	)	APPROPRIATION

Authority

ORS 537.610, 537.705 and 540.505 to 540.580 establish the process in which the holder of a certificate of registration may submit a request for recognition of modifications to the place of use, character of use or point of appropriation under a ground water certificate of registration.

OAR Chapter 690, Divisions 382 and 380 implement the statutes and provide the Department's procedures and criteria for evaluating ground water registration modification applications.

Applicant

CITY OF COLUMBIA CITY
ATTN: LEAHNETTE RIVERS, CITY ADMINISTRATOR

COLUMBIA CITY, OR 97018

Findings of Fact

Background

1. On December 19, 2007, the City of Columbia City filed a ground water registration modification application to modify the place of use and point of appropriation under Registration Application GR-2515 (Certificate of Registration GR-3873). The Department assigned the application number T-10507.
2. The applicant's agent submitted revised maps on February 6, 2008, to better illustrate the location of the original and proposed new well sites. Additionally, on February 21, 2008, the applicant's agent amended the proposed place of use listing in the application to match the revised maps.
3. The ground water registration to be modified is as follows:
Registration: APPLICATION GR-2515 (CERTIFICATE OF REGISTRATION GR-3873),
in the name of the CITY OF COLUMBIA CITY
Use: MUNICIPAL
Tentative Priority Date: MARCH 6, 1939

This final order is subject to judicial review by the Court of Appeals under ORS 183.482. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.482(1). Pursuant to ORS 536.075 and OAR 137-003-0675, you may petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

Original Place of Use:

MUNICIPAL USE				
Twp	Rng	Mer	Sec	¼ ¼
5 N	1 W	WM	28	SE NE

4. There is a scrivener's error in the survey coordinates which describe the location of the original well (identified in Finding #3 above). Based upon the map for Registration Application GR-2515 (Certificate of Registration GR-3873) and the survey coordinates provided, the well is actually located 1500 feet East and 380 feet **North** from the center of Section 28, being within the SE ¼ NE ¼ of Section 28, Township 5 North, Range 1 West, W.M., rather than 380 feet South from the center of Section 28.
5. Application T-10507 proposes to modify the place of use under the ground water registration to:

MUNICIPAL USE				
Twp	Rng	Mer	Sec	¼ ¼
5 N	1 W	WM	21	SW NE
5 N	1 W	WM	21	NE NW
5 N	1 W	WM	21	SW NW

5 N	1 W	WM	28	SW SE
5 N	1 W	WM	28	SE SE
5 N	1 W	WM	33	NW NE

6. Application T-10507 also proposes to modify the point of appropriation under the ground water registration. The proposed new points of appropriation, located between approximately 600 feet and 725 feet northwest from the original well, are located as follows:

Twp	Rng	Mer	Sec	¼ ¼	Survey Coordinates
5 N	1 W	WM	28	SE NE	PW0 – 255 feet North and 1440 feet East from the center of Section 28
5 N	1 W	WM	28	SE NE	PW1 – 330 feet North and 1340 feet East from the center of Section 28
5 N	1 W	WM	28	SE NE	PW2 – 210 feet North and 1385 feet East from the center of Section 28

7. Notice of the application for ground water registration modification was published on January 1, 2008, pursuant to OAR 690-382-0600. No comments were filed in response to the notice.
8. On February 25, 2008, the Department mailed a copy of the draft Preliminary Determination proposing to approve Ground Water Registration Modification Application T-10507 to the applicant and their agent. The draft Preliminary Determination set forth a deadline of March 26, 2008, for the applicant to respond.
9. On February 28, 2008, the Department received correspondence from the applicant requesting the Department proceed with issuance of a Preliminary Determination. Additionally, the applicant established that it is a municipality as defined in ORS 540.510(3)(b). Therefore, in accordance with OAR 690-382-0700(5), the information necessary to demonstrate that the applicant is authorized to pursue the transfer has been provided.
10. On March 7, 2008, the Department issued a Preliminary Determination proposing to approve recognition of Ground Water Registration Modification Application T-10507 and mailed a copy to the applicants. Additionally, notice of the Preliminary Determination for the transfer application was published on the Department's weekly notice on March 18, 2008, pursuant to ORS 540.520 and OAR 690-382-0800. No protests were filed in response to the notice.

Review Criteria for Ground Water Registration Modification Applications [OAR 690-382-0700(2)]

11. The proposed modifications would not result in enlargement of the ground water registration.
12. The proposed modifications would not result in a state Scenic Waterway not receiving previously available water during periods in which streamflows are less than the quantities determined by the Department to be necessary to meet the requirements of ORS 390.835.
13. The proposed modifications would not result in injury to other water rights.

Conclusions of Law

The modifications in place of use and point of appropriation proposed in application T-10507 are consistent with the requirements of ORS 537.610, 537.705, 540.505 to 540.580 and OAR 690-382-1000.

Now, therefore, it is ORDERED:

1. The modifications to Registration Application GR-2515 (Certificate of Registration GR-3873) proposed in application T-10507 are recognized. Recognition of the modifications shall not be construed as a final determination of the right to appropriate ground water under the certificate of registration or modification. Such a determination will occur in an adjudication proceeding under ORS 537.670 to 537.695.
2. The use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Registration Application GR-2515 (Certificate of Registration GR-3873) and any related decree.
3. Water shall be acquired from the same aquifer (water source) as the original point of appropriation.
4. The quantity of water diverted at the new points of appropriation shall not exceed the quantity of water lawfully available at the original point of appropriation.
5. When required by the Department, the water user shall install and maintain in-line flow meters or other suitable devices for measuring and recording the quantity of water appropriated. The type and plans of the measuring devices must be approved by the Department prior to beginning construction and shall be installed under the general supervision of the Department.

SUBJECT: Ground Water Registration Modification T-10507

Please find enclosed the Preliminary Determination indicating that, based on the information available, the Department intends to approve application T-10507. This document is an intermediate step in the approval process; water may not be used legally as proposed in the ground water registration modification application until a Final Order has been issued by the Department. Please read this entire letter carefully to determine your responsibility for additional action.

A public notice is being published in the Department's weekly publication simultaneously with issuance of the Preliminary Determination. The notice initiates a 30-day period in which any person may file either a protest opposing the decision proposed by the Department in the Preliminary Determination or a standing statement supporting the Department's decision.

If no protest is filed, the Department will issue a Final Order consistent with the Preliminary Determination. You should receive a copy of the Final Order about 30 days after the close of the protest period.

If a protest is filed, the application may be referred to a contested case proceeding. A contested case provides an opportunity for the proponents and opponents of the decision proposed in the Preliminary Determination to present information and arguments supporting their position in a quasi-judicial proceeding.

SUBJECT: Ground Water Registration Modification T-10507

Enclosed, please find a draft of our Preliminary Determination regarding Ground Water Registration Modification Application T-10507. The document reflects the Department's conclusion that, based on the information currently available, recognition of the ground water registration modification will be approved. Authority

ORS 537.610, 537.705 and 540.505 to 540.580 establish the process in which the holder of a certificate of registration may submit a request for recognition of modifications to the place of use, character of use or point of appropriation under a ground water certificate of registration.

OAR Chapter 690, Divisions 382 and 380 implement the statutes and provide the Department's procedures and criteria for evaluating ground water registration modification applications.

Applicant

CITY OF COLUMBIA CITY
ATTN: LEAHNETTE RIVER, CITY ADMINSTRATOR
PO BOX 189
COLUMBIA CITY, OR 97018

Findings of Fact

Background

1. On December 19, 2007, the City of Columbia City filed a ground water registration modification application to modify the place of use and point of appropriation under Registration Application GR-2515 (Certificate of Registration GR-3873). The Department assigned the application number T-10507.
2. The applicant's agent submitted revised maps on February 6, 2008, to better illustrate the location of the original and proposed new well sites. Additionally, on February 21, 2008, the applicant's agent amended the proposed place of use listing in the application to match the revised maps.
3. The ground water registration to be modified is as follows:
Registration: APPLICATION GR-2515 (CERTIFICATE OF REGISTRATION GR-3873),
in the name of the CITY OF COLUMBIA CITY
Use: MUNICIPAL
Tentative Priority Date: MARCH 6, 1939

Quantity: 100.0 GALLONS PER MINUTE (GPM)
Source: A PUMP WELL, in the Columbia River Basin

Original Point of Appropriation:

Twp	Rng	Mer	Sec	¼ ¼	Survey Coordinates
5 N	1 W	WM	28	SE NE	1500 feet East and 380 feet <u>South</u> * from the center of Section 28
*This is a scrivener's error. See explanation in Finding #4 below.					

Original Place of Use:

MUNICIPAL USE				
Twp	Rng	Mer	Sec	¼ ¼
5 N	1 W	WM	28	SE NE

4. There is a scrivener's error in the survey coordinates which describe the location of the original well (identified in Finding #3 above). Based upon the map for Registration Application GR-2515 (Certificate of Registration GR-3873) and the survey coordinates provided, the well is actually located 1500 feet East and 380 feet **North** from the center of Section 28, being within the SE ¼ NE ¼ of Section 28, Township 5 North, Range 1 West, W.M., rather than 380 feet South from the center of Section 28.
5. Application T-10507 proposes to modify the place of use under the ground water registration to:

MUNICIPAL USE				
Twp	Rng	Mer	Sec	¼ ¼
5 N	1 W	WM	21	SW NE
5 N	1 W	WM	21	NE NW
5 N	1 W	WM	21	SW NW
5 N	1 W	WM	21	SE NW
5 N	1 W	WM	21	NE SW
5 N	1 W	WM	21	NW SW
5 N	1 W	WM	21	SW SW
5 N	1 W	WM	21	SE SW
5 N	1 W	WM	21	NW SE
5 N	1 W	WM	21	SW SE
5 N	1 W	WM	21	SE SE
5 N	1 W	WM	28	NE NE
5 N	1 W	WM	28	NW NE
5 N	1 W	WM	28	SW NE
5 N	1 W	WM	28	SE NE
5 N	1 W	WM	28	NE NW
5 N	1 W	WM	28	SE NW
5 N	1 W	WM	28	NE SW

MUNICIPAL USE				
Twp	Rng	Mer	Sec	¼ ¼
5 N	1 W	WM	28	SE SW
5 N	1 W	WM	28	NE SE
5 N	1 W	WM	28	NW SE
5 N	1 W	WM	28	SW SE
5 N	1 W	WM	28	SE SE
5 N	1 W	WM	33	NW NE

6. Application T-10507 also proposes to modify the point of appropriation under the ground water registration. The proposed new points of appropriation, located between approximately 600 feet and 725 feet northwest from the original well, are located as follows:

Twp	Rng	Mer	Sec	¼ ¼	Survey Coordinates
5 N	1 W	WM	28	SE NE	PW0 – 255 feet North and 1440 feet East from the center of Section 28
5 N	1 W	WM	28	SE NE	PW1 – 330 feet North and 1340 feet East from the center of Section 28
5 N	1 W	WM	28	SE NE	PW2 – 210 feet North and 1385 feet East from the center of Section 28

7. Notice of the application for ground water registration modification was published on January 1, 2008, pursuant to OAR 690-382-0600. No comments were filed in response to the notice.

Review Criteria for Ground Water Registration Modification Applications [OAR 690-382-0700(2)]

8. The proposed modifications would not result in enlargement of the ground water registration.
9. The proposed modifications would not result in a state Scenic Waterway not receiving previously available water during periods in which streamflows are less than the quantities determined by the Department to be necessary to meet the requirements of ORS 390.835.
10. The proposed modifications would not result in injury to other water rights.

Determination and Proposed Action

The modifications in place of use and additional points of appropriation proposed in Application T-10507 appear to be consistent with the requirements of ORS 537.610, 537.705, 540.505 to 540.580 and OAR 690-382-1000, and will be recognized provided that protests are not filed pursuant to OAR 690-382-0900.

If Ground Water Registration Modification Application T-10507 is recognized, the final order will include the following:

- 1. The modifications to Registration Application GR-2515 (Certificate of Registration GR-3873) proposed in Application T-10507 are recognized. Recognition of the modifications shall not be construed as a final determination of the right to appropriate ground water under the certificate of registration or modification. Such a determination will occur in an adjudication proceeding under ORS 537.670 to 537.695.*
- 2. The use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Registration Application GR-2515 (Certificate of Registration GR-3873) and any related decree.*
- 3. Water shall be acquired from the same aquifer (water source) as the original point of appropriation.*
- 4. The quantity of water diverted at the new points of appropriation shall not exceed the quantity of water lawfully available at the original point of appropriation.*
- 5. When required by the Department, the water user shall install and maintain in-line flow meters or other suitable devices for measuring and recording the quantity of water appropriated. The type and plans of the measuring devices must be approved by the Department prior to beginning construction and shall be installed under the general supervision of the Department.*

To: File T-10507 Date: February 12, 2008

From: Donn Miller

Subject: T-10507, city of Columbia city
(GW Registration Modification for GR-2515)

The file proposes to add two additional POA's to the existing GW registration. It also proposes to corrected the location of the original POA.

All of the wells develop the unconsolidated sedimentary aquifer that is not far from the Columbia River. The three wells are similarly built and are located within about 150 feet of each other. All of the wells have water level heads that are about sea level.

The wells are clustered in town and are more than 800 feet from the closest known neighboring well.

This analysis is easy. The wells develop the same source and the transfer would not result in injury to existing rights (extremely low to no potential).

Dear Ms. Rivers:

The Department is currently in the process of examining the City's Ground Water Registration Modification Application. Specifically, our Ground Water Section is performing the ground water injury review, and I am reviewing the application for completeness.

There are some problems with the application maps that need to be resolved before I can continue processing your application. Please submit revised maps that correct and/or include the following items, as required by OAR 690-382-0400 and 690-380-3100:

1. On the large 11" x 17" map, the scale shown on the map and identified as being 1"=1320' does not appear to be accurate when measured against the scale, existing well site and section lines drawn on the map. Using a 1"=1320' scale, the scale drawn on the map measures out to be more like 1"=1250' or 1"=1275'.
- OK. See Corr. Map Rcvd. 2-6-08
2. The scale shown on the small 8 1/2" x 11" map and identified as being 1"=400' does not appear to be accurate when measured against the scale, proposed well sites and section lines drawn on the map. Using a 1"=400' scale, the scale drawn on the map measures out to be more like 1"=385'.
- OK. Rcvd. Corrected map on 2-6-08.
3. The location coordinates for the existing well (PW0) must be indicated on the large 11" x 17" map. While this information is shown on the small 8 1/2" x 11" map, a point for the existing well is not plotted on the small 8 1/2" x 11" map.
(NOTE: You could also correct this deficiency by adding a point on the small 8 1/2" x 11" map that identifies the existing well.)
- OK. See Corr. Map Rcvd. on 2-6-08.
4. The large 11" x 17" map must show quarter-quarter section lines.
OK. See Corr. Map Rcvd. 2-6-08.

Please submit the revised maps by **Wednesday, February 27, 2008**, to Lisa Jaramillo, Water Resources Department, 725 Summer Street NE, Suite A, Salem, OR 97301-1266. If you have any questions, please feel free to contact me by telephone at 503-986-0880 or by e-mail at Lisa.J.Jaramillo@wrд.state.or.us.

Subject: GR Mod Appl T-10507 (City of Columbia City)

Hello Eric,

I am currently working on the Ground Water Registration Application T-10507 for the City of Columbia City. I have completed my review of the application and am in the process of preparing the Draft Preliminary Determination.

As part of my review, I found a discrepancy with the proposed place of use listing in the application (Pg. 7) and the application map (Figure 2 – 11 X 17). The application listing indicates that the entire NW ¼ of Section 28, T5N, R1W is to be included in the proposed place of use. Map Figure 2, however, appears to indicate otherwise. For the NW ¼ of Sec. 28, Map Figure 2 shows that only the NE ¼ NW ¼ and the SE ¼ NW ¼ are to be included in the proposed place of use. Please clarify which is correct.

If Map Figure 2 is correct, the proposed place of use listing on page 7 of the application needs to be amended so that it matches the map.

If, however, the proposed place of use listing in the application is correct, the map will need to be modified once more so that it agrees with the proposed place of use listing.

I apologize for not catching this discrepancy earlier. Please let me know if you have any questions.

Thank you for your assistance,
Lisa Jaramillo

- Reason(s) for amendment/modification(s): The City recently completed two new wells to provide additional capacity to meet the demands of the City's growing population and to provide system redundancy. The City is applying for an additional groundwater right for these wells but is also requesting to add these wells as additional points to GR 2515 as additional points of appropriation to provide greater flexibility in the City's use of GR 2515. This modification request also proposes to revise the place of use to reflect the current service area

boundary. The service area is larger than the original Registration due to population growth. Finally, this modification provides more accurate location information regarding the point of appropriation for GR 2515.
