6. Notice of the application for temporary transfer was published pursuant to ORS 540.520 and OAR 690-380-4000. No comments were filed in response to the notice.
7. Water has been used within the last five years according to the terms and conditions of the rights. No evidence is available that would demonstrate that the rights are subject to forfeiture under ORS 540.610.
8. A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing right are present.
9. The proposed change will not result in enlargement of the right.
10. The proposed change will not result in injury to other water rights. This finding is made through an abbreviated review recognizing that the transfer may be revoked under ORS 540.523(6) if the Department later finds that the transfer is causing injury to any existing water right.

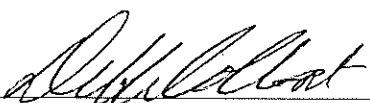

Conclusions of Law

The temporary changes in place of use proposed in application T-10536 are consistent with the requirements of ORS 540.523 and OAR 690-380-8000.

Now, therefore, it is ORDERED:

11. The changes in place of use proposed in application T-10536 are approved.
12. The former place of use **shall not** be irrigated as part of this water right during the 2008, 2009, 2010, 2011 and 2012 irrigation seasons.
13. The use shall revert to the authorized place of use at the end of the 2012 irrigation season.
14. The approval of this temporary transfer may be revoked or modified if the Department finds the change causes injury to any existing water right.
15. A subsequent application for permanent transfer of Certificates 54085 and 54086 shall be subject to a full and complete review to determine consistency with the requirements of OAR Chapter 690, Division 380. Approval of this temporary transfer does not establish a precedent for approval of a subsequent application filed for a permanent transfer.
16. The use of water at the temporary place of use authorized by this transfer shall be in accordance with the terms and conditions of Certificates 54085 and 54086 and any related decree.
17. The time during which water is used under this approved temporary transfer does not apply toward a finding of forfeiture under ORS 540.610.
18. The water user shall maintain and operate the existing measurement device and shall make such improvements as may be required by the Department.
19. The use of the remaining water right described by Certificates 54085 and 54086 shall continue to be in accordance with the terms and conditions of Certificates 54085 and 54086 and any related decree.

Dated at Salem, Oregon this 17th day of March 2008.

Question #4 (Continued)

Reasons for changes:

circle that currently does not receive water because it is not allocated, i.e. priority date is junior to other rights within the sub-area. The water rights from the circle where the corners are being transferred to, (G-9285) are being transferred to the corners. The applicant does not want to forfeit these primary rights even though they are not currently allocated. For the time being at least, he would rather they be retained in the corners under CRP.

Question #5 (Continued)

Water Delivery System

Prior to the circles being installed and even after installation, the corners were irrigated with wheel lines.

It should be reiterated that one well can supply both G-6932 and G-9285, however, because G-9285 is not allocated water, no irrigation has taken place.

Re: Branstetter Temporary Transfer

Dear Susan:

Enclosed is a temporary transfer our office is doing for Tom Branstetter (owner) and Larry Lorenzen (operator). I'm enclosing a check in the amount of \$349, which by my calculation should cover the fee. If I have not computed the fee correctly please let me know and I'll remit additional payment.

For your information, we have previously submitted a permanent transfer for this same land. We desire to "piggy-back" this temporary transfer with the permanent transfer in the hopes that Mr. Lorenzen might be able to irrigate later this spring. It is our understanding that a temporary transfer takes approximately 60 days to process.

If you need any additional information please do not hesitate to contact me. Thank you.

Sincerely yours,

Dennis R. Hunt
Legal Assistant

As we enter fall and cooler outdoor temperatures, remember to program your heating system's thermostat and don't make manual adjustments as this will cause your system to run less efficiently. Setting your temperature lower at night could save as much as 20% on your heating bill this winter. Change the filters on your system monthly to keep your heater running smoothly. For more energy saving tips, contact our customer services representative at 567-6414.
