TEMPORARY CHANGE IN PLACE OF
USE**

Authority

ORS 537.705 and 540.505 to 540.580 establish the process in which a water right holder may submit a request to temporarily transfer the place of use and, if necessary to convey the water to the temporary place of use, the point of appropriation authorized under an existing water right. OAR Chapter 690, Division 380 implements the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

Findings of Fact

1. On May 7, 2020, Jens Rasmussen of Farmland Reserve, Inc., filed an application to temporarily change the place of use under Certificate 95155 for a period of two years. The Department assigned the application number T-13442.
2. Notice of the application for transfer was published on May 26, 2020, pursuant to OAR 690-380-4000. No comments were filed in response to the notice.
3. Temporary Transfer application T-13442 contains information in the file of water rights (Permit S-55061, Permit S-54633, Permit S-55190, Permit S-55192 and Certificate 44654) existing on the "TO" lands proposed in transfer application T-13442. The Applicant has stated these water rights will not be exercised during the 2020 and 2021 irrigation seasons and requested that these water rights not be included as part of this Temporary Transfer application.
4. On October 15, 2020, the agent for the applicant submitted a revised application and map to clarify the place of use and disposition of layered rights.
5. The right to be transferred is as follows:
Certificate: 95155 in the name of FARMLAND RESERVE INC., C/O
 AGRINORTHWEST (perfected under Permit S-36940)
Use: IRRIGATION OF 30.58 ACRES
Priority Date: JUNE 29, 1973

Rate: 0.76 CUBIC FOOT PER SECOND

Limit/Duty: The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-FORTIETH of one cfs, or its equivalent for each acre irrigated, and shall be further limited to a diversion of not to exceed 4.5 acre-feet per acre for each acre irrigated during the irrigation season of each year.

Source: COLUMBIA RIVER, a tributary of the PACIFIC OCEAN

6. Temporary Transfer Application T-13442 proposes to change the place of use of the right to:

4 N	26 E	WM	19	SW NW	2	9.04
4 N	26 E	WM	19	SE NW		6.33
Total						30.58

7. There are multiple primary irrigation water rights, Permits S-55061, S-55190, S-55192, S-54633 and Certificate 44654 that are appurtenant to portions of the "TO" lands described above in Finding of Fact #6. During the term of the Temporary Transfer, water use under these rights are either already shut off, not allocated any water this season, do not supply enough water or have not been activated by mitigation or intended to be used on these acres and thus shall not be exercised.

8. Temporary Transfer Application T-13442 proposes to temporarily transfer a water right from within the boundaries of Columbia Improvement District. The district was notified of the proposed temporary transfer and indicated that the applicant has conferred with the district about the proposed transfer and does not object to the transfer.

Temporary Transfer Review Criteria

9. Water has been used within the last five years according to the terms and conditions of the rights. There is no evidence that would demonstrate that the right is subject to forfeiture under ORS 540.610.
10. A pumping platform structure and pumps, pipelines and boosters, and sprinkler system sufficient to use the full amount of water allowed under the existing rights was present within the five-year period prior to submittal of Transfer Application T-13442.
11. The proposed change would not result in enlargement of the right.
12. The proposed change, as conditioned herein, would not result in injury to other water rights. This finding is made through an abbreviated review recognizing that the transfer may be revoked under ORS 540.523(5) if the Department later finds that the transfer is causing injury to any existing water right.

Conclusions of Law

The temporary change in place of use proposed in Temporary Transfer Application T-13442 is consistent with the requirements of ORS 540.523 and OAR 690-380-8000.

Now, therefore, it is ORDERED:

1. The temporary change in place of use proposed in Temporary Transfer Application T-13442 is approved.
2. The former place of use **shall not** be irrigated as part of this water right during the 2020 and 2021 irrigation seasons.
3. The water user shall maintain and operate the existing measurement devices and shall make such improvements as may be required by the Department.
4. The use shall revert to the authorized place of use at the end of the 2021 irrigation season.
5. The approval of this temporary transfer may be revoked or modified if the Department finds the changes causes injury to any existing water right.
6. Subsequent applications for permanent transfer of Certificate 95155 shall be subject to a full and complete review to determine consistency with the requirements of OAR Chapter 690, Division 380. Approval of this temporary transfer does not establish a precedent for approval of a subsequent application filed for a permanent transfer.

7. The use of water at the temporary place of use authorized by this transfer shall be in accordance with the terms and conditions of Certificate 95155. The right to the use of the water is restricted to beneficial use at the place of use described and is subject to all other conditions and limitations contained in Certificate 95155, any order, and any related decree.
8. There are water rights existing on the proposed "TO" lands as identified in Finding of Fact #7. As described above in Finding of Fact #7, water use for primary irrigation under these water rights shall be suspended during the 2020 and 2021 irrigation seasons.
9. Water use measurement conditions:
 - a. Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device at each (new and existing) points of appropriation.
 - b. The water user shall maintain the meters or measuring devices in good working order.
 - c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.
10. The time during which water is used under this approved temporary transfer does not apply toward a finding of forfeiture under ORS 540.610.

Determination and Conclusions of Law	
FINDINGS	DETERMINATION AND PROPOSED ACTION / CONCLUSIONS OF LAW
Based on review of the evidence submitted, the Department finds the water right(s) has/have been used [within the last five years] or [within the five-year period prior to submittal of the transfer application] according to the terms and conditions of the right(s) and the right(s) is/are not subject to forfeiture.	The right(s) has/have been used [within the past five years] or [within the five-year period prior to submittal of the transfer application] according to the terms and conditions of the right(s). or Confirming water right Certificate XXXXX was issued within the last five years prior to submission of Transfer Application T-XXXXX.
Based on the information submitted [and Department records], a diversion structure and ditch sufficient to use the full amount of water allowed under the existing right(s) were present within the five-year period prior to submittal of the transfer application. or Based on the information submitted [and Department records], a pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing right(s) were present within the five-year period prior to submittal of the transfer application.	The Applicant is ready, willing, and able to use the full quantity of water under the right. There is no evidence in the record to suggest the right is subject to forfeiture.
[As conditioned,] the proposed change(s) would not result in enlargement of the right. <i>Or, if denial</i> The lands currently irrigated under the right would continue to receive water from the same source resulting in enlargement of the right(s).	The proposed change(s) will not enlarge the right. Or The proposed change(s) would result in enlargement of the right.

Determination and Conclusions of Law (Cont'd)

Based on review of the record, the proposed change(s) would not result in injury to other water rights.

Or, if denial

The proposed change(s) would result in the routing of return flows around at least one diversion of other existing water rights, resulting in injury to those rights. Or

An instream water right, Certificate XXXXX, exists for the reach of the river in which the authorized point of diversion would be moved upstream, and streamflows within the reach are frequently below the levels allocated under the instream water right. Thus, the instream water right would be injured as a result of the proposed change in point of diversion.

The proposed change(s) would not result in injury to other water rights.

Or

The proposed change would result in injury to other water rights.

Or

The proposed change would result in injury to the instream water right. [See consent to injury]

**BEFORE THE WATER RESOURCES DEPARTMENT
OF THE
STATE OF OREGON**

In the Matter of Transfer Application	)	FINAL ORDER APPROVING A
T-13442, Umatilla County	)	TEMPORARY CHANGE IN PLACE OF
	)	USE

Authority

ORS 537.705 and 540.505 to 540.580 establish the process in which a water right holder may submit a request to temporarily transfer the place of use and, if necessary to convey the water to the temporary place of use, the point of appropriation authorized under an existing water right. OAR Chapter 690, Division 380 implements the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

Applicant

FARMLAND RESERVE, INC.
PO BOX 2308
PASCO, WA 99302

Agent

JENS RASMUSSEN, AGRI-NW
PO BOX 2308
PASCO, WA 99302

Findings of Fact

1. On May 7, 2020, Jens Rasmussen of Farmland Reserve, Inc., filed an application to temporarily change the place of use under Certificate 95155 for a period of two years. The Department assigned the application number T-13442.
2. Notice of the application for transfer was published on May 26, 2020, pursuant to OAR 690-380-4000. No comments were filed in response to the notice.
3. Temporary Transfer application T-13442 contains information in the file of water rights (Permit S-55061, Permit S-54633, Permit S-55190, Permit S-55192 and Certificate 44654) existing on the "TO" lands proposed in transfer application T-13442. The Applicant has stated these water rights will not be exercised during the 2020 and 2021 irrigation seasons and requested that these water rights not be included as part of this Temporary Transfer application.
4. On October 15, 2020, the agent for the applicant submitted a revised application and map to clarify the place of use and disposition of layered rights.
5. The right to be transferred is as follows:
Certificate: 95155 in the name of FARMLAND RESERVE INC., C/O
AGRINORTHWEST (perfected under Permit S-36940)
Use: IRRIGATION OF 30.58 ACRES
Priority Date: JUNE 29, 1973

Rate: 0.76 CUBIC FOOT PER SECOND

Limit/Duty: The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-FORTIETH of one cfs, or its equivalent for each acre irrigated, and shall be further limited to a diversion of not to exceed 4.5 acre-feet per acre for each acre irrigated during the irrigation season of each year.

Source: COLUMBIA RIVER, a tributary of the PACIFIC OCEAN

Authorized Point of Diversion:

6. Temporary Transfer Application T-13442 proposes to change the place of use of the right to:

4 N	26 E	WM	19	SW NW	2	9.04
4 N	26 E	WM	19	SE NW		6.33
Total						30.58

7. There are ^{multiple} ~~several~~ primary irrigation water rights, Permits S-55061, S-55190, S-55192, S-54633 and Certificate 44654 that are appurtenant to portions of the "TO" lands described above in Finding of Fact #6. During the term of the Temporary Transfer, water use under these rights are either already shut off, not allocated any water this season, do not supply enough water or have not been activated by mitigation or intended to be used on these acres and thus shall not be exercised.

8. Temporary Transfer Application T-13442 proposes to temporarily transfer a water right from within the boundaries of Columbia Improvement District. The district was notified of the proposed temporary transfer and indicated that the applicant has conferred with the district about the proposed transfer and does not object to the transfer.

Temporary Transfer Review Criteria

9. Water has been used within the last five years according to the terms and conditions of the rights. There is no evidence that would demonstrate that the right is subject to forfeiture under ORS 540.610.
10. A pumping platform structure and pumps, pipelines and boosters, and sprinkler system sufficient to use the full amount of water allowed under the existing rights was present within the five-year period prior to submittal of Transfer Application T-13442.
11. The proposed change would not result in enlargement of the right.
12. The proposed change, as conditioned herein, would not result in injury to other water rights. This finding is made through an abbreviated review recognizing that the transfer may be revoked under ORS 540.523(5) if the Department later finds that the transfer is causing injury to any existing water right.

Conclusions of Law

The temporary change in place of use proposed in Temporary Transfer Application T-13442 is consistent with the requirements of ORS 540.523 and OAR 690-380-8000.

Now, therefore, it is ORDERED:

1. The temporary change in place of use proposed in Temporary Transfer Application T-13442 is approved.
2. The former place of use **shall not** be irrigated as part of this water right during the 2020 and 2021 irrigation seasons.
3. The water user shall maintain and operate the existing measurement devices and shall make such improvements as may be required by the Department.
4. The use shall revert to the authorized place of use at the end of the 2021 irrigation season.
5. The approval of this temporary transfer may be revoked or modified if the Department finds the changes causes injury to any existing water right.
6. Subsequent applications for permanent transfer of Certificate 95155 shall be subject to a full and complete review to determine consistency with the requirements of OAR Chapter 690, Division 380. Approval of this temporary transfer does not establish a precedent for approval of a subsequent application filed for a permanent transfer.

7. The use of water at the temporary place of use authorized by this transfer shall be in accordance with the terms and conditions of Certificate 95155. The right to the use of the water is restricted to beneficial use at the place of use described and is subject to all other conditions and limitations contained in Certificate 95155, any ~~Order~~, and any related decree.
8. There are water rights existing on the proposed "TO" lands as identified in Findings of Fact (FOF) 7. As described above in FOF 7, water use for primary irrigation under these water rights shall be suspended during the 2020 and 2021 irrigation seasons.
9. Water use measurement conditions:
 - a. Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device at each (new and existing) points of appropriation.
 - b. The water user shall maintain the meters or measuring devices in good working order.
 - c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.
10. The time during which water is used under this approved temporary transfer does not apply toward a finding of forfeiture under ORS 540.610.

Proposed Changes: ☐ POU ☐ POD ☐ POA ☐ USE ☐ OTHER

Reviewer(s): Greg Silbernagel

Date of Review: 9/30/2020

1. Do you have evidence that the right has not been used in the last 5 years and that the presumption of forfeiture would not likely be rebuttable? ☐ Yes ☒ No If "Yes", attach evidence (e.g. dated aerial photo showing pavement or building on the land for >5 yrs.)
2. Is there a history of regulation on the source that serves this (or these) right(s) that has involved the transferred right(s) and downstream water rights? ☐ Yes ☒ No Generally characterize the frequency of any regulation or explain why regulation has not occurred:
3. Have headgate notices been issued for the source that serves the transferred right(s)?
☐ Yes ☒ No ☐ Records not available.
4. In your estimation, after the proposed change, would distribution of water for the right(s) result in regulation of other water rights that would not have occurred if use under the original right(s) was/were maximized? ☐ Yes ☒ No If "Yes", explain:
5. In your estimation, if the proposed change is approved, are there upstream water rights that would be affected? ☐ Yes ☒ No If "Yes", describe how the rights would be affected and list the rights most affected:

124

6. Check here ☐ if it appears that downstream water rights benefit from return flows resulting from the current use of the transferred right(s)? If you check the box, generally characterize the locations where the return flows likely occur and list the water rights that benefit most:

☐ N/A

7. For POD changes and instream transfers, check here if there are channel losses between the old and new PODs or within the proposed instream reach? If you check the box, describe and, if possible, estimate the losses:

☒ N/A

8. For instream transfers that propose protection of a reach beyond the mouth of the source stream:

☒ N/A Would the quantity be measureable into the receiving stream consistent with OAR 690-077-0015(8)? ☐ Yes ☐ No

9. For POU changes: ☐ N/A Is it likely the original place of use would continue to receive water from the same source? ☐ Yes ☒ No If "Yes", explain:

10. For POU or USE changes: ☐ N/A In your best judgment, would use of the existing right at "full face value," result in the diversion of more water than can be used beneficially and without waste? ☐ Yes ☒ No If "Yes", explain:

11. For POU changes that involve micro-irrigation: ☐ N/A

- a. Has the applicant made changes (absent a transfer) to convert to micro-irrigation within the current place of use boundary of the water right proposed for transfer, and previously demonstrated to the Department through monitoring and site inspections by the Watermaster that the proposed transfer will not result in injury or enlargement?

☒ Yes ☐ No If "Yes", explain:

This is part of the old Boardman Tree Farm. The trees are all gone now and they are converting from micro-irrigation back to solid set pivots. Soil moisture monitoring is no longer a requirement if they are no longer practicing micro-irrigation.

- b. Has a temporary transfer of this nature been previously filed and approved on the same lands (or portions thereof) as those lands involved in this transfer?

☒ Yes ☐ No If "Yes", answer the following:

- i. Were there any problems with more acres being irrigated (or wetted) than were authorized under the temporary transfer? ☐ Yes ☐ No If "Yes", explain:

- ii. Did the designated areas that were to remain dry (or not wetted) under the temporary transfer actually remain dry? ☐ Yes ☐ No If "No", explain:

- iii. Did the applicant comply with and meet all of the conditions of the temporary transfer? ☐ Yes ☐ No If "No", explain:

- iv. Do you have any other observations regarding the temporary transfer? ☐ Yes ☐ No If "Yes", describe:

- v. Did the applicant demonstrate to the Department through monitoring and site inspections by the Watermaster that neither injury nor enlargement occurred as a result of the temporary transfer? ☐ Yes ☐ No If "No", explain:

- c. To the best of your knowledge, if this transfer is approved, does it appear that:

- i. "Injury" will occur to other water rights that share the same source? ☐ Yes ☐ No If "Yes", explain:

- ii. "Enlargement" of the water right being transferred will occur? ☐ Yes ☐ No If "Yes", explain:

12. Are there other issues not identified through the above questions that should be considered in determining whether the change "can be effected without injury to other rights"?

☐ Yes ☒ No If "Yes", explain:

13. What alternatives may be available for addressing any issues identified above:

14. Do conditions need to be included in the transfer order to avoid enlargement of the right or injury to other rights? ☐ No ☒ Yes, as checked and provided below:

☐ For POU changes that involve micro-irrigation, provide the monitoring and reporting conditions necessary to prevent injury/enlargement:

☐ A Headgate should be required prior to diverting water.

☒ Measurement Devices for POD or POA: (if this condition is selected, also fill in the top sections of Page 4)

a. Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device, ☒ at each point of diversion/appropriation (new and existing) OR at each new point of diversion/appropriation ☐ with the exception that water rights issued to the Bureau of Reclamation or an irrigation district (or similar entity) are not subject to this condition.*

b. The water user shall maintain the meters or measuring devices in good working order.

c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.

☐ Reservoir water use measurement: (if this condition is selected, also fill in the top sections of Page 4)

a. Before water use may begin under this order, the water user shall install staff gages, or, with prior approval of the Director, other suitable measuring devices, that measure the entire range and stage between empty and full in each reservoir. Staff gages shall be United States Geological Survey style.*

b. Before water use may begin under this order, if the reservoir is located in channel, weirs or other suitable measuring devices must be installed upstream and downstream of the reservoir, and, an adjustable outlet valve must be installed. The water user shall maintain such devices in good working order. A written waiver may be obtained, if in the judgment of the Director, the installation of weirs or other suitable measuring devices, or the adjustable outlet valve, will provide no public benefit.

* The following alternative device(s) should be substituted for the bold, underlined device in the above selected condition:

☐

Weir

☐

Submerged Orifice

☐

Parshall Flume

☐

Flow Restrictor

Part 2 of 5 – Temporary Transfer Application Map Checklist

Your temporary transfer application **will be returned** if any of the map requirements listed below are not met.

Please be sure that the temporary transfer application map you submit includes all the required items and matches the existing water right map. Check all boxes that apply.

- ☐ ☒ N/A If more than three water rights are involved, separate maps are needed for each water right.
- ☒ Permanent quality printed with dark ink on good quality paper.
- ☒ The size of the map can be 8½ x 11 inches, 8½ x 14 inches, 11 x 17 inches, or up to 30 x 30 inches. For 30 x 30 inch maps, one extra copy is required.
- ☒ A north arrow, a legend, and scale.
- ☒ The scale of the map must be: 1 inch = 400 feet, 1 inch = 1,320 feet; the scale of the Final Proof/Claim of Beneficial Use Map (the map used when the permit was certificated); the scale of the county assessor map if the scale is not smaller than 1 inch = 1,320 feet; or a scale that has been pre-approved by the Department.
- ☒ Township, Range, Section, ¼ ¼, DLC, Government Lot, and other recognized public land survey lines.
- ☒ Tax lot boundaries (property lines) are required. Tax lot numbers are recommended.
- ☒ Major physical features including rivers and creeks showing direction of flow, lakes and reservoirs, roads, and railroads.
- ☒ Major water delivery system features from the point(s) of diversion/appropriation such as main pipelines, canals, and ditches.
- ☒ Existing place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions. If less than the entirety of the water right is being changed, a separate hachuring is needed for lands left unchanged.
- ☒ ☐ N/A Proposed temporary place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions.
- ☒ Existing point(s) of diversion or well(s) with distance and bearing or coordinates from a recognized survey corner. This information can be found in your water right certificate or permit.
- ☐ ☒ N/A If you are proposing a change in point(s) of diversion or well(s) to convey water to the new temporary place of use, show the proposed location and label it clearly with distance and bearing or coordinates. If GPS coordinates are used, latitude-longitude coordinates may be expressed as either degrees-minutes-seconds with at least one digit after the decimal

*Example for Line 2a calculation to transfer 45.0 acres of Primary Certificate 12345 (total 1.25 cfs for 100 acres) and 45.0 acres of Supplemental Certificate 87654 (1/80 cfs per acre) on the same land:

1. Divide total authorized cfs by total acres in the water right (for C12345, $1.25 \text{ cfs} \div 100 \text{ ac}$); then multiply by the number of acres to be transferred to get the transfer cfs ($\times 45 \text{ ac} = 0.56 \text{ cfs}$).
2. If the water right certificate does not list total cfs, but identifies the allowable use as 1/40 or 1/80 of a cfs per acre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (For C87654, $45.0 \text{ ac} \times 0.0125 \text{ cfs/ac} = 0.56 \text{ cfs}$)
3. Add cfs for the portions of water rights on all the land included in the transfer; however do not count cfs for supplemental rights on acreage for which you have already calculated the cfs fee for the primary right on the same land. The fee should be assessed only once for each "on the ground" acre included in the transfer. (In this example, blank 2a would be only 0.56 cfs, since both rights serve the same 45.0 acres. Blank 2b would be 0 and Line 2 would then also become 0).

Water Right Certificate # 89511

Description of Water Delivery System

System capacity: _____ cubic feet per second (cfs) OR

CID System - 142,000 gallons per minute (gpm)

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines, and sprinklers used to divert, convey, and apply the water at the authorized place of use. Water is withdrawn at a pump station located on the Columbia River. The water is then transported through a series of pipelines and boosters and either used in the Boardman farm irrigation system or conveyed into the CID canal. From the canal, water re-enters an underground pipeline and is pumped into the Butter Creek farm sprinkler system

Water Right Certificate # 89511

For Place of Use Changes

OWRD

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands? ☐ Yes ☒ No

If YES, list the certificate, water use permit, or ground water registration numbers: (1) 89511 is included in T-12522, which is currently in process. The COBU has been submitted and the "From" lands are derived from that COBU. (2) Certificate 89305 covers the rest of the field in 4N 26 E sec. 19, as well as adjacent fields, but will not be layered with this proposed transfer. (3) Certificate 90153 is owned by another party and used in the same quarter-quarter sections as proposed in this transfer but are used on separate fields and will not overlap. (4) Permits S-55601, S-55190, S-55192 & S-54633 identify the "To" lands in 2N 28E as supplemental. These permits WILL NOT be used on the lands described in this application, though it is possible that they will be exercised in the same or adjacent quarter-quarter sections.

Pursuant to ORS 540.525, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for temporary transfer can be included in the transfer or remain unused on the authorized place of use. If the primary water right does not revert soon enough to allow use of the supplemental right within five years, the supplemental right shall become subject to cancellation for nonuse under ORS 540.610.

If a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation is necessary to convey the water to the new temporary place of use you must provide:

- ☐ Well log(s) for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map. (Tip: You may search for well logs on the Department's web page at: http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx)

AND/OR

- ☐ Describe the construction of the authorized and proposed well(s) in Table 3 below for any well that does not have a well log. For a *proposed well(s) not yet constructed or built*, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the Department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.

Authority

Oregon Revised Statutes (ORS) 540.505 to 540.580 establish the process in which a water right holder may submit a request to transfer the point of diversion, place of use, or character of use authorized under an existing water right. Oregon Administrative Rules (OAR) Chapter 690, Division 380 implement the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

Findings of Fact

1. On November 3, 2016, FARMLAND RESERVE INC., filed an application to change the place of use under Certificates 76584, 76585, 76586, 83588, 83589, 83590, 83591, 83592, and 89511. The Department assigned the application number T-12522.
2. As part of the application, the agent for the applicant submitted an Attachment 1 of this permanent transfer application requesting that upon approval of this transfer, that the two pending temporary transfer applications T-12271 (Vol. 101, Pg 211) and T-12441 (Vol. 103, Pg. 708) currently in effect be terminated.
3. On February 23, 2017, the Department issued a Preliminary Determination proposing to approve Transfer T-12522 and mailed a copy to the applicant. Additionally, notice of the Preliminary Determination for the transfer application was published on the Department's weekly notice on February 28, 2017, pursuant to ORS 540.520 and OAR 690-380-4020. No protests were filed in response to the notice.
4. Notice of the application for transfer was published on November 3, 2016, pursuant to OAR 690-380-4000. No comments were filed in response to the notice.

This final order is subject to judicial review by the Court of Appeals under ORS 183.482. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.482(1). Pursuant to ORS 536.075 and OAR 137-003-0675, you may petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

5. The portion of the first water right to be transferred is as follows:

Certificate: 76584 in the name of POTLATCH CORPORATION (perfected under Permit S-37150)

Use: IRRIGATION OF 476.96 ACRES

Priority Date: JULY 25, 1973

Rate: 12.52 CUBIC FEET PER SECOND (CFS), PROVIDED THE TOTAL QUANTITY DIVERTED UNDER THE RIGHTS PERFECTED UNDER PERMIT 37150 DOES NOT EXCEED 140.1 CFS

Limit/Duty: The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, is limited to ONE-FORTIETH of one cubic foot per second per acre, or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 4½ acre-feet per acre for each acre irrigated during the irrigation season of each year.

Certificate 83589 does not accurately describe the point of diversion in relationship to the other four water rights (Certificates 83590, 83591, 83592, 89511) associated with this original permit (Per# S-36940). The other POD descriptions listed on the four certificate numbers mentioned above for the diversion structure on the Columbia River were located at the centroid of the concrete pad in which the turbine pumps are located. The agent and Certified Water Rights Examiner for the applicant has requested to make this POD location for Certificate 83589 consistent with other water rights and provided information indicating that all the points of diversion are the same and should be described as follows:

24. The applicant has requested the Department issue one certificate each that would combine ALL of the transferred portions and for the portions NOT modified (superseding remaining right certificates) under each of the two original permits (S-37150 & S-36940) when the Claim of Beneficial Use (COBU) is received and approved. The combined certificates would facilitate efficiency in tracking and record keeping for the company. The Department will consider the request to combine these superseding certificates at the time the COBU is submitted.
25. On December 28, 2016, the Department sent a copy of the draft Preliminary Determination proposing to approve Transfer Application T-12522 to the applicants. The draft Preliminary Determination cover letter set forth a deadline of January 27, 2017, for the applicant to respond. On January 9, 2017, the agent for the applicant requested the Department continue

with the transfer, proceed with issuance of the Preliminary Determination and provided the necessary information to demonstrate that the applicants are authorized to pursue the transfer. In addition, the agent also requested the Department acknowledge that the POD descriptions of all the certificates are based on one single point at the POD location on the Columbia River. To be consistent with the other POD locations identified in all the water rights of record being transferred in this transfer, the Department is led to clarify the POD locations as one and is further described above in Finding #14 and shall become part of the rights of record.

Transfer Review Criteria [OAR 690-380-4010(2)]

26. Water has been used within the last five years prior to submittal of the transfer application according to the terms and conditions of the rights. There is no evidence available that would demonstrate that the rights are subject to forfeiture under ORS 540.610.
27. A diversion structure, pumping facility, pipeline, booster pumps and drip irrigation systems sufficient to use the full amount of water allowed under the existing rights were present within the five-year period prior to submittal of Transfer Application T-12522.
28. The proposed change would not result in enlargement of the rights. The purpose of the proposed changes in place of use is to transfer water rights from drip-irrigated 8 foot and 2 foot strips to irrigated pivots containing row crops. Any use of water outside of the proposed pivots could be readily observed by the Watermaster, thus the Department has determined the need and continued use of soil moisture monitoring conditions described in the new confirming right certificates will not be needed to monitor the proposed places of use for enlargement of the rights.
29. A diversion structure, pumping facility, pipeline, booster pumps and drip irrigation systems sufficient to use the full amount of water allowed under the existing rights were present within the five-year period prior to submittal of Transfer Application T-12522.
30. The proposed changes would not result in enlargement of the rights.
31. The proposed changes would not result in injury to other water rights.

Conclusions of Law

The changes in place of use proposed in Transfer Application T-12522 are consistent with the requirements of ORS 540.505 to 540.580 and OAR 690-380-5000.

Now, therefore, it is ORDERED:

1. The changes in place of use proposed in Transfer Application T-12522 are approved.
2. The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificates 76584, 76585, 76586, 83588, 83589, 83590, 83591, 83592, and 89511 and any related decree.
3. Water right Certificates 76584, 76585, 76586, 83588, 83589, 83590, 83591, 83592, and 89511 are cancelled. New certificates will be issued describing those portions of the rights NOT

affected by this transfer. All remaining rights shall also include the clarified and re-described POD location as described in Finding of Fact #14 above.

4. The approval of this transfer application T-12522 shall make null and void the two temporary transfers T-12271 and T-12441 currently in effect. Transfer applications T-12271 (Volume 101, Page 211) and T-12441 (Volume 103, Page 708) are terminated and of no further force or effect.
5. Water use measurement conditions:
 - a. Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device at each new point of diversion.
 - b. The water user shall maintain the meters or measuring devices in good working order.
 - c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meter or measuring device is located within a private structure, the Watermaster shall request access upon reasonable notice.
6. The former places of use of the transferred rights shall no longer receive water under the rights.
7. The continued need for use of soil moisture monitoring conditions described in the above modified certificates will not be needed to monitor the proposed places of use for enlargement of the rights. The conditions for soil moisture probes installation, monitoring and reporting are hereby removed from these water rights at the proposed place of use authorized in this transfer. The portions of the rights not modified by the final order shall retain the specific soil moisture monitoring conditions described in each certificate.
8. Full beneficial use of the water shall be made, consistent with the terms of this order, on or before **October 1, 2026**. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the changes and full beneficial use of the water.
9. After satisfactory proof of beneficial use is received, new certificates confirming the rights transferred will be issued.

Reference: Application T- 13442

On May 21, 2020, we received your water right Transfer application. The application was accompanied by \$880.34. Our receipt number 132461 is enclosed.

By copy of this letter, we are asking the Watermaster for a report regarding the potential for injury to existing water rights which may be caused by the requested change.

Except as provided under ORS 540.510(3) for municipalities, you may not *temporarily* use water at the new place of use until a final order approving the temporary transfer application has been issued by the Department. Additionally, pursuant to OAR 690-380-8010, the lands from which an irrigation water right is to be temporarily transferred and the land to which the right is to be temporarily transferred may not both receive water during the same season. If the temporary transfer is approved during an irrigation season and water has already been used at the currently authorized location during that season, then the temporary transfer will not take effect until the following season.

If the land is sold before the temporary transfer is approved, the buyer's consent to the temporary transfer will be required unless a recorded deed or other legal document clearly established that the water right was not conveyed in the sale.

If you have any questions, please contact the Transfer Section at (503) 986-0815.

Regular Temporary Water Right Transfer Application Checklist

Checked by Joan

Date 5-19-20

A temporary transfer must be for a change in place of use. A temporary change in POD/POA or APOD/APOA cannot be accepted as a stand-alone change.

*Certificate 89511 is cancelled
(unable to locate Proof to the Sat or COBU)*

A change in POD/POA can accompany the temporary change in place of use, only if the proposed temporary POD/POA is supplying water to the proposed temporary place of use.

(If OK, check box to left; if not, fill in the blank)

- ☐ 1. Page 1 of application: Are all attachments that have been checked actually included?
If not, what is missing? _____
- ☐ 2. Are fees included and correct?
If not, the correct fee would be: _____, so the amount missing is: _____
- ☐ 3. Part 4 of application: Have all the applicants listed at the top of the page signed at the bottom?
If not, whose signature is missing? _____
- ☐ 4. Are all listed certificates shown by WRIS as non-cancelled?
If not, which are cancelled? _____
For each cancelled certificate, if there has been a remaining right certificate issued that covers the lands in the left side of Table 2, list its number _____ and check the #4 box at left on this checklist.
- ☐ 5. If any certificate is in the name of a "district", is a Supplemental Form D from that district enclosed?
☐ N/A ☐ Form D needed from _____ (district)
- ☐ 6. If all #1-#5 boxes on this checklist are checked (with no remaining deficiencies identified), accept the application. Put this check sheet in the transfer folder.

If #1, #2, #3, #4 or #5 on this checklist is deficient, the application cannot be accepted. It should be returned and the deficiencies listed in the "staff" section at the bottom of Application Page 1, unless the applicant or agent can resolve the deficiencies within 2-3 days.

Ask Joan if you have questions 😊
