3. TYPE OF CHANGE

- Use Place of Use Point of Diversion Point of Appropriation
- Historic Point of Diversion Substitution Surface Water to Ground Water

Reason for change: Partial transfer of 18.94 cfs from Opal Springs to ground water (SB 820). Transfer P.O.D. from surface water to well P.O.A. for ground water source and energy conservation through use of artesian pressure.

4. AFFECTED DISTRICTS AND LOCAL GOVERNMENTS

Is the affected water right located within or served by an irrigation or other water district?

- Yes No

Will the affected water right be located within or served by an irrigation or other water district after the proposed transfer?

- Yes No

If yes for either, list the name and mailing address of each district:

Deschutes Valley Water District - 881 SW Culver Highway, Madras, Oregon 97741

Attach the name and mailing address of all affected local governments (e.g., county, city, municipal corporation, tribal governments)

Jefferson County - 66 SE D, Suite D Madras OR 97741 (541) 475-2443.

5. CURRENT WATER RIGHT INFORMATION

Name on Permit, Certificate, or Decree: Deschutes Valley Water District

Decree: _____

Not applicable

8. EXHIBITS

Application may be rejection if all appropriate exhibits are not enclosed.

Land Use Information Form:

- Enclosed
- Not needed (must meet the following four requirements):
 - ❶ In EFU zone or irrigation district,
 - ❷ Change in place of use only,
 - ❸ No structural changes needed, including diversion works, delivery facilities, other structures, and
 - ❹ Irrigation only.

Map:

- Water Right Transfer: *Must be prepared by a Certified Water Right Examiner.*
- All others: *Need not be prepared by a Certified Water Right Examiner.*

Lot Book Report:

- (n/a Permit Amendment)
- A lot book report for the land to which the water right is appurtenant prepared by a title company. If the applicant is not the landowner as shown by the lot book report, the applicant shall provide a notarized and signed statement from the landowner authorizing the change.

Evidence of use within last five years, or not subject to forfeiture:

- (n/a Permit Amendment)
- Evidence that the water has been used over the past five years in accordance with the terms and conditions of the right or that the right is not subject to forfeiture under ORS 540.610.

Water Well Reports:

- If application is for a change in point of appropriation or change from surface water to ground water, attach copies of all water well reports. If reports are not available, describe construction details including well depth, static water level, and information necessary to establish the ground water body developed or proposed to be developed.

Fees:

- Amount enclosed: \$ _____
See department Fee Schedule at www.wrd.state.or.us or call (503) 986-0900.

9. SIGNATURE

I (we) swear that I (we) have read the above application and the statements made are true and accurate.

 <small>applicant signature</small>	<p>DAVID J NEWTON</p> <small>name (print)</small>	<p>4/30/04</p> <small>date</small>
<small>applicant signature</small>	<small>name (print)</small>	<small>date</small>

Before you submit your application, be sure you have:

- Answered each question completely.
- Attached a legible map, which includes township, range, section, quarter/quarter and tax lot number.
- Include the necessary exhibits.
- Include a check payable to the Oregon Water Resources Department for the appropriate amount. The Department's Fee Schedule can be found at www.wrd.state.or.us or call (503) 986-0900.

DESCHUTES VALLEY WATER DISTRICT
Application for Water Right Transfer
Permit No. 36515

April 23, 2004

ATTACHEMENT A

DESCRIPTION OF DISTRIBUTION SYSTEM AND WATER USE

Opal Springs is located in Township 12S, Range 12E, SW1/4 of NE ¼ of Section 33. 1215 feet north and 1940 feet west from the east 1/4 – section corner of Section 33.

The main spring at Opal Springs discharges from a steep slope above the Crooked River at the location described above. The diversion works are located near the bottom of the Crooked River Canyon and consist of a subsurface sheet pile wall and 60 inch diameter steel pipe installed vertically down into the rocky talus at the base of the slope. This pipe serves as a spring collector into which a turbine fan pump has been installed. The collector and pump supply water via a 20 inch diameter steel pipe to an adjacent pump house. Two steel pipelines (20 inch and 12 inch) convey water to storage reservoirs 900 feet above the Canyon floor to the Main Tanks.

The Opal Springs pump house adjacent to the spring collector contains three 150 hp, two 500 hp, and two 400 hp turbine pumps. An additional 400 hp pump is located in another building nearby. Two steel pipelines, a 20 inch diameter and a 12 inch diameter are used to convey the pumped water approximately from the Canyon floor to the Main Tanks with an elevation change of 900 feet. Water is distributed from the Main Tanks via the various reservoir and booster pump system. Total system capacity is 18.53 cfs based on pump capacity, pipe sizes and operation alternatives.
