**10. Other Remarks (optional)**

Please see the attached transfer application map for reference to the locations of the wells discussed in the following remarks. Authorized Well 1 (MARI 1125) was abandoned and replaced by MARI 1112, designated as Replacement Well 1 for this transfer; however, the change was not documented at that time. Authorized Well 2 (MARI 1103) still exists, but has been replaced by MARI 1109, designated as Proposed Well 3 for this transfer. When MARI 1109 was drilled, it was close enough to the original well (MARI 1103) that documentation of the change in a transfer was not required. The applicant is currently using MARI 1112 (Replacement Well 1) and MARI 1109 (Proposed Well 3) for irrigation of land under both rights. The applicant wishes to retain Authorized Well 2 for possible future use, document Replacement Well 1 and Proposed Well 3, and add proposed Wells 4, 5, and 6, in order to be able to use all of these wells either together or in any combination for irrigation of lands under both rights.

Remarks: The construction specifications for Proposed Wells 5 and 6 are based on the log for Proposed Well 4 (MARI 62238). The actual casing/screen diameters and lengths, screened or perforated intervals, and total well depths, may vary depending on actual conditions encountered in the field. The objective will be to complete new wells so they obtain water from the alluvial aquifer.
