▪ If an agent is listed above, please check one of the following:

- Please send all correspondence to Agent. Send *copies* of correspondence to Applicant; or
- Please send all correspondence to Applicant. Send *copies* of correspondence to Agent.

4. PROPOSED CHANGE(S) TO WATER RIGHT(S)

- List **all** water rights to be affected by this transfer. Indicate the certificate, permit, decree or other identifying number(s) in the table below: *(Attach additional pages as necessary.)*

	Application / Decree	Permit / Previous Transfer	Certificate
1.	S-32520	S-25691	29982
2.	S-65818	S-47707	82065
3.		-	
4.		-	
5.		-	
6.		-	

- Attach a **separate Supplemental Form A** (*Description of Proposed Change(s) to a Water Right*) for **each** water right listed above.
- Check **all** proposed change(s) included in this transfer application:
 - Place of Use Point of Diversion (POD) Additional Point of Diversion
 - Character of Use Point of Appropriation (POA, or well) Additional POA
 - Instream Transfer Surface Water POD to Ground Water POA
 - Substitution of Supplemental Groundwater right for Primary Surface water right
 - Historic POD change Other

Reason(s) for change(s): This transfer moves all the fairways of the junior right to the rough of the senior so all the greens, tees, and fairways can be irrigated during drought years.

5. WATER DELIVERY SYSTEM

- Describe the **current** water delivery system **or** the system that **was in place** at some time within the last 5 years. Include information on the pumps, canals, pipelines and sprinklers used to divert, convey and apply the water at the authorized place of use. If the transfer involves multiple rights that have independent systems, describe each system separately.

The description must be sufficient to demonstrate that the full quantity of water to be transferred can be conveyed from the authorized source and applied at the authorized location and that the applicant is ready, willing, and able to exercise the right.

Water is pumped from a diversion point in the Mohawk River using a 20 HP Marathon Centrifugal pump and conveyed through a 4-inch main to the pond. Water is pumped from the pond to the various areas using Toro, Hunter and RB 900 sprinklers.

- System capacity: 1.04 cubic feet per second (cfs). If the transfer involves multiple rights that have independent systems, describe the capacity for each system separately.

One system provides water for two water rights.

Before submitting your application to the Department, be sure you have:

- Answered each question completely.
- Included all the required attachments.
- Provided original signatures for **all** named deed holders, or other parties, with an interest in the water right.
- Included a check payable to the Oregon Water Resources Department for the appropriate amount.

12. SIGNATURES

▪ Check one of the following, as appropriate, and sign the application in the signature box below:

In accordance with OAR 690-380-3000(13)(a), I (we) understand that prior to Department approval of a permanent transfer and upon my receipt of a draft Preliminary Determination for the proposed transfer, I (we) will be required [pursuant to OAR 690-380-4010(5) and (6)] to provide the following landownership information and evidence demonstrating that I (we) am authorized to pursue the transfer:

- (a) A report of ownership information that has been prepared by a title company within the three months prior to the issuance of the draft Preliminary Determination showing current land ownership of the subject lands, unless there is a recorded water right conveyance agreement;
- (b) If applicable, a copy of any water right conveyance agreement on the subject lands. If a water right conveyance agreement has been recorded for the subject lands, the report of ownership information must be prepared by a title company within the three months of the water right conveyance agreement being recorded or show ownership of the subject property at the time the water right conveyance agreement was recorded; **and** If the landowner identified in the report of ownership information or the individual or entity to whom the interest in the water right has been conveyed is **not** the applicant, a **notarized statement consenting to the transfer** signed by the landowner identified in the report or an authorized representative of the entity to whom the interest in the water right has been conveyed as identified in a water right conveyance agreement, or other documentation demonstrating that the applicant is authorized to pursue the transfer in the absence of the consent of the landowner.

I (we) affirm that the applicant is a municipality, as defined in ORS 540.510(3)(b), and that the right is in the name of the municipality or a predecessor. Therefore, pursuant to OAR 690-380-3000(13)(b), the applicant is **NOT** required to provide the above described report of ownership information.

I (we) affirm that the applicant is an entity with the authority to condemn property and is acquiring the property to which the water right proposed for transfer is appurtenant by condemnation. Documentation is provided with this application supporting this statement. Therefore, pursuant to OAR 690-380-3000(13)(c), the applicant is **NOT** required to provide the above described report of ownership information. (NOTE: Such an entity may only apply for a transfer under this subsection if it has filed a condemnation action to acquire the property.

I (we) affirm that this is a temporary transfer and a copy of the deed for the "from" land (and affidavits of consent from any other landowners, if applicable) is enclosed.

I (we) affirm that this is a historic point of diversion transfer and that I (we) must provide a report of current ownership prepared by a title company prior to the Department finalizing my request.

▪ I (we) affirm that the information contained in this application is true and accurate.

This e-mail is to confirm our findings from reviewing the file for Application G-13489, Permit G-12735, and whether it should be included in the surface-water transfer we will be submitting. We determined that the ground water right is a stand-alone right, and the exact location of where the right is exercised is unknown. The application map does not clearly identify the location of the acreage to be irrigated, and the COBU map does not match areas that were irrigated at the time final proof was made. Therefore, we concluded that the ground water right does not need to be included with the surface-water transfers, because it is a stand-alone right, at this time.

We will submit an extension on the ground water right to extend the c-date to a point in time when all the conditions of the permit were met, and submit a revised COBU map that clearly defines the areas irrigated by the ground water right.

Please confirm that the above comments are consistent with your understanding by responding to this e-mail.

Malia,

I agree that you may include the entire place of use in the "from" and "to" maps, even though some of the area will be the same. The additional map showing the final configuration of the rights should also be helpful and will be appreciated.

Application S-65818 is now under Certificate 82065 in the name of Springfield Country Club, Inc., and is subject to transfer. Application S-32525 is under Certificate 32642, in the name of Walton L.H. Osborne of Roseburg, appears unlikely to be a right you intend to include in this transfer.

Please refresh my memory about how the proposed place of use will fall within DLC and Government lots and your statement about not including acreage within DLCs and Government lots. Will the character of use remain "irrigation," or be changed to a type of use that does not include acreage in the description?

Subject: Phone call today regarding a transfer that will involve Applicastions S-32525 and S-65818

Hi Dorothy:

This e-mail is to document the conclusions of our telephone conversation today regarding a transfer that we are preparing for Spring Field County Club. The two water rights that are Applications S-32525 (Senior) and S-65818 (Junior) that will be involved in transfer that we hope to submit in a week or two.

The final decision, was this was a special case where it made sense to submit a "From" map that shows the location of each existing water right and a "To" map that shows the location where each right is being moved to. We would also submit a map that would show the final configuration of how all the rights would fit together after the transfer is completed. This last figure would provide a bigger look at the end goal.

You can simply acknowledge this e-mail, if I have captured the end result of our discussion. We will include a copy of your acknowledgment e-mail with the transfer to help clarify why the "To" maps are depicted the way they are.

This is the same transfer where we received earlier approval to not break out the acreages by DLC and Government Lots, because the acreages would be so small.

Thank you for all your help and guidance in this transfer.

Hi Malia –

That is consistent to what we discussed. Please include a copy of this e-mail with the transfer application.

Subject: Springfield Country Club New Transfer Applications for water right applications S-35818, S-65818, and G-13489

Hi Kelly:

This e-mail is to document our telephone conversation on December 16th regarding a map that I am preparing to accompany two transfers and a permit amendment. I will be submitting at least two or more maps for the proposed changes to Springfield Country Club's existing water rights. These rights are Application S-32520/Certificate 25691, Application S-65818/Certificate 82065, and Application G-13489/Permit G-12735. The proposed changes will move the existing surface water rights so the more senior right covers all the land that they always need to irrigate and the junior right covers land they do not need to irrigate when surface water is not available. The permit amendment to the groundwater right is to correctly show where they have always used the ground water right, which is not consistent with the final proof map. These changes mean the greens, tees, and some fairways will always be irrigated, and the fairways will not be irrigated when surface water is not available and use of the junior right is restricted. Thus, the mapping for these changes requires mapping very small areas, which are further reduced in size if all the acreages are separated out by not only ¼ ¼ section, but also Donation Land Claim and Government Tax Lots. It would be much simpler if the acreages were only described by ¼ ¼. During our conversation you recognized that the problem of mapping and tracking many very small areas would also be a burden to the Department. Therefore, we both agreed that it made sense map the acreages by ¼ ¼ section only.

Please respond to this e-mail if it is consistent with your understanding of our conversation, or add your comments.
