In the Matter of Transfer Application)	FINAL ORDER APPROVING TEMPORARY
T-14484, Umatilla County)	CHANGES IN PLACES OF USE, POINT OF
)	APPROPRIATION AND ADDITIONAL POINT
)	OF APPROPRIATION

Authority

Oregon Revised Statute (ORS) 537.705 and 540.505 to 540.580 establish the process in which a water right holder may submit a request to temporarily transfer the place of use and, if necessary to convey the water to the temporary place of use, the point of appropriation authorized under an existing water right. Oregon Administrative Rule (OAR) Chapter 690, Division 380 implements the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

Applicant

POLLOCK AND SON, INC.
c/o BRYCE POLLOCK
78691 AGNEW RD
HERMISTON, OR 97838

Findings of Fact

1. On June 18, 2024, Pollock and Son, Inc. c/o Bryce Pollock filed an application to temporarily change the place of use and change the point of appropriation and add a point of appropriation to serve the proposed place of use under Certificates 42339 and 46930 for a period of 5 years. The Department assigned the application number T-14484.
2. Notice of the application for transfer was published on July 2, 2024, pursuant to OAR 690-380-4000.
3. The first right to be transferred is as follows:
Certificate: 42339 in the name of ESTATE OF TOM QUICK (perfected under Permit G-4067)
Use: IRRIGATION of 16.4 ACRES
Priority Date: MARCH 28, 1968
Rate: 0.21 CUBIC FOOT PER SECOND

This is a final order in other than a contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-0080, you may petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

Limit/Duty: The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, shall be limited to one-eightieth of one cubic foot per second per acre, or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 3.0 acre feet per acre for each acre irrigated during the irrigation season of each year; and shall be further limited to appropriation of water only to the extent that it does not impair or substantially interfere with existing surface water rights of others.

Twp	Rng	Mer	Sec	Q-Q	Acres
4 N	28 E	WM	20	SE NW	16.4

8. An additional point of appropriation is necessary to convey the water to the proposed temporary place of use. Temporary Transfer Application T-14484 proposes an additional point of appropriation approximately 0.5 mile southeast to:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
4 N	28 E	WM	20	SE NW	WELL - 310 FEET NORTH AND 850 FEET EAST FROM THE SW CORNER OF SECTION 20

Temporary Transfer Review Criteria

9. Water has been used within the last five years according to the terms and conditions of the rights. There is no evidence available that would demonstrate that the rights are subject to forfeiture under ORS 540.610.
10. A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing rights are present.
11. The proposed changes would prevent the lands from which the water rights are removed during the period of the temporary transfer from receiving water under the transferred rights, as required by ORS 540.523(7).
12. The proposed changes would not result in injury to other water rights. This finding is made through an abbreviated review recognizing that the transfer may be revoked under ORS 540.523(5) if the Department later finds that the transfer is causing injury to any existing water right.

Conclusions of Law

The temporary changes in place of use, point of appropriation and an additional point of appropriation to serve the temporary place of use proposed in Temporary Transfer Application T-14484 are consistent with the requirements of ORS 540.523 and OAR 690-380-8000.

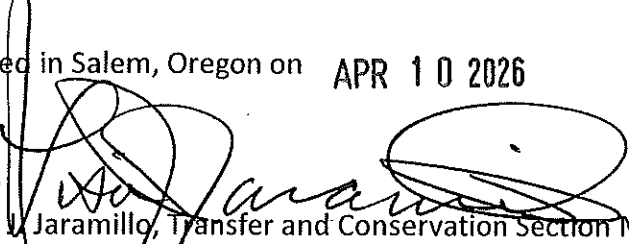

Now, therefore, it is ORDERED:

1. The temporary changes in place of use, point of appropriation and an additional point of appropriation to serve the temporary place of use proposed in Temporary Transfer Application T-14484 are approved.
2. The former place of use **shall not** be irrigated as part of these water rights during the 2026, 2027, 2028, 2029 and 2030 irrigation seasons.
3. The use shall revert to the authorized place of use at the end of the 2030 irrigation season. The authorization to use the temporary points of appropriation shall be terminated concurrently.
4. The approval of this temporary transfer may be revoked or modified if the Department finds the changes cause injury to any existing water right.
5. The quantity of water diverted at the proposed temporary point of appropriation shall not exceed the quantity of water lawfully available at the original points of appropriation.
6. The quantity of water diverted at the proposed temporary additional point of appropriation, together with that diverted at the original point of appropriation, shall not exceed the quantity of water lawfully available at the original points of appropriation.
7. A subsequent application for permanent transfer of Certificates 42339 and 46930 shall be subject to a full and complete review to determine consistency with the requirements of OAR Chapter 690, Division 380. Approval of this temporary transfer does not establish a precedent for approval of a subsequent application filed for a permanent transfer.
8. The use of water at the temporary place of use authorized by this transfer shall be in accordance with the terms and conditions of Certificates 42339 and 46930.
9. The time during which water is used under this approved temporary transfer does not apply toward a finding of forfeiture under ORS 540.610.
10. Water use measurement conditions:
 - a. Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device, at each point of appropriation (new and existing).
 - b. The water user shall maintain the meters or measuring devices in good working order.

c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.

11. The use of the remaining water right described by Certificate 46930 shall continue to be in accordance with the terms and conditions of Certificate 46930.

Groundwater Transfer Review Summary Form

Transfer/PA # T- 14484

GW Reviewer A. Wentworth Date Review Completed: 10/10/2024

Summary of Same Source Review:

The proposed change in point of appropriation is not within the same aquifer as per OAR 690-380-2110(2).

Summary of Injury Review:

The proposed transfer will result in another, existing water right not receiving previously available water to which it is legally entitled or result in significant interference with a surface water source as per 690-380-0100(3).

Summary of GW-SW Transfer Similarity Review:

The proposed SW-GW transfer doesn't meet the definition of "similarly" as per OAR 690-380-2130.

This is only a summary. Documentation is attached and should be read thoroughly to understand the basis for determinations.

Application: T-14484

Applicant Name: Pollock & Son, Inc.

Proposed Changes: POA APOA SW→GW RA
 USE POU OTHER

Reviewer(s): A. Wentworth

Date of Review: 10/10/2024

Date Reviewed by GW Mgr. and Returned to WRSD: _____

The information provided in the application is insufficient to evaluate whether the proposed transfer may be approved because:

- The water well reports provided with the application do not correspond to the water rights affected by the transfer.
- The application does not include water well reports or a description of the well construction details sufficient to establish the ground water body developed or proposed to be developed.
- Other _____

1. Basic description of the changes proposed in this transfer: The applicant proposes to temporarily add an additional point of appropriation to Certificates 42339 and 46930 because the authorized existing well has become unreliable. The authorized and proposed POAs associated with these water rights are displayed in Table 1.

Table 1:

Certificate	Authorized POAs/PODs	Proposed POAs/PODs	Proposed POU Changes
42339	Well (UMAT 56576)	Well 1 (UMAT 2420)	From 16.4 acres to 16.4 acres
46930	Well 1 (UMAT 2420)	Well (UMAT 56576)	From 16.4 acres to 16.4 acres

2. Will the proposed POA develop the same aquifer (source) as the existing authorized POA?
 Yes No Comments: All Authorized and Proposed POAs produce water from the Ordinance Gravel alluvial aquifer in the Westland Road Subarea.

3.

4. a) Is there more than one source developed under the right (e.g., basalt and alluvium)?
 Yes No
- b) If yes, estimate the portion of the right supplied by each of the sources and describe any limitations that will need to be placed on the proposed change (rate, duty, etc.): _____
5. a) Will this proposed change, at its maximum allowed rate of use, likely result in an increase in interference with **another groundwater right**?
 Yes No Comments: Proposed APOA UMAT 2420 is closer to its nearest neighboring well compared to UMAT 56576. UMAT 2420 is ~280 ft from UMAT 53445 and UMAT 56576 is ~420 ft from UMAT 56586. Pumping at the maximum authorized rate (1.21 cfs) will likely result in increased interference (Figure 2 and Figure 3).
- b) If yes, would this proposed change, at its maximum allowed rate of use, likely result in another groundwater right not receiving the water to which it is legally entitled?
 Yes No If yes, explain: Interference at the closest groundwater right POA from pumping at the Authorized POA (UMAT 56576) is 0.21 feet, compared to 1.37 feet from Proposed APOA (UMAT 2420).
6. a) Will this proposed change, at its maximum allowed rate of use, likely result in an increase in interference with **another surface water source**?
 Yes No Comments:
- b) If yes, at its maximum allowed rate of use, what is the expected change in degree of interference with any **surface water sources** resulting from the proposed change?
 Stream: _____ Minimal Significant
 Stream: _____ Minimal Significant
 Provide context for minimal/significant impact: _____
7. For SW-GW transfers, will the proposed change in point of diversion affect the surface water source similarly (as per OAR 690-380-2130) to the authorized point of diversion specified in the water use subject to transfer?
 Yes No Comments: n/a
8. What conditions or other changes in the application are necessary to address any potential issues identified above: _____
9. Any additional comments: _____

1. Do you have evidence that the right has not been used in the last 5 years and that the presumption of forfeiture would not likely be rebuttable? Yes No If "Yes", attach evidence (e.g. dated aerial photo showing pavement or building on the land for >5 yrs.)

2. Is there a history of regulation on the source that serves this (or these) right(s) that has involved the transferred right(s) and downstream water rights? Yes No Generally characterize the frequency of any regulation or explain why regulation has not occurred:
 The existing well, UMAT 56576, is regulated most years due to hydraulic connectivity to the Umatilla River and is regulated at surface water priority dates.

3. Have headgate notices been issued for the source that serves the transferred right(s)?
 Yes No Records not available.

4. In your estimation, after the proposed change, would distribution of water for the right(s) result in regulation of other water rights that would not have occurred if use under the original right(s) was/were maximized? Yes No If "Yes", explain:
 The proposed well is outside of the 1/4 mile regulation zone. If this is approved as the same source by groundwater staff, regulation of the proposed well must remain when the existing authorize well is regulated off.

5. In your estimation, if the proposed change is approved, are there upstream water rights that would be affected? Yes No If "Yes", describe how the rights would be affected and list the rights most affected:

6. Check here if it appears that downstream water rights benefit from return flows resulting from the current use of the transferred right(s)? If you check the box, generally characterize the locations where the return flows likely occur and list the water rights that benefit most:

N/A

7. For POD changes and instream transfers, check here if there are channel losses between the old and new PODs or within the proposed instream reach? If you check the box, describe and, if possible, estimate the losses:

N/A

8. For instream transfers that propose protection of a reach beyond the mouth of the source stream:

N/A Would the quantity be measureable into the receiving stream consistent with OAR 690-077-0015(8)? Yes No

9. For POU changes: N/A Is it likely the original place of use would continue to receive water from the same source? Yes No If "Yes", explain:

10. For POU or USE changes: N/A In your best judgment, would use of the existing right at "full face value," result in the diversion of more water than can be used beneficially and without waste?

Yes No If "Yes", explain:

11. For POU changes that involve micro-irrigation: N/A

a. Has the applicant made changes (absent a transfer) to convert to micro-irrigation within the current place of use boundary of the water right proposed for transfer, and previously demonstrated to the Department through monitoring and site inspections by the Watermaster that the proposed transfer will not result in injury or enlargement?

Yes No If "Yes", explain:

b. Has a temporary transfer of this nature been previously filed and approved on the same lands (or portions thereof) as those lands involved in this transfer?

Yes No If "Yes", answer the following:

i. Were there any problems with more acres being irrigated (or wetted) than were authorized under the temporary transfer? Yes No If "Yes", explain:

ii. Did the designated areas that were to remain dry (or not wetted) under the temporary transfer actually remain dry? Yes No If "No", explain:

iii. Did the applicant comply with and meet all of the conditions of the temporary transfer? Yes No If "No", explain:

iv. Do you have any other observations regarding the temporary transfer? Yes No If "Yes", describe:

v. Did the applicant demonstrate to the Department through monitoring and site inspections by the Watermaster that neither injury nor enlargement occurred as a result of the temporary transfer? Yes No If "No", explain:

c. To the best of your knowledge, if this transfer is approved, does it appear that:

i. "Injury" will occur to other water rights that share the same source? Yes No If "Yes", explain:

ii. "Enlargement" of the water right being transferred will occur? Yes No If "Yes", explain:

12. Are there other issues not identified through the above questions that should be considered in determining whether the change "can be effected without injury to other rights"?

Yes No If "Yes", explain:

See above regarding regulation of authorized well. Defer to groundwater staff for same source review.

13. What alternatives may be available for addressing any issues identified above:

14. Do conditions need to be included in the transfer order to avoid enlargement of the right or injury to other rights? No Yes, as checked and provided below:

For POU changes that involve micro-irrigation, provide the monitoring and reporting conditions necessary to prevent injury/enlargement:

A Headgate should be required prior to diverting water.

Measurement Devices for POD or POA: (if this condition is selected, also fill in the top sections of Page 4)

a. Before water use may begin under this order, the water user shall install a **totalizing flow meter***, or, with prior approval of the Director, another suitable measuring device, at each point of diversion/appropriation (new and existing) **OR** at each new point of diversion/appropriation with the exception that water rights issued to the Bureau of Reclamation or an irrigation district (or similar entity) are not subject to this condition.

b. The water user shall maintain the meters or measuring devices in good working order.

c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.

Reservoir water use measurement: (if this condition is selected, also fill in the top sections of Page 4)

a. Before water use may begin under this order, the water user shall install **staff gages***, or, with prior approval of the Director, other suitable measuring devices, that measure the entire range and stage between empty and full in each reservoir. Staff gages shall be United States Geological Survey style.

b. Before water use may begin under this order, if the reservoir is located in channel, weirs or other suitable measuring devices must be installed upstream and downstream of the reservoir, and, an adjustable outlet valve must be installed. The water user shall maintain such devices in good working order. A written waiver may be obtained, if in the judgment of the Director, the installation of weirs or other suitable measuring devices, or the adjustable outlet valve, will provide no public benefit.

* The following alternative device(s) should be substituted for the bold, underlined device in the above selected condition:

- Weir
- Parshall Flume
- Other: _____

- Submerged Orifice
- Flow Restrictor

Subject: T-14484 temporary transfer well question

Hi Scott,

While reviewing the application for T-14484, I ran into a question about the location of the Proposed POA. The application lists the Proposed POA as UMAT 2414; however, the map shows a location for the Proposed POA that

lines up with a different well (UMAT 2420). Can you reach out to the applicant to confirm whether UMAT 2414 or UMAT 2420 is the intended Proposed POA?

Thanks,
Andrew

Reference: Application T-14484

On June 18, 2024, the Department received your water right Temporary Transfer Application. The application was accompanied by \$1304.00. Receipt numbers 143143 & 143187 are enclosed.

By copy of this letter, we are asking the Watermaster for a report regarding the potential for injury to existing water rights which may be caused by the requested change.

Except as provided under ORS 540.510(3) for municipalities, you may not **temporarily** use water at the new place of use or from the new point of appropriation until a final order approving the temporary transfer application has been issued by the Department. Additionally, pursuant to OAR 690-380-8010, the lands **from** which an irrigation water right is to be temporarily transferred and the land **to** which the right is to be temporarily transferred may not both receive water during the same season. If the temporary transfer is approved during an irrigation season and water has already been used at the currently authorized location during that season, then the temporary transfer will not take effect until the following season.

If the land is sold before the temporary transfer is approved, the buyer's consent to the temporary transfer will be required unless a recorded deed or other legal document clearly established that the water right was not conveyed in the sale.

If you have any questions, please contact the Transfer Section at (503) 986-0935.

Part 2 of 5 – Temporary Transfer Application Map Checklist

Your temporary transfer application will be returned if any of the map requirements listed below are not met.

OWRD

Please be sure that the temporary transfer application map you submit includes all the required items and matches the existing water right map. Check all boxes that apply.

- N/A If more than three water rights are involved, separate maps are needed for each water right.
- Permanent quality printed with dark ink on good quality paper.
- The size of the map can be 8½ x 11 inches, 8½ x 14 inches, 11 x 17 inches, or up to 30 x 30 inches. For 30 x 30 inch maps, one extra copy is required.
- A north arrow, a legend, and scale.
- The scale of the map must be: 1 inch = 400 feet, 1 inch = 1,320 feet; the scale of the Final Proof/Claim of Beneficial Use Map (the map used when the permit was certificated); the scale of the county assessor map if the scale is not smaller than 1 inch = 1,320 feet; or a scale that has been pre-approved by the Department.
- Township, Range, Section, ¼ ¼, DLC, Government Lot, and other recognized public land survey lines.
- Tax lot boundaries (property lines) are required. Tax lot numbers are recommended.
- Major physical features including rivers and creeks showing direction of flow, lakes and reservoirs, roads, and railroads.
- Major water delivery system features from the point(s) of diversion/appropriation such as main pipelines, canals, and ditches.
- Existing place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions. If less than the entirety of the water right is being changed, a separate hachuring is needed for lands left unchanged.
- N/A Proposed temporary place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions.
- Existing point(s) of diversion or well(s) with distance and bearing or coordinates from a recognized survey corner. This information can be found in your water right certificate or permit.
- N/A If you are proposing a change in point(s) of diversion or well(s) to convey water to the new temporary place of use, show the proposed location and label it clearly with distance and bearing or coordinates. If GPS coordinates are used, latitude-longitude coordinates may be expressed as either degrees-minutes-seconds with at least one digit after the decimal (example – 42°32’15.5”) or degrees-decimal with five or more digits after the decimal (example – 42.53764°).

*Example for Line 2a calculation to transfer 45.0 acres of Primary Certificate 12345 (total 1.25 cfs for 100 acres) and 45.0 acres of Supplemental Certificate 87654 (1/80 cfs per acre) on the same land:

1. Divide total authorized cfs by total acres in the water right (for C12345, $1.25 \text{ cfs} \div 100 \text{ ac}$); then multiply by the number of acres to be transferred to get the transfer cfs ($\times 45 \text{ ac} = 0.56 \text{ cfs}$).
2. If the water right certificate does not list total cfs, but identifies the allowable use as 1/40 or 1/80 of a cfs per acre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (For C87654, $45.0 \text{ ac} \times 0.0125 \text{ cfs/ac} = 0.56 \text{ cfs}$)
3. Add cfs for the portions of water rights on all the land included in the transfer; however **do not count cfs for supplemental rights on acreage for which you have already calculated the cfs fee for the primary right on the same land**. The fee should be assessed only once for each "on the ground" acre included in the transfer. (In this example, blank 2a would be only 0.56 cfs, since both rights serve the same 45.0 acres. Blank 2b would be 0 and Line 2 would then also become 0).

Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For *proposed wells not yet constructed or built*, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.

RE: Temporary Transfer Application for a Water Right

Dear William Porfily,

The Water Resources Department has received your Temporary Transfer Application. At this time however, we are unable to accept your applications because the minimum filing requirements have not been met.

We are hereby returning the incomplete applications and the fees submitted, due to the items listed below:

1. Page 8 of the application, please indicate if proposed Well 1 is a change in POA or an additional POA. ✓
2. The Department requires Evidence of Use for each Certificate proposed for transfer in the application. ✓
Only one Evidence of Use Affidavit for Certificate 42339 is included with the application. Please submit a notarized and complete Evidence of Use affidavit for Certificate 46930 along with the required documentation.
3. Pursuant to OAR 690-380-3000(19) Land Use Forms must be submitted with a Temporary Transfer Application. Land Use Forms were not included with this application. ✓
4. Pursuant to OAR 690-380-3000(14) A copy of a current recorded deed with the county is required upon submittal of the application in order for the application to be considered complete. Certificate 46930 appears to be on a different Tax Lot than the deed provided. Please ensure the correct deeds for all of the lands that are proposed for transfer when resubmitting the application. ✓
5. Pursuant to OAR 690-380-3000(21)(a)(b), the Department requires a Supplemental Form D to be submitted with a Temporary Transfer Application. The application does include a signed Supplemental Form D however, the form only includes Certificate 42339. Please provide a Supplemental Form D for Certificate 46930. ✓
6. Well logs were not included with the application. Please make sure that they are included when resubmitting the application. ✓

We are hereby returning the application and the fees submitted. Should you have any questions or need assistance you may contact me at 503-979-3129 or by email at arla.l.davis@water.oregon.gov

RE: Temporary Transfer Application for a Water Right

Dear William Porfily,

The Water Resources Department has received your Temporary Transfer Application. At this time however, we are unable to accept your applications because the minimum filing requirements have not been met according to the Oregon Administrative Rules (OAR 690-380-3000, OAR 690-380 -3050, and OAR 690-380-8000).

We are hereby returning the incomplete applications and the fees submitted, due to the items listed below:

- Added Pages to transfer Acres*
1. According to Oregon Revised Statute and Oregon Administrative Rule a Temporary Transfer must include a change of Place of Use. Then an additional Point of Appropriation can be added if necessary to convey the water to the new temporary place of use. OAR 690-380-8000 (1).
 - 690-380-8000 (1) - Temporary Transfers - Any person who holds a water use subject to transfer may request that the Department approve:
 - (1) For a period of not to exceed five years, a temporary transfer of:
 - a) Place of use and, if necessary to convey the water to the new temporary place of use, point of diversion or appropriation; or
 - b) Character of use of a right to store water, or

In order for the applicant to add or change a Point of Appropriation only, an application for a permanent transfer may be submitted through the Department's standard Transfer process. The application is found on our website in the forms section.

- Added Deed*
2. A copy of a current recorded deed with the county is required upon submittal of the application in order for the application to be complete.
 - OAR 690-380-3000(14) For temporary transfers under OAR 690-380-8000, name of the deeded landowner of the land to which the water right is appurtenant and a copy of the recorded deed to the subject lands. If the applicant is not the deeded landowner, the applicant shall provide a notarized statement from the landowner authorizing the change.

We are hereby returning the application and the fees submitted. Should you have any questions or need assistance you may contact me at 503-979-3129 or by email at arla.l.davis@water.oregon.gov
