● Authorized Points of Diversion

The decree map was found to be inaccurate. The lands on this map redescribe and clarify the authorized places of use within Certificates 5961, 6005 and 6042. Current GIS technology and 2005 aerial photography were used to define the places of use. The railroad was constructed prior to the construction of I-84. This railroad was used as reference in redescribing the places of use. This map more accurately reflects the places of use at that
