PROPOSED CHANGES

Check all type(s) of change(s) proposed below (change "CODES" are provided in parentheses):

Changes to Point(s) of Groundwater Appropriation:

☐ Point of Appropriation (POA) – the proposed POA will replace the authorized POA

☐ Additional Point of Appropriation (APOA) - proposed POA will be in addition to the authorized POA

Changes in Place of Use and/or Character of Use:

☑ Place of Use (POU) - the proposed changes to the place of use will replace the authorized place of use

☐ Character of Use (USE) - the proposed changes to the character of use of the water right will modify the authorized character of use

Explain in your own words what you propose to accomplish with this application, and why:

When T-12775 was submitted November 22, 2017, this was under a contract agreement between the applicant (Aurora Properties LLC c/o Mike Iverson) and the owner of the "from" land (Roger Wayne Van Lieu) stating the owner of the "to" land (Aurora Properties LLC c/o Mike Iverson) is obligated to file this application to restore the place of use to its original authorized location under GR-2004. Because Groundwater Registration Modifications cannot be reverted, a new application is being submitted to return the place of use to the original place of use. Upon approval of this application, the sole remaining authorized well under GR-2004 will be the original well (MARI 511).

PROPOSED CHANGES

Check all type(s) of change(s) proposed below (change "CODES" are provided in parentheses):

Changes to Point(s) of Groundwater Appropriation:

☐ Point of Appropriation (POA) – the proposed POA will replace the authorized POA

☐ Additional Point of Appropriation (APOA) - proposed POA will be in addition to the authorized POA

Changes in Place of Use and/or Character of Use:

☑ Place of Use (POU) - the proposed changes to the place of use will replace the authorized place of use

☐ Character of Use (USE) - the proposed changes to the character of use of the water right will modify the authorized character of use

Explain in your own words what you propose to accomplish with this application, and why:

When T-12775 was submitted, this was under a contract agreement between the applicant and owner that this modification would be returned when requested. That request has been issued and because Groundwater Registration Modifications cannot be reverted, a new application is being submitted to return the place of use to the original place of use with the original well only.
