# Additional Water Right Form Standard Application for Instream Lease

A summary of review criteria and procedures that are generally applicable to these applications is available at [www.wrd.state.or.us/OWRD/PUBS/forms.shtml](http://www.wrd.state.or.us/OWRD/PUBS/forms.shtml).

## ~I~ Water Right Holder and Water Right Information

### Section 1.5 continued from Standard Application for Instream Lease.

**Subject Water Rights.** Lessor proposes to lease the water rights listed in 1.3.

The right(s) to be leased are further described as follows:

Certificate No.: 80571

Priority date: March 31, 1910

Type

of use: Supplemental Irrigation

Legal Season of Use (if not listed on the certificate): April 15 to Oct 1

Is the entire water right certificate being leased?  Yes  No

If no, list the acres to be leased by legal description of township, range, section, and 1/4 1/4, which will be dried up as part of this lease. Include a map (Attachment 3) showing the lands that will not receive water.

Place of use: T \_\_\_\_\_ N, R \_\_\_\_\_ W, Section \_\_\_\_\_, \_\_\_\_\_ 1/4 \_\_\_\_\_ 1/4 - \_\_\_\_\_ acres to be leased

Enter additional places of use here, using format above:

See attached spreadsheet

Page \_\_\_\_\_ (Identify page number of certificate, if certificate is greater than 10 pages.)

Number of acres, if for irrigation: 99.1

Acre-feet of storage, if applicable: n/a

Rate associated with leased rights (cfs): 0.991 cfs

(Use additional lines if there is more than one rate associated with the water right.)

Duty associated with leased rights (AF): 4.5 AF/Ac

(Use additional lines if there is more than one duty associated with the water right.)

Conditions or other limitations, if any: The right is limited to 50 cfs into the Hopkins canal at the Bradshaw Drop, or its equivalent in cas of rotation measured at the Point of Diversion from the source.

## ~II~ Instream Water Right Information

### Section 2.2 continued from Standard Application for Short-Term Instream Lease.

**Instream use created by lease.** The instream use to be created is described as follows:

Bear Creek

Tributary to Rogue River in the Rogue Basin.

Describe the point of diversion (POD) and any associated reach(es) of the instream use being created. If possible list the reach by river mile. If no reach is identified, and there is only one POD listed on the certificate, the lease may be processed to be protected at the POD. (If more than one POD is listed on the certificate, then the POD and any associated reach(es) must be identified): For the primary the points of diversion for the water right are on Little Butte Creek. One POD is North Fork Little Butte Creek: 40 feet north and 620 feet west from E 1/4 corner of section 20, being within the SE1/4 NE1/4 of section 20, Township 36 South, Range 2 East, W.M.

Another POD is South Fork Little Butte Creek: 780 feet south and 400 feet west from E 1/4 corner of section 29, being within the NE 1/4 SE 1/4 of section 29, Township 36 S, Range 2 East, W.M.

Another POD is Bradshaw Drop: SW1/4 SW1/4, Section 8, Township 36 South, Range 1 East, W.M.

After the water is diverted under the rights it is transported via the Joint System Canal shared with Medford Irrigation District. The water is then diverted by RRVID at the Bradshaw Drop into the Hopkins Canal which crosses Bear Creek through a flume on the McAndrews Avenue Bridge. At the crossing, RRVID can deliver water to Bear Creek through a control structure. The reach of the instream water right under this lease will be from the McAndrews Bridge, at approximately stream mile 9.5, to the mouth of Bear Creek. For the supplemental right the point of diversion ( POD) for the water right is 870 feet South and 1460 feet East from the NW Corner of Section 30, within the NE ¼ of the NW ¼ of said section, Township 37 South, Range 1 West, W.M., this POD is commonly known as the Jackson Street diversion or the Bear Creek Feeder Canal; the instream right will be supplied by the supplemental rights when supplemental water is also being delivered for irrigation. Use of the supplemental right to satisfy the in-stream right will be at 1/100th cfs per acre delivered by leaving water instream at the POD.

Maximum volume in acre-feet: 445.95

Rate in cfs: 0.991

(Use the section below to indicate a more restrictive period of use than allowed by the water right.)

**Conditions to prevent injury, if any:**

None

The instream flow will be allocated on a daily average basis up to the described rate from \_\_\_\_\_ through \_\_\_\_\_.

Other (describe): The instream right protected under this lease shall be satisfied through the delivery by RRVID based on the same percentage diversion and delivery rate RRVID is providing to irrigation rights with the District. In case of Shortage of supply wher the general allotment on the District has been reduce, the District may deliver less that the 2.65 acre-feet per acre in accordance with District policy governing temporary instream leases. In the event the District stops delivery of irrigation water prior to October 1, the delivery for the instream water shall also stop. Reporting to the watermaster shall be consistent with any required reporting of other district operations. In stream water will be at 1/100th cfs and measured just below the Hopkins diversion by Hydromat guage BJB
