In the Matter of Transfer Application	)	FINAL ORDER APPROVING TEMPORARY
T-14825, Sherman County	)	CHANGE IN PLACES OF USE

Authority

Oregon Revised Statute (ORS) 537.705 and 540.505 to 540.580 establish the process in which a water right holder may submit a request to temporarily transfer the place of use and, if necessary to convey the water to the temporary place of use, the point of appropriation authorized under an existing water right. Oregon Administrative Rule (OAR) Chapter 690, Division 380 implements the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

Applicant

PO BOX 201	PO BOX 212
RUFUS, OR 97050	RUFUS, OR 97050

Findings of Fact

1. On February 17, 2026, William Martin (Martin Farms. Inc.) and Douglas Martin (3 Rivers Farm, Inc.) filed an application to temporarily change the places of use under Certificates 60446, 64106, and 87605. for a period of 5 years. The Department assigned the application number T-14825.
2. Notice of the application for transfer was published on February 24, 2026, pursuant to OAR 690-380-4000.
3. On March 9, 2026, the Department received correspondence from Josh Newton, Attorney for the Confederated Tribes of the Warm Springs Reservation of Oregon (Tribe). The Tribe does not object to the Department processing the Transfer Application T-14825, in accordance with applicable law, and the Department's customary practice.
4. The portion of the first right to be transferred is as follows:

Certificate: 60446 in the name of WILLIAM F. AND BARBARA B. MARTIN (perfected under Permit G-9559)

This is a final order in other than a contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-0080, you may petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

Temporary Transfer Review Criteria

10. Water has been used within the last five years according to the terms and conditions of the rights. There is no evidence available that would demonstrate that the rights are subject to forfeiture under ORS 540.610.
11. A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing rights are present.
12. The proposed changes would prevent the lands from which the water right is removed during the period of the temporary transfer from receiving water under the transferred rights, as required by ORS 540.523(7).
13. The proposed changes would not result in injury to other water rights. This finding is made through an abbreviated review recognizing that the transfer may be revoked under ORS 540.523(5) if the Department later finds that the transfer is causing injury to any existing water right.

14. To avoid enlargement of the temporary right the layered supplemental rights from the same source shall not be exercised.

Conclusions of Law

The temporary change in places of use proposed in Temporary Transfer Application T-14825 are consistent with the requirements of ORS 540.523 and OAR 690-380-8000.

Now, therefore, it is ORDERED:

1. The temporary change in places of use proposed in Temporary Transfer Application T-14825 are approved.
2. The former place of use **shall not** be irrigated as part of these water rights during the 2026, 2027, 2028, 2029 and 2030 irrigation seasons.
3. During duration of this temporary transfer layered rights should not be exercised.
4. The use shall revert to the authorized place of use at the end of the 2030 irrigation season.
5. The approval of this temporary transfer may be revoked or modified if the Department finds the change cause injury to any existing water right.
6. A subsequent application for permanent transfer of Certificates 60446, 64106, and 87605 shall be subject to a full and complete review to determine consistency with the requirements of OAR Chapter 690, Division 380. Approval of this temporary transfer does not establish a precedent for approval of a subsequent application filed for a permanent transfer.
7. The use of water at the temporary place of use authorized by this transfer shall be in accordance with the terms and conditions of Certificates 60446, 64106, and 87605.
8. The time during which water is used under this approved temporary transfer does not apply toward a finding of forfeiture under ORS 540.610.
9. The use of the remaining water rights described by Certificates 60446, 64106, and 87605 shall continue to be in accordance with the terms and conditions of Certificates 60446, 64106, and 87605.

Description of Water Delivery System

System capacity: 0.89 cubic feet per second (cfs) OR

400 gallons per minute (gpm)

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines, and sprinklers used to divert, convey, and apply the water at the authorized place of use. Water is pumped from the well (SHER-298, Circle-2 Well) to the place of use in buried mainlines before being applied through the center pivot at Circle 2 and portable sprinklers/wheel lines in the adjacent acres. The well is linked into the overall water distribution system connected to surrounding pivots and irrigation systems.

Transfer Application: T-14825

Review Due Date: 03/25/2026

Applicant Name: William & Douglas Martin

Proposed Changes: ☒ POU ☐ POD ☐ POA ☐ USE ☐ OTHER

Reviewer(s): R Wood

Date of Review: 03/16/2026

1. Do you have evidence that the right has not been used in the last 5 years and that the presumption of forfeiture would not likely be rebuttable? ☐ Yes ☒ No If "Yes", attach evidence (e.g. dated aerial photo showing pavement or building on the land for >5 yrs.)
2. Is there a history of regulation on the source that serves this (or these) right(s) that has involved the transferred right(s) and downstream water rights? ☐ Yes ☒ No Generally characterize the frequency of any regulation or explain why regulation has not occurred:

Regulation has not been necessary to date.
3. Have headgate notices been issued for the source that serves the transferred right(s)?
☐ Yes ☒ No ☐ Records not available.
4. In your estimation, after the proposed change, would distribution of water for the right(s) result in regulation of other water rights that would not have occurred if use under the original right(s) was/were maximized? ☐ Yes ☒ No If "Yes", explain:
5. In your estimation, if the proposed change is approved, are there upstream water rights that would be affected? ☐ Yes ☒ No If "Yes", describe how the rights would be affected and list the rights most affected:

6. Check here ☐ if it appears that downstream water rights benefit from return flows resulting from the current use of the transferred right(s)? If you check the box, generally characterize the locations where the return flows likely occur and list the water rights that benefit most:

☒ N/A

7. For POD changes and instream transfers, check here if there are channel losses between the old and new PODs or within the proposed instream reach? If you check the box, describe and, if possible, estimate the losses:

☒ N/A

8. For instream transfers that propose protection of a reach beyond the mouth of the source stream:

☒ N/A Would the quantity be measureable into the receiving stream consistent with OAR 690-077-0015(8)? ☐ Yes ☐ No

9. For POU changes: ☐ N/A Is it likely the original place of use would continue to receive water from the same source? ☐ Yes ☒ No If "Yes", explain:

10. For POU or USE changes: ☐ N/A In your best judgment, would use of the existing right at "full face value," result in the diversion of more water than can be used beneficially and without waste?

☐ Yes ☒ No If "Yes", explain:

11. For POU changes that involve micro-irrigation: ☒ N/A

- a. Has the applicant made changes (absent a transfer) to convert to micro-irrigation within the current place of use boundary of the water right proposed for transfer, and previously demonstrated to the Department through monitoring and site inspections by the Watermaster that the proposed transfer will not result in injury or enlargement?

☐ Yes ☐ No If "Yes", explain:

- b. Has a temporary transfer of this nature been previously filed and approved on the same lands (or portions thereof) as those lands involved in this transfer?

☐ Yes ☒ No If "Yes", answer the following:

- i. Were there any problems with more acres being irrigated (or wetted) than were authorized under the temporary transfer? ☐ Yes ☐ No If "Yes", explain:
- ii. Did the designated areas that were to remain dry (or not wetted) under the temporary transfer actually remain dry? ☐ Yes ☐ No If "No", explain:
- iii. Did the applicant comply with and meet all of the conditions of the temporary transfer? ☐ Yes ☐ No If "No", explain:
- iv. Do you have any other observations regarding the temporary transfer? ☐ Yes ☐ No If "Yes", describe:
- v. Did the applicant demonstrate to the Department through monitoring and site inspections by the Watermaster that neither injury nor enlargement occurred as a result of the temporary transfer? ☐ Yes ☐ No If "No", explain:

- c. To the best of your knowledge, if this transfer is approved, does it appear that:

- i. "Injury" will occur to other water rights that share the same source?

☐ Yes ☒ No If "Yes", explain:

- ii. "Enlargement" of the water right being transferred will occur?

☐ Yes ☒ No If "Yes", explain:

12. Are there other issues not identified through the above questions that should be considered in determining whether the change "can be effected without injury to other rights"?

☐ Yes ☒ No If "Yes", explain:

13. What alternatives may be available for addressing any issues identified above:

14. Do conditions need to be included in the transfer order to avoid enlargement of the right or injury to other rights? ☐ No ☒ Yes, as checked and provided below:

☐ For POU changes that involve micro-irrigation, provide the monitoring and reporting conditions necessary to prevent injury/enlargement:

☐ A Headgate should be required prior to diverting water.

☒ Measurement Devices for POD or POA: (if this condition is selected, also fill in the top sections of Page 4)

*a. Before water use may begin under this order, the water user shall install a **totalizing flow meter***, or, with prior approval of the Director, another suitable measuring device, ☒ at each point of diversion/appropriation (new and existing) **OR** at each new point of diversion/appropriation ☐ with the exception that water rights issued to the Bureau of Reclamation or an irrigation district (or similar entity) are not subject to this condition.*

b. The water user shall maintain the meters or measuring devices in good working order.

c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.

☐ Reservoir water use measurement: (if this condition is selected, also fill in the top sections of Page 4)

*a. Before water use may begin under this order, the water user shall install **staff gages***, or, with prior approval of the Director, other suitable measuring devices, that measure the entire range and stage between empty and full in each reservoir. Staff gages shall be United States Geological Survey style.*

b. Before water use may begin under this order, if the reservoir is located in channel, weirs or other suitable measuring devices must be installed upstream and downstream of the reservoir, and, an adjustable outlet valve must be installed. The water user shall maintain such devices in good working order. A written waiver may be obtained, if in the judgment of the Director, the installation of weirs or other suitable measuring devices, or the adjustable outlet valve, will provide no public benefit.

* The following alternative device(s) should be substituted for the bold, underlined device in the above selected condition:

☐ Weir	☐ Submerged Orifice
☐ Parshall Flume	☐ Flow Restrictor
☐ Other: _____

Re: Transfer Application T-14825

Dear Mr. Giffin, Ms. Henderson, and Mr. Frederick:

We represent the Confederated Tribes of the Warm Springs Reservation of Oregon ("Tribe"). The Oregon Water Resources Department ("Department") has provided the Tribe with certain information concerning Transfer Application T-14825, which is further identified in Appendix A hereto ("Application").

The Tribe has reviewed the Application. The Tribe is relying in good faith upon the information provided by the Department. Based on that information, the Tribe does not object to the Department processing the Application in accordance with applicable law, and the Department's customary practice. The Tribe expressly reserves, and does not waive, all rights, claims, and defenses that it may possess in connection with the Application, including, but not limited to, whether the Application violates the Treaty of June 25, 1855, with the Tribes of Middle Oregon, 12 Stat. 963, or the Confederated Tribes of the Warm Springs Reservation Water Rights Settlement Agreement, dated November 17, 1997, as amended.

RE: APPLICATION FOR TEMPORARY TRANSFER OF THREE CERTIFICATES (64106, 87605, & 60446)

Dear OWRD Staff,

CwM-H2O, LLC is submitting this temporary water right transfer application on behalf of Martin Farms, Inc. and 3 Rivers Farm, Inc., the Applicants. The transfer proposes a change in the place of use (POU) of portions of three water rights – Certificates 64106, 87605, and 60446 – to four center pivot irrigation circles for a period of five years. This proposed change in POU does not require any structural changes to the existing distribution system, it has no corresponding changes to points of appropriation (POAs), nor are their proposed changes to the character of use. The changes are based on planned crop rotations over the farming operation.

The items included in the application package are as follows:

Application for a Permit to Use Groundwater:

- An application for the Transfer Reimbursement Authority (RA) and check for \$125,
- A \$3,072.50 check for the transfer application fee,
- A signed application form document,
- A stamped temporary transfer map (Attachment 1),
- Completed Evidence of Use Affidavits (Attachment 2),
- Legal descriptions of the "from" lands (Attachment 3),
- Map scale waiver emails from OWRD (Attachment 4),
- Available well logs for relevant POAs (Attachment 5).

The application package included herein has scanned copies of the Applicants' signatures and notarized affidavits. The original signatures will be mailed to OWRD separately following this submittal in case they are required by the Department.

Please let us know if there are any issues with processing this application or any questions about the contents therein.

Sincerely,

CwM H2O, L.L.C.

Part 2 of 4 – Temporary Transfer Application Map Checklist

Your temporary transfer application will be returned if any of the map requirements listed below are not met.

Please be sure that the temporary transfer application map you submit includes all the required items and matches the existing water right map. Check all boxes that apply.

- ☐ ☒ N/A If more than three water rights are involved, separate maps are needed for each water right.
- ☒ Permanent quality printed with dark ink on good quality paper.
- ☒ The size of the map can be 8½ x 11 inches, 8½ x 14 inches, 11 x 17 inches, or up to 30 x 30 inches. For 30 x 30 inch maps, one extra copy is required.
- ☒ A north arrow, a legend, and scale.
- ☒ The scale of the map must be: 1 inch = 400 feet, 1 inch = 1,320 feet; the scale of the Final Proof/Claim of Beneficial Use Map (the map used when the permit was certificated); the scale of the county assessor map if the scale is not smaller than 1 inch = 1,320 feet; or a scale that has been pre-approved by the Department. Scale waiver → ATTACHMENT 4
- ☒ Township, Range, Section, ¼ ¼, DLC, Government Lot, and other recognized public land survey lines.
- ☒ Tax lot boundaries (property lines) are required. Tax lot numbers are recommended.
- ☒ Major physical features including rivers and creeks showing direction of flow, lakes and reservoirs, roads, and railroads.
- ☒ Major water delivery system features from the point(s) of diversion/appropriation such as main pipelines, canals, and ditches.
- ☒ Existing place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions. If less than the entirety of the water right is being changed, a separate hachuring is needed for lands left unchanged.
- ☒ ☐ N/A Proposed temporary place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions.
- ☒ Existing point(s) of diversion or well(s) with distance and bearing or coordinates from a recognized survey corner. This information can be found in your water right certificate or permit. – available well logs are included as ATTACHMENT 5
- ☐ ☒ N/A If you are proposing a change in point(s) of diversion or well(s) to convey water to the new temporary place of use, show the proposed location and label it clearly with distance and bearing or coordinates. If GPS coordinates are used, latitude-longitude coordinates may be expressed as either degrees-minutes-seconds with at least one digit after the decimal (example – 42°32'15.5") or degrees-decimal with five or more digits after the decimal (example – 42.53764°).

Explain in your own words what you propose to accomplish with this transfer application and why:

The Applicants wish to temporarily transfer portions of the places of use for three water rights certificates (Cert. 64106, Cert. 87605, and Cert. 60446) to cover areas of four center-pivots with primary water rights for the next five irrigation seasons. The Applicants plan to grow high-value crops in these areas and require temporary movement of these water rights. The distribution system is fully integrated such that each certificate's POA can provide water to the proposed "to" lands.

**A LUCS form is not required for this proposed temporary transfer, as it meets all conditions for a LUCS waiver (POU change only, no structural changes, just irrigation, and all within EFU-zoned land).*

FEB 17 2026

OWRD

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines, and sprinklers used to divert, convey, and apply the water at the authorized place of use. Water is pumped from the well (SHER-311, Corral Well) to the place of use in buried mainlines before being applied through two center pivots (Circle 1 and Circle 10) and portable sprinklers/wheel lines. The well is linked into the overall water distribution system connected to surrounding pivots and irrigation systems.

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands? ☒ Yes ☐ No

If YES, list the certificate, water use permit, or ground water registration numbers: G-18144

Pursuant to ORS 540.523, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for temporary transfer can be included in the transfer or remain unused on the authorized place of use. If the primary water right does not revert soon enough to allow use of the supplemental right within five years, the supplemental right shall become subject to cancellation for nonuse under ORS 540.610.

If a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation is necessary to convey the water to the new temporary place of use you must provide:

- ☐ Well log(s) for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map. (Tip: You may search for well logs on the Department's web page at: http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx)

AND/OR

- ☒ Describe the construction of the authorized and proposed well(s) in Table 3 below for any well that does not have a well log. For a *proposed well(s) not yet constructed or built*, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the Department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.

There is evidence of seasonal irrigation of the portions of Certificate 87650 proposed for temporary transfer in this Application. Portions of the "from" lands were irrigated in each of the last five years, and all of the proposed "from" lands have been irrigated in at least one of the last five years. We see the place of use significantly wetter (dark blue in the Sentinel-2 Moisture Index data) than nearby dried out fields.

Part 2 of 4 – Temporary Transfer Application Map Checklist

Your temporary transfer application will be returned if any of the map requirements listed below are not met.

Please be sure that the temporary transfer application map you submit includes all the required items and matches the existing water right map. Check all boxes that apply.

- ☐ ☒ N/A If **more than three** water rights are involved, separate maps are needed for each water right.
- ☒ Permanent quality printed with dark ink on good quality paper.
- ☒ The size of the map can be 8½ x 11 inches, 8½ x 14 inches, **11 x 17 inches**, or up to 30 x 30 inches. For 30 x 30 inch maps, one extra copy is required.
- ☒ A north arrow, a legend, and scale.
- ☒ The scale of the map must be: 1 inch = 400 feet, 1 inch = 1,320 feet; the scale of the Final Proof/Claim of Beneficial Use Map (the map used when the permit was certificated); the **scale of the county assessor map** if the scale is not smaller than 1 inch = 1,320 feet; or a scale that has been pre-approved by the Department. Scale waiver → **ATTACHMENT 4**
- ☒ Township, Range, Section, ¼ ¼, DLC, Government Lot, and other recognized public land survey lines.
- ☒ Tax lot boundaries (property lines) are required. Tax lot numbers are recommended.
- ☒ Major physical features including rivers and creeks showing direction of flow, lakes and reservoirs, roads, and railroads.
- ☒ Major water delivery system features from the point(s) of diversion/appropriation such as main pipelines, canals, and ditches.
- ☒ Existing place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions. If less than the entirety of the water right is being changed, a separate hachuring is needed for lands left unchanged.
- ☒ ☐ N/A Proposed temporary place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions.
- ☒ Existing point(s) of diversion or well(s) with distance and bearing or coordinates from a recognized survey corner. This information can be found in your water right certificate or permit. – available well logs are included as **ATTACHMENT 5**
- ☐ ☒ N/A If you are proposing a change in point(s) of diversion or well(s) to convey water to the new temporary place of use, show the proposed location and label it clearly with distance and bearing or coordinates. If GPS coordinates are used, latitude-longitude coordinates may be expressed as either degrees-minutes-seconds with at least one digit after the decimal (example – 42°32'15.5") or degrees-decimal with five or more digits after the decimal (example – 42.53764°).

Explain in your own words what you propose to accomplish with this transfer application and why:

The Applicants wish to temporarily transfer portions of the places of use for three water rights certificates (Cert. 64106, Cert. 87605, and Cert. 60446) to cover areas of four center-pivots with primary water rights for the next five irrigation seasons. The Applicants plan to grow high-value crops in these areas and require temporary movement of these water rights. The distribution system is fully integrated such that each certificate's POA can provide water to the proposed "to" lands.

**A LUCS form is not required for this proposed temporary transfer, as it meets all conditions for a LUCS waiver (POU change only, no structural changes, just irrigation, and all within EFU-zoned land).*

I (we) affirm that the information contained in this application is true and accurate.

Explain in your own words what you propose to accomplish with this transfer application and why:

The Applicants wish to temporarily transfer portions of the places of use for three water rights certificates (Cert. 64106, Cert. 87605, and Cert. 60446) to cover areas of four center-pivots with primary water rights for the next five irrigation seasons. The Applicants plan to grow high-value crops in these areas and require temporary movement of these water rights. The distribution system is fully integrated such that each certificate's POA can provide water to the proposed "to" lands.

**A LUCS form is not required for this proposed temporary transfer, as it meets all conditions for a LUCS waiver (POU change only, no structural changes, just irrigation, and all within EFU-zoned land).*

I (we) affirm that the information contained in this application is true and accurate.

Applicant signature: *Douglas Martin* Print Name (and Title if applicable): Douglas Martin Date: 2-12-26

Is the applicant the sole owner of the land on which the water right, or portion thereof, proposed for transfer is located? ☒ Yes ☐ No

-Each of the "from" lands are jointly owned the two Applicants.

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines, and sprinklers used to divert, convey, and apply the water at the authorized place of use. Water is pumped from the well (SHER-311, Corral Well) to the place of use in buried mainlines before being applied through two center pivots (Circle 1 and Circle 10) and portable sprinklers/wheel lines. The well is linked into the overall water distribution system connected to surrounding pivots and irrigation systems.

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands? ☒ Yes ☐ No

If YES, list the certificate, water use permit, or ground water registration numbers: G-18144

Pursuant to ORS 540.523, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for temporary transfer can be included in the transfer or remain unused on the authorized place of use. If the primary water right does not revert soon enough to allow use of the supplemental right within five years, the supplemental right shall become subject to cancellation for nonuse under ORS 540.610.

If a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation is necessary to convey the water to the new temporary place of use you must provide:

- ☐ Well log(s) for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map. (Tip: You may search for well logs on the Department's web page at: http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx)

- ☒ Describe the construction of the authorized and proposed well(s) in Table 3 below for any well that does not have a well log. For a *proposed well(s) not yet constructed or built*, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the Department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.

On February 17, 2026, the Department received your water right Temporary Transfer Application. The application was accompanied by \$3072.50. Receipt number 146889 is enclosed.

By copy of this letter, we are asking the Watermaster for a report regarding the potential for injury to existing water rights which may be caused by the requested change.

Except as provided under ORS 540.510(3) for municipalities, you may not **temporarily** use water at the new place of use until a final order approving the temporary transfer application has been issued by the Department. Additionally, pursuant to OAR 690-380-8010, the lands from which an irrigation water right is to be temporarily transferred and the land to which the right is to be temporarily transferred may not both receive water during the same season. If the temporary transfer is approved during an irrigation season and water has already been used at the currently authorized location during that season, then the temporary transfer will not take effect until the following season.

If the land is sold before the temporary transfer is approved, the buyer's consent to the temporary transfer will be required unless a recorded deed or other legal document clearly established that the water right was not conveyed in the sale.

If you have any questions, please contact the Transfer Section at (503) 986-0935.

RE: APPLICATION FOR TEMPORARY TRANSFER OF THREE CERTIFICATES (64106, 87605, & 60446)

Dear OWRD Staff,

CwM-H2O, LLC is submitting this temporary water right transfer application on behalf of Martin Farms, Inc. and 3 Rivers Farm, Inc., the Applicants. The transfer proposes a change in the place of use (POU) of portions of three water rights – Certificates 64106, 87605, and 60446 – to four center pivot irrigation circles for a period of five years. This proposed change in POU does not require any structural changes to the existing distribution system, it has no corresponding changes to points of appropriation (POAs), nor are their proposed changes to the character of use. The changes are based on planned crop rotations over the farming operation.

The items included in the application package are as follows:

Application for a Permit to Use Groundwater:

- An application for the Transfer Reimbursement Authority (RA) and check for \$125,
- A \$3,072.50 check for the transfer application fee,
- A signed application form document,
- A stamped temporary transfer map (Attachment 1),
- Completed Evidence of Use Affidavits (Attachment 2),
- Legal descriptions of the "from" lands (Attachment 3),
- Map scale waiver emails from OWRD (Attachment 4),
- Available well logs for relevant POAs (Attachment 5).

The application package included herein has scanned copies of the Applicants' signatures and notarized affidavits. The original signatures will be mailed to OWRD separately following this submittal in case they are required by the Department.

Please let us know if there are any issues with processing this application or any questions about the contents therein.

Sincerely,

CwM H2O, L.L.C.

RE: APPLICATION FOR TEMPORARY TRANSFER OF THREE CERTIFICATES (64106, 87605, & 60446)

Dear OWRD Staff,

CwM-H2O, LLC (CwM) submitted a temporary water right transfer application on behalf of Martin Farms, Inc. and 3 Rivers Farm, Inc., the Applicants, on February 13, 2026. The transfer proposes a change in the place of use (POU) of portions of three water rights – Certificates 64106, 87605, and 60446 – to four center pivot irrigation circles for a period of five years. This proposed change in POU does not require any structural changes to the existing distribution system, it has no corresponding changes to points of appropriation (POAs), nor are there proposed changes to the character of use. The changes are based on planned crop rotations over the farming operation.

The application was submitted with electronic scans of the original signatures for the application and Evidence of Use Affidavit, as the multiple Applicant parties were unable to sign together. Accompanying this letter, you will find the original signature pages for the application (page 4 of 15) and the Evidence of Use Affidavits from each party. Please place these documents in the record with the temporary transfer application package.

Please let us know if there are any issues with processing these documents, the temporary transfer application, or have any questions about the contents therein.

Sincerely,

CwM H2O, L.L.C.
