right.

WOULD RESULT IN INJURY* to an existing water

*The approval of this transfer application would result in injury to other water rights because _____

The existing right may not be valid because _____

Headgate notices HAVE HAVE NOT Been issued for diversion from the source(s) which serve(s) this right.

If for change in point of diversion, is there any intervening point(s) for diversion between the authorized and proposed points of diversion? (Yes or No) _____

In my opinion, the order approving the subject transfer application should include the following in regard to the appropriator installing suitable measuring devices in the diversion works:

_____ (1) PRIOR to the diverting of water at the new point of diversion . . .

_____ (2) WHEN IN the judgement of the watermaster it becomes necessary . . .

The enclosed copy of the transfer application and map(s) is for your records.

In the Matter of Transfer Application	)	FINAL ORDER APPROVING A
T-10539, Umatilla County	)	TEMPORARY CHANGE IN PLACE OF
	)	USE

Authority

ORS 537.705 and 540.505 to 540.580 establish the process in which a water right holder may submit a request to temporarily transfer the place of use and, if necessary to convey the water to the temporary place of use, the point of appropriation authorized under an existing water right. OAR Chapter 690, Division 380 implements the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

Findings of Fact

1. On February 14, 2008 Craig Coleman filed an application to temporarily change the place of use under Certificates 83422 and 83447 for a period of TWO years. The Department assigned the application number T-10539.
2. The portion of the first right to be transferred is as follows:
Certificate: 83422 in the name of CRAIG COLEMAN (perfected under Permit G-1671)
Use: IRRIGATION of 21.7 ACRES
Priority Date: JUNE 28, 1960
Rate: 0.27 CUBIC FOOT PER SECOND (CFS) from either well
Limit/Duty: ONE-EIGHTIETH cfs per acre, not to exceed 3.0 acre-feet for each acre irrigated during the irrigation season of each year
Source: TWO WELLS in the UMATILLA RIVER BASIN

This is a final order in other than a contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-0080, you may petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

6. Notice of the application for temporary transfer was published on February 26, 2008 pursuant to ORS 540.520 and OAR 690-380-4000. No comments were filed in response to that notice.
7. Application T-10539 proposes to temporarily transfer water rights within the boundaries of the County Line Improvement District. On February 21, 2008 the Department notified the District of the proposed temporary transfer.
8. Water has been used within the last five years according to the terms and conditions of the rights. No evidence is available that would demonstrate that the rights are subject to forfeiture under ORS 540.610.
9. A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing rights are present.
10. To avoid the possibility of enlargement, on March 18, 2008 the applicant proposed additional conditions, including a stringent program to monitor soil moisture on the lands subject to this transfer, upon which drip irrigation will be used and on the lands between the drip irrigated rows that will be dried up.
11. The proposed change in place of use, as conditioned, will not result not result in enlargement of the right.
12. The proposed change will not result in injury to other water rights. This finding is made through an abbreviated review recognizing that the transfer may be revoked under ORS 540.523(6) if the Department later finds that the transfer is causing injury to any existing water right.

Conclusions of Law

The temporary change in place of use proposed in application T-10539, as conditioned, is consistent with the requirements of ORS 540.523 and OAR 690-380-8000.

Now, therefore, it is ORDERED:

1. The temporary change in place of use proposed in application T-10539, subject to the soil moisture monitoring requirements listed below, is approved.
2. The water user shall install and maintain a water flow and soil moisture monitoring system.
 - a) The water user shall install and maintain valves and in-line flow meters or other suitable devices for controlling, measuring and recording the quantity of water diverted. In-line flow meters shall be installed at each well and each field control manifold serving the drip irrigated areas. The type and plans of the valves and measuring devices must be approved by the Department prior to beginning construction and shall be installed under the general supervision of the Department.
 - b) The water user shall operate and maintain the valves and measuring devices, as needed. The Watermaster may monitor the system and accuracy of the measuring devices, as needed.
 - c) The monitoring system shall include Gro-Point Sensors or a similar monitoring system capable of accuracy that is equivalent to, or superior to the level of accuracy provided by the Gro-Point system. If other than a Gro-Point soil moisture monitoring system is used, the type of system and installation plans must be approved by the Watermaster prior to installation.
 - d) The soil moisture monitoring system shall include one monitoring station for each type of crop grown and for every 100 acres of each major soil type. Soil types or crop types with less than 100 acres shall have one monitoring station per soil or crop type. Each monitoring station shall consist of one access tube located outside the irrigated area and paired access tubes with one tube located in the crop row and a second tube located midway between the crop rows. Additional soil moisture monitoring stations shall be installed as required by the Watermaster where conditions dictate more monitoring stations are required to effectively determine irrigation is occurring only where there is an appurtenant water right. The monitoring program, including both the number and location of the monitoring sites shall be approved by the Watermaster prior to installation.
 - e) The data from the moisture monitoring system shall be continuously monitored or collected at a minimum of weekly intervals. The soil moisture content shall be monitored beginning one week prior to the irrigation season and continuing until one week past the end of the irrigation season. Soil moisture data collected from the monitoring system shall be reported to the Watermaster in summary format including equipment used and monitoring data listed by station and measurement field, as approved by the Watermaster.
 - f) Soil moisture reports shall be made during the first week prior to the irrigation season and once per week during the first three weeks of the irrigation season. Unless otherwise required by the Watermaster, soil moisture data collected after the third week of the irrigation season shall be reported to the Watermaster by the 5th day of the month following the month for which the data was collected. Reporting requirements may be

modified, after the third week of the irrigation season, as dictated by the Watermaster or upon written request from the water user subject to approval of the Watermaster. However, review of the monitoring program can occur at any time with a formal request from the water user or the Watermaster. Modification to the monitoring program may occur at any time as deemed necessary and/or appropriate by the Watermaster.

- g) Upon reasonable notice the water user shall provide the Watermaster access to metering equipment and moisture monitoring stations as well as access to monitoring data and flow data, including access to real time data on an internal web site or computer.
 - h) The water user shall promptly inform the Watermaster of any situation that results in the application of water to any land without a water right, including but not limited to the areas between crop rows. The water user shall also inform the Watermaster of the course of action taken by the water user to correct the problem and prevent the future occurrence of similar events.
 - i) If water is applied to lands without water rights, including but not limited to, the area between the crop rows, the Watermaster may regulate the water use until the soil moisture and flow data demonstrate that the areas without water rights are no longer receiving water.
 - j) If, at any time after the third week of irrigation, the Watermaster determines that the water user has not taken all necessary precautions to ensure that areas without appurtenant water rights, including areas between crop rows, are not receiving water this temporary transfer may be terminated. If this transfer is terminated, the water rights subject to this transfer will revert to their original place of use.
- 3. The former place of use **shall not** be irrigated as part of this water right during the 2008 and 2009 irrigation seasons.
 - 4. The use shall revert to the authorized place of use at the end of the 2009 irrigation season.
 - 5. The approval of this temporary transfer may be revoked or modified if the Department finds the change causes injury to any existing water right.
 - 6. A subsequent application for permanent transfer of Certificates 83422 and 83447 shall be subject to a full and complete review to determine consistency with the requirements of OAR Chapter 690, Division 380. Approval of this temporary transfer does not establish a precedent for approval of a subsequent application filed for a permanent transfer.
 - 7. The use of water at the temporary place of use authorized by this transfer shall be in accordance with the terms and conditions of Certificates 83422 and 83447 and any related decree.
 - 8. The time during which water is used under this approved temporary transfer does not apply toward a finding of forfeiture under ORS 540.610.

9. The water user shall maintain and operate the existing measurement device and shall make such improvements as may be required by the Department.
10. The use of the remaining water right described by Certificates 83422 and 83447 shall continue to be in accordance with the terms and conditions of Certificates 83422 and 83447 and any related decree.

Dated at Salem, Oregon this 25 day of March 2008.

STATE OF OREGON

COUNTY OF UMATILLA

CERTIFICATE OF WATER RIGHT

THIS CERTIFICATE ISSUED TO

CRAIG COLEMAN
33896 E. WALLS ROAD
HERMISTON, OREGON 97838

confirms the right to use the waters of TWO WELLS in the UMATILLA RIVER BASIN for MAINTENANCE OF WETLAND FOR FISH AND WILDLIFE and IRRIGATION OF 62.7 ACRES.

This right was perfected under Permit G-1671. The date of priority is JUNE 28, 1960. The amount of water to which this right is entitled is limited to an amount actually beneficially used and shall not exceed 1.60 CUBIC FEET PER SECOND (CFS) from either well, in any combination, being 0.82 CFS FOR MAINTENANCE OF WETLAND FOR FISH AND WILDLIFE and 0.78 CFS FOR IRRIGATION, or its equivalent in case of rotation, measured at the wells.

The quantity of water diverted at the additional point of appropriation, together with that diverted at the original point of appropriation, shall not exceed the quantity of water available from the original point of appropriation; being Well #1.

The wells are located as follows:

WELL #1: NE 1/4 SE 1/4, SECTION 27, T 4 N, R 27 E, W.M.; 1420 FEET NORTH AND 490 FEET WEST FROM THE SE CORNER, SECTION 27.

WELL #1a: NE 1/4 SE 1/4, SECTION 27, T 4 N, R 27 E, W.M.; 1350 FEET NORTH AND 430 FEET WEST FROM THE SE CORNER, SECTION 27.

The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, is limited to ONE-EIGHTIETH of one cubic foot per second per acre, or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 3.0 acre-feet for each acre irrigated during the irrigation season of each year.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

A description of the place of use to which this right is appurtenant is as follows:

THIS CERTIFICATE ISSUED TO

CRAIG COLEMAN

33896 E. WALLS ROAD
HERMISTON, OREGON 97838

confirms the right to use the waters of WELL #8 within the UMATILLA RIVER BASIN for **SUPPLEMENTAL IRRIGATION OF 47.7 ACRES.**

This right was perfected under Permit G-3822. The date of **priority is FEBRUARY 15, 1968.** The amount of water to which this right is entitled is limited to an amount actually beneficially used and shall not exceed **0.6 CUBIC FOOT PER SECOND** (if available at the original point of appropriation described as Well No. 2, located within the NE1/4 SE1/4, Section 27, T 4 N, R 27 E, W.M.; 1420 feet North and 490 feet West from the SE corner of Section 27), or its equivalent in case of rotation, measured at the well.

The well is located as follows:

WELL #8: SW 1/4 NW 1/4, SECTION 26, T 4 N, R 27 E, W.M.; 1160 FEET NORTH AND 370 FEET EAST FROM THE W 1/4 CORNER, SECTION 26.

The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, is limited to ONE-EIGHTIETH of one cubic foot per second per acre, or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed **3.0 acre-feet** for each acre irrigated during the irrigation season of each year. This right is limited to any deficiency in the available supply of any prior right existing for the same land.

$$26.0 \text{ A} \times 0.0125 \text{ CFS/A} = 0.33 \text{ CFS}$$

The well shall be maintained in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon.

The water user shall install and maintain an in-line flow meter or other suitable device for measuring and recording the quantity of water appropriated.

This certificate is issued to confirm a change in PLACE OF USE and CHARACTER OF USE approved by an order of the Water Resources Director entered NOVEMBER 24, 2004, and supersedes Certificate 80595, State Record of Water Right Certificates.

The right to the use of the water for the above purpose is restricted to beneficial use on the lands or place of use described.

WITNESS the signature of the Water Resources Director, affixed

I have contacted both of my clients involved in the above mentioned Temporary Transfers. I believe Craig Coleman called you and discussed the monitoring required to achieve approval for his temporary transfer. Both Clients are preparing to do the required monitoring to demonstrate that enlargement of the water right will not occur with the drip systems that they propose in the transfer applications.

Thank you for you call and understanding in this matter. If you have any other questions or concerns please call me or e-mail me.

Watermaster Review Form: Water Right Transfer

Transfer Application: T-10539

Review Due Date: 3-22-08

Applicant Name: Craig Coleman

Proposed Changes: ☒ POU ☐ POD ☐ POA ☐ USE ☐ OTHER

Reviewer(s): Frank Dye & Tony Justus

Date of Review: Mar. 6, 2008

1. Do you have information suggesting that the water rights may be subject to forfeiture?
☐ Yes ☒ No If "Yes", describe the information and indicate if you intend to file a cancellation affidavit or if you need additional time to determine if a cancellation affidavit should be filed: _____
2. Is there a history of regulation on the source that serves the right proposed for transfer that has involved the right and downstream water rights? ☒ Yes ☐ No Generally characterize the frequency of any regulation or explain why regulation has not occurred: The wells are within the Ordinance critical groundwater area.
3. Check here if it appears that downstream water rights benefit from return flows resulting from the current use of the right? ☐ If you check the box, generally characterize the locations where the return flows likely occur and list the water rights that benefit most: _____
4. Are there upstream water rights that would be affected by the proposed change?
☐ Yes ☒ No If "Yes", describe how the rights would be affected and list the rights most affected: _____
5. For POD changes and instream transfers, check here if there are channel losses between the old and new PODs or within the proposed instream reach? ☐ If you check the box, describe and, if possible, estimate the losses: _____
6. Would distribution of water for the right after the proposed change result in regulation of other water rights that would not have occurred if use of the existing right was maximized?
☒ Yes ☐ No If "Yes", explain: Perhaps, if use is expanded.
7. For POU changes, would the original place of use continue to receive water from the same source? ☒ Yes ☐ No ☐ N/A If "Yes", explain: Proposal is to continue to irrigate the from lands with drip irrigation in strips. If irrigation occurs outside of the intended strip area, it would constitute expansion of the water right.
8. For POU or USE changes, would use of the existing right at "full face value," result in the diversion of more water than can be used beneficially and without waste? ☐ Yes ☒ No If "Yes", explain: _____

9. Are there other issues not identified through the above questions? ☒ Yes ☐ No If "Yes", explain: 1.6 acres proposed for SESW should, according to map, be located in SWSE.
10. What alternatives may be available for addressing any issues identified above: Department could consider allowing irrigation in strips through drip irrigation. In other instances with a permanent transfer strip irrigation was allowed with extensive monitoring and reporting requirements. see Potlach transfers.
11. Have headgate notices been issued for the source that serves the right? ☐ Yes ☒ No
12. What water control and measurement conditions should be included in the transfer:

Measurement Devices	☒ Present and should be maintained.	☐ Should be required prior to diverting water.	☐ May be required in the future.
Headgates	☐ Present and should be maintained.	☐ Should be required prior to diverting water.	☐ May be required in the future.

Reference: Temporary Transfer 10539

On February 14, 2008 we received your water right transfer application requesting place of use. The application was accompanied by \$272.00. Our receipt 91453 is enclosed.

By copy of this letter, we are asking the Watermaster for a report regarding the potential for injury to existing water rights which may be caused by the change.

Pursuant to OAR 690-380-8010, the lands from which an irrigation water right is to be transferred and the land to which the right is to be transferred may not both receive water during the same season. If the temporary transfer is approved during an irrigation season and water has already been used at the currently authorized location during that season, then the temporary transfer will not take effect until the following season.

We will notify you if additional information or corrections to the application or map are required.

If you have any questions, please call the Transfer Section, (503)986-0900.

- ☐ Instream Transfer ☐ Surface Water source to Ground Water source

- Reason(s) for change(s): I am planting blue berries under drip irrigation in the areas of my Circle 5 and Circle 20. Each drip line will irrigate a row of blue barriers on a 2.5 foot wide strip. The blue berries rows are on 10 feet centers. I am also transferring water rights to 13.5 acres I transferred water right from to Flying J under Transfer T-10427. This Temporary Transfer will be cancelled when I submit and get approved a permanent transfer for these areas.

5. WATER DELIVERY SYSTEM

- Describe the *current* water delivery system or the system that *was in place* at some time *within the last 5 years*. Include information on the pumps, canals, pipelines and sprinklers used to divert, convey and apply the water at the authorized place of use. If the transfer involves multiple rights that have independent systems, describe each system separately.

The description must be sufficient to demonstrate that the full quantity of water to be transferred can be conveyed from the authorized source and applied at the authorized location and that the applicant is ready, willing, and able to exercise the right.

Circle #5 is one of 21 circles irrigated with the delivery system shown on the Application Map. Wells #1, #1a and #8 are the authorized POA for the irrigation of Circle #5. Well #1 is equipped with a 200 hp, 1300 gpm submersible pump. Well #1a is equipped with a 500 hp, 3275 gpm turbine pump controlled by a variable speed electrical panel. Well #8 is used for supplement irrigation of Circle #5. It is equipped with a 150 hp, 1800 gpm turbine pump.

- System capacity: 10 cubic feet per second (cfs). If the transfer involves multiple rights that have independent systems, describe the capacity for each system separately.

Before submitting your application to the Department, be sure you have:

- Answered each question completely.
- Included all the required attachments.
- Provided original signatures for all named deed holders, or other parties, with an interest in the water right.
- Included a check payable to the Oregon Water Resources Department for the appropriate amount.

10. SIGNATURES

- Check one of the following, as appropriate, and sign the application in the signature box below:

- ☒ In accordance with OAR 690-380-3000(13)(a), I (we) understand that prior to Department approval of a permanent transfer and upon my receipt of a draft Preliminary Determination for the proposed transfer, I (we) will be required [pursuant to OAR 690-380-4010(5)] to provide the following landownership information and evidence demonstrating that I (we) are authorized to pursue the transfer:

- (a) A report of ownership and lien information that has been prepared by a title company *within the last three months*;
- (b) A copy of written notification of the proposed transfer provided by the applicant to all lien holders on the subject lands unless the report of ownership and lien information shows that a water right conveyance agreement has been recorded for the subject lands. *If a water right conveyance agreement has been recorded for the subject lands, a copy of the agreement and identification of the owner of the lands at the time the agreement was recorded must be submitted; and*
- (c) If the landowner identified in the report of ownership and lien information is not the applicant, a notarized statement consenting to the transfer (*attached*) signed by the landowner identified in the report or an authorized representative of the entity to whom the interest in the water right has been conveyed as identified in a water right conveyance agreement or other documentation demonstrating that the applicant is authorized to pursue the transfer in the absence of the consent of the landowner.

- ☐ I (we) affirm that the applicant is a municipality, as defined in ORS 540.510(3)(b), and that the right is in the name of the municipality or a predecessor. Therefore, pursuant to OAR 690-380-3000(13)(b), the applicant is NOT required to provide the above described report of ownership and lien information.

- ☐ I (we) affirm that the applicant is an entity with the authority to condemn property and is acquiring the property to which the water right proposed for transfer is appurtenant by condemnation. Documentation is provided with this application supporting this statement. Therefore, pursuant to OAR 690-380-3000(13)(c), the applicant is NOT required to provide the above described report of ownership and lien information. (*NOTE: Such an entity may only apply for a transfer under this subsection if it has filed a condemnation action to acquire the property.*)

- I (we) affirm that the information contained in this application is true and accurate.

Remarks: The 21.7 acres irrigated in Circle #5 are being transfer to 8.2 acres of drip irrigated blue berries and 13.5 acres of Circle 19. The blue berries will be planted in rows. The spacing between the rows will be 10 ft. Each row of blue barriers will be irrigated with a single drip line which will irrigate a 2.5 ft strip of ground center on the blue berries row. This will result in a 7.5 wide strip of non-irrigated land between the rows. The existing 13.5 acre water rights in circle 19 were transfer under Transfer T-10427

RE: TEMPORARY WATER RIGHT TRANSFER APPLICATION CRAIG COLEMAN

Dear Mortgage Holder:

Craig Coleman has retained me to assist in the preparation of a temporary water right transfer application. The purpose of this transfer is to transfer 21.7 acres of ground water right described in Certificates 83422 and 83447 from his Circle # 5 to 8.2 acres of drip irrigation of Blue Berries and 13.5 acres in Circle 19 that was transfer to Flying J.

I have prepared the attached temporary water right transfer application and map. Along with this application, the OWRD requires that anyone holding an encumbrance on the land involved in the water right transfer be notified of the transfer. A recent Lot Book Report from Pioneer Title Company indicates NW Farm Credit Services, FLCA having encumbrances on the land involved in this transfer. With this letter and copy of the application, our desire is to meet the notification requirement.

If you have any questions regarding this transfer, the transfer process, or if you want a copy of the amended transfer, please contact me at (541) 449-1327.

Sincerely,

William I. Porfily
