Instream Lease Application Part 2 of 4 – Instream Lease Application Map Checklist

A Map is generally required for each water right not leased in its entirety

The application map (if required) should include all the items listed below and match the existing water right(s) of record.

This should be a simple map. (See example below). A copy of a final proof survey map with the portion to be leased shaded or hachured in will also suffice.

☐ Yes ☒ N/A Instream lease application map(s).

- A map is **not** required if an entire right is being leased or if the right is for use of municipal or quasi-municipal water use;
- A north directional symbol, a legend, a map scale, and township, range, section and quarter-quarter (QQ), including tax lots, donation land claims and government lots, if appropriate;
- If an irrigation right, nursery use, or other similar uses, the number of acres to be leased or transferred in each quarter-quarter must be clearly labeled and hachured to differentiate between the acres being leased or transferred and any remaining acreage must be identified;
- If the place of use on the water right is broken down by more than one priority date, or source stream, and/or diversion the map must identify each with separate hachuring and clearly label what is being changed;
- Provide a statement describing the proposed instream reach or point;
- If **more than three** water rights are involved, separate maps are needed for each water right; and
- The map need not be prepared by a certified water right examiner.
- **NOTE:** An existing water right that meets the requirements of OAR 690-077-0071 may be used, if approved by the Department prior to submittal of the application.

Part 4 of 4 – Instream Lease Provisions and Signatures

Term, Termination Clause, Validity of Water Right, Instream Use

Term of the Lease:

The lease is requested to BEGIN in: month 5 year 2026
and END in: month 9 year 2030

Note: The begin month is generally the first month of the irrigation season and the end month is the last month in the irrigation season. If not an irrigation right, this would be the first and last month of your authorized period of allowed use.

Termination provision (for multiyear leases) - The parties to the lease request (choose one):

- ☒ a. The option of terminating the lease prior to expiration of the full term with written notice to the Department by the Lessor(s) and/or Lessee.
- ☐ b. The option of terminating the lease prior to the expiration of the full term, with consent by all parties to the lease.
- ☐ c. The parties would not like to include a Termination Provision. (See instructions for limitations to this provision)

Validity of the rights to be leased:

- ☐ The water right(s) to be leased have been used under the terms and conditions of the right(s) during the last five years or have been leased instream; or
- ☒ The water right(s) has not been used for the last five years according to the terms and conditions of the rights. However, the water right(s) is not subject to forfeiture under ORS 540.610(2). *Documentation describing why the water right is not subject to forfeiture must be submitted with application.*

Certificate 39222 is a water right held by Clean Water Services for water use on Clean Water Services owned property. Clean Water Services is a county service district organized under ORS chapter 451 (a municipal corporation under ORS 198.101). Under ORS 540.610(2)(b), Certificate 39222 is not subject to forfeiture for non-use.

Public use: Check the public use(s) this lease will serve (as defined by ORS 537.332):

- ☒ Conservation, maintenance and enhancement of aquatic, fish and wildlife, fish and wildlife habitat and any other ecological values.
- ☐ Recreation
- ☐ Pollution abatement
- ☐ Navigation

Precedent: If a right which has been leased is later proposed to be leased again or later transferred or become part of an allocation of conserved water project, a new injury review shall be required. An instream lease shall not set a precedent on a future transaction.

The undersigned declare:

1. The Lessor(s) agrees during the term of this lease, to suspend use of water allowed under the subject water right(s) and under any appurtenant primary or supplemental water right(s) not involved in the lease application; and
2. The Lessor(s) certifies that I/we are the water right holder(s) of the right(s) described in this instream lease application. If not the deeded landowner, I/we have provided documentation with the lease application that I/we have authorization to pursue the lease application and/or have obtained consent from the deeded landowner; and
3. All parties affirm that the information provided in this lease application is true and accurate.

Cancellation of Associated Storage Certificate 39221

Affidavit of Voluntary Cancellation or Diminution of a Water Right Certificate

VOLUNTARY CANCELLATION is how the legal holder(s) of a water right certificate may cancel an abandoned water right or an abandoned portion of a water right. Abandonment means water use has or will have ceased under the cancellation. A cancellation can apply to an entire certificate or to a specific place of use and acreage. The rate of water must be proportionately cancelled to match the portion of the right being cancelled. If a certificate is partially cancelled, a remaining water right certificate will be issued describing the uncanceled portion.

[see also Oregon Revised Statute (ORS) 540.621 and Administrative Rule (OAR) 690-017-0100.]

VOLUNTARY DIMINUTION is how the legal holder(s) of a water right certificate may diminish an entire water right or a portion of it from a primary purpose to a supplemental purpose. The overall authorized rate of water on the certificate will remain the same, but the proportions between primary use and supplemental use will change. In the diminution process, the originating water right will be cancelled, and a new water right will be issued describing the diminution. [see also Oregon Administrative Rule (OAR) 690-330-0040.]

Describe in your own words what you want to accomplish with this affidavit: The applicant wishes to voluntarily cancel the entirety of Certificate 39221; as this is a storage water right certificate associated with an abandoned reservoir (no reservoir infrastructure exists).

Certificate of Water Right Information:

Certificate Number: 39221
