Silver Lake, OR 97638

On March 6, 2025, the Water Resources Department received the Claim of Beneficial Use (COBU) for the following file:

T-13457

The COBU included a report and map. In the future the Department will review your submittal. At that time we will review these items and provide a final certificate, proposed certificate, or a request for additional information.

If you are interested in having your COBU reviewed sooner, you may pay to have your file processed immediately, using the Reimbursement Authority program, which is described at: <https://www.oregon.gov/owrd/programs/WaterRights/RA/Pages/default.aspx>

Customer Service phone: (503) 986-0900

If you sell the property, please contact the Department, or have the new owners contact the Department about the need to file an assignment.

Oregon Water Resources Department
725 Summer Street NE, Suite A
Salem, Oregon 97301-1266
(503) 986-0900
www.oregon.gov/OWRD

A fee of \$230 must accompany this form for any Transfer final orders including a water right with a priority date of July 9, 1987, or later.

Example – A transfer involves 5 rights and one of the rights has a priority date of July 9, 1987, or later, the fee is required.

A separate form shall be completed for each transfer.

This form is subject to revision. **Begin each new claim** by checking for a new version of this form at:
<https://www.oregon.gov/OWRD/Forms/Pages/default.aspx>

The completion of this form is required by OAR 690-014-0100(1) and 690-014-0110(4).

Please type or print in dark ink. If this form is found to contain errors or omissions, it may be returned to you. **Every item must have a response.** If any requested information does not apply to the claim, insert "NA." **Do not delete or alter any section of this form unless directed by the form.** The Department may require the submittal of additional information from any water user or authorized agent.

"Section 7" of this form is intended to aid in the completion of this form and should not be submitted.

A claim of beneficial use includes both this report and a map. If the map is being mailed separately from this form, please include a note with this form indicating such.

If you have questions regarding the completion of this form, please call 503-979-9103.

The Department has a program that allows it to enter into a voluntary agreement with an applicant for expedited services. Under such an agreement, the applicant pays the cost to hire additional staff that would not otherwise be available. This program means a certificate may be issued in about a month. For more information on this program see:

<https://www.oregon.gov/OWRD/programs/WaterRights/RA/Pages/default.aspx>

SECTION 3
Changes Made

Note: The Claim only needs to describe the changes that were authorized in the transfer final order.

Change #1

Change in POA(s) or Additional POA(s)

Did the transfer order authorize a change in the points of appropriation or additional points of appropriation? **YES**

If "NO", this Section can be deleted.

1. New or additional point of appropriation name or number:

POINT OF APPROPRIATION (POA) NAME OR NUMBER (CORRESPOND TO MAP)	WELL LOG ID # FOR ALL WORK PERFORMED ON THE WELL (IF APPLICABLE)	WELL TAG # (IF APPLICABLE)	SOURCE (IF LISTED IN TRANSFER FINAL ORDER)
Well #7	LAKE 887		

Attach each well log available for the well (include the log for the original well and any subsequent alterations, reconstructions, or deepenings)

2. Variations:

Was the use developed differently from what was authorized by the transfer final order, or extension final? **YES**

If yes, describe below.

(e.g. "The order allowed three new/additional points of appropriation. The water user only developed one of the points.")

The 10.31 acres of supplemental to be moved on Certificate 48608 was erroneously listed on the final order as also changing the POA to Well #7. The application indicated that this was a place of use change only, remaining with Well #6.

Well #6 currently has no pump installed and no piping infrastructure in place to delivery water to the place of use. The 10.31 acres of supplemental irrigation was not developed.

Well #7	1.09 cfs	1.93 cfs	NA

System Description

Are there multiple new or additional Points of Appropriation (POA)?

NO

If "YES" you will need to copy and complete either Section A or B in this Section for each POA.

POA Name or Number this section describes (only needed if there is more than one):

Well #7

A. POA System Information

Provide the following information concerning the point of appropriation. Information provided must describe the equipment used to appropriate water from the point of appropriation.

Change #2

Change in Place of Use

Did the transfer order authorize a change in the place of use?

YES

1. Claim Summary – Authorized Use:

If Irrigation or Nursery Use:

THE # OF ACRES ALLOWED	THE # OF ACRES DEVELOPED
Certificate 35750 – 10.31	10.31
Certificate 48608 – 17.74 primary 10.31 supplemental	17.74 primary 0.00 supplemental

NEW USE(S)	WAS THE NEW PLACE OF USE DEVELOPED TO THE FULL EXTENT AUTHORIZED UNDER THE ORDER? (INCLUDE THE LOCATION OF THE DEVELOPED PLACE USE ON THE CLAIM MAP)
	NA
	NA

2. Variations:

Was the use developed differently from what was authorized by the transfer final order? YES

If yes, describe below.

(e.g. "The order authorized a change in place of use for 40 acres. The water user only developed 38 acres.")

The 10.31 acres of supplemental to be moved on Certificate 48608 was erroneously listed on the final order as also changing the POA to Well #7. The application indicated that this was a place of use change only, remaining with Well #6. Well #6 currently has no pump installed and no piping infrastructure in place to deliver water to the place of use. The 10.31 acres of supplemental irrigation was not developed.

Change #3

Change in Character of Use

Did the transfer order authorize a change in character of use?

SECTION 4
CONDITIONS

All conditions contained in the transfer final order, or any extension final order shall be addressed. Reports that do not address all performance related conditions will be returned.

1. Time Limits:

Describe how the water user has complied with each of the development timelines established in the transfer final order and any extensions of time issued for the transfer:

	DATE FROM TRANSFER	DATE THE AUTHORIZED CHANGES WERE COMPLETED *THIS DATE MUST FALL BETWEEN THE "ISSUANCE DATE" AND THE "COMPLETENESS DATE"
ISSUANCE DATE	March 14, 2023	
COMPLETENESS DATE FROM ORDER (C)	October 1, 2024	Section 18 system was installed prior to transfer application, 2018 Section 2 system was installed and proofed in 2008

* MUST BE WITHIN PERIOD BETWEEN TRANSFER FINAL ORDER, OR ANY EXTENSION FINAL ORDER ISSUANCE AND THE DATE TO COMPLETE THE CHANGE

2. Is there an extension final order(s)? **NO**

3. Measurement Conditions:

a. Does the transfer final order, or any extension final order require the installation of a meter or other approved measuring device? **YES**

Reminder: If a meter or approved measuring device was required, the COBU map must indicate the location of the device in relation to the point of appropriation.

b. Has a meter been installed? **YES**

c. Meter Information

POA NAME OR #	MANUFACTURER	SERIAL #	CONDITION (WORKING OR NOT)	CURRENT METER READING	DATE INSTALLED
Well #7	Seametrics	03220401	Working	688.56707 ac-ft	2018
Well #1	McCrometer	08-03827	working	932 986 ac-ft x.001	2008

4. Recording and reporting conditions

a. Is the water user required to report the water use to the Department? **NO**

5. Other conditions required by the transfer final order or extension final order:

a. Were there special well construction standards? **NO**

b. Was submittal of a ground water monitoring plan required? **NO**

c. Other conditions? **NO**

If "YES" to any of the above, identify the condition and describe the water user's actions to comply with the condition(s):

NA

SECTION 6

CLAIM OF BENEFICIAL USE MAP

The Claim of Beneficial Use Map must be submitted with this claim. Claims submitted without the Claim of Beneficial Use map will be returned. The map shall be submitted on poly film at a scale of 1" = 1320 feet, 1" = 400 feet, or the original full-size scale of the county assessor map for the location.

The changes that were authorized under the transfer final order must be mapped based on the developed locations; new or additional points of appropriation and place of use.

In cases where the order involved additional points of appropriation, the additional points should be mapped based on their developed locations. The original points of appropriation should be mapped based on the original right of record at the time the transfer final order was issued.

In cases where the order involved changing the place of use for a portion of a water right, the portion of the place of use being changed should be mapped based on the developed location. If the transfer also included portions of the place of use that were not being modified, but were receiving a new or additional point of appropriation, the place of use for those lands should be mapped based on the original right of record at the time the transfer final order was issued.

Provide a general description of the survey method used to prepare the map. Examples of possible methods include, but are not limited to, a traverse survey, GPS, or the use of aerial photos. If the basis of the survey is an aerial photo, provide the source, date, series and the aerial photo identification number.

Survey performed with Real Time GPS – Corner tie is a 5/8" iron rod located at the northeast corner of Section 18, T27S 16E, W.M. and a brass cap located at the southeast corner of Section 2, T27S 15E, W.M

SILVER LAKE, OR 97638

REFERENCE: Transfer Application T-13457

Enclosed is a copy of the final order approving your water right transfer application.

The time allowed to complete the transfer is specified in the final order. YOU SHOULD GIVE PARTICULAR ATTENTION TO THE TIME LIMIT. The water right for any portion of the authorized change in character of use or change in place of use NOT carried out within the time allowed will be lost.

An extension of the time limit can be allowed only upon a showing that diligent effort has been made to complete the actual change(s) within the time allowed.

You are required to hire a Certified Water Rights Examiner (CWRE) to complete a Claim of Beneficial Use report and map which must be submitted to this Department within one year of the date you complete the change(s) or within one year of the completion date authorized in the transfer final order, whichever occurs first.

If you have any questions related to the approval of this temporary transfer, you may contact your caseworker, Corey Courchane by telephone at (503) 979-3917 or by e-mail at Corey.A.Courchane@oregon.gov.

Sincerely,

Nila Kamis

BEFORE THE WATER RESOURCES DEPARTMENT
OF THE
STATE OF OREGON

In the Matter of Transfer Application	)	FINAL ORDER APPROVING CHANGES IN
T-13457, Lake County	)	POINTS OF APPROPRIATION AND PLACES
	)	OF USE AND THE PARTIAL CANCELLATION
	)	OF A WATER RIGHT

Authority

Oregon Revised Statutes (ORS) 537.705 and 540.505 to 540.580 establish the process in which a water right holder may submit a request to transfer the point of appropriation, place of use, or character of use authorized under an existing water right. Oregon Administrative Rules (OAR) Chapter 690, Division 380 implement the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

ORS 540.621 establishes the process for the owner of land to which a water right is appurtenant to certify under oath that the water right, or a portion thereof, has been abandoned and to voluntarily request that it be cancelled.

Applicant

DANIEL AND LEANNE MILES
81341 BUICK LANE
SILVER LAKE, OR 97638

Findings of Fact

1. On June 9, 2020, DANIEL AND LEANNE MILES filed an application to change the points of appropriation and to change the places of use under Certificates 35750, 48608, 94357, 94359, 94361, 94362, and 94365. The Department assigned the application number T-13457.
2. Notice of the application for transfer was published on June 16, 2020, pursuant to OAR 690-380-4000. No comments were filed in response to the notice.

This final order is subject to judicial review by the Court of Appeals under ORS 183.482. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.482(1). Pursuant to ORS 536.075 and OAR 137-003-0675, you may petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

3. On October 19, 2021, the Department contacted the applicant by written correspondence to notify the applicant and the applicant's agent of a deficiency in the application. The Department's Watermaster review identified, "The applicant is proposing to move 1.53 acres in the SENW and 1.14 acres in the NESW of 27 15 2 for Certificate 94365. Building have been here for over 20 years so I propose we limit transfer to 0.58 acres in the SENW and .35 acres in the NESW." These areas are also not identified on the application map, as required by Oregon Administrative Rule 690-380-3100(2)(i). Therefore, the water use as authorized by Certificate 94365 could not have been beneficially used in the identified areas within the previous 5 years prior to submittal of the application, being May 26, 2015. These areas should be removed from the application, and pursuant to Oregon Revised Statute 540.610, these areas should be cancelled for non-use. The Department requested the submission of a revised Table 2 and map with the identified acres removed, along with an Affidavit for the Partial Cancellation of Water Right Certificate 94365. The Department requested that the deficiency be resolved by November 19, 2021.
4. On December 23, 2021, the applicant's agent requested for additional time to resolve the deficiency. The Department requested that the deficiency be resolved by January 21, 2022.
5. On January 18, 2022, the Department received a revised map and table for Certificate 94365, and an Affidavit for the Voluntary Cancellation of a Portion of Water Right Certificate 94365, resolving the deficiency.
6. On March 2, 2022, the Department mailed a copy of the draft Preliminary Determination proposing to approve Transfer Application T-13457 to the applicants. The draft Preliminary Determination cover letter set forth a deadline of April 1, 2022, for the applicants to respond. The applicants requested that the Department proceed with issuance of a Preliminary Determination and provided the necessary information to demonstrate that the applicant is authorized to pursue the transfer.
7. On October 31, 2022, the Department issued a Preliminary Determination proposing to approve Transfer T-13457 and mailed a copy to the applicant. Additionally, notice of the Preliminary Determination for the transfer application was published on the Department's weekly notice on November 1, 2022, and in the Lake County Examiner newspaper on January 25 and February 1, 2023 pursuant to ORS 540.520 and OAR 690-380-4020. No protests were filed in response to the notices.

Transfer Review Criteria (OAR 690-380-4010)

29. Water has been used within the last five years according to the terms and conditions of the rights. There is no information in the record that would demonstrate that the rights are subject to forfeiture under ORS 540.610.
30. A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing rights were present within the five-year period prior to submittal of Transfer Application T-13457.
31. The proposed change would not result in enlargement of the rights.
32. The proposed change would not result in injury to other water rights.
33. All other application requirements are met.

Partial Cancellation of a Water Right

34. On January 18, 2022, an affidavit certifying that a portion of a water right has been abandoned and requesting cancellation of the right was received from Daniel and Leanne Miles. The right to be cancelled is as follows:

Certificate: 94365 in the names of LLOYD L. MILES, REBECCA MILES (perfected under Permit G-1241)

Use: IRRIGATION of 1.74 ACRES

Priority Date: FEBRUARY 6, 1959

Conclusions of Law

The changes in points of appropriation and changes in places of use proposed in Transfer Application T-13457 are consistent with the requirements of ORS 537.705 and 540.505 to 540.580 and OAR 690-380-5000 and the abandoned portion of Certificate 94365 should be cancelled.

Now, therefore, it is ORDERED:

1. The changes in points of appropriation and changes in places of use proposed in Transfer Application T-13457 are approved. The portion of Certificate 94365 that has been abandoned is cancelled.
2. The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificates 35750, 48608, 94357, 94359, 94361, 94362, 94365, and any related decree.
3. Water right Certificates 35750, 48608, 94357, 94359, 94361, 94362, and 94365 are cancelled. New certificates will be issued describing those portions of the rights not affected by this transfer.
4. The quantity of water, as authorized by Certificate 35750, diverted at the new point of appropriation (Well 7), shall not exceed the quantity of water lawfully available at the original point of appropriation (Well 5).
5. The quantity of water, as authorized by Certificate 48608, diverted at the new point of appropriation (Well 6), shall not exceed the quantity of water lawfully available at the original point of appropriation (Well 7).
6. The quantity of water, as authorized by Certificate 94357, diverted at the new point of appropriation (Well 7), shall not exceed the quantity of water lawfully available at the original point of appropriation (Well #3).

7. The quantity of water, as authorized by Certificate 94361, diverted at the new point of appropriation (Well 7), shall not exceed the quantity of water lawfully available at the original point of appropriation (Well #1 and #2).
8. The quantity of water, as authorized by Certificates 94359, 94362; and 94365, diverted at the new point of appropriation (Well 7), shall not exceed the quantity of water lawfully available at the original point of appropriation (Well #1).
9. Water use measurement conditions:
 - a. Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device, at each point of appropriation (new and existing).
 - b. The water user shall maintain the meters or measuring devices in good working order.
 - c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.
10. Water shall be acquired from the same aquifer (water source) as the original points of appropriation.
11. The former places of use of the transferred rights shall no longer receive water under the rights.
12. Full beneficial use of the water shall be made, consistent with the terms of this order, on or before **October 1, 2024**. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the changes and full beneficial use of the water.
13. After satisfactory proof of beneficial use is received, new certificates confirming the rights transferred will be issued.

Notice of
Preliminary Determination
for Water Right Transfer
T-13457

T-13457 filed by Daniel and Leanne Miles, 81341 Buick Lane, Silver Lake, OR 97638, proposes changes in points of appropriation and places of use under Certificates 35750, 48608, 94357, 94359, 94361, 94362, and 94365.

Certificate 35750 allows the use of 0.13 cubic foot per second (cfs) from a well in Sec. 14, T27S, R15E, WM for irrigation in Sec. 14, T27S, R15E, WM. The applicant proposes to move the point of appropriation to Sec. 18, T27S, R16E, WM, and to change the place of use to Sec. 18, T27S, R16E, WM.

Certificate 48608 allows the use of 0.35 cfs from a well in Sec. 14, T27S, R15E, WM for irrigation and supplemental irrigation in Sec. 14, T27S, R15E, WM. The applicant proposes to move the point of appropriation to Sec. 18, T27S, R16E, WM, and to change the place of use of irrigation to Sec. 18, T27S, R16E, WM, and supplemental irrigation within Sec. 14, T27S, R15E, WM.

Certificate 94357 allows the use of 0.030 cfs from a well in Sec. 2, T27S, R15E, WM for irrigation in Sec. 2, T27S, R15E, WM. The applicant proposes to move the point of appropriation to Sec. 18, T27S, R16E, WM, and to change the place of use to Sec. 18, T27S, R16E, WM.

Certificate 94359 allows the use of 0.30 cfs from a well in Sec. 2, T27S, R15E, WM for irrigation in Sec. 2, T27S, R15E, WM. The applicant proposes to move the point of appropriation to Sec. 18, T27S, R16E, WM, and to change the place of use to Sec. 18, T27S, R16E, WM.

Certificate 94361 allows the use of 0.11 cfs from two wells in Sec. 2, T27S, R15E, WM for irrigation in Sec. 2, T27S, R15E, WM. The applicant proposes to move the point of appropriation to Sec. 18, T27S, R16E, WM, and to change the place of use to Sec. 18, T27S, R16E, WM. Certificate 94362 allows the use of 0.23 cfs from a well in Sec. 2, T27S, R15E, WM for irrigation and supplemental irrigation in Sec. 2, T27S, R15E, WM. The applicant proposes to move the point of appropriation to Sec. 18, T27S, R16E, WM, and to change the place of use of irrigation to Sec. 18, T27S, R16E, WM, and supplemental irrigation within Sec. 14, T27S, R15E, WM.

Certificate 94365 allows the use of 0.11 cfs from a well in Sec. 2, T27S, R15E, WM for irrigation in Sec. 2, T27S, R15E, WM. The applicant proposes to move the point of appropriation to Sec. 18, T27S, R16E, WM, and to change the place of use to Sec. 18, T27S,

R16E, WM.

The Water Resources Department proposes to approve the transfer, based on the requirements of ORS Chapter 540 and OAR 690-380-5000.

Any person may file, jointly or severally, a protest or standing statement within 30 days after the last date of newspaper publication of this notice, MM/DD/YEAR. Call (503) 986-0815 to obtain additional information.

If no protests are filed, the Department will issue a final order consistent with the preliminary determination.

SUBJECT: Water Right Transfer Application T-13457

Please find enclosed the Preliminary Determination indicating that, based on the information available, the Department intends to approve application T-13457. This document is an intermediate step in the approval process; water may not be used legally as proposed in the transfer application until a Final Order has been issued by the Department. Please read this entire letter carefully to determine your responsibility for additional action.

A public notice is being published in the Department's weekly publication and in the Lake County Examiner newspaper, simultaneously with issuance of the Preliminary Determination. The notice initiates a period in which any person may file either a protest opposing the decision proposed by the Department in the Preliminary Determination or a standing statement supporting the Department's decision. The protest period will end 30 days after the last date of newspaper publication.

If no protest is filed, the Department will issue a Final Order consistent with the Preliminary Determination. You should receive a copy of the Final Order about 30 days after the close of the protest period.

If a protest is filed, the application may be referred to a contested case proceeding. A contested case provides an opportunity for the proponents and opponents of the decision proposed in the Preliminary Determination to present information and arguments supporting their position in a quasi-judicial proceeding.

Please do not hesitate to contact me, at corey.a.courchane@water.oregon.gov or (503) 979-3917, if I may be of assistance.

Sincerely,

OF THE
STATE OF OREGON**

In the Matter of Transfer Application	)	PRELIMINARY DETERMINATION
T-13457, Lake County	)	PROPOSING APPROVAL OF CHANGES IN
	)	POINTS OF APPROPRIATION AND PLACES
	)	OF USE AND THE PARTIAL CANCELLATION
	)	OF A WATER RIGHT

Authority

Oregon Revised Statutes (ORS) 537.705 and 540.505 to 540.580 establish the process in which a water right holder may submit a request to transfer the point of appropriation, place of use, or character of use authorized under an existing water right. Oregon Administrative Rules (OAR) Chapter 690, Division 380 implement the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

ORS 540.621 establishes the process for the owner of land to which a water right is appurtenant to certify under oath that the water right, or a portion thereof, has been abandoned and to voluntarily request that it be cancelled.

Applicant

DANIEL AND LEANNE MILES
81341 BUICK LANE
SILVER LAKE, OR 97638

Findings of Fact

1. On June 9, 2020, DANIEL AND LEANNE MILES filed an application to change the points of appropriation and to change the places of use under Certificates 35750, 48608, 94357, 94359, 94361, 94362, and 94365. The Department assigned the application number T-13457.
2. Notice of the application for transfer was published on June 16, 2020, pursuant to OAR 690-380-4000. No comments were filed in response to the notice.

Pursuant to OAR 690-380-4030, any person may file a protest or standing statement within 30 days after the last date of publication of notice of this preliminary determination.
--

3. On October 19, 2021, the Department contacted the applicant by written correspondence to notify the applicant and the applicant's agent of a deficiency in the application. The Department's Watermaster review identified, "The applicant is proposing to move 1.53 acres in the SENW and 1.14 acres in the NESW of 27 15 2 for Certificate 94365. Building have been here for over 20 years so I propose we limit transfer to 0.58 acres in the SENW and .35 acres in the NESW." These areas are also not identified on the application map, as required by Oregon Administrative Rule 690-380-3100(2)(i). Therefore, the water use as authorized by Certificate 94365 could not have been beneficially used in the identified areas within the previous 5 years prior to submittal of the application, being May 26, 2015. These areas should be removed from the application, and pursuant to Oregon Revised Statute 540.610, these areas should be cancelled for non-use. The Department requested the submission of a revised Table 2 and map with the identified acres removed, along with an Affidavit for the Partial Cancellation of Water Right Certificate 94365. The Department requested that the deficiency be resolved by November 19, 2021.
4. On December 23, 2021, the applicant's agent requested for additional time to resolve the deficiency. The Department requested that the deficiency be resolved by January 21, 2022.
5. On January 18, 2022, the Department received a revised map and table for Certificate 94365, and an Affidavit for the Voluntary Cancellation of a Portion of Water Right Certificate 94365, resolving the deficiency.
6. On March 2, 2022, the Department mailed a copy of the draft Preliminary Determination proposing to approve Transfer Application T-13457 to the applicants. The draft Preliminary Determination cover letter set forth a deadline of April 1, 2022, for the applicants to respond. The applicants requested that the Department proceed with issuance of a Preliminary Determination and provided the necessary information to demonstrate that the applicant is authorized to pursue the transfer.

Transfer Review Criteria (OAR 690-380-4010)

28. Water has been used within the last five years according to the terms and conditions of the rights. There is no information in the record that would demonstrate that the rights are subject to forfeiture under ORS 540.610.
29. A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing rights were present within the five-year period prior to submittal of Transfer Application T-13457.
30. The proposed change would not result in enlargement of the rights.
31. The proposed change would not result in injury to other water rights.
32. All other application requirements are met.

Partial Cancellation of a Water Right

33. On January 18, 2022, an affidavit certifying that a portion of a water right has been abandoned and requesting cancellation of the right was received from Daniel and Leanne Miles. The right to be cancelled is as follows:

Certificate: 94365 in the names of LLOYD L. MILES, REBECCA MILES (perfected under Permit G-1241)
Use: IRRIGATION of 1.74 ACRES
Priority Date: FEBRUARY 6, 1959
Rate: 0.02 CUBIC FOOT PER SECOND
Limit/Duty: The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, is limited to ONE-EIGHTIETH of one cubic foot per second per acre, or its equivalent for each acre irrigated, and shall be further limited to a diversion of not to exceed 3.0 acre-feet per acre for each acre irrigated during the irrigation season of each year.

Determination and Proposed Action

The changes in points of appropriation and changes in places of use proposed in Transfer Application T-13457 appear to be consistent with the requirements of ORS 537.705 and 540.505 to 540.580 and OAR 690-380-5000 and the abandoned portion of Certificate 94365 should be cancelled. If protests are not filed pursuant to OAR 690-380-4030, the application will be approved and the abandoned right will be cancelled.

If Transfer Application T-13457 is approved, the final order will include the following:

- 1. The changes in points of appropriation and changes in places of use proposed in Transfer Application T-13457 are approved. The portion of Certificate 94365 that has been abandoned is cancelled.*
- 2. The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificates 35750, 48608, 94357, 94359, 94361, 94362, 94365, and any related decree.*
- 3. Water right Certificates 35750, 48608, 94357, 94359, 94361, 94362, and 94365 are cancelled. New certificates will be issued describing those portions of the rights not affected by this transfer.*
- 4. The quantity of water, as authorized by Certificate 35750, diverted at the new point of appropriation (Well 7), shall not exceed the quantity of water lawfully available at the original point of appropriation (Well 5).*
- 5. The quantity of water, as authorized by Certificate 48608, diverted at the new point of appropriation (Well 6), shall not exceed the quantity of water lawfully available at the original point of appropriation (Well 7).*
- 6. The quantity of water, as authorized by Certificate 94357, diverted at the new point of appropriation (Well 7), shall not exceed the quantity of water lawfully available at the original point of appropriation (Well #3).*
- 7. The quantity of water, as authorized by Certificate 94361, diverted at the new point of appropriation (Well 7), shall not exceed the quantity of water lawfully available at the original point of appropriation (Well #1 and #2).*
- 8. The quantity of water, as authorized by Certificates 94359, 94362, and 94365, diverted at the new point of appropriation (Well 7), shall not exceed the quantity of water lawfully available at the original point of appropriation (Well #1).*
- 9. Water use measurement conditions:*
 - a. Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device, at each point of appropriation (new and existing).*

- b. The water user shall maintain the meters or measuring devices in good working order.
- c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.
10. Water shall be acquired from the same aquifer (water source) as the original points of appropriation.
11. The former places of use of the transferred rights shall no longer receive water under the rights.
12. Full beneficial use of the water shall be made, consistent with the terms of this order, on or before **October 1, 2024**. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the changes and full beneficial use of the water.
13. After satisfactory proof of beneficial use is received, new certificates confirming the rights transferred will be issued.

SUBJECT: Water Right Transfer Application T-13457

Your water right transfer is ready for issuance of the Preliminary Determination, once the Department receives payment for publication of the newspaper notice.

Items needed before the next phase of processing...

At this time you need to:

1. submit a check for \$216.54 (to cover cost of publication of the notice), made out to the Oregon Water Resources Department.
2. write **"for T-13457 NOTICE"** on the front of your check, and
3. submit it with the tracking stub at the bottom of this letter.

Mail the check to 725 Summer St. NE, Suite A, Salem, OR 97301-1266, **no later than August 12, 2022.**

What happens next...

Shortly after receiving payment, the Department will issue the Preliminary Determination, initiate publication in the Lake County Examiner newspaper, and also publish the notice on the Department's weekly notice. Publication of the notice will initiate a protest period during which any person may file either a protest opposing the decision proposed by the Department in the Preliminary Determination or a standing statement supporting the Department's decision.

If we do not receive payment for newspaper notice by August 12, 2022, a Preliminary Determination may be issued denying the application as incomplete.

Reference: Water Right Transfer Application T-13457

Your water right transfer is in the first of three phases of processing. Enclosed is a draft of the Department's Preliminary Determination regarding Transfer Application T-13457. The document reflects the Department's conclusion that, based on the information currently available, the transfer will be approved. Your response and submittal of the items outlined below are required by April 1, 2022.

Required items needing your immediate attention:

1. Please carefully review the Draft Preliminary Determination to verify that it accurately reflects the changes you intend to make and to become familiar with the proposed conditions.
2. **Respond in writing by April 1, 2022**, with acknowledgement that you agree to the proposed action and conditions.
3. If you find any errors, please let me know.
4. **REQUIRED:** You must submit a **Report of Ownership** for the lands where the water right(s) are currently located (i.e., the FROM lands). This report:
 - a) Must be prepared by a title company;
 - b) Shall include a "prepared by" statement and the date the title company prepared the report printed on the cover sheet;
 - c) Must be:
 - i. Prepared within 3 months of the Draft Preliminary Determination showing current ownership; **OR**
 - ii. Prepared within 3 months of recording of a water right conveyance agreement; **OR**
 - iii. Have a prepared date showing ownership at the time a water right conveyance agreement was recorded.

If water right conveyance agreements are involved, it is helpful to provide copies of those agreements along with the Report of Ownership.

RECEIVED

MAY 20 2022

OWRD

IMPORTANT: In order for the Department to clearly understand the date that the title company prepared the Report of Ownership, the title company must indicate/state the date that they prepared the report on the coversheet and/or first page of the report.

- d) Must include a list of owners at the time the report was generated; **AND**
- e) Must include a legal description of the property where the water right to be transferred is currently located (i.e., the FROM lands).

- 5. You must provide a notarized statement of consent signed by any landowner listed in the Report of Ownership who is not already included in the transfer application. The Department's statement of consent form (**Consent By Deeded Landowner**) is available at: [https://www.oregon.gov/OWRD/WRDFormsPDF/consent to transfer form.pdf](https://www.oregon.gov/OWRD/WRDFormsPDF/consent%20to%20transfer%20form.pdf)
- 6. Notice of this transfer will need to be published in a newspaper with general circulation in the area where the water rights are currently located. You will be responsible for the charges.

Conditions to your water right...

The Watermaster has required a water measurement device(s) at the new diversion point(s) prior to diversion of water. Enclosed is a contact information sheet to assist you in pursuing additional information or approval of the required (or alternate) device(s).

Please note the proposed date by which all conditions must be met: October 1, 2023. If the required completion date is insufficient to comply with any of the conditions, you may request more time, at no cost to you, during this stage of processing. **Please let me know by the comment deadline if you will need more time and explain the reasons why.**

What happens next...

Once the Preliminary Determination is issued a publication period is required. Because there is more than ¼ mile between the new and the authorized points of appropriation, the Department will publish notice of the transfer in a local newspaper having a general circulation in the area of the water right at least once per week for two consecutive weeks. You are responsible for sending a check to cover the cost of publication prior to the issuance of the Preliminary Determination and publication of notice. As outlined in OAR 690-380-4020(3), publication costs include both the direct cost of the notice and indirect processing costs (not to exceed 20% of the direct costs) for processing.

Reference: Water Right Transfer Application T-13457

Your water right transfer is in the first of three phases of processing. Enclosed is a draft of the Department's Preliminary Determination regarding Transfer Application T-13457. The document reflects the Department's conclusion that, based on the information currently available, the transfer will be approved. Your response and submittal of the items outlined below are required by April 1, 2022.

Required items needing your immediate attention:

1. Please carefully review the Draft Preliminary Determination to verify that it accurately reflects the changes you intend to make and to become familiar with the proposed conditions.
2. **Respond in writing by April 1, 2022**, with acknowledgement that you agree to the proposed action and conditions.
3. If you find any errors, please let me know.
4. **REQUIRED:** You must submit a **Report of Ownership** for the lands where the water right(s) are currently located (i.e., the FROM lands). This report:
 - a) Must be prepared by a title company;
 - b) Shall include a "prepared by" statement and the date the title company prepared the report printed on the cover sheet;
 - c) Must be:
 - i. Prepared within 3 months of the Draft Preliminary Determination showing current ownership; **OR**
 - ii. Prepared within 3 months of recording of a water right conveyance agreement; **OR**
 - iii. Have a prepared date showing ownership at the time a water right conveyance agreement was recorded.

If water right conveyance agreements are involved, it is helpful to provide copies of those agreements along with the Report of Ownership.

IMPORTANT: In order for the Department to clearly understand the date that the title company prepared the Report of Ownership, the title company must indicate/state the date that they prepared the report on the coversheet and/or first page of the report.

- d) Must include a list of owners at the time the report was generated; **AND**
 - e) Must include a legal description of the property where the water right to be transferred is currently located (i.e., the FROM lands).
5. You must provide a notarized statement of consent signed by any landowner listed in the Report of Ownership who is not already included in the transfer application. The Department's statement of consent form (**Consent By Deeded Landowner**) is available at: [https://www.oregon.gov/OWRD/WRDFormsPDF/consent to transfer form.pdf](https://www.oregon.gov/OWRD/WRDFormsPDF/consent%20to%20transfer%20form.pdf)
6. Notice of this transfer will need to be published in a newspaper with general circulation in the area where the water rights are currently located. You will be responsible for the charges.

Conditions to your water right...

The Watermaster has required a water measurement device(s) at the new diversion point(s) prior to diversion of water. Enclosed is a contact information sheet to assist you in pursuing additional information or approval of the required (or alternate) device(s).

Please note the proposed date by which all conditions must be met: October 1, 2023. If the required completion date is insufficient to comply with any of the conditions, you may request more time, at no cost to you, during this stage of processing. **Please let me know by the comment deadline if you will need more time and explain the reasons why.**

What happens next...

Once the Preliminary Determination is issued a publication period is required. Because there is more than ¼ mile between the new and the authorized points of appropriation, the Department will publish notice of the transfer in a local newspaper having a general circulation in the area of the water right at least once per week for two consecutive weeks. You are responsible for sending a check to cover the cost of publication prior to the issuance of the Preliminary Determination and publication of notice. As outlined in OAR 690-380-4020(3), publication costs include both the direct cost of the notice and indirect processing costs (not to exceed 20% of the direct costs) for processing.

Issuance of the Preliminary Determination will occur shortly after we receive:

1. Your written response to the conditions and proposed action in the Draft Preliminary Determination (e-mail is acceptable); and
2. The Report of Ownership, including affidavits of consent from any landowners shown in the ownership report who have not signed the transfer application. The title company must indicate/state the date that they prepared the ownership report on the coversheet and/or first page of the report.

If we do not receive the items listed above by April 1, 2022, a Preliminary Determination may be issued denying the application as incomplete.

Please do not hesitate to contact me, at corey.a.courchane@oregon.gov or (503) 979-3917, if I may be of assistance.

Sincerely,

Corey Courchane

PRELIMINARY DETERMINATION
PROPOSING APPROVAL OF CHANGES IN
POINTS OF APPROPRIATION AND PLACES
OF USE

Authority

Oregon Revised Statutes (ORS) 537.705 and 540.505 to 540.580 establish the process in which a water right holder may submit a request to transfer the point of appropriation, place of use, or character of use authorized under an existing water right. Oregon Administrative Rules (OAR) Chapter 690, Division 380 implement the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

ORS 540.621 establishes the process for the owner of land to which a water right is appurtenant to certify under oath that the water right, or a portion thereof, has been abandoned and to voluntarily request that it be cancelled.

Applicant

DANIEL AND LEANNE MILES
81341 BUICK LANE
SILVER LAKE, OR 97638

Findings of Fact

1. On June 9, 2020, DANIEL AND LEANNE MILES filed an application to change the points of appropriation and to change the places of use under Certificates 35750, 48608, 94357, 94359, 94361, 94362, and 94365. The Department assigned the application number T-13457.
2. Notice of the application for transfer was published on June 16, 2020, pursuant to OAR 690-380-4000. No comments were filed in response to the notice.
3. On October 19, 2021, the Department contacted the applicant by written correspondence to notify the applicant and the applicant's agent of a deficiency in the application. The Department's Watermaster review identified, "The applicant is proposing to move 1.53 acres in the SENW and 1.14 acres in the NESW of 27 15 2 for Certificate 94365. Building have been here for over 20 years so I propose we limit transfer to 0.58 acres in the SENW and .35 acres in the NESW." These areas are also not identified on the application map, as required by Oregon Administrative Rule 690-380-3100(2)(i). Therefore, the water use as

authorized by Certificate 94365 could not have been beneficially used in the identified areas within the previous 5 years prior to submittal of the application, being May 26, 2015. These areas should be removed from the application, and pursuant to Oregon Revised Statute 540.610, these areas should be cancelled for non-use. The Department requested the submission of a revised Table 2 and map with the identified acres removed, along with an Affidavit for the Partial Cancellation of Water Right Certificate 94365. The Department requested that the deficiency be resolved by November 19, 2021.

4. On December 23, 2021, the applicant's agent requested for additional time to resolve the deficiency. The Department requested that the deficiency be resolved by January 21, 2022.
5. On January 18, 2022, the Department received a revised map and table for Certificate 94365, and an Affidavit for the Voluntary Cancellation of a Portion of Water Right Certificate 94365, resolving the deficiency.

6. The portion of the first right to be transferred is as follows:

Certificate: 35750 in the name of THELMA C. HEILMEYER OWSLEY (perfected under Permit G-1092)
Use: IRRIGATION of 10.31 ACRES
Priority Date: NOVEMBER 6, 1958
Rate: 0.13 CUBIC FOOT PER SECOND
Limit/Duty: The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, shall be limited to ONE-EIGHTIETH of one cubic foot per second per acre, or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 3 acre feet per acre for each acre irrigated during the irrigation season of each year.

Transfer Review Criteria (OAR 690-380-4010)

27. Water has been used within the last five years according to the terms and conditions of the rights. There is no information in the record that would demonstrate that the rights are subject to forfeiture under ORS 540.610.
28. A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing rights were present within the five-year period prior to submittal of Transfer Application T-13457.
29. The proposed change would not result in enlargement of the rights.

30. The proposed change would not result in injury to other water rights.
31. All other application requirements are met.

Partial Cancellation of a Water Right

32. On January 18, 2022, an affidavit certifying that a portion of a water right has been abandoned and requesting cancellation of the right was received from Daniel and Leanne Miles. The right to be cancelled is as follows:

Certificate: 94365 in the name of LLOYD L. MILES and REBECCA MILES (perfected under Permit G-1241)

Use: IRRIGATION of 1.74 ACRES

Priority Date: FEBRUARY 6, 1959

Rate: 0.02 CUBIC FOOT PER SECOND

Limit/Duty: The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, is limited to ONE-EIGHTIETH of one cubic foot per second per acre, or its equivalent for each acre irrigated, and shall be further limited to a diversion of not to exceed 3.0 acre-feet per acre for each acre irrigated during the irrigation season of each year.

Determination and Proposed Action

The changes in points of appropriation and changes in places of use proposed in Transfer Application T-13457 appear to be consistent with the requirements of ORS 537.705 and 540.505 to 540.580 and OAR 690-380-5000 and the abandoned portion of Certificate 94365 should be cancelled. If protests are not filed pursuant to OAR 690-380-4030, the application will be approved and the abandoned right will be cancelled.

If Transfer Application T-13457 is approved, the final order will include the following:

- The changes in points of appropriation and changes in places of use proposed in Transfer Application T-13457 are approved. The portion of Certificate 94365 that has been abandoned is cancelled.*

2. *The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificates 35750, 48608, 94357, 94359, 94361, 94362, and 94365 and any related decree.*
3. *Water right Certificates 35750, 48608, 94357, 94359, 94361, 94362, and 94365 are cancelled. New certificates will be issued describing those portions of the rights not affected by this transfer.*
4. *The quantity of water, as authorized by Certificate 35750, diverted at the new point of appropriation (Well 7), shall not exceed the quantity of water lawfully available at the original point of appropriation (Well 5).*
5. *The quantity of water, as authorized by Certificate 48608, diverted at the new point of appropriation (Well 6), shall not exceed the quantity of water lawfully available at the original point of appropriation (Well 7).*
6. *The quantity of water, as authorized by Certificate 94357, diverted at the new point of appropriation (Well 7), shall not exceed the quantity of water lawfully available at the original point of appropriation (Well #3).*
7. *The quantity of water, as authorized by Certificate 94361, diverted at the new point of appropriation (Well 7), shall not exceed the quantity of water lawfully available at the original point of appropriation (Well #1 and #2).*
8. *The quantity of water, as authorized by Certificates 94359, 94362, and 94365, diverted at the new point of appropriation (Well 7), shall not exceed the quantity of water lawfully available at the original point of appropriation (Well #1).*
9. *Water use measurement conditions:*
 - a. *Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device, at each point of appropriation (new and existing).*
 - b. *The water user shall maintain the meters or measuring devices in good working order.*
 - c. *The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.*
10. *Water shall be acquired from the same aquifer (water source) as the original points of appropriation.*
11. *The former places of use of the transferred rights shall no longer receive water under the rights.*

12. *Full beneficial use of the water shall be made, consistent with the terms of this order, on or before **October 1, 2023**. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the changes and full beneficial use of the water.*
13. *After satisfactory proof of beneficial use is received, new certificates confirming the rights transferred will be issued.*

The Department has completed an initial review of your transfer application. There is a deficiency that needs to be resolved before we can continue processing your application:

- The Department's Watermaster review identified, "The applicant is proposing to move 1.53 acres in the SENW and 1.14 acres in the NESW of 27 15 2 for Certificate 94365. Building have been here for over 20 years so I propose we limit transfer to 0.58 acres in the SENW and .35 acres in the NESW." These areas are also not identified on the application map, as required by Oregon Administrative Rule 690-380-3100(2)(i). Therefore, the water use as authorized by Certificate 94365 could not have been beneficially used in the identified areas within the previous 5 years prior to submittal of the application, being May 26, 2015. These areas should be removed from the application, and pursuant to Oregon Revised Statute 540.610, these areas should be cancelled for non-use. Please submit a revised map and Table 2 with the identified areas removed, and submit the attached Affidavit for the Voluntary Cancellation of a Portion of a Water Right Certificate, cancelling the identified portions from Certificate 94365.

If the Department does not receive the above requested materials by November 19, 2021, a Final Order may be issued denying the application as incomplete.

Please do not hesitate to contact me, at corey.a.courchane@oregon.gov or (503) 979-3917, if I may be of assistance.

Groundwater Transfer Review Summary Form

Transfer/PA # T- 13457

GW Reviewer Gerald H. Grondin

Date Review Completed: 05 August 2021

Summary of Same Source Review:

☐ The proposed change in point of appropriation is not within the same aquifer as per OAR 690-380-2110(2).

Summary of Injury Review:

☐ The proposed transfer will result in another, existing water right not receiving previously available water to which it is legally entitled or result in significant interference with a surface water source as per 690-380-0100(3).

Summary of GW-SW Transfer Similarity Review:

☐ The proposed SW-GW transfer doesn't meet the definition of "similarly" as per OAR 690-380-2130.

☒ None of the Above

This is only a summary. Documentation is attached and should be read thoroughly to understand the basis for determinations.

The information provided in the application is insufficient to evaluate whether the proposed transfer may be approved because:

- ☐ The water well reports provided with the application do not correspond to the water rights affected by the transfer.
- ☐ The application does not include water well reports or a description of the well construction details sufficient to establish the ground water body developed or proposed to be developed.
- ☐ Other _____

1. Basic description of the changes proposed in this transfer: _____

This transfer application relates to seven water right certificates (see attached summary table). The transfer application proposes moving various POU segments (91.04 acres total) within T27S/R15-sec 02 & 14 to a single POU center pivot within T27S/R16-sec 18 and transferring related groundwater pumpage (1.14 cfs total = 510.77 gpm total) from five POA/POD wells within T27S/R15-sec 02 & 14 to a single POA/POD well within T27S/R16-sec 18 as summarized in the attached table and shown in attached maps.

2. Will the proposed POA develop the same aquifer (source) as the existing authorized POA?

☒ Yes ☐ No Comments: _____

Essentially yes, the "same aquifer" (source) given the same groundwater system will likely be tapped despite the authorized and proposed POA wells are constructed to varying depths and tap varying geologic units (see attached well logs). Long term groundwater level data indicates groundwater levels at wells in the vicinity of the currently authorized and proposed POA locations have similar elevations, seasonally fluctuate similarly, and show the same long-term trends (see attached hydrograph) despite being completed at varying depths and different geologic units.

Additionally, groundwater in the Fort Rock Valley-Christmas Valley area (Fort Rock Classified Area) is identified as a single groundwater system. Groundwater is found in both a shallower predominantly basin-fill sediment unit and a deeper predominantly volcanic rocks and sediments unit below. The predominantly basin fill sediment unit and the predominantly volcanic rocks and sediment unit both readily yield groundwater and the two units are hydraulically connected.

Miller (1984 and 1986) describes the groundwater source as the main groundwater reservoir. That reservoir includes groundwater in different geologic units. The reservoir has three characteristics. First, the "natural" groundwater level changes less than 1.5 feet annually, indicating the system is highly modulated. Second, the 1980s potentiometric surface was approximately 4292 feet elevation amsl basin-wide with Silver Lake an exception. Third, the reservoir consists of numerous water producing zones in several formations, all having an essentially common potentiometric level, and all being very transmissive in general.

3. a) Is there more than one source developed under the right (e.g., basalt and alluvium)?

☐ Yes ☒ No _____

Essentially no. Single hydraulically connected groundwater system. See discussion in part 2 above.

b) If yes, estimate the portion of the right supplied by each of the sources and describe any limitations that will need to be placed on the proposed change (rate, duty, etc.): _____

No estimate made and no limitation recommended. Single groundwater system. See item 2 and 3a above.

4. a) Will this proposed change, at its maximum allowed rate of use, likely result in an increase in interference with **another ground water right**?

☒ Yes ☐ No Comments: _____

The proposed POA well change will move groundwater pumping closer to the same groundwater right POA well within T27S/R16-sec 18. The calculated maximum additional seasonal groundwater level drawdown at that POA well is less than 1.60 feet. That POA well should be able to accommodate the seasonal drawdown change. The maximum additional seasonal groundwater level drawdown at other POA wells further away will be less.

The long-term impact on the groundwater system should be the same. That impact is to continue contributing to the ongoing annual Fort Rock Classified Area groundwater level decline (see the attached hydrograph...it shows an annual decline rate of about 0.35 feet per year).

- b) If yes, would this proposed change, at its maximum allowed rate of use, likely result in another groundwater right not receiving the water to which it is legally entitled?

☐ Yes ☒ No If yes, explain: _____

See discussion in part 4a above.

5. a) Will this proposed change, at its maximum allowed rate of use, likely result in an increase in interference with **another surface water source**?

☒ Yes ☐ No Comments: _____

Yes. The POA changes moves pumping closer to Silver Lake but further away from Paulina Marsh. The seasonal drawdown at Silver Lake is calculated to be greater by less than 0.10 feet by the end of the irrigation season. The seasonal drawdown at Paulina Marsh is calculated to be less than current. The long-term interference should be the same.

- b) If yes, at its maximum allowed rate of use, what is the expected change in degree of interference with any **surface water sources** resulting from the proposed change?

Stream: Silver Lake ☒ Minimal ☐ Significant

Stream: Paulina Marsh ☒ Minimal ☐ Significant

Provide context for minimal/significant impact: _____

See comment in part 5a above.

6. For SW-GW transfers, will the proposed change in point of diversion affect the surface water source similarly (as per OAR 690-380-2130) to the authorized point of diversion specified in the water use subject to transfer?

☐ Yes ☒ No Comments: _____

Not Applicable. No SW-GW transfer.

7. What conditions or other changes in the application are necessary to address any potential issues identified above: _____

Note: the proposed transfer is within the Fort Rock groundwater limited area.

The following are technical groundwater review recommendations. It is recognized that one or more technically recommended conditions may or may not be allowed under the transfer process rules and statutes. This technical groundwater review relies on other appropriate and authorized Department staff to make that determination.

"Large" flow meter condition for any proposed "To" POA and/or APOA well. Require the flow meter for any POA and/or APOA well to be properly installed and maintained. Each meter shall be either within 50 feet of the well head with a clearly visible monument adjacent to the meter or a surveyed location shall be provided and a clearly visible monument adjacent to the meter shall be installed for each meter more than 50 feet from the well head.

Condition 7P (well tag condition) for all the "To" and "From" POA wells.

Condition 7T (modified) for all "To" POA wells: "Prior to use, all POA wells shall be configured to allow a strictly clean water (no oil) static water level measurements with an electric-tape. That can include measurement access via an unobstructed vertical discharge pipe that allows the groundwater level to fluctuate freely within the discharge pipe (no valves, etc.). Otherwise, a dedicated measuring tube must be installed prior to use. The tube must be unobstructed, have a diameter of 3/4 inch (0.75 inch) or greater, and pursuant to figure 200-5 in OAR 690-200."

8. Any additional comments: _____

No additional comments.

Drawdown Calculations Using Theis Equation

Theis Equation: $s = [Q/(4 \cdot T \cdot \pi)] [W(u)]$
 $u = (r^2 S)/(4 \cdot T \cdot t)$
 $W(u) = (-\ln u) - (0.5772157) + (u/1 \cdot 1!) - (u^2/2 \cdot 2!) + (u^3/3 \cdot 3!) - (u^4/4 \cdot 4!) + \dots$

s = drawdown (L)
 T = transmissivity (L²/T)
 S = storage coefficient (dimensionless)
 π = 3.141592654

r = radial distance (L)
 t = time (T)
 u = dimensionless
 $W(u)$ = well function

Watermaster Review Form: Water Right Transfer

Oregon Water Resources Department
725 Summer St NE, Suite A
Salem, Oregon 97301-1266
(503) 986-0900
www.oregon.gov/OWRD

Transfer Application: T-13457

Review Due Date: 07/09/2020

Applicant Name: Daniel Miles

Proposed Changes: ☒ POU ☒ POD ☒ POA ☐ USE ☐ OTHER

Reviewer(s): Giffin

Date of Review: 10/28/2020

1. Do you have evidence that the right has not been used in the last 5 years and that the presumption of forfeiture would not likely be rebuttable? ☒ Yes ☐ No If "Yes", attach evidence (e.g. dated aerial photo showing pavement or building on the land for >5 yrs.)
2. Is there a history of regulation on the source that serves this (or these) right(s) that has involved the transferred right(s) and downstream water rights? ☐ Yes ☒ No Generally characterize the frequency of any regulation or explain why regulation has not occurred:
3. Have headgate notices been issued for the source that serves the transferred right(s)?
☐ Yes ☒ No ☐ Records not available.
4. In your estimation, after the proposed change, would distribution of water for the right(s) result in regulation of other water rights that would not have occurred if use under the original right(s) was/were maximized? ☐ Yes ☒ No If "Yes", explain:
5. In your estimation, if the proposed change is approved, are there upstream water rights that would be affected? ☐ Yes ☒ No If "Yes", describe how the rights would be affected and list the rights most affected:

6. Check here ☐ if it appears that downstream water rights benefit from return flows resulting from the current use of the transferred right(s)? If you check the box, generally characterize the locations where the return flows likely occur and list the water rights that benefit most:

☒ N/A

7. For POD changes and instream transfers, check here if there are channel losses between the old and new PODs or within the proposed instream reach? If you check the box, describe and, if possible, estimate the losses:

☒ N/A

8. For instream transfers that propose protection of a reach beyond the mouth of the source stream:

☒ N/A Would the quantity be measureable into the receiving stream consistent with OAR 690-077-0015(8)? ☐ Yes ☐ No

9. For POU changes: ☐ N/A Is it likely the original place of use would continue to receive water from the same source? ☐ Yes ☒ No If "Yes", explain:

10. For POU or USE changes: ☐ N/A In your best judgment, would use of the existing right at "full face value," result in the diversion of more water than can be used beneficially and without waste? ☐ Yes ☒ No If "Yes", explain:

11. For POU changes that involve micro-irrigation: ☒ N/A

- a. Has the applicant made changes (absent a transfer) to convert to micro-irrigation within the current place of use boundary of the water right proposed for transfer, and previously demonstrated to the Department through monitoring and site inspections by the Watermaster that the proposed transfer will not result in injury or enlargement?

☐ Yes ☐ No If "Yes", explain:

- b. Has a temporary transfer of this nature been previously filed and approved on the same lands (or portions thereof) as those lands involved in this transfer?

☐ Yes ☒ No If "Yes", answer the following:

- i. Were there any problems with more acres being irrigated (or wetted) than were authorized under the temporary transfer? ☐ Yes ☐ No If "Yes", explain:
- ii. Did the designated areas that were to remain dry (or not wetted) under the temporary transfer actually remain dry? ☐ Yes ☐ No If "No", explain:
- iii. Did the applicant comply with and meet all of the conditions of the temporary transfer? ☐ Yes ☐ No If "No", explain:
- iv. Do you have any other observations regarding the temporary transfer? ☐ Yes ☐ No If "Yes", describe:
- v. Did the applicant demonstrate to the Department through monitoring and site inspections by the Watermaster that neither injury nor enlargement occurred as a result of the temporary transfer? ☐ Yes ☐ No If "No", explain:

- c. To the best of your knowledge, if this transfer is approved, does it appear that:

i. "Injury" will occur to other water rights that share the same source?
☐ Yes ☒ No If "Yes", explain:

ii. "Enlargement" of the water right being transferred will occur?
☐ Yes ☒ No If "Yes", explain:

The applicant is proposing to move 1.53 acres in the SENW and 1.14 acres in the NESW of 27 15 2 for certificate 94365. Building have been here for over 20 years and near 20 years so I propose we limit the transfer to 0.58 Acres in the SENW and .35 acres in the NESW.

12. Are there other issues not identified through the above questions that should be considered in determining whether the change "can be effected without injury to other rights"?

☐ Yes ☒ No If "Yes", explain:

13. What alternatives may be available for addressing any issues identified above:

14. Do conditions need to be included in the transfer order to avoid enlargement of the right or injury to other rights? ☐ No ☒ Yes, as checked and provided below:

☐ For POU changes that involve micro-irrigation, provide the monitoring and reporting conditions necessary to prevent injury/enlargement:

☐ A Headgate should be required prior to diverting water.

☒ Measurement Devices for POD or POA: (if this condition is selected, also fill in the top sections of Page 4)

*a. Before water use may begin under this order, the water user shall install a **totalizing flow meter***, or, with prior approval of the Director, another suitable measuring device, ☒ at each point of diversion/appropriation (new and existing) **OR** at each new point of diversion/appropriation ☐ with the exception that water rights issued to the Bureau of Reclamation or an irrigation district (or similar entity) are not subject to this condition.*

b. The water user shall maintain the meters or measuring devices in good working order.

c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.

☐ Reservoir water use measurement: (if this condition is selected, also fill in the top sections of Page 4)

*a. Before water use may begin under this order, the water user shall install **staff gages***, or, with prior approval of the Director, other suitable measuring devices, that measure the entire range and stage between empty and full in each reservoir. Staff gages shall be United States Geological Survey style.*

b. Before water use may begin under this order, if the reservoir is located in channel, weirs or other suitable measuring devices must be installed upstream and downstream of the reservoir, and, an adjustable outlet valve must be installed. The water user shall maintain such devices in good working order. A written waiver may be obtained, if in the judgment of the Director, the installation of weirs or other suitable measuring devices, or the adjustable outlet valve, will provide no public benefit.

* The following alternative device(s) should be substituted for the bold, underlined device in the above selected condition:

Reference: Application T- 13457

On June 9, 2020, we received your water right Transfer application. The application was accompanied by \$6150.00. Our receipt number 132613 is enclosed.

By copy of this letter, we are asking the Watermaster for a report regarding the potential for injury to existing water rights which may be caused by the requested change. A review form will also be sent to Oregon Department of Fish and Wildlife to determine if a fish screen is needed to determine whether the proposed well accesses the same source of water as the original POD.

This application may require publication of a notice for two consecutive weeks in a newspaper with general circulation in the area where the water right is located. If it is determined that newspaper notice will be required, the Department will prepare the notice and notify you of the cost. You will be responsible for submitting payment to the Department prior to publication of the notice.

Except as provided under ORS 540.510(3) for municipalities, you may not use water in the new place of use or from the new point of diversion until a final order approving the transfer application has been issued by the Department. In order to avoid any possible forfeiture of the water right, you should continue to use the water as described by your existing water right.

If the land is sold before the application is approved, the buyer's consent to the application will be required unless a recorded deed or other legal document clearly established that the water right was not conveyed in the sale.

Refer to the following page for a chart showing the steps and expected timelines for the processing of your application.

If you have any questions, please contact the Transfer Section at (503) 986-0815.

Part 2 of 5 – Transfer Application Map

Your transfer application will be returned if any of the map requirements listed below are not met.

Please be sure that the transfer application map you submit includes all the required items and matches the existing water right map. Check all boxes that apply.

- ☒ ☐ N/A Certified Water Right Examiner (CWRE) Stamp and Original Signature. For a list of CWREs, see http://apps.wrd.state.or.us/apps/wr/cwre_license_view/. CWRE stamp and signature are not required for substitutions.
- ☒ ☐ N/A If more than three water rights are involved, separate maps are needed for each water right.
- ☒ Permanent quality printed with dark ink on good quality paper.
- ☒ The size of the map can be 8½ x 11 inches, 8½ x 14 inches, 11 x 17 inches, or up to 30 x 30 inches. For 30 x 30 inch maps, one extra copy is required.
- ☒ A north arrow, a legend, and scale.
- ☒ The scale of the map must be: 1 inch = 400 feet, 1 inch = 1,320 feet, the scale of the Final Proof/Claim of Beneficial Use Map (the map used when the permit was certificated), the scale of the county assessor map if the scale is not smaller than 1 inch = 1,320 feet, or a scale that has been pre-approved by the Department.
- ☒ Township, Range, Section, ¼ ¼, DLC, Government Lot, and other recognized public land survey lines.
- ☒ Tax lot boundaries (property lines) are required. Tax lot numbers are recommended.
- ☒ Major physical features including rivers and creeks showing direction of flow, lakes and reservoirs, roads, and railroads.
- ☒ Major water delivery system features from the point(s) of diversion/appropriation such as main pipelines, canals, and ditches.
- ☒ Existing place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions. If less than the entirety of the water right is being changed, a separate hachuring is needed for lands left unchanged.
- ☒ ☐ N/A Proposed place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions.
- ☒ Existing point(s) of diversion or well(s) with distance and bearing or coordinates from a recognized survey corner. This information can be found in your water right certificate or permit.
- ☒ ☐ N/A If you are proposing a change in point(s) of diversion or well(s), show the proposed location and label it clearly with distance and bearing or coordinates. If GPS coordinates are used, latitude-longitude coordinates may be expressed as either degrees-minutes-seconds with at

Part 3 of 5 – Fee Worksheet

1. For irrigation calculate cfs for each water right involved as follows:
 - a. Divide total authorized cfs by total acres in the water right (*for C12345, 1.25 cfs ÷ 100 ac*); then multiply by the number of acres to be transferred to get the transfer cfs (*× 45 ac = 0.56 cfs*).
 - b. If the water right certificate does not list total cfs, but identifies the allowable use as 1/40 or 1/80 of a cfs per acre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (*For C87654, 45.0 ac × 0.0125 cfs/ac = 0.56 cfs*)
2. Add cfs for the portions of water rights on all the land included in the transfer; however **do not count cfs for supplemental rights on acreage for which you have already calculated the cfs fee for the primary right on the same land**. The fee should be assessed only once for each "on the ground" acre included in the transfer. (*In this example, blank 5a would be only 0.56 cfs, since both rights serve the same 45.0 acres. Blank 5b would be 0 and Line 5 would then also become 0*).

- ☒ By signing this application, I understand that, upon receipt of the draft preliminary determination and prior to Department approval of the transfer, I will be required to provide landownership information and evidence that I am authorized to pursue the transfer as identified in OAR 690-380-4010(5); **OR**
- ☐ I affirm the applicant is a municipality as defined in ORS 540.510(3)(b) and that the right is in the name of the municipality or a predecessor; **OR**
- ☐ I affirm the applicant is an entity with the authority to condemn property and is acquiring by condemnation the property to which the water right proposed for transfer is appurtenant and have supporting documentation.

By my signature below, I confirm that I understand:

- Prior to Department approval of the transfer application, I may be required to submit payment to the Department for publication of a notice in a newspaper with general circulation in the area where the water right is located, once per week for two consecutive weeks. If more than one qualifying newspaper is available, I suggest publishing the notice in the following newspaper: Lake County Examiner.
- Amendments to the application may only be made in response to the Department's Draft Preliminary Determination (DPD). The applicant will have a period of at least 30 days to amend the application to address any issues identified by the Department in the DPD, or to withdraw the application. Note that amendments may be subject to additional fees, pursuant to ORS 536.050.
- Failure to complete an approved change in place of use and/or change in character of use, will result in loss of the water right (OAR 690-380-6010).

I (we) affirm that the information contained in this application is true and accurate.

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands? ☒ Yes ☐ No

If YES, list the certificate, water use permit, or ground water registration numbers: 35750.

Pursuant to ORS 540.510, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for transfer must be included in the transfer or be cancelled. Any change to a ground water registration must be filed separately in a ground water registration modification application.

CERTIFICATE # 35750

Description of Water Delivery System

System capacity: 0.66 cubic feet per second (cfs) OR
_____ gallons per minute (gpm)

Describe the current water delivery system or the system that was used within the last five years. Include information on the pumps, canals, pipelines, and how the water is applied and apply the water at the authorized place of use. Water is pumped to center pivot system for land application. Areas that are not covered by the system are
and flood irrigated.

For Place of Use or Character of Use Changes

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands? ☒ Yes ☐ No

If YES, list the certificate, water use permit, or ground water registration numbers: 48606.

Pursuant to ORS 540.510, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for transfer must be included in the transfer or be cancelled. Any change to a ground water registration must be filed separately in a ground water registration modification application.

For Substitution (ground water supplemental irrigation will be substituted for surface water primary irrigation)

For a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation:

- ☒ Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map.

Tip: You may search for well logs on the Department's web page at:

http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx

AND/OR

- ☒ Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For *proposed wells not yet constructed or built*, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.

For Place of Use or Character of Use Changes

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands? ☐ Yes ☒ No

If YES, list the certificate, water use permit, or ground water registration numbers: NA.

Pursuant to ORS 540.510, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for transfer must be included in the transfer or be cancelled. Any change to a ground water registration must be filed separately in a ground water registration modification application.

For Substitution (ground water supplemental irrigation will be substituted for surface water primary irrigation)

Ground water supplemental Permit or Certificate # NA;

Surface water primary Certificate # NA.

For a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation:

- ☒ Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map.

Tip: You may search for well logs on the Department's web page at:

http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx

AND/OR

- ☒ Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For *proposed wells not yet constructed or built*, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.

NOTICE OF RIGHT TO PETITION FOR RECONSIDERATION OR JUDICIAL REVIEW

This is an order in other than a contested case. This order is subject to judicial review under ORS 183.482. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.482. Pursuant to ORS 183.482, ORS 536.075 and OAR 137-003-0675, you may petition for judicial review and petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

The quantity of water diverted at the new points of appropriation shall not exceed the quantity of water lawfully available at the original points of appropriation described as follows:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
27 S	15 E	WM	2	SE SW	2 CHAINS NORTH AND 25½ CHAINS EAST FROM SW CORNER, SECTION 2

The water user shall maintain and operate an in-line flow meter or other suitable device for measuring and recording the quantity of water diverted as required by the Department.

Water shall be acquired from the same aquifer (water source) as the original points of appropriation.

The right to the use of the water for the above purpose is restricted to beneficial use on the place of use described.

This certificate is issued to confirm changes in POINTS OF APPROPRIATION AND PLACE OF USE approved by an order of the Water Resources Director entered September 27, 2007, at Special Order Volume 73, Page 342, approving Transfer Application T-8588, and supercedes Certificate 31236, State record of Water Right Certificates.

A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

The quantity of water diverted at the new points of appropriation shall not exceed the quantity of water lawfully available at the original points of appropriation described as follows:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
27 S	15 E	WM	2	SE SW	170 FEET NORTH AND 1730 FEET EAST FROM SW CORNER, SECTION 2

The water user shall maintain and operate an in-line flow meter or other suitable device for measuring and recording the quantity of water diverted as required by the Department.

Water shall be acquired from the same aquifer (water source) as the original points of appropriation.

The right to the use of the water for the above purpose is restricted to beneficial use on the place of use described.

This certificate is issued to confirm changes in POINTS OF APPROPRIATION AND PLACE OF USE approved by an order of the Water Resources Director entered September 27, 2007, at Special Order Volume 73, Page 342, approving Transfer Application T-8588, and supercedes Certificate 47919, State record of Water Right Certificates.

confirms the right to the use of water perfected under the terms of Permit U-695. The amount of water used to which this right is entitled is limited to the amount used beneficially, and shall not exceed the amount specified, or its equivalent in the case of rotation, measured at the wells. The specific limits and conditions of the use are listed below.

SOURCE OF WATER: WELLS #1 AND #2 IN THE SILVER CREEK BASIN

PURPOSE OR USE: IRRIGATION OF 30.0 ACRES

MAXIMUM RATE: 0.38 CUBIC FOOT PER SECOND (CFS), BEING 0.05 CFS FROM WELL #1 FOR 3.81 ACRES
AND 0.33 CFS FROM WELL #2 FOR 26.19 ACRES

DATE OF PRIORITY: JANUARY 17, 1955

The wells are located as follows:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
27 S	15 E	WM	2	NW SW	WELL #1 - 2627.4 FEET NORTH AND 5215.45 FEET WEST FROM SE CORNER, SECTION 2
27 S	15 E	WM	2	SE SW	WELL #2 - 187.26 FEET NORTH AND 3509.58 FEET WEST FROM SE CORNER, SECTION 2

The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, is limited to ONE-EIGHTIETH of one cubic foot per second per acre, or its equivalent for each acre irrigated, and shall be further limited to a diversion of not to exceed 3.0 acre-feet per acre for each acre irrigated during the irrigation season of each year.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

A description of the place of use is as follows:

Twp	Rng	Mer	Sec	Q-Q	Well #	Acres
27 S	15 E	WM	2	SW SW	2	3.46
27 S	15 E	WM	2	SE SW	1	3.81

NOTICE OF RIGHT TO PETITION FOR RECONSIDERATION OR JUDICIAL REVIEW

This is an order in other than a contested case. This order is subject to judicial review under ORS 183.482. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.482. Pursuant to ORS 183.482, ORS 536.075 and OAR 137-003-0675, you may petition for judicial review and petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

The quantity of water diverted at the new points of appropriation shall not exceed the quantity of water lawfully available at the original points of appropriation described as follows:

Twp	Rng	Mer	Sec	Q-Q	GLot	Measured Distances
27 S	15 E	WM	2	NE NW	3	1342 FEET SOUTH AND 2646 FEET WEST FROM NE CORNER, SECTION 2

The well shall be maintained in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon.

The water user shall maintain and operate an in-line flow meter or other suitable device for measuring and recording the quantity of water diverted as required by the Department.

Water shall be acquired from the same aquifer (water source) as the original points of appropriation.

The right to the use of the water for the above purpose is restricted to beneficial use on the place of use described.

This certificate is issued to confirm changes in POINTS OF APPROPRIATION AND PLACE OF USE approved by an order of the Water Resources Director entered September 27, 2007, at Special Order Volume 73, Page 342, approving Transfer Application T-8588, and supercedes Certificate 72464, State record of Water Right Certificates.

confirms the right to the use of water perfected under the terms of Permit G-1241. The amount of water used to which this right is entitled is limited to the amount used beneficially, and shall not exceed the amount specified, or its equivalent in the case of rotation, measured at the well. The specific limits and conditions of the use are listed below.

SOURCE OF WATER: WELL #1 IN THE SILVER CREEK BASIN

PURPOSE OR USE: IRRIGATION OF 59.8 ACRES

MAXIMUM RATE: 0.57 CUBIC FOOT PER SECOND

DATE OF PRIORITY: FEBRUARY 6, 1959

The well is located as follows:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
27 S	15 E	WM	2	NW SW	WELL #1 - 2627.4 FEET NORTH AND 5215.45 FEET WEST FROM SE CORNER, SECTION 2

The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, is limited to ONE-EIGHTIETH of one cubic foot per second per acre, or its equivalent for each acre irrigated, and shall be further limited to a diversion of not to exceed 3.0 acre-feet per acre for each acre irrigated during the irrigation season of each year.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

A description of the place of use is as follows:

Twp	Rng	Mer	Sec	Q-Q	GLot	Acres
27 S	15 E	WM	2	NE NW	3	8.50
27 S	15 E	WM	2	NW NW	4	21.58

NOTICE OF RIGHT TO PETITION FOR RECONSIDERATION OR JUDICIAL REVIEW

This is an order in other than a contested case. This order is subject to judicial review under ORS 183.482. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.482. Pursuant to ORS 183.482, ORS 536.075 and OAR 137-003-0675, you may petition for judicial review and petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

The quantity of water diverted at the new points of appropriation shall not exceed the quantity of water lawfully available at the original points of appropriation described as follows:

Twp	Rng	Mer	Sec	Q-Q	GLot	Measured Distances
27 S	15 E	WM	2	NE NW	3	1342 FEET SOUTH AND 2646 FEET WEST FROM NE CORNER, SECTION 2

The well shall be maintained in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon.

The water user shall maintain and operate an in-line flow meter or other suitable device for measuring and recording the quantity of water diverted as required by the Department.

Water shall be acquired from the same aquifer (water source) as the original points of appropriation.

The right to the use of the water for the above purpose is restricted to beneficial use on the place of use described.

This certificate is issued to confirm a change in POINTS OF APPROPRIATION AND PLACE OF USE approved by an order of the Water Resources Director entered September 27, 2007, at Special Order Volume 73, Page 342, approving Transfer Application T-8588, and supercedes Certificate 74297, State record of Water Right Certificates.
