Remarks: There are significant differences in the taxlot and government lot boundaries and numbers shown in the ORMAP database maps for Benton and Linn Counties, especially in Section 1 of T12S, R5W, WM. The uncertainty in these boundaries relative to the transfer mapping was discussed with Kelly Starnes of the WRD on March 3, 2009.

The remaining rights would continue to be served by the river PODs.

Water will continue to be used in the FROM lands, but the type of use will change.

The application requests approval to convert 124.0 acres of the right to mining and industrial uses. The previous land owner raised sweet corn and pumpkins. Page 43 of the Extension Miscellaneous 8530 (Cuenca, et al; 199) shows the net irrigation water use for sweet corn would be 19.6 inches 19 out of 20 years or 1.63 AF/acre. Based on this information, the 124.0 acres would yield 202.1AF of water for the proposed mining and industrial uses.
