NOTICE OF CERTIFICATE ISSUANCE

Attached is a certificate that confirms the water rights established under the terms of a transfer order issued by this Department.

This certificate is an order in order than a contested case. This order is subject to judicial review under ORS 183.482. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.482. Pursuant to ORS 183.482, ORS 536.075 and OAR 137-003-0675, you may petition for judicial review and petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

This statement of judicial review rights is required under ORS 536.075 it does not alter or add to existing review rights or create review rights that are not otherwise provided by law.

The water must be controlled and not wasted. To change the location of the point of diversion, the character of use, or the location of use requires the advance approval of the Water Resources Director.

If you have any questions please contact Jonnine Skaug at 503-979-3943.

NOTICE OF RIGHT TO PETITION FOR RECONSIDERATION OR JUDICIAL REVIEW

This is an order in other than a contested case. This order is subject to judicial review under ORS 183.482. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.482. Pursuant to ORS 183.482, ORS 536.075 and OAR 137-003-0675, you may petition for judicial review and petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, shall be limited to ONE-EIGHTIETH of one cubic foot per second per acre, or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 3.0 acre-feet per acre for each acre irrigated during the irrigation season of each year.

The right shall conform to such reasonable rotation system as may be ordered by the proper state officer.

A description of the place of use is as follows:

Twp	Rng	Mer	Sec	Q-Q	Acres
33 S	31 E	WM	9	NE NE	32.0
33 S	31 E	WM	9	NW NE	32.4
33 S	31 E	WM	9	SW NE	30.0
33 S	31 E	WM	9	SE NE	30.4

The quantity of water diverted at the additional points of appropriation, together with that diverted at the original point of appropriation, shall not exceed the quantity of water lawfully available from the original point of appropriation.

Water use measurement conditions:

- A. The water user shall maintain the totalizing flow meters or measuring devices, as approved by the Director, in good working order, at each point of appropriation (new and existing).
- B. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.

Water shall be acquired from the same aquifer (water source) at the original points of appropriation.

The right to store and use the water for the above purpose is restricted to beneficial use at the place of use described.

This certificate is issued to confirm ADDITIONAL POINT OF APPROPRIATIONS approved by an order of the Water Resources Director entered September 30, 2019, at Special Order Volume 113, Page 1266, approving Transfer Application T-12864, supercedes Certificate 66774, State record of Water Right Certificates.

NOTICE OF RIGHT TO PETITION FOR RECONSIDERATION OR JUDICIAL REVIEW

This is an order in other than a contested case. This order is subject to judicial review under ORS 183.482. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.482. Pursuant to ORS 183.482, ORS 536.075 and OAR 137-003-0675, you may petition for judicial review and petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

The amount of water used for irrigation under this right, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second and 3.0 acre-feet for each acre irrigated during the irrigation season of each year.

A description of the place of use is as follows:

The quantity of water diverted at the additional points of appropriation, together with that diverted at the original points of appropriation, shall not exceed the quantity of water lawfully available from the original points of appropriation.

Measurement, recording and reporting conditions:

- A. The water user shall maintain the totalizing flow meters or measuring devices, as approved by the Director, in good working order, at each point of appropriation (new and existing).
- B. The water user shall keep a complete record of the amount of water used each month, and shall submit a report which includes the recorded water use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the water user to report general water-use information, including the place and nature of use of water under the right.
- C. The water user shall allow the watermaster access to the meters or measuring devices; provided however, where any meters or measuring devices is located within a private structure, the watermaster shall request access upon reasonable notice.
- D. The Director may provide an opportunity for the water user to submit alternative measuring and reporting procedures for review and approval.

The water user shall ensure that the well has been assigned an OWRD Well Identification Number (Well ID tag), which shall be permanently attached to the well. The Well ID shall be used as a reference in any correspondence regarding the well, including any reports of water use, water level, or pump test data.

To monitor the effect of water use from the well(s) authorized under this right, the Department requires the water user to obtain, from a qualified individual (see below), and report annual static water level measurements. The static water level shall be measured in the month of March. Reports shall be submitted to the Department within 30 days of measurement. The measurements may be required in a different month. If the measurement requirement is stopped, the Director may restart it at any time.

The reference levels against which any future measurements will be compared is 95.85 feet below land surface for Well 11 and 98.50 feet below land surface for Well 12, respectively.

All measurements shall be made by a certified water rights examiner, registered professional geologist, registered professional engineer, licensed well constructor or pump installer licensed by the Construction Contractors Board and be submitted to the Department on forms provided by the Department. The Department requires the individual performing the measurement to:

- (A) Identify each well with its associated measurement; and
- (B) Measure and report water levels to the nearest tenth of a foot as depth-to-water below ground surface; and
- (C) Specify the method used to obtain each well measurement; and
- (D) Certify the accuracy of all measurements and calculations submitted to the Department.

The water user shall discontinue use of, or reduce the rate or volume of withdrawal from, the well if annual water level measurements reveal any of the following events:

- (A) An average water level decline of three or more feet per year for five consecutive years; or
- (B) A water level decline of 15 or more feet in fewer than five consecutive years; or
- (C) A water level decline of 25 or more feet; or
- (D) Hydraulic interference leading to a decline of 25 or more feet in any neighboring well with senior priority.

The period of non-use or restricted use shall continue until the water level rises above the decline level which triggered the action or until the Department determines, based on the water user's and/or the Department's data and analysis, that no action is necessary because the aquifer in question can sustain the observed declines without adversely impacting the resource or senior water rights. The water user shall in no instance allow excessive decline, as defined in Commission rules, to occur within the aquifer as a result of use under this right. If more than one well is involved, the water user may submit an alternative measurement and reporting plan for review and approval by the Department.

Failure to comply with any of the provisions of this right may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the right.

If substantial interference with a senior water right occurs due to withdrawal of water from any well listed on this right, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interference.

The well(s) shall be maintained in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine the water level elevation in the well at all times.

The use may be restricted if the quality of downstream waters decreases to the point that those waters no longer meet existing state or federal water quality standards due to reduced flows.

Where two or more water users agree among themselves as to the manner of rotation in the use of water and such agreement is placed in writing and filed by such water users with the watermaster, and such rotation system does not infringe upon such prior rights of any water user not a party to such rotation plan, the watermaster shall distribute the water according to the agreement.

The Director may require water level or pump test results every ten years.

This right is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

Water shall be acquired from the same aquifer (water source) at the original points of appropriation.

The right to the use of the water for the above purpose is restricted to beneficial use on the place of use described.

This certificate is issued to confirm ADDITIONAL POINT OF APPROPRIATIONS approved by an order of the Water Resources Director entered September 30, 2019, at Special Order Volume 113, Page 1266, approving Transfer Application T-12864, supercedes Certificate 93575, State record of Water Right Certificates.

Scott,

We are preparing the final certificates for the above transfer and identified an error on each of the 5 Claim maps associated with the Transfer. I wanted to find out from you how you would like to handle the error. We can either make the correction on our end, or you could submit new maps. The issue is with the coordinates for Well #2 (HARN 1677-51860).

The map places the well in the SE NW of Section 3. The coordinates indicate that the well is located 60 feet North and 1340 feet West from the W 1/4 Corner of Section 3. I believe that the coordinates should be 60 feet North and 1340 feet EAST from the W 1/4 Corner of Section 3.

**BEFORE THE WATER RESOURCES DEPARTMENT
OF THE
STATE OF OREGON**

In the Matter of Transfer Application	)	FINAL ORDER APPROVING
T-12864, Harney County	)	ADDITIONAL POINTS OF
	)	APPROPRIATION

Authority

Oregon Revised Statutes (ORS) 537.705 and 540.505 to 540.580 establish the process in which a water right holder may submit a request to transfer the point of appropriation, place of use, or character of use authorized under an existing water right. Oregon Administrative Rules (OAR) Chapter 690, Division 380 implement the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

Applicant

WHITBY BROTHERS LAND AND LIVESTOCK LLC
JEB WHITBY
62 W JUNIPER RD
MESA, WA 99343

Findings of Fact

1. On March 8, 2018, WHITBY BROTHERS LAND AND LIVESTOCK LLC AND JEB WHITBY filed an application for additional points of appropriation under Certificates 66774, 66775, 67893, 67894, and 93575. The Department assigned the application number T-12864.
2. Notice of the application for transfer was published on March 13, 2018, pursuant to OAR 690-380-4000. No comments were filed in response to the notice.
3. On September 7, 2018, the Department sent a copy of the draft Preliminary Determination proposing to approve Transfer Application T-12864 to the applicants. The draft Preliminary Determination cover letter set forth a deadline of October 8, 2018, for the applicant to respond. The applicants requested that the Department proceed with issuance of a Preliminary Determination and provided the necessary information to demonstrate that the applicants are authorized to pursue the transfer.
4. On December 27, 2018, the Department issued a Preliminary Determination proposing to approve Transfer T-12864 and mailed a copy to the applicant. Additionally, notice of the Preliminary Determination for the transfer application was published on the Department's weekly notice on January 1, 2019, and in the Burns Times Herald newspaper on January 2, and 9, 2019, pursuant to ORS 540.520 and OAR 690-380-4020. No protests were filed in response to the notice.

This final order is subject to judicial review by the Court of Appeals under ORS 183.482. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.482(1). Pursuant to ORS 536.075 and OAR 137-003-0675, you may petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

Transfer Review Criteria (OAR 690-380-4010)

15. Water has been used within the last five years according to the terms and conditions of the rights. There is no information in the record that would demonstrate that the rights are subject to forfeiture under ORS 540.610.

16. A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing rights were present within the five-year period prior to submittal of Transfer Application T-12864.
17. The proposed change would not result in enlargement of the rights.
18. The proposed change would not result in injury to other water rights.
19. All other application requirements are met.

Conclusions of Law

The additional points of appropriation proposed in Transfer Application T-12864 are consistent with the requirements of ORS 537.705 and 540.505 to 540.580 and OAR 690-380-5000.

Now, therefore, it is ORDERED:

1. The additional points of appropriation proposed in Transfer Application T-12864 are approved.
2. The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificates 66774, 66775, 67893, 67894 and 93575 and any related decree.
3. Water right Certificates 66774, 66775, 67893, 67894 and 93575 are cancelled.
4. The quantity of water diverted at the additional points of appropriation, together with that diverted at the original points of appropriation, shall not exceed the quantity of water lawfully available at the original points of appropriation.
5. Water use measurement conditions:
 - a. Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device at each point of appropriation (new and existing).
 - b. The water user shall maintain the meters or measuring devices in good working order.
 - c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.
6. Water shall be acquired from the same aquifer (water source) as the original points of appropriation.
7. Full beneficial use of the water shall be made, consistent with the terms of this order, on or before **October 1, 2020**. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the change and full beneficial use of the water.

8. After satisfactory proof of beneficial use is received, new certificates confirming the rights transferred will be issued.

for the purpose of IRRIGATING 124.8 ACRES.

The right has been perfected under Permit G-9115. The date of priority
is SEPTEMBER 12, 1980. The right is limited to not more than 1.56 CUBIC
FEET PER SECOND or its equivalent in case of rotation, measured at the
well.

The well is located as follows:

NE 1/4 NE 1/4, SECTION 9, T 33 S, R 31 E, W.M.; 1320 FEET SOUTH AND
1200 FEET WEST FROM THE NE CORNER OF SECTION 9.

The amount of water used for irrigation, together with the amount
secured under any other right existing for the same lands, shall be
limited to ONE-EIGHTIETH of one cubic foot per second per acre, or its
equivalent for each acre irrigated and shall be further limited to a
diversion of not to exceed 3.0 acre-feet per acre for each acre
irrigated during the irrigation season of each year.

The right shall conform to such reasonable rotation system as may be
ordered by the proper state officer.

The amount of water used for irrigation under this right, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second and 3.0 acre-feet for each acre irrigated during the irrigation season of each year.

NOTICE OF RIGHT TO PETITION FOR RECONSIDERATION OR JUDICIAL REVIEW

This is an order in other than a contested case. This order is subject to judicial review under ORS 183.484 and ORS 536.075. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.484(2). Pursuant to ORS 183.484, ORS 536.075 and OAR 137-004-0080, you may petition for judicial review and petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied. In addition, under ORS 537.260 any person with an application, permit or water right certificate subsequent in priority may jointly or severally contest the issuance of the certificate within three months after issuance of the certificate.

A description of the place of use is as follows:

Twp	Rng	Mer	Sec	Q-Q	Acres
33 S	31 E	WM	9	NE NW	25.5
33 S	31 E	WM	9	NW NW	32.0

33 S	31 E	WM	9	SE SW	29.2

Measurement, recording and reporting conditions:

- A. The water user shall maintain, in good working order, a totalizing flow meter or other suitable measuring device as approved by the Director at each point of appropriation.
- B. The water user shall keep a complete record of the amount of water used each month, and shall submit a report which includes the recorded water use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the water user to report general water-use information, including the place and nature of use of water under the right.
- C. The water user shall allow the watermaster access to the meter or measuring device; provided however, where any meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.
- D. The Director may provide an opportunity for the water user to submit alternative measuring and reporting procedures for review and approval.

The water user shall ensure that the well has been assigned an OWRD Well Identification Number (Well ID tag), which shall be permanently attached to the well. The Well ID shall be used as a reference in any correspondence regarding the well, including any reports of water use, water level, or pump test data.

To monitor the effect of water use from the well(s) authorized under this right, the Department requires the water user to obtain, from a qualified individual (see below), and report annual static water level measurements. The static water level shall be measured in the month of March. Reports shall be submitted to the Department within 30 days of measurement. The measurements may be required in a different month. If the measurement requirement is stopped, the Director may restart it at any time.

The reference levels against which any future measurements will be compared is 95.85 feet below land surface for Well 11 and 98.50 feet below land surface for Well 12, respectively.

All measurements shall be made by a certified water rights examiner, registered professional geologist, registered professional engineer, licensed well constructor or pump installer licensed by the Construction Contractors Board and be submitted to the Department on forms provided by the Department. The Department requires the individual performing the measurement to:

- (A) Identify each well with its associated measurement; and
- (B) Measure and report water levels to the nearest tenth of a foot as depth-to-water below ground surface; and
- (C) Specify the method used to obtain each well measurement; and
- (D) Certify the accuracy of all measurements and calculations submitted to the Department.

The water user shall discontinue use of, or reduce the rate or volume of withdrawal from, the well if annual water level measurements reveal any of the following events:

- (A) An average water level decline of three or more feet per year for five consecutive years; or
- (B) A water level decline of 15 or more feet in fewer than five consecutive years; or
- (C) A water level decline of 25 or more feet; or
- (D) Hydraulic interference leading to a decline of 25 or more feet in any neighboring well with senior priority.

The period of non-use or restricted use shall continue until the water level rises above the decline level which triggered the action or until the Department determines, based on the water user's and/or the Department's data and analysis, that no action is necessary because the aquifer in question can sustain the observed declines without adversely impacting the resource or senior water rights. The water user shall in no instance allow excessive decline, as defined in Commission rules, to occur within the aquifer as a result of use under this right. If more than one well is involved, the water user may submit an alternative measurement and reporting plan for review and approval by the Department.

Failure to comply with any of the provisions of this right may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the right.

If substantial interference with a senior water right occurs due to withdrawal of water from any well listed on this right, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interference.

The well(s) shall be maintained in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine the water level elevation in the well at all times.

The use may be restricted if the quality of downstream waters decreases to the point that those waters no longer meet existing state or federal water quality standards due to reduced flows.

Where two or more water users agree among themselves as to the manner of rotation in the use of water and such agreement is placed in writing and filed by such water users with the watermaster, and such rotation system does not infringe upon such prior rights of any water user not a party to such rotation plan, the watermaster shall distribute the water according to the agreement.

The Director may require water level or pump test results every ten years.

This right is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The right to the use of the water for the above purpose is restricted to beneficial use on the place of use described.

**CLAIM OF
BENEFICIAL USE
for Transfer New or
Additional POD Only**

Oregon Water Resources Department
725 Summer Street NE, Suite A
Salem, Oregon 97301-1266
(503) 986-0900
www.wrd.state.or.us

RECEIVED

A fee of \$200 must accompany this form for any Transfer final orders including a water right with a priority date of July 9, 1987, or later.

Example – A transfer involves 5 rights and one of the rights has a priority date of July 9, 1987, or later, the fee is required.

DEC 02 2019
OWRD

Claims received without the correct fee of \$200 will be returned.

A separate form shall be completed for each transfer.

This form is subject to revision. **Begin each new claim** by checking for a new version of this form at:
http://www.oregon.gov/owrd/pages/wr/cwre_info.aspx

The completion of this form is required by OAR 690-014-0100(1) and 690-014-0110(4).

Please type or print in dark ink. If this form is found to contain errors or omissions, it may be returned to you. **Every item must have a response.** If any requested information does not apply to the claim, insert "NA." **Do not delete or alter any section of this form unless directed by the form.** The Department may require the submittal of additional information from any water user or authorized agent.

"Section 8" of this form is intended to aid in the completion of this form and should not be submitted.

A claim of beneficial use includes both this report and a map. If the map is being mailed separately from this form, please include a note with this form indicating such.

If you have questions regarding the completion of this form, please call 503-986-0900 and ask for the Certificate Section.

The Department has a program that allows it to enter into a voluntary agreement with an applicant for expedited services. Under such an agreement, the applicant pays the cost to hire additional staff that would not otherwise be available. This program means a certificate may be issued in about a month. For more information on this program see:

http://www.oregon.gov/owrd/pages/mgmt_reimbursement_authority.aspx

SECTION 1

GENERAL INFORMATION

Type of Authorized Change

This Claim is being submitted for a transfer where the only authorized change was a change in either point(s) of diversion or additional point(s) of diversion, or a combination of both.

YES

If additional changes were authorized, you will need to select a different form.

SECTION 4 SYSTEM DESCRIPTION

Are there multiple new or additional Points of Diversion (POD)s?

YES

POD Name or Number this section describes (only needed if there is more than one):

#1 (HARN 1668)

A. POD System Information

Provide the following information concerning the point of diversion. Information provided must describe the equipment used to appropriate water from the point of diversion.

1. Pump Information

MANUFACTURER	MODEL	SERIAL NUMBER	TYPE (CENTRIFUGAL, TURBINE OR SUBMERSIBLE)	INTAKE SIZE	DISCHARGE SIZE
Vertiline	UNK	37071032-4	Turbine	16"	10"

2. Motor Information

MANUFACTURER	HORSEPOWER

SECTION 7

CLAIM OF BENEFICIAL USE MAP

The Claim of Beneficial Use Map must be submitted with this claim. Claims submitted without the Claim of Beneficial Use map will be returned. The map shall be submitted on poly film at a scale of 1" = 1320 feet, 1" = 400 feet, or the original full-size scale of the county assessor map for the location.

For the purpose of this Claim, the map identifying the location of the place of use does not require a new survey. The location of the place of use identified on the Claim map should be based on the original right of record at the time the transfer final order was issued. In transfers approved for additional points of diversion, the original points must be identified the map based on the original right of record at the time the transfer final order was issued.

Provide a general description of the survey method used to prepare the map. Examples of possible methods include, but are not limited to, a traverse survey, GPS, or the use of aerial photos. If the basis of the survey is an aerial photo, provide the source, date, series and the aerial photo identification number.

Wells & conveyances to sprinkler that irrigates the POU were tied to approximate boundaries using two survey grade GPS receivers in autonomous RTK mode. Points were imported to Arc Map GIS software & compared with aerial imagery for accuracy.

Map Checklist

Please be sure that the map you submit includes ALL the items listed below.

On December 2, 2019, the Water Resources Department received the Claim of Beneficial Use (COBU) for the following Transfer(s):

T-12864

The COBU included a report and map. The Department hopes to review your submittal within approximately 2 - 4 years. At that time we will review these items and provide a final certificate, proposed certificate, or a request for additional information.

If you are interested in having your COBU reviewed sooner, you may pay to have your file processed immediately, using the Reimbursement Authority program, which is described at:

<https://www.oregon.gov/OWRD/programs/WaterRights/RA/Pages/Certificate.aspx>

For all other questions please call our Customer Service phone: (503) 986-0900.

If you sell the property, please contact the Department, or have the new owners contact the Department about the need to file an assignment.

REFERENCE: Transfer Application T-12864

Enclosed is a copy of the final order approving your water right transfer application.

The time allowed to complete the transfer is specified in the final order. **YOU SHOULD GIVE PARTICULAR ATTENTION TO THE TIME LIMIT.** The water right for any portion of the authorized change in character of use or change in place of use NOT carried out within the time allowed will be lost.

An extension of the time limit can be allowed only upon a showing that diligent effort has been made to complete the actual change(s) within the time allowed.

You are required to hire a Certified Water Rights Examiner (CWRE) to complete a Claim of Beneficial Use report and map which must be submitted to this Department within one year of the date you complete the change(s) or within one year of the completion date authorized in the transfer final order, whichever occurs first.

If you have any questions related to the approval of this transfer, you may contact your caseworker, Arla Davis, by telephone at (503) 986-0806 or by e-mail at Arla.L.Davis@oregon.gov.

Sincerely,

In the Matter of Transfer Application	)	FINAL ORDER APPROVING
T-12864, Harney County	)	ADDITIONAL POINTS OF
	)	APPROPRIATION

Authority

Oregon Revised Statutes (ORS) 537.705 and 540.505 to 540.580 establish the process in which a water right holder may submit a request to transfer the point of appropriation, place of use, or character of use authorized under an existing water right. Oregon Administrative Rules (OAR) Chapter 690, Division 380 implement the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

Findings of Fact

1. On March 8, 2018, WHITBY BROTHERS LAND AND LIVESTOCK LLC AND JEB WHITBY filed an application for additional points of appropriation under Certificates 66774, 66775, 67893, 67894, and 93575. The Department assigned the application number T-12864.
2. Notice of the application for transfer was published on March 13, 2018, pursuant to OAR 690-380-4000. No comments were filed in response to the notice.
3. On September 7, 2018, the Department sent a copy of the draft Preliminary Determination proposing to approve Transfer Application T-12864 to the applicants. The draft Preliminary Determination cover letter set forth a deadline of October 8, 2018, for the applicant to respond. The applicants requested that the Department proceed with issuance of a Preliminary Determination and provided the necessary information to demonstrate that the applicants are authorized to pursue the transfer.
4. On December 27, 2018, the Department issued a Preliminary Determination proposing to approve Transfer T-12864 and mailed a copy to the applicant. Additionally, notice of the Preliminary Determination for the transfer application was published on the Department's weekly notice on January 1, 2019, and in the Burns Times Herald newspaper on January 2, and 9, 2019, pursuant to ORS 540.520 and OAR 690-380-4020. No protests were filed in response to the notice.

This final order is subject to judicial review by the Court of Appeals under ORS 183.482. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.482(1). Pursuant to ORS 536.075 and OAR 137-003-0675, you may petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

Transfer Review Criteria (OAR 690-380-4010)

15. Water has been used within the last five years according to the terms and conditions of the rights. There is no information in the record that would demonstrate that the rights are subject to forfeiture under ORS 540.610.

16. A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing rights were present within the five-year period prior to submittal of Transfer Application T-12864.
17. The proposed change would not result in enlargement of the rights.
18. The proposed change would not result in injury to other water rights.
19. All other application requirements are met.

Conclusions of Law

The additional points of appropriation proposed in Transfer Application T-12864 are consistent with the requirements of ORS 537.705 and 540.505 to 540.580 and OAR 690-380-5000.

Now, therefore, it is ORDERED:

1. The additional points of appropriation proposed in Transfer Application T-12864 are approved.
2. The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificates 66774, 66775, 67893, 67894 and 93575 and any related decree.
3. Water right Certificates 66774, 66775, 67893, 67894 and 93575 are cancelled.
4. The quantity of water diverted at the additional points of appropriation, together with that diverted at the original points of appropriation, shall not exceed the quantity of water lawfully available at the original points of appropriation.
5. Water use measurement conditions:
 - a. Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device at each point of appropriation (new and existing).
 - b. The water user shall maintain the meters or measuring devices in good working order.
 - c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.
6. Water shall be acquired from the same aquifer (water source) as the original points of appropriation.
7. Full beneficial use of the water shall be made, consistent with the terms of this order, on or before **October 1, 2020**. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the change and full beneficial use of the water.

8. After satisfactory proof of beneficial use is received, new certificates confirming the rights transferred will be issued.

Transfer Review Criteria (OAR 690-380-4010)

15. Water has been used within the last five years according to the terms and conditions of the rights. There is no information in the record that would demonstrate that the rights are subject to forfeiture under ORS 540.610.
16. A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing rights were present within the five-year period prior to submittal of Transfer Application T-12864.
17. The proposed change would not result in enlargement of the rights.
18. The proposed change would not result in injury to other water rights.
19. All other application requirements are met.

Conclusions of Law

The additional points of appropriation proposed in Transfer Application T-12864 are consistent with the requirements of ORS 537.705 and 540.505 to 540.580 and OAR 690-380-5000.

Now, therefore, it is ORDERED:

1. The additional points of appropriation proposed in Transfer Application T-12864 are approved.
2. The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificates 66774, 66775, 67893, 67894 and 93575 and any related decree.
3. Water right Certificates 66774, 66775, 67893, 67894 and 93575 are cancelled.
4. The quantity of water diverted at the additional points of appropriation, together with that diverted at the original points of appropriation, shall not exceed the quantity of water lawfully available at the original points of appropriation.

5. Water use measurement conditions:
 - a. Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device at each point of appropriation (new and existing).
 - b. The water user shall maintain the meters or measuring devices in good working order.
 - c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.
6. Water shall be acquired from the same aquifer (water source) as the original points of appropriation.
7. Full beneficial use of the water shall be made, consistent with the terms of this order, on or before **October 1, 2020**. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the change and full beneficial use of the water.
8. After satisfactory proof of beneficial use is received, new certificates confirming the rights transferred will be issued.

SUBJECT: Water Right Transfer Application T-12864

Please find enclosed the Preliminary Determination indicating that, based on the information available, the Department intends to approve application T-12864. This document is an intermediate step in the approval process; water may not be used legally as proposed in the transfer application until a Final Order has been issued by the Department. Please read this entire letter carefully to determine your responsibility for additional action.

A public notice is being published in the Department's weekly publication and in the Burns Times Herald newspaper, simultaneously with issuance of the Preliminary Determination. The notice initiates a period in which any person may file either a protest opposing the decision proposed by the Department in the Preliminary Determination or a standing statement supporting the Department's decision. The protest period will end 30 days after the last date of newspaper publication.

If no protest is filed, the Department will issue a Final Order consistent with the Preliminary Determination. You should receive a copy of the Final Order about 30 days after the close of the protest period.

If a protest is filed, the application may be referred to a contested case proceeding. A contested case provides an opportunity for the proponents and opponents of the decision proposed in the Preliminary Determination to present information and arguments supporting their position in a quasi-judicial proceeding.

Please do not hesitate to contact me at 503-986-0886 or Patrick.K.Starnes@oregon.gov if I may be of assistance.

Sincerely,

Kelly Starnes

Authority

Oregon Revised Statutes (ORS) 537.705 and 540.505 to 540.580 establish the process in which a water right holder may submit a request to transfer the point of appropriation, place of use, or character of use authorized under an existing water right. Oregon Administrative Rules (OAR) Chapter 690, Division 380 implement the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

Findings of Fact

1. On March 8, 2018, WHITBY BROTHERS LAND AND LIVESTOCK LLC AND JEB WHITBY filed an application for additional points of appropriation under Certificates 66774, 66775, 67893, 67894, and 93575. The Department assigned the application number T-12864.
2. Notice of the application for transfer was published on March 13, 2018, pursuant to OAR 690-380-4000. No comments were filed in response to the notice.
3. On September 7, 2018, the Department sent a copy of the draft Preliminary Determination proposing to approve Transfer Application T-12864 to the applicants. The draft Preliminary Determination cover letter set forth a deadline of October 8, 2018, for the applicant to respond. The applicants requested that the Department proceed with issuance of a Preliminary Determination and provided the necessary information to demonstrate that the applicants are authorized to pursue the transfer.

Pursuant to OAR 690-380-4030, any person may file a protest or standing statement within 30 days after the last date of publication of notice of this preliminary determination.

Transfer Review Criteria (OAR 690-380-4010)

14. Water has been used within the last five years according to the terms and conditions of the rights. There is no information in the record that would demonstrate that the rights are subject to forfeiture under ORS 540.610.
15. A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing rights were present within the five-year period prior to submittal of Transfer Application T-12864.
16. The proposed change would not result in enlargement of the rights.
17. The proposed change would not result in injury to other water rights.
18. All other application requirements are met.

Determination and Proposed Action

The additional points of appropriation proposed in Transfer Application T-12864 appear to be consistent with the requirements of ORS 537.705 and 540.505 to 540.580 and OAR 690-380-5000. If protests are not filed pursuant to OAR 690-380-4030, the application will be approved.

If Transfer Application T-12864 is approved, the final order will include the following:

- 1. The additional points of appropriation proposed in Transfer Application T-12864 are approved.*
- 2. The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificates 66774, 66775, 67893, 67894 and 93575 and any related decree.*
- 3. Water right Certificates 66774, 66775, 67893, 67894 and 93575 are cancelled.*
- 4. The quantity of water diverted at the additional points of appropriation, together with that diverted at the original points of appropriation, shall not exceed the quantity of water lawfully available at the original points of appropriation.*
- 5. Water use measurement conditions:*
 - a. Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device at each point of appropriation (new and existing).*
 - b. The water user shall maintain the meters or measuring devices in good working order.*
 - c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.*
- 6. Water shall be acquired from the same aquifer (water source) as the original points of appropriation.*
- 7. Full beneficial use of the water shall be made, consistent with the terms of this order, on or before **October 1, 2020**. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the change and full beneficial use of the water.*

8. *After satisfactory proof of beneficial use is received, new certificates confirming the rights transferred will be issued.*

Dated at Salem, Oregon this Dec. 27th, 2018,

Dwight French, Water Right Services Administrator, for
Thomas M. Byler, Director
Oregon Water Resources Department

**Notice of Preliminary Determination for
Water Right Transfer T-12864**

T-12864 filed by Jeb Whitby - Whitby Brothers Land and Livestock, LLC, 62 W Juniper Road, Mesa, WA 99343, proposes additional points of appropriation under Certificates (C) 66774, 66775, 67893, 67894, and 93575. C-66774 allows the use of 1.56 cubic feet per second (cfs) from a well in Sec. 9, T33S, R31E, WM for irrigation in Sec. 9. C-66775 allows the use of 5.57 cfs from a well in Sec. 4, T33S, R31E, WM for irrigation in Sects. 3 and 4, T33S, R31E, WM. C-67893 allows the use of 1.4 cfs from a well in Sec. 10, T33S, R31E, WM for irrigation in Sec. 10. C-67894 allows the use of 2.8 cfs from a well in Sec. 8, T33S, R31E, WM for irrigation in Sec. 8. C-93575 allows the use of 2.88 cfs from two wells in Sects. 9 and 10, T33S, R31E, WM for irrigation in Sec. 9. The applicant proposes additional points of appropriation in Sects. 3, 4, 8, 9, and 10, T33S, R31E, WM. The Water Resources Department proposes to approve the transfer, based on the requirements of ORS Chapter 540 and OAR 690-380-5000.

Any person may file, jointly or severally, a protest or standing statement within 30 days after the last date of newspaper publication of this notice, **MM/DD/YEAR**. Call (503) 986-0815 to obtain additional information. If no protests are filed, the Department will issue a final order consistent with the preliminary determination.

Good Morning Marcy:

I have reviewed you DPD and found no errors or omissions.
The Burns Herald should be the newspaper to use for public notice.
At my last visit to the farm, totalizing flow meters were installed on all wells being transferred and the system has been plumbed according to my application maps. So, it should be ready for a COBU after the first cutting next season. Jeb, if you'd like additional time, Marcy can probably make the C-date 2023 at the latest. But, I think you'll be ready before October 1, 2020 anyway.
I'll contact Ameritle in Burns to get the list pack today.

Thanks,
Scott

Subject: Transfer T-12864 - WhitbyFarms

Good morning;

I have completed the first phase of processing of your transfer. There are a few items I need in order to proceed, which are listed below and are outlined in the cover letter of the attached packet:

- 1) Please review the Draft Final order (Please look at the POA locations because they had to be listed so many times in the document) and get back to me on any changes that need to be made and/or if it meets your intent and you want to proceed with the processing of the transfer. Written consent is needed to move forward with the next phase of processing, email is ok.
- 2) Please contact a title company to provide you with an ownership report. Most title companies in this region call them "listing packets". They are usually free and can be generated quickly. They can e-mail the report directly to me.

3) Please confirm the Burns Times Herald as the newspaper you wish to use for the publication notice.

4) I also want to mention that you can extend the completion date free of charge now. This is the time to do it, otherwise there is another process to go through if things don't work out as planned. We can move it out up to 5 years if you would like. If you finish sooner, that's great. Let me know. You can respond via e-mail if you prefer.

5) Lastly, the Watermaster, JR Johnson, has required measuring devices on the new and existing points of appropriation. I have included her contact information so that you may discuss with her the type of measuring devices that needs to be installed.

Feel free to contact me if I can be of further assistance.

Thanks...

Watermaster Review Form: Water Right Transfer

Transfer Application: T-12864

Review Due Date: _____

Applicant Name: Whitby Brothers Land and Livestock LLC

Proposed Changes: ☐ POU ☐ POD ☒ POA ☐ USE ☐ OTHER

Reviewer(s): _____

Date of Review: Mar. 22, 2018

1. Do you have evidence that the right has not been used in the last 5 years and that the presumption of forfeiture would not likely be rebuttable? ☐ Yes ☒ No If "yes", attach evidence (e.g. dated aerial photo showing pavement or building on the land for >5 yrs.)
2. Is there a history of regulation on the source that serves this (or these) right(s) that has involved the transferred right(s) and downstream water rights? ☐ Yes ☒ No
Generally characterize the frequency of any regulation or explain why regulation has not occurred: N/A
3. Have headgate notices been issued for the source that serves the transferred right(s)?
☐ Yes ☒ No ☐ Records not available.
4. In your estimation, after the proposed change would distribution of water for the right(s) result in regulation of other water rights that would not have occurred if use under the original right(s) was/were maximized?
☐ Yes ☒ No If "Yes", explain: _____
5. In your estimation, if the proposed change is approved, are there upstream water rights that would be affected? ☐ Yes ☒ No If "Yes", describe how the rights would be affected and list the rights most affected: _____
6. Check here ☐ if it appears that downstream water rights benefit from return flows resulting from the current use of the transferred right(s)? If you check the box, generally characterize the locations where the return flows likely occur and list the water rights that benefit most: _____ ☒ N/A
7. For POD changes and instream transfers, check here ☐ if there are channel losses between the old and new PODs or within the proposed instream reach? If you check the box, describe and, if possible, estimate the losses: _____ ☒ N/A
8. For instream transfers that propose protection of a reach beyond the mouth of the source stream: ☒ N/A Would the quantity be measureable into the receiving stream consistent with OAR 690-077-0015(8)? ☐ Yes ☐ No
9. For POU changes: ☐ N/A Is it likely the original place of use would continue to receive water from the same source? ☐ Yes ☒ No If "Yes", explain: _____

10. For POU or USE changes: ☐ N/A In your best judgment, would use of the existing right at "full face value," result in the diversion of more water than can be used beneficially and without waste? ☐ Yes ☒ No If "Yes", explain: _____
11. Are there other issues not identified through the above questions that should be considered in determining whether the change "can be effected without injury to other rights"? ☐ Yes ☒ No If "Yes", explain: _____
12. What alternatives may be available for addressing any issues identified above: N/A
13. Do conditions need to be included in the transfer order to avoid enlargement of the right or injury to other rights? ☐ No ☒ Yes, as checked below:
- ☐ A Headgate should be required prior to diverting water.
- ☒ Measurement Devices for POD or POA: (if this condition is selected, also fill in the top sections of page 3)
- a. *Before water use may begin under this order, the water user shall install a **totalizing flow meter***, or, with prior approval of the Director, another suitable measuring device, ☒ at each point of diversion/appropriation (new and existing) or ☐ at each new point of diversion/appropriation.*
- b. *The water user shall maintain the meters or measuring devices in good working order.*
- c. *The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.*
- ☐ Reservoir water use measurement: (if this condition is selected, also fill in the top sections of page 3)
- a. *Before water use may begin under this order, the water user shall install **staff gages***, or, with prior approval of the Director, other suitable measuring devices, that measure the entire range and stage between empty and full in each reservoir. Staff gages shall be United States Geological Survey style.*
- b. *Before water use may begin under this order, if the reservoir is located in channel, weirs or other suitable measuring devices must be installed upstream and downstream of the reservoir, and, an adjustable outlet valve must be installed. The water user shall maintain such devices in good working order. A written waiver may be obtained, if in the judgment of the Director, the installation of weirs or other suitable measuring devices, or the adjustable outlet valve, will provide no public benefit.*

* The following alternative device(s) should be substituted for the bold, underlined device in the above selected condition:

Measurement Condition Information for the Applicant (to be sent with the Draft Preliminary Determination or Final Order)

Transfer #: T-12864

☒ In order to avoid enlargement of the right or injury to other rights, a totalizing flow meter will be required to be installed **prior to diversion of water**, as a condition of this transfer:

- ☒ at each point of diversion/appropriation (new and existing) **or**
☐ at each new point of diversion/appropriation.

For additional information, or to obtain approval of a different type of measurement device, the applicant should contact the area Watermaster:

Groundwater Transfer Review Summary Form

Transfer/PA # T- 12864

GW Reviewer D. BOSCHMANN Date Review Completed: 6/22/2018

Summary of Enlargement (Same Source) Review:

☐ The proposed transfer fails to keep the original place of use from receiving water from the same source.

Summary of Injury Review:

☐ The proposed transfer will result in another, existing water right not receiving previously available water to which it is legally entitled or result in significant interference with a surface water source.

Summary of Well Construction Assessment:

☒ The proposed POA does not have a well log.

☒ The proposed POA does not appear to meet current well construction standards. Route through Well Construction and Compliance Section.

This is only a summary. Documentation is attached and should be read thoroughly to understand the basis for determinations.

The information provided in the application is insufficient to evaluate whether the proposed transfer may be approved because:

- ☐ The water well reports provided with the application do not correspond to the water rights affected by the transfer.
 - ☐ The application does not include water well reports or a description of the well construction details sufficient to establish the ground water body developed or proposed to be developed.
 - ☐ Other _____
-

1. Basic description of the changes proposed in this transfer: _____

Transfer application T-12864 is related to certificates 66774, 66775, 67893, 67894, and 93575. The overall purpose of the transfer appears to be combining all wells from all certificates into one integrated system.

Certificate 66774 authorizes groundwater pumping from one well (POD 1 = HARN 1668) for primary irrigation of 124.8 acres in the Malheur Lake Basin. This transfer seeks the following changes to certificate 66774:

1. Add 8 APOAs (HARN 1677; HARN 50623*; HARN 50481; HARN 1844**; HARN 1843; HARN 900; HARN 51959; HARN 51938).

Certificate 66775 authorizes groundwater pumping from one well (POD 1 = HARN 1677***) for primary irrigation of 524.6 acres in the Malheur Lake Basin. This transfer seeks the following changes to certificate 66775:

1. Add 8 APOAs (HARN 1688; HARN 50623*; HARN 50481; HARN 1844**; HARN 1843; HARN 900; HARN 51959; HARN 51938).

Certificate 67893 authorizes groundwater pumping from one well (POD 1 = HARN 1843) for primary irrigation of 112.0 acres in the Malheur Lake Basin. This transfer seeks the following changes to certificate 67893:

1. Add 8 APOAs (HARN 1668; HARN 1677; HARN 50623; HARN 50481; HARN 1844***; HARN 900; HARN 51959; HARN 51938).

Certificate 67894 authorizes groundwater pumping from one well (POD 1 = HARN 900) for primary irrigation of 224.0 acres in the Malheur Lake Basin. This transfer seeks the following changes to certificate 67894:

1. Add 8 APOAs (HARN 1688; HARN 50623*; HARN 50481; HARN 1844**; HARN 1843; HARN 1677; HARN 51959; HARN 51938).

Certificate 93575 authorizes groundwater pumping from two wells (POD 1 = HARN 51959; POD 2 = HARN 51938) for primary irrigation of 230.4 acres in the Malheur Lake Basin. This transfer seeks the following changes to certificate 93575:

1. Add 8 APOAs (HARN 1688; HARN 50623*; HARN 50481; HARN 1844**; HARN 1843; HARN 1677; HARN 900).

*Note: HARN 50623 does not appear to meet minimum well construction standards (seal material = "Blank"). Route to Well Construction and Compliance.

**Note: HARN 1844 is a deepening log only. No information is available regarding the casing or seal intervals on this well. It cannot be determined if this well meets the minimum well construction standards. Route to Well Construction and Compliance.

***Note: The application lists HARN 50481 as the authorized well under certificate 66775. The certificate was signed 10/02/1991. HARN 50481 was completed 01/19/2000. The authorized well of record for this certificate is HARN 1677. It is assumed HARN 50481 is intended as an APOA. The application/permit document for certificate 66775 clearly specifies a 16" well with a depth of 591 feet, 355 feet of steel casing drilled by Leeman

White (Highland Drilling) located 2650 ft south and 1330 feet west from the NE corner section 4. These well construction details are entirely consistent with those of HARN 1677. It is the opinion of this reviewer that the original metes and bounds provided for certificate 66775 were in error and that the applicant intended to indicate east instead of west from the reference corner. This is corroborated by the well log GPS provided on the alteration log for HARN 1677, which is HARN 51860.

****Note: the application depicts the locations of HARN 1843 and HARN 1844 switched as compared to the locations of these wells in the OWRD GSIS database, which are based on previous water rights information (application materials for file G-15165) and corroborated by water use reporting facility names under said water rights.

2. Will the proposed POA develop the same aquifer (source) as the existing authorized POA?
☒ Yes ☐ No Comments: Available data indicates a predominantly volcanic/volcaniclastic unit occurs beneath a predominantly basin fill sediment unit. Reports for the Malheur Lake Basin indicate groundwater occurs in both the basin fill and underlying volcanic rocks. The groundwater is likely hydraulically connected, making a single groundwater system occurring in different geologic units. Leonard (1970) found that near the edges of the valley there is likely good interconnection between individual water-bearing beds in the valley fill and those in the adjacent and underlying tertiary rocks.
3. a) Is there more than one source developed under the right (e.g., basalt and alluvium)?
☐ Yes ☒ No See comment in 2 above.
b) If yes, estimate the portion of the right supplied by each of the sources and describe any limitations that will need to be placed on the proposed change (rate, duty, etc.): _____
4. a) Will this proposed change, at its maximum allowed rate of use, likely result in an increase in interference with **another ground water right**?
☐ Yes ☒ No Comments: The authorized and proposed wells are the only authorized wells in the vicinity of the proposed transfer. There will be no increase in interference with wells outside of the proposed project area as long as no enlargement occurs. The nearest authorized wells are roughly 2 miles away.
- b) If yes, would this proposed change, at its maximum allowed rate of use, likely result in another groundwater right not receiving the water to which it is legally entitled?
☐ Yes ☒ No If yes, explain: See comment in 4a above.
5. a) Will this proposed change, at its maximum allowed rate of use, likely result in an increase in interference with **another surface water source**?
☐ Yes ☒ No Comments: The nearest perennial surface water source is the sink of Rock Creek located over 7 miles to the west. At this location the elevation of Rock Creek is well above the groundwater elevation at the location of the proposed wells. Groundwater at the proposed locations does not appear to provide baseflow to this reach of Rock Creek. Other surface water bodies in the vicinity of the proposed wells are intermittent, and lie at elevations well above the groundwater elevation in this area.
b) If yes, at its maximum allowed rate of use, what is the expected change in degree of interference with any **surface water sources** resulting from the proposed change?

7. Any additional comments: _____

*Note: HARN 50623 does not appear to meet minimum well construction standards (seal material = "Blank"). Route to Well Construction and Compliance.

**Note: HARN 1844 is a deepening log only. No information is available regarding the casing or seal intervals on this well. It cannot be determined if this well meets the minimum well construction standards. Route to Well Construction and Compliance.

Description of Water Delivery System

MAR 08 2018

System capacity: 1.56 cubic feet per second (cfs) OR

_____ gallons per minute (gpm)

OWRD

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines, and sprinklers used to divert, convey, and apply the water at the authorized place of use. Water is pumped from Well #1 & conveyed by buried pipe to a center pivot sprinkler that irrigates POU.

confirms the right to use the waters of A WELL in the ROCK CREEK BASIN,
for the purpose of IRRIGATING 124.8 ACRES.

The right has been perfected under Permit G-9115. The date of priority
is SEPTEMBER 12, 1980. The right is limited to not more than 1.56 CUBIC
FEET PER SECOND or its equivalent in case of rotation, measured at the
well.

The well is located as follows:

#1 NE 1/4 NE 1/4, SECTION 9, T 33 S, R 31 E, W.M.; 1320 FEET SOUTH AND
1200 FEET WEST FROM THE NE CORNER OF SECTION 9.

The amount of water used for irrigation, together with the amount
secured under any other right existing for the same lands, shall be
limited to ONE-EIGHTIETH of one cubic foot per second per acre, or its
equivalent for each acre irrigated and shall be further limited to a
diversion of not to exceed 3.0 acre-feet per acre for each acre
irrigated during the irrigation season of each year.

The right shall conform to such reasonable rotation system as may be
ordered by the proper state officer.

A description of the place of use under the right, and to which such
right is appurtenant, is as follows:

FARMINGTON, UTAH 84025

confirms the right to use the waters of A WELL in the ROCK CREEK BASIN,
for the purpose of IRRIGATING 524.6 ACRES.

The right has been perfected under Permit G-9116. The date of priority
is SEPTEMBER 12, 1980. The right is limited to not more than 5.57 CUBIC
FEET PER SECOND or it equivalent in case of rotation, measured at the
well.

The well is located as follows:

SE 1/4 NE 1/4, SECTION 4, T 33 S, R 31 E, W.M.; 60 FEET NORTH AND
1340 FEET WEST FROM THE EAST 1/4 CORNER OF SECTION 4.

The amount of water used for irrigation, together with the amount
secured under any other right existing for the same lands, shall be
limited to ONE-EIGHTIETH of one cubic foot per second per acre, or its
equivalent for each acre irrigated and shall be further limited to a
diversion of not to exceed 3.0 acre-feet per acre for each acre
irrigated during the irrigation season of each year.

The right shall conform to such reasonable rotation system as may be
ordered by the proper state officer.

A description of the place of use under the right, and to which such
right is appurtenant, is as follows:

LAS VEGAS, NEVADA 89119

confirms the right to use the waters of ONE WELL in the CATLOW VALLEY BASIN for IRRIGATION OF 112.0 ACRES.

This right was perfected under Permit G-10872. The date of priority is OCTOBER 10, 1988. This right is limited to not more than 1.4 CUBIC FEET PER SECOND or its equivalent in case of rotation, measured at the well.

The well is located as follows:

NE 1/4 NW 1/4, SECTION 10, T 33 S, R 31 E, W.M.; 1307 FEET SOUTH AND 1339 FEET EAST FROM THE NW CORNER OF SECTION 10.

The amount of water used for irrigation together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second (or its equivalent) and 3.0 acre-feet for each acre irrigated during the irrigation season of each year.

The right shall be limited to appropriation of water only to extent that it does not impair or substantially interfere with prior surface water rights as well as prior ground water rights of others.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

A description of the place of use to which this right is appurtenant is as follows:

		XFER	RR

confirms the right to the use of water perfected under the terms of Permit G-16674. The amount of water used to which this right is entitled is limited to the amount used beneficially, and shall not exceed the amount specified, or its equivalent in the case of rotation, measured at the point of diversion from the source. The specific limits and conditions of the use are listed below.

APPLICATION FILE NUMBER: G-17228

SOURCE OF WATER: WELL 11 AND WELL 12 IN ROARING SPRINGS CANYON BASIN

PURPOSE OR USE: IRRIGATION OF 230.4 ACRES

MAXIMUM RATE: 2.88 CUBIC FEET PER SECOND (CFS), BEING NO MORE THAN 2.23 CFS FROM WELL 11 AND 2.23 CFS FROM WELL 12

PERIOD OF USE: MARCH 1 THROUGH OCTOBER 31

DATE OF PRIORITY: JUNE 2, 2009

The wells are located as follows:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
33 S	31 E	WM	9	SW NW	WELL 11 - 2730 FEET NORTH AND 800 FEET EAST FROM SW CORNER, SECTION 9
33 S	31 E	WM	10	NW NW	WELL 12 - 860 FEET EAST FROM NW CORNER, SECTION 10

The amount of water used for irrigation under this right, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second and 3.0 acre-feet for each acre irrigated during the irrigation season of each year.

NOTICE OF RIGHT TO PETITION FOR RECONSIDERATION OR JUDICIAL REVIEW

This is an order in other than a contested case. This order is subject to judicial review under ORS 183.484 and ORS 536.075. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.484(2). Pursuant to ORS 183.484, ORS 536.075 and OAR 137-004-0080, you may petition for judicial review and petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied. In addition, under ORS 537.260 any person with an application, permit or water right certificate subsequent in priority may jointly or severally contest the issuance of the certificate within three months after issuance of the certificate.

Measurement, recording and reporting conditions:

- The water user shall maintain, in good working order, a totalizing flow meter or other suitable measuring device as approved by the Director at each point of appropriation.
- The water user shall keep a complete record of the amount of water used each month, and shall submit a report which includes the recorded water use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the water user to report general water-use information, including the place and nature of use of water under the right.
- The water user shall allow the watermaster access to the meter or measuring device; provided however, where any meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.
- The Director may provide an opportunity for the water user to submit alternative measuring and reporting procedures for review and approval.

The water user shall ensure that the well has been assigned an OWRD Well Identification Number (Well ID tag), which shall be permanently attached to the well. The Well ID shall be used as a reference in any correspondence regarding the well, including any reports of water use, water level, or pump test data.

To monitor the effect of water use from the well(s) authorized under this right, the Department requires the water user to obtain, from a qualified individual (see below), and report annual static water level measurements. The static water level shall be measured in the month of March. Reports shall be submitted to the Department within 30 days of measurement. The measurements may be required in a different month. If the measurement requirement is stopped, the Director may restart it at any time.

The reference levels against which any future measurements will be compared is 95.85 feet below land surface for Well 11 and 98.50 feet below land surface for Well 12, respectively.

All measurements shall be made by a certified water rights examiner, registered professional geologist, registered professional engineer, licensed well constructor or pump installer licensed by the Construction Contractors Board and be submitted to the Department on forms provided by the Department. The Department requires the individual performing the measurement to:

- Identify each well with its associated measurement; and
- Measure and report water levels to the nearest tenth of a foot as depth-to-water below ground surface; and
- Specify the method used to obtain each well measurement; and
- Certify the accuracy of all measurements and calculations submitted to the Department.

The water user shall discontinue use of, or reduce the rate or volume of withdrawal from, the well if annual water level measurements reveal any of the following events:

- An average water level decline of three or more feet per year for five consecutive years; or
- A water level decline of 15 or more feet in fewer than five consecutive years; or
- A water level decline of 25 or more feet; or
- Hydraulic interference leading to a decline of 25 or more feet in any neighboring well with senior priority.

The period of non-use or restricted use shall continue until the water level rises above the decline level which triggered the action or until the Department determines, based on the water user's and/or the Department's data and analysis, that no action is necessary because the aquifer in question can sustain the observed declines without adversely impacting the resource or senior water rights. The water user shall in no instance allow excessive decline, as defined in Commission rules, to occur within the aquifer as a result of use under this right. If more than one well is involved, the water user may submit an alternative measurement and reporting plan for review and approval by the Department.

Failure to comply with any of the provisions of this right may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the right.

If substantial interference with a senior water right occurs due to withdrawal of water from any well listed on this right, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interference.

The well(s) shall be maintained in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine the water level elevation in the well at all times.

The use may be restricted if the quality of downstream waters decreases to the point that those waters no longer meet existing state or federal water quality standards due to reduced flows.

Where two or more water users agree among themselves as to the manner of rotation in the use of water and such agreement is placed in writing and filed by such water users with the watermaster, and such rotation system does not infringe upon such prior rights of any water user not a party to such rotation plan, the watermaster shall distribute the water according to the agreement.

The Director may require water level or pump test results every ten years.

This right is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The right to the use of the water for the above purpose is restricted to beneficial use on the place of use described.

STATE OF OREGON
COUNTY OF HARNEY
CERTIFICATE OF WATER RIGHT

NO
RR

THIS CERTIFICATE ISSUED TO

CARL THOMAS
4055 SOUTH SPENCER #124
LAS VEGAS, NEVADA 89119

confirms the right to use the waters of ONE WELL in the CATLOW VALLEY BASIN for IRRIGATION OF 224.0 ACRES.

This right was perfected under Permit G-10873. The date of priority is OCTOBER 10, 1988. This right is limited to not more than 2.8 CUBIC FEET PER SECOND or its equivalent in case of rotation, measured at the well.

The well is located as follows:

SW 1/4 NE 1/4, SECTION 8, T 33 S, R 31 E, W.M.; 2650 FEET SOUTH AND 1320 FEET EAST FROM NORTH 1/4 CORNER OF SECTION 8.

The amount of water used for irrigation together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second (or its equivalent) and 3.0 acre-feet for each acre irrigated during the irrigation season of each year.

The right shall be limited to appropriation of water only to the extent that it does not impair or substantially interfere with prior surface water rights as well as prior ground water rights of others.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

A description of the place of use to which this right is appurtenant is as follows:

Your transfer application will be returned if any of the map requirements listed below are not met.

Please be sure that the transfer application map you submit includes all the required items and matches the existing water right map. Check all boxes that apply.

- ☒ ☒ N/A Certified Water Right Examiner (CWRE) Stamp and Original Signature. For a list of CWREs, see http://apps.wrd.state.or.us/apps/wr/cwre_license_view/. CWRE stamp and signature are not required for substitutions.
- ☒ ☐ N/A If **more than three** water rights are involved, separate maps are needed for each water right.
- ☒ ☒ Permanent quality printed with dark ink on good quality paper.
- ☒ ☒ The size of the map can be 8½ x 11 inches, 8½ x 14 inches, 11 x 17 inches, or up to 30 x 30 inches. For 30 x 30 inch maps, one extra copy is required.
- ☒ ☒ A north arrow, a legend, and scale.
- ☒ ☒ The scale of the map must be: 1 inch = 400 feet, 1 inch = 1,320 feet, the scale of the Final Proof/Claim of Beneficial Use Map (the map used when the permit was certificated), the scale of the county assessor map if the scale is not smaller than 1 inch = 1,320 feet, or a scale that has been pre-approved by the Department.
- ☒ ☒ Township, Range, Section, ¼ ¼, DLC, Government Lot, and other recognized public land survey lines.
- ☒ ☒ Tax lot boundaries (property lines) are required. Tax lot numbers are recommended.
- ☒ ☒ Major physical features including rivers and creeks showing direction of flow, lakes and reservoirs, roads, and railroads.
- ☒ ☒ Major water delivery system features from the point(s) of diversion/appropriation such as main pipelines, canals, and ditches.
- ☒ ☒ Existing place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions. If less than the entirety of the water right is being changed, a separate hachuring is needed for lands left unchanged.
- ☒ ☐ N/A Proposed place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions.
- ☒ ☒ Existing point(s) of diversion or well(s) with distance and bearing or coordinates from a recognized survey corner. This information can be found in your water right certificate or permit.
- ☒ ☐ N/A If you are proposing a change in point(s) of diversion or well(s), show the proposed location and label it clearly with distance and bearing or coordinates. If GPS coordinates are used, latitude-longitude coordinates may be expressed as either degrees-minutes-seconds with at least one digit after the decimal (example – 42°32'15.5") or degrees-decimal with five or more digits after the decimal (example – 42.53764°).

QWRD

1. For irrigation calculate cfs for each water right involved as follows:
 - a. Divide total authorized cfs by total acres in the water right (for C12345, $1.25 \text{ cfs} \div 100 \text{ ac}$); then multiply by the number of acres to be transferred to get the transfer cfs ($\times 45 \text{ ac} = 0.56 \text{ cfs}$).
 - b. If the water right certificate does not list total cfs, but identifies the allowable use as 1/40 or 1/80 of a cfs per acre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (For C87654, $45.0 \text{ ac} \times 0.0125 \text{ cfs/ac} = 0.56 \text{ cfs}$)
2. Add cfs for the portions of water rights on all the land included in the transfer; however **do not count cfs for supplemental rights on acreage for which you have already calculated the cfs fee for the primary right on the same land.** The fee should be assessed only once for each "on the ground" acre included in the transfer. (In this example, blank 5a would be only 0.56 cfs, since both rights serve the same 45.0 acres. Blank 5b would be 0 and Line 5 would then also become 0).

Description of Water Delivery System

MAR 08 2018

System capacity: 1.56 cubic feet per second (cfs) OR

_____ gallons per minute (gpm)

OWRD

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines, and sprinklers used to divert, convey, and apply the water at the authorized place of use. **Water is pumped from Well #1 & conveyed by buried pipe to a center pivot sprinkler that irrigates POU.**

Check the following boxes that apply:

- ☒ The applicant is responsible for completion of change(s). Notices and correspondence should continue to be sent to the applicant.
- ☐ The receiving landowner will be responsible for completing the proposed change(s) after the final order is issued. Copies of notices and correspondence should be sent to this landowner.
- ☐ Both the receiving landowner and applicant will be responsible for completion of change(s). Copies of notices and correspondence should be sent to this landowner and the applicant.

At this time, are the lands in this transfer application in the process of being sold? ☐ Yes ☒ No

If YES, and you know who the new landowner will be, please complete the receiving landowner information table below. If you do not know who the new landowner will be, then a request for assignment will have to be filed for at a later date.

If a property sells, the certificated water right(s) located on the land belong to the new owner, unless a sale agreement or other document states otherwise. For more information see:

For Place of Use or Character of Use Changes

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands? ☐ Yes ☒ No

If YES, list the certificate, water use permit, or ground water registration numbers:

Pursuant to ORS 540.510, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for transfer must be included in the transfer or be cancelled. Any change to a ground water registration must be filed separately in a ground water registration modification application.

For a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation:

- ☒ Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map.

Tip: You may search for well logs on the Department's web page at:

http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx

AND/OR

- ☐ Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For *proposed wells not yet constructed or built*, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.

The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.

Land Use Information Form

emailed 14 Feb
Oregon Water Resources Department
725 Summer Street NE, Suite A
Salem, Oregon 97301-1266
(503) 986-0900
www.wrd.state.or.us

NOTE TO APPLICANTS

In order for your application to be processed by the Water Resources Department (WRD), this Land Use Information Form must be completed by a local government planning official in the jurisdiction(s) where your water right will be used and developed. The planning official may choose to complete the form while you wait, or return the receipt stub to you. Applications received by WRD without the Land Use Form or the receipt stub will be returned to you. Please be aware that your application will not be approved without land use approval.

This form is NOT required if:

- 1) Water is to be diverted, conveyed, and/or used only on federal lands; **OR**
- 2) The application is for a water right transfer, allocation of conserved water, exchange, permit amendment, or ground water registration modification, and **all** of the following apply:
 - a) The existing and proposed water use is located entirely within lands zoned for exclusive farm-use or within an irrigation district;
 - b) The application involves a change in place of use only;
 - c) The change does not involve the placement or modification of structures, including but not limited to water diversion, impoundment, distribution facilities, water wells and well houses; and
 - d) The application involves irrigation water uses only.

NOTE TO LOCAL GOVERNMENTS

The person presenting the attached Land Use Information Form is applying for or modifying a water right. The Water Resources Department (WRD) requires its applicants to obtain land-use information to be sure the water rights do not result in land uses that are incompatible with your comprehensive plan. Please complete the form or detach the receipt stub and return it to the applicant for inclusion in their water right application. You will receive notice once the applicant formally submits his or her request to the WRD. The notice will give more information about WRD's water rights process and provide additional comment opportunities. You will have 30 days from the date of the notice to complete the land-use form and return it to the WRD. If no land-use information is received from you within that 30-day period, the WRD may presume the land use associated with the proposed water right is compatible with your comprehensive plan. Your attention to this request for information is greatly appreciated by the Water Resources Department. If you have any questions concerning this form, please contact the WRD's Customer Service Group at 503-986-0801.

B. Description of Proposed Use

Type of application to be filed with the Water Resources Department:

- ☐ Permit to Use or Store Water ☒ Water Right Transfer ☐ Permit Amendment or Ground Water Registration Modification
☐ Limited Water Use License ☐ Allocation of Conserved Water ☐ Exchange of Water

Source of water: ☐ Reservoir/Pond ☒ Ground Water ☐ Surface Water (name) _____

Estimated quantity of water needed: 14.21 ☒ cubic feet per second ☐ gallons per minute ☐ acre-feet

Intended use of water: ☒ Irrigation ☐ Commercial ☐ Industrial ☐ Domestic for _____ household(s)
☐ Municipal ☐ Quasi-Municipal ☐ Instream ☐ Other _____

Briefly describe:

Changing irrigation system to include all production wells together

For Local Government Use Only

The following section must be completed by a planning official from each county and city listed unless the project will be located entirely within the city limits. In that case, only the city planning agency must complete this form. This deals only with the local land-use plan. Do not include approval for activities such as building or grading permits.

Please check the appropriate box below and provide the requested information

- ☒ Land uses to be served by the proposed water uses (including proposed construction) are allowed outright or are not regulated by your comprehensive plan. Cite applicable ordinance section(s): HC 20 3.010, EPRU-1
- ☐ Land uses to be served by the proposed water uses (including proposed construction) involve discretionary land-use approvals as listed in the table below. (Please attach documentation of applicable land-use approvals which have already been obtained. Record of Action/land-use decision and accompanying findings are sufficient.) **If approvals have been obtained but all appeal periods have not ended, check "Being pursued."**

Reference: Application T- 12864

On March 8, 2018, we received your water right Transfer application. The application was accompanied by \$3650.00. Our receipt number 126037 is enclosed.

By copy of this letter, we are asking the Watermaster for a report regarding the potential for injury to existing water rights which may be caused by the requested change. A review form will also be sent to our groundwater staff to determine whether the proposed well accesses the same source of water as the original well or as the original POA.

Your application will be examined to determine whether additional information is needed. We will notify you if further information or corrections to the application or map are required.

This application may require publication of a notice for two consecutive weeks in a newspaper with general circulation in the area where the water right is located. If it is determined that newspaper notice will be required, the Department will prepare the notice and notify you of the cost. You will be responsible for submitting payment to the Department prior to publication of the notice.

Except as provided under ORS 540.510(3) for municipalities, you may not use water from the new point of appropriation until a final order approving the transfer application has been issued by the Department.

In order to avoid any possible forfeiture of the water right, you should continue to use the water as described by your existing water right.

If the land is sold before the application is approved, the buyer's consent to the application will be required unless a recorded deed or other legal document clearly established that the water right was not conveyed in the sale.

Refer to the following page for a chart showing the steps and expected timelines for the processing of your application.

If you have any questions, please contact the Transfer Section at (503) 986-0807.
