2001-2005

The lands in Sec29 stretching south from the large agricultural field have been planted to cottonwood trees and irrigated in small sections throughout 2002 and 2005. A mainline was extended from the point of diversion at the house near the middle of Sec 29 and extended north to the agricultural field. Short segments of this reach have been irrigated using handline. See photo of point of diversion below.

Approximately 10 acres of the place of use for this certificate is located in T7S R 19E Section 20 S 1/2 of the SW 1/4 was planted in cottonwood trees and irrigated throughout the 2001-2005 seasons for the purpose of growing and re-establishing cottonwood trees historically present throughout this valley. See the photos below.

Foreground is Certificate 7836, Background are cottonwood trees being irrigated on Sec 29 NE $\frac{1}{4}$ of the SW $\frac{1}{4}$

Approximately 6 acres in T7S R 19E Section 29 in the SE $\frac{1}{4}$ of the NW $\frac{1}{4}$ was irrigated to grow cottonwood trees. This is the area north of the house. See photos below of one of the segments being irrigated.
