Reason(s) for change(s): This transfer will serve two purposes. First, it will provide water to establish vegetated buffer to enhance wetlands as required under Corps of Engineers and Oregon DSL permits as part of wetland mitigation at the facility. The vegetated buffer is specified in the wetland mitigation plan under those permits to enhance and maintain the mitigation wetlands and provide wildlife habitat. The irrigation system consists of a portable intake equipped with a Fish Screen that draws water from the Tualatin River and is pumped by a portable Pioneer prime Series Model PP66S12L pump rated at 75 HP. The water is conveyed approximately 900 linear feet in a portable 4-inch diameter plastic pipeline to an Echo traveling big gun irrigator equipped with a 1.2 inch diameter nozzle, and 1500 feet of 4-inch plastic flexible pipe.

• System capacity: <u>0.71</u> cubic feet per second (cfs). If the transfer involves multiple rights that have independent systems, describe the capacity for each system separately.
