OF THE
STATE OF OREGON**

In the Matter of Transfer Application	)	FINAL ORDER APPROVING A CHANGE
T-13530, Josephine County	)	IN POINT OF DIVERSION TO REFLECT
	)	HISTORIC USE

Authority

ORS 540.532 establishes the process in which a water right holder may submit a request for a change in point of diversion to reflect historical use under an existing water right. OAR Chapter 690-380-2120 implements the statute and provides the Department's procedures and criteria for evaluating historic point of diversion/appropriation transfer applications.

Applicant

RALPH J. BISHOP
618 E COOK STREET
SANTA MARIA, CA 93454

Findings of Fact

1. On September 30, 2020, RALPH J. BISHOP filed a transfer application for authorization of an historic point of diversion under Certificate 20834. The Department assigned the application number T-1353013530.
2. Notice of the application for transfer was published on October 6, 2020, pursuant to OAR 690-380-4000. No comments were filed in response to the notice.
3. On March 16, 2021, the Department contacted the applicant by written correspondence to notify the applicant and the applicant's agent of deficiencies in the application. The "FROM" lands in Table 2 did not match acres identified in the map, and the Evidence of Use affidavit was not stamped by the notary. The Department requested that the deficiencies be resolved by April 15, 2021.
4. On March 24, 2021, the Department received a revised Table 2.
5. On March 29, 2021, the Department received an Evidence of Use affidavit containing both the signature and stamp of the notary, resolving the deficiencies.

This is a final order in other than a contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-0080, you may petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

6. The portion of the right to be transferred is as follows:

Certificate: 20834 in the name of W. O. BURCH (perfected under Permit S-16346)
Use: IRRIGATION of 0.5 ACRE
Priority Date: MAY 24, 1945
Rate: 0.01 CUBIC FOOT PER SECOND
Limit/Duty: The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, shall be limited to ONE-FIFTIETH of one cubic foot per second per acre, or its equivalent for each acre irrigated throughout the irrigation season from April 1st to November 1st of each year.
Period of Use: April 1 to November 1
Source: WEST FORK ILLINOIS RIVER, a tributary of ILLINOIS RIVER

Authorized Point of Diversion:

Twp	Rng	Mer	Sec	Q-Q
39 S	8 W	WM	32	NW SE

Authorized Place of Use:

IRRIGATION					
Twp	Rng	Mer	Sec	Q-Q	Acres
39 S	8 W	WM	32	NW SE	0.5

7. The Department received information from the applicant that better describes the location of the authorized point of diversion for Certificate 20834 as follows:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
39 S	8 W	WM	32	NW SE	POD 4 - 460 FEET SOUTH AND 140 FEET EAST FROM THE CENTER OF SECTION 32

8. Transfer Application T-13530 proposes to move the authorized point of diversion approximately 1029 feet downstream to reflect historical use to:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
39 S	8 W	WM	32	NW SE	POD 3 - 30 FEET SOUTH AND 1070 FEET EAST FROM THE CENTER OF SECTION 32

9. The Oregon Department of Fish and Wildlife (ODFW) has determined that a fish screening and/or by-pass device is necessary at the new point of diversion to prevent fish from entering the diversion and/or safely transport fish back to the body of water from which the fish were diverted and that the diversion is not currently equipped with an appropriate fish screening and/or by-pass device. This diversion may be eligible for screening cost share funds.

Transfer Review Criteria (ORS 540.532 and OAR 690-380-2120)

10. Pursuant to OAR 690-380-2120(2)(a), evidence has been submitted that the actual, current point of diversion for the water right in question, as described in Finding No. 8, has been in use for more than 10 years.

11. Pursuant to OAR 690-380-2120(2)(c), the Watermaster provided a statement that to his knowledge there has been no complaint of injury due to the use of water at the actual, current point of diversion, prior to the transfer request.
12. The Department did not identify any affected water rights pursuant to OAR 690-380-2120(3).
13. Water has been used within the last five years according to the terms and conditions of the right. There is no evidence available that would demonstrate that the right is subject to forfeiture under ORS 540.610.
14. A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing right are present.
15. The proposed change would not result in enlargement of the right.
16. The proposed change would not result in injury to other water rights.

Conclusions of Law

The proposed change in point of diversion to reflect historical use in application T-13530 is consistent with the requirements of ORS 540.532, and OAR 690-380-2120.

Now, therefore, it is ORDERED:

1. The change proposed in T-13530 is approved and effective immediately.
2. The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificate 20834 and any related decree.
3. Water right Certificate 20834 is cancelled. Certificate 95710 will be issued to describe the change in point of diversion for the portion of the right included in T-13530. Certificate 95711 shall be issued to describe the portion of Certificate 20834 not modified by this order. Together, the new Certificates shall supersede Certificate 20834.
4. The quantity of water diverted at the new point of diversion (POD 3), shall not exceed the quantity of water lawfully available at the original point of diversion (POD 4).
5. Water use measurement conditions:
 - a. Prior to October 1, 2022, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device, at each new point of diversion, with the exception that water rights issued to the Bureau of Reclamation or an irrigation district (or similar entity) are not subject to this condition.
 - b. The water user shall maintain the meters or measuring devices in good working order.

- c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.
6. Prior to October 1, 2022, the water user shall install a fish screening and/or by-pass device, as appropriate, at the new point of diversion consistent with the Oregon Department of Fish and Wildlife's (ODFW) design and construction standards. Prior to installation, the water user shall obtain written approval from ODFW that the required screen and/or by-pass device meets ODFW's criteria. Prior to submitting a Claim of Beneficial Use, the water user must obtain written approval from ODFW that the required screening and/or by-pass device was installed to the state's criteria. The water user shall maintain and operate the fish screen and/or by-pass device, as appropriate, at the point of diversion consistent with ODFW's operational and maintenance standards..

REFERENCE: Historic Change in Point of Diversion Application T-13530

The Department has completed an initial review of your water right transfer application. There are a couple of deficiencies that need to be resolved before we can continue processing your application:

1. Table 2 (Description of Changes to Water Right Certificate) identifies 9.12 acres in the "Acres" column, and should only identify 0.5 acres. Regardless of the additional remarks below, the table and map have to match acre for acre. The map identifies 0.5 acres subject to transfer, therefore Table 2 also needs to identify 0.5 acres. Please revise Table 2 and resubmit.
2. The Evidence of Use affidavit is signed by a notary, however the required notary stamp is missing. Please provide an Evidence of Use affidavit that is signed and stamped by a notary.

If the Department does not receive the above requested materials by April 15, 2021, a Final Order may be issued denying the application as incomplete.

Please do not hesitate to contact me, at corey.a.courchane@oregon.gov or (503) 986-0825, if I may be of assistance.

Water Right and Diversion Transfer Comment Form
(ODFW provides to WRD so that WRD can make findings according to statutory requirements.)

Reference Transfer #: T-13530

Date of review: 10/30/20

A. Please check box if you believe there is a potential for injury to an instream water right.

☐ The Oregon Department of Fish and Wildlife (ODFW) believes this proposed transfer may injure an instream water right(s) on _____ [stream], tributary to _____, because _____.
(Please attach any available supporting information.)

Note: This will prompt WRD to make a determination whether the transfer will injure an instream water right. (OWRD makes the determination of injury to a water right, while ODFW's role is to raise concerns, and to evaluate proposed mitigation and net benefit to the resource if OWRD consents to injury of an instream water right.)

B. Please check one of the following five boxes related to fish screen requirements pursuant to ORS 540.525 or 540.532:

☐ **1. Screen Maintain**

[Select this option if the new Point of Diversion (POD) requires a fish screen and is currently equipped with an appropriate fish screen that will still be in compliance if the transferred water is diverted from this POD.]

Note: This option will yield the following:

Finding of Fact: The Oregon Department of Fish and Wildlife has determined that a fish screen is necessary at the new point of diversion to prevent fish from entering the diversion and that the diversion is currently equipped with an appropriate fish screen.

Condition: The water user shall operate and maintain an approved fish screen at the new point of diversion. If Oregon Department of Fish and Wildlife (ODFW) determines the screen is not functioning properly, and is unsuccessful in working with the water user to meet ODFW standards, ODFW may request that OWRD regulate the use of water until OWRD receives notification from ODFW that the fish screen is functioning properly.

☒ **2. Screen Now**

[Option 2 should generally be selected if listed fish species are present at the point of diversion and/or the originating water right diversion is currently screened. If Option 2 is selected, provide contact information on the "Fish Screening and Passage Information" sheet. The new diversion may be eligible for cost-share.]

Note: This option will yield the following:

Finding of Fact: The Oregon Department of Fish and Wildlife (ODFW) has determined that a fish screen is necessary at the new point of diversion to prevent fish from entering the diversion and that the diversion is not currently equipped with an appropriate fish screen. This diversion may be eligible for screening cost-share funds.

Condition: Prior to diverting water, the water user shall install an approved fish screen at the new point of diversion and shall provide to the OWRD a written statement from Oregon Department of Fish and Wildlife (ODFW) that the installed screen meets the state's criteria, or that ODFW has determined a screen is not necessary.

The water user shall operate and maintain the fish screen at the new point of diversion consistent with ODFW's operational and maintenance standards. If ODFW determines the screen is not functioning properly, and is unsuccessful in working with the water user to meet ODFW standards, ODFW may request that OWRD regulate the use of water until OWRD receives notification from ODFW that the fish screen is functioning properly.

*Please return all 3 pages to: Transfers Section, Water Resources Department,
725 Summer St. NE, Suite A, Salem, OR 97301-1266*

☐ **3. Screen 2 Year**

[Option 3 may be checked if the change is from an unscreened diversion to a HISTORIC POD or an existing POD in use for another water right, and cost-share funds are not currently available. It should NOT be checked if listed fish species are present at the point of diversion, the originating water right diversion is screened, cost-share funds are currently available, or the diversion is not eligible for ODFW's cost-share program. Please provide contact information on the "Fish Screening and Passage Information" sheet.] If extraordinary circumstances are present, please explain: _____

Note: This option will yield the following:

Finding of Fact: The Oregon Department of Fish and Wildlife (ODFW) has determined that a fish screen is necessary at the new point of diversion to prevent fish from entering the diversion and that the diversion is not currently equipped with an appropriate fish screen. Listed fish species are not present at the point of diversion, the originating water right diversion is not screened, cost-share funds are not currently available, and the proposed diversion may be eligible for ODFW's cost-share program. A grace period of two years is appropriate until such time as cost-share funds become available to assist in the construction of a fish screen. If cost-share funds do not become available, the water user must screen within the indicated time period regardless of the availability of cost-share funding.

Condition: By October 1, 20__ [Within two years after the date of this order] the water user shall install an approved fish screen at the new point of diversion. The water user may withdraw water at the new point of diversion without a screen until October 1, 20__. The water user shall provide to OWRD a written statement from Oregon Department of Fish and Wildlife (ODFW) that the installed screen meets the state's criteria, or that ODFW has determined a screen is not necessary.

The water user shall maintain and operate the fish screen at the new point of diversion consistent with ODFW's operational and maintenance standards. If ODFW determines the screen is not functioning properly, and is unsuccessful in working with the water user to meet ODFW standards, ODFW may request that OWRD regulate the use of water until OWRD receives notification from ODFW that the fish screen is functioning properly.

☐ **4. Screen Future**

[Use this option if fish are not currently present, but might possibly be at some future time.]

Note: This option will yield the following:

Finding of Fact: The Oregon Department of Fish and Wildlife has determined that the diversion is not currently equipped with an appropriate fish screen, but a fish screen may be required in the future at the new point of diversion to prevent fish from entering the diversion.

Condition: The Oregon Department of Fish and Wildlife (ODFW) may require the water user to install an approved fish screen at the new point of diversion within one year after receiving written notification that a fish screen is required. Once installed the water user shall maintain and operate the fish screen at the new point of diversion according to ODFW's operational and maintenance standards. If ODFW determines the screen is not functioning properly, and is unsuccessful in working with the water user to meet ODFW standards, ODFW may request that OWRD regulate the use of water until OWRD receives notification from ODFW that the fish screen is functioning properly.

☐ **5. No Screen Needed**

[Check this box if fish are not currently present, and are not expected in the future.]

Additional Fish Screening and Passage Information for the Applicant
(To be completed by ODFW for WRD to provide to the applicant.)

Transfer #: T-13530

The applicant should be aware that fish screening and passage may be required for certain changes in point of diversion if the boxes below are checked.

- ☒ Fish screening is required as a condition of this transfer. The fish screen must meet ODFW's design, construction, operational and maintenance standards.

Pursuant to ORS 498.306, cost-share funds may be available to assist in the installation of fish screening.

The applicant should contact the ODFW staff member below to obtain additional information on the design, construction, operational, and maintenance standards for the fish screen and to obtain information about ODFW's cost-sharing program for screening. **Prior to installation, the water user must obtain written approval from ODFW that the required screen meets ODFW's criteria.**

ODFW staff name: Rich Kilbane

Address: 1495 E Gregory Rd

City/State/Zip: Central Point/OR/97502

Phone: (541) 826-8774

- ☒ This transfer may trigger requirements for fish passage under ORS 509.585 because a new point of diversion will be constructed, an existing point of diversion's capacity will be increased, or an existing point of diversion will be abandoned. The applicant should contact the ODFW staff member below for a determination of whether native migratory fish are or were present at the applicable location, which will determine whether fish passage must be addressed.

On September 30, 2020, we received your water right Transfer application. The application was accompanied by \$670.00. Our receipt number 133527 is enclosed.

By copy of this letter, we are asking the Watermaster for a report regarding the potential for injury to existing water rights which may be caused by the requested change, and a review form is also being sent to Oregon Department of Fish and Wildlife, to see whether a fish screen may be required.

If the land is sold before the transfer is approved, the buyer's consent to the transfer will be required unless a recorded deed or other legal document clearly established that the water right was not conveyed in the sale.

Refer to the following page for a chart showing the steps and expected timelines for the processing of your application.

Applicant must obtain any necessary permits from the Department of State Lands for work within identified Wetland areas prior to making application for a development permit. The development permit will be subject to review by the Oregon Department of Fish and Wildlife for compliance with their regulations and Riparian corridor setbacks.
