WATER
RESOURCES
DEPARTMENT

RE: Approval of Temporary Transfer under SB 494 (ORS 540.570). File # T-7477

Pursuant to ORS 540.570, Echo Irrigation District filed a request to move the place of use of certain water rights within the district for the 1996 irrigation season. The changes requested are enumerated on the attached sheet. Notice of the request was published in summary form by the Water Resources Department on January 23, 1996. Public comments were accepted for 30 days following publication. No comments were received.

Pursuant to ORS 540.570 (3) and OAR 690-21-070 (3) staff have reviewed the requested changes. This review finds that in order to assure that the changes do not injure existing rights or result in enlargement of the subject rights the following conditions of approval shall apply:

1. Prior to using water on the subject lands, for each point of diversion included in the temporary transfer, the water user shall install an in-line flow meter or other suitable device for measuring and recording the quantity of water used. The type and plans of the measuring device must be approved by the Watermaster.
2. Pursuant to 540.570 (2) water shall not be used on the subject lands until 60 days after the district's completed notice was received. The notice was complete and officially filed January 17, 1996.
3. The former place of use for the subject lands shall receive no water from any source for the 1996 irrigation season.
4. All restrictions and limitations contained in the decree or permit of the subject rights shall apply to the "TO" lands.
5. Pursuant to 540.570 (6) the department may further condition or revoke a temporary transfer at any time to the extent necessary to avoid injury if the department finds the transfer is causing injury to an existing water right.

Therefore, the request, as conditioned above and as enumerated on the attached sheet is approved for the 1996 irrigation season.
