In the Matter of the Completion of a Change	)	DETERMINATION OF SATISFACTORY
in Place of Use Under Transfer Application	)	PROOF OF COMPLETION FOR A
T-10519, Jackson County	)	PERMANENT DISTRICT TRANSFER

Authority

Oregon Administrative Rule (OAR) 690-385-7400 describes the documentation the district must file with the Department in order to provide proof of use.

OAR 690-385-7600 provides in pertinent part that satisfactory proof shall be (a) a determination by the Department that application of water to beneficial use under the terms of the transfer final order was completed to the extent authorized, or (b) a determination by the Department that the application of water to a beneficial use under the terms of the transfer final order was completed to an extent less than authorized.

Oregon Revised Statue (ORS) 540.530(2)(a) and OAR 690-385-7600 authorize the Department to issue or modify a certificate of water right upon satisfactory proof of completion of the change or changes authorized by a final order approving a permanent district transfer.

Applicant

MEDFORD IRRIGATION DISTRICT
PO BOX 70
JACKSONVILLE, OR 97530

Findings of Fact

1. On November 24, 2009, the Department signed a final order, which was mailed on December 11, 2009, and recorded in Special Order Volume 79, Pages 203-209, approving Transfer Application T-10519 involving Certificates 83381, 83383, 80578 and Permit S-4951. The final order established October 1, 2011, as the date for completion of the authorized changes in place of use.
2. On September 26, 2012, the Department received a Claim of Beneficial Use (CBU) and associated maps from the applicant for Transfer Application T-10519.

NOTICE OF RIGHT TO PETITION FOR RECONSIDERATION OR JUDICIAL REVIEW

This is an order in other than a contested case. This order is subject to judicial review under ORS 183.482. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.482. Pursuant to ORS 183.482, ORS 536.075 and OAR 137-003-0675, you may petition for judicial review and petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

3. On September 26, 2017, the Department received an amended map and site report from the applicant for one of the parcels for Transfer Application T-10519, thus satisfying all the requirements for proof under OAR 6902-385-7400.
4. The Department reviewed the CBU and map(s) submitted by the applicant for Transfer Application T-10519.
5. The CBU did not contain a map of the point of diversion from the source. However, since the transfer involved the transfer of places of use only within an irrigation district and did not involve a change in the point of diversion, the existing maps on file with the Department are sufficient to identify the point of diversion from the source.
6. The proposed place of use as approved the final order for Transfer Application T-10519, and as recorded in Special Order Volume 79, Pages 203-209 is shown in the table below:

¹This quarter-quarter was incorrectly identified in the transfer final order; it is shown correctly here.

²This tax lot number changed since the transfer final order was issued; it has been updated here to reflect the change as shown in the CBU.

7. Based on the review of evidence submitted by the applicant, the department finds that the application of water to beneficial use under the terms of the transfer final order for T-10519 was completed to the extent authorized in the transfer as described in Table 1, above.

Conclusions of Law

1. The Applicant has submitted proof of use pursuant to OAR 690-385-7400.
2. Application of water to a beneficial use under the terms of the transfer final order has been made to the extent shown in Tables 1, above.
3. The applicant has demonstrated proof of completion under T-10519 to the satisfaction of the department.

4. The Department is authorized to issue or modify certificates of water rights involved in transfer T-10519 consistent with this determination of satisfactory proof of completion.

Now, therefore, it is ORDERED:

Water right Certificates 83381, 83383, 80578 and Permit S-4951 are modified as shown in Tables 1, above. The Department will issue superseding certificates and permit describing these rights when it determines it is necessary for record keeping.

Hi Patty,

I am working on the CBU for T-10519. I noticed that in TL 400 of T 37 E, R 2 W, Section 29 that 8.2 acres in SWNE and 0.3 acres in SENE were approved. On the CBU map and site report only the 8.2 acres are noted. If not proved up on the 0.3 acres will be lost. I checking to see if it was an oversight that the 0.3 acres were not included in the CBU. If they are to be included, they need to be shown on the site report and the Final Proof Map. [I included a scan of the application map – it shows the 8.2 and the 0.3 acres].

Best regards,

Aleta:

As I prepare the notice, and actually look at the data closely, I have discovered the following (I apologize for not reviewing more closely yesterday per your request):

1. I don't find an "OFF" map for 37S 1W 20 FORSYTH 2. My interpretation of the map suggests the legal for the 3.6 acres for BECHTER (OFF) is located in 37S 1W 16 NENW 3. The legal for TORANO (OFF) is 37S 1W 16 SWNE 4. The legal for FITCH (OFF) is o.k.
5. The legal for BOSSARD (ON) is 36S 1W 34 NESW and SESW according to the map.

You might want to verify my interpretation.

O.K. Looks good.

If you already sent the notice to the watermaster, you might want to e-mail an amended notice. You could also converse/work with the watermaster office about whether you should just e-mail them notice in general. They should be able to review the notices you provide just as I have. I know Central Oregon ID in Redmond does that with the watermaster office located in Bend (and the district sends the same e-mail to me as well for public notice). It seems an efficient and effective way to operate.

Dear Alan,

Attached is a revised correction to the transfer 10519, notice 07-03.

Please notice the Authorized place of use is where the corrections are.

The original table showed Orchard Homes LLC 372W36 TAX LOT 2219 which CAN NOT BE USED IN THIS TRANSFER.

The replaced table states the corrected Authorized place of use showing the lands to be used in 07-03 transfer along with mapping.

If you have any questions please call or email. Thank you for your help with this, Alan.

Watermaster Review Form: Water Right Transfer

Transfer Application: T-10519

Review Due Date: 2/16/08

Applicant Name: Medford Irrigation District

Proposed Changes: ☒ POU ☐ POD ☐ POA ☐ USE ☐ OTHER

Reviewer(s): Larry Menteer

Date of Review: Mar. 18, 2008

1. Do you have information suggesting that the water rights may be subject to forfeiture?
☐ Yes ☒ No If "Yes", describe the information and indicate if you intend to file a cancellation affidavit or if you need additional time to determine if a cancellation affidavit should be filed: _____
2. Is there a history of regulation on the source that serves the right proposed for transfer that has involved the right and downstream water rights? ☒ Yes ☐ No Generally characterize the frequency of any regulation or explain why regulation has not occurred: The system for TID/MID/RRVID was designed collectively. MID and RRVID have senior right on waters from the South Fork of Little Butte Creek. TID and MID are junior to RRVID on Bear Creek live flow. Each year RRVID calls for its water, then TID and MID begin using their stored water.
3. Check here if it appears that downstream water rights benefit from return flows resulting from the current use of the right? ☐ If you check the box, generally characterize the locations where the return flows likely occur and list the water rights that benefit most: Since the system was designed collectively and MID and RRVID are down stream, they benefit from return flows along most of the length of Bear Creek from the town of Phoenix to the juncture with the Rogue River.
4. Are there upstream water rights that would be affected by the proposed change?
☐ Yes ☒ No If "Yes", describe how the rights would be affected and list the rights most affected: _____
5. For POD changes and instream transfers, check here if there are channel losses between the old and new PODs or within the proposed instream reach? ☐ If you check the box, describe and, if possible, estimate the losses: _____
6. Would distribution of water for the right after the proposed change result in regulation of other water rights that would not have occurred if use of the existing right was maximized?
☐ Yes ☒ No If "Yes", explain: _____
7. For POU changes, would the original place of use continue to receive water from the same source? ☐ Yes ☒ No ☐ N/A If "Yes", explain: _____

8. For POU or USE changes, would use of the existing right at "full face value," result in the diversion of more water than can be used beneficially and without waste? ☐ Yes ☒ No
If "Yes", explain: _____
9. Are there other issues not identified through the above questions? ☐ Yes ☒ No If
"Yes", explain: _____
10. What alternatives may be available for addressing any issues identified above: _____
11. Have headgate notices been issued for the source that serves the right? ☒ Yes ☐ No
12. What water control and measurement conditions should be included in the transfer:

Measurement Devices	☒ Present and should be maintained.	☐ Should be required prior to diverting water.	☐ May be required in the future.
Headgates	☒ Present and should be maintained.	☐ Should be required prior to diverting water.	☐ May be required in the future.

Attention Greg Nelson

Dear Greg,

Please find enclosed the Medford Irrigation District's permanent transfer requests from Notices #07-01, #07-02, #07-03, and #07-04. These landowners have perfected the water right transfer during the 2007 irrigation season.

As you know that Certificate #80570 was replaced with Certificate #83381 and Certificate #80572 was replaced with Certificate #83383. I am including copies of the first pages of Certificates #83381 and #83383 and an "abstract of Permit No. 4951" for supplemental irrigation. We are still waiting for this Certificate.

On the Notices of Transfer I sent to you in April 2007, the tables were defined with the old Certificates #80570 and #80572. The attached Petition for Permanent Transfer lists the New Certificates #83381 and #83383.

Thank you for all of your help on this and hopefully the next one will go a little smoother.

Sincerely

Carol Bradford

If certain lands within this water right are found to have had legally exercised water rights that have a priority date senior to the date of this permit, then this water right shall be considered supplemental to the senior water right. This water right may not be transferred separately from any senior water right existing for the same lands. If the senior water right for the same lands is cancelled, then this water right may be transferred as a primary water right.

The right to the use of the water for the above purpose is restricted to beneficial use on the lands or place of use described. The use herein may be made only at times when sufficient water is available to satisfy all prior rights, including rights for maintaining instream flows.

This certificate describes that portion of the water right confirmed by Certificate 80570, State Record of Water Right Certificates, NOT modified by the provisions of an order of the Water Resources Director entered May 31, 2007, approving Transfer Application 10120. This certificate also corrects the scrivener's error in number of total acres cited.

The issuance of this superseding certificate does not confirm the status of the water right in regard to the provisions of ORS 540.610 pertaining to forfeiture or abandonment.

WITNESS the signature of the Water Resources Director, affixed May 31, 2007.

Phillip C. Ward, Director
