORDERED:

The change and subsequent use of water shall be subject to the following conditions:

1. The combined quantity of water diverted at the new point of appropriation, together with that diverted at the old points of appropriation, shall not exceed the quantity of water lawfully available at the original points of appropriation.
2. Prior to water use from the proposed point of appropriation, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order.

The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.

The Director may require the permittee to keep and maintain a record of the amount (volume) of water used and may require the permittee to report water use on a periodic schedule as established by the Director. In addition, the Director may require the permittee to report general water use information, the periods of water use and the place and nature of use of water under the permit. Enclosed, please find a *draft* Final Order regarding Permit Amendment Application T-10499. The document reflects the Department's conclusion that, based on the information currently available, the permit amendment will be approved. Please review the draft carefully to evaluate whether the document is consistent with your intent in seeking the permit amendment.

Additionally, because the new point of appropriation is more than ¼ mile from the authorized points of appropriation, the applicant is responsible for publishing notice of the permit amendment in a local newspaper having a general circulation in the area of the water use permit. The permit amendment notice must be published in a local newspaper in the general area of the permit (newspapers with statewide circulation such as the Capital Press, Journal of Commerce, etc. do not qualify). The notice must be published at least once a week for three consecutive weeks. A copy of the required notice is enclosed for your use. Please have the newspaper insert the appropriate final date of publication in the place indicated in the notice.

After publication, the Department needs to receive an affidavit specifying the dates the notice was published. Please request the affidavit of publication from the newspaper following publication and send it to me, Lisa Jaramillo, at the address at the top of the page.

Payment of the cost of publication is your responsibility; please do not send any billing to the Water Resources Department.

Upon receipt of the affidavit, processing will continue on the permit amendment application.

FROM: _____ WATERMASTER, DISTRICT # _____
_____ X _____ GROUNDWATER SECTION

(SIGNATURE) GERALD H. GRONDAIN *Gerald Grondain* date signed 29 July 2008

SUBJECT: PERMIT AMENDMENT # 10499

A change in: POU POD (A POA) of water.

In the name(s) of Blanco Bogs/Alex Ellis

In my opinion (assuming the right is valid), the proposed change

MAY BE MADE WITHOUT INJURY WOULD RESULT IN INJURY* to an existing water right.

*The approval of this transfer application would result in injury to other water rights because _____

The existing right may not be valid because _____

Headgate notices HAVE HAVE NOT Been issued for diversion from the source(s) which serve(s) this right.

If for change in point of diversion, is there any intervening point(s) for diversion between the authorized and proposed points of diversion? (Yes or No) _____

In my opinion, the order approving the subject transfer application should include the following in regard to the appropriator installing suitable measuring devices in the diversion works:

_____ (1) PRIOR to the diverting of water at the new point of diversion . . .

_____ (2) WHEN IN the judgement of the watermaster it becomes necessary . . .

Oregon Water Resources Department Memorandum

Date: 29 July 2008
To: OWRD Transfer Section Files
From: Jerry Grondin, OWRD Hydrogeologist
Subject: Ground Water Permit Amendment Review
Transfer Application Number: T-10499
Application: G-14563, Permit: G-13621, Certificate: none
Applicant: Blanco Bogs (Alex Ells)

Blanco Bogs near Port Orford, Oregon has applied for a permit amendment to add a third well to the existing two ground water points of appropriation (POA). The purpose is for more efficient use of water and to reduce stress on existing wells.

Owner Well	Well Log ID	Location	Comment
Well 1	CURR 1722 CURR 1802 CURR 50901 CROO 53252	T31S/R15E-sec 32 DCA	Additional logs are for alterations and reconditioning, including well surging. NOTE: the last log has the wrong county.
Well 2	CURR 50193	T31S/R15E-sec 32 DCA	
Well 3	Not drilled	T31S/R15E-sec 32 DCC	Proposed additional well

Source of Water Assessment:

The source of water is likely the same given the proposed total depth and open interval of the proposed third well is similar to the existing two wells.

Injury Assessment of the Proposed Transfer:

OAR 690-380-100 (definitions) notes "(3) 'Injury' or 'Injury to an existing water right' means a proposed transfer would result in another, existing water right not receiving previously available water to which it is legally entitled."

Closest Water Right Well:

The additional well proposed by permit amendment T-10499 can be made **without "injury"** as defined by OAR 690-380-100 given:

- The closest water right well to the additional well proposed by permit amendment T-10499 is well CURR 1722 which is under the same water right (application G-14563, permit G-13621) as the proposed well;
- The water right (application G-14563, permit G-13621) to be amended includes a static ground water level measurement requirement condition that will continue;

- The water right (application G-14563, permit G-13621) to be amended includes a 10-foot maximum decline condition over any period of years that will continue;
- The distance from the closest water right well operating under a water right different from application G-14563, permit G-13621 (T-10499) to the additional well proposed by permit amendment T-10499 is the same or greater than the distance to the two existing wells operating under application G-14563, permit G-13621.

Closest Surface Water:

The additional well proposed by permit amendment T-10499 can be made **without “injury”** as defined by OAR 690-380-100 given:

- The distance from the closest surface water body (un-named stream) to the additional well proposed by permit amendment T-10499 is the same or greater than the distance to the two existing wells operating under application G-14563, permit G-13621.

Conclusion:

The proposed change by permit amendment T-10499 (change the location of proposed well 4) is likely to **obtain water from the same source** and can be made **without “injury”** as defined by OAR 690-380-100.
