RE: Summary of Soda Creek and Little Crater Creek confusion

Dear Bill:

I received your letter dated May 5, 2000, and I have the maps provided by Tumalo Irrigation District and agree with the district that Soda Creek has been previously identified on several maps by other names. I conclude from the map of the *Final Report of the Construction Tumalo irrigation Project to the Desert Land Board, State of Oregon by Project Engineer* dated June 1913- December 1914 and the application map for the water right permit 19628 that the intent of the Crater Creek ditch was to divert and capture streams emanating from Broken Top. The water right lists the sources of water as: Crater Creek, Little Crater Creek, Tumalo Creek and three spring branches. It is clearly evident from the application map that at that time Soda Creek was labeled Crater Creek, the east branch of Soda Creek is the most easterly spring, and Crater Creek was identified as Little Crater Creek. The unsurveyed portion of the map incorrectly locates the drainage of Little Crater Creek with another stream. I believe "Little Crater Creek" (which is not identified on current USGS maps) was just the western most branches of either Crater Creek or Soda Creek.

Given this information and interpretation, I believe the Tumalo Irrigation District has the right to divert Soda Creek into the Crater Creek ditch as long as the conditions of the water right are met. I am sending a copy of this letter to Salem to be put into the application file. I will keep a copy with the water right records in the Watermaster's office in Bend.

I hope this clears up the matter and eases you and the District.

Sincerely,

Kyle Gorman
Watermaster – District 11
