9. The authorized place of use as described in Finding of Facts #3 and #5, above, are appurtenant to lands described under Permits S-55061, S-54633, S-55401 and S-55192. These permits provide for pre-planned (only) annual use of water from the Columbia River, tributary to the Pacific Ocean, within certain constraints and permissions as outlined in the permits.
10. The proposed place of use as described in Finding of Fact #5 and #7, above, will become appurtenant to lands described under Permits S-55061, S-54633, S-55401, and S-55192. In the interest of preserving groundwater, water use described under Permits S-55061, S-54633, S-55401, and S-55192, may be used as the primary supply when water is available for use under these permits. If water use under these permits during an irrigation season is supplemental to a primary groundwater right, and the water under these permits is used as the primary supply, then the primary groundwater right cannot be transferred separately from the supplemental water under this permit to another place of use or character of use. If water from Permits S-55061, S-54633, S-55401, and S-55192, is used for supplemental

irrigation, the pre-existing primary rights for the same place of use cannot be transferred to another place or character of use.

Transfer Review Criteria [OAR 690-380-0100(14), OAR 690-380-4010(2), and OAR 690-380-2200]

11. Water has been used within the last five years prior to submittal of Transfer Application T-14594 according to the terms and conditions of the rights. There is no information in the record that would demonstrate that the rights are subject to forfeiture under ORS 540.610.
12. A water delivery system sufficient to use the full amount of water allowed under the existing rights was present within the five-year period prior to submittal of Transfer Application T-14594.
13. The water rights are subject to transfer as defined in ORS 540.505(4) and OAR 690-380-0100(14).
14. The proposed change, as conditioned, would not result in enlargement of the rights.
15. The proposed change, as conditioned, would not result in injury to other existing water rights.
16. All other application requirements are met.

Determination and Proposed Action

The change in places of use proposed in Transfer Application T-14594 appear to be consistent with the requirements of ORS 540.505 to 540.580 and OAR 690-380-5000. If protests are not filed pursuant to OAR 690-380-4030, the transfer application will be approved.

If Transfer Application T-14594 is approved, the final order will include the following:

1. *The change in places of use proposed in Transfer Application T-14594 are approved.*
2. *The right to the use of the water is restricted to beneficial use at the place of use described and is subject to all other conditions and limitations contained in Certificates 80705, 81408, and any related decree.*
3. *Approval of this transfer application does not constitute nor grant legal access onto or through another person's property for purposes of accessing the new places of use.*
4. *Water right Certificates 80705 and 81408 are cancelled. New certificates will be issued describing those portions of the rights not affected by this transfer.*

5. *The former place of use of the transferred rights shall no longer receive water under the rights.*
6. *Water use measurement conditions:*
 - a. *Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device, at each point of diversion.*
 - b. *The water user shall maintain the meters or measuring devices in good working order.*
 - c. *The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.*
7. *Full beneficial use of the water shall be made, consistent with the terms of this order, on or before **October 1, 2027**. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the change and full beneficial use of the water.*
8. *After satisfactory proof of beneficial use is received, new certificates confirming the rights transferred will be issued.*

SUBJECT: Water Right Transfer Application T-14594

Please find enclosed the Proposed Final Order indicating that, based on the information available, the Department intends to approve application T-14594. This document is an intermediate step in the approval process; water may not be used legally as proposed in the transfer application until a Final Order has been issued by the Department. Please read this entire letter carefully to determine your responsibility for additional action.

A public notice is being published in the Department's weekly publication, simultaneously with issuance of the Proposed Final Order. The notice initiates a period in which any person may file either a protest opposing the decision proposed by the Department in the Proposed Final Order or a request for party status supporting the Department's decision. The protest period will end 30 days after the Department's notice.

The Proposed Final Order will become a Final Order 33 days after the protest period ends without any further action by the Department, as a matter of law, if no protest is filed.

If a protest is filed, the application may be referred to a contested case proceeding. A contested case provides an opportunity for the proponents and opponents of the decision proposed in the Proposed Final Order to present information and arguments supporting their position in a quasi-judicial proceeding.

Please don't hesitate to contact me at 503-986-0892 or Joan.M.Smith@water.oregon.gov, if I may be of assistance.

Sincerely,

Joan Smith
