

Public Land Survey System (PLSS) locations were collected by incorporating (DPS) methods. MAD27 coordinates were converted to NAD83 using the NAD83/PLSS conversion software. The PLSS coordinates were then converted to a UTM projection. The UTM coordinates were then converted to a decimal format. The decimal coordinates were then converted to a decimal format. The decimal coordinates were then converted to a decimal format.

Point of diversion located 1627 feet north and 2188 feet west of SE corner, section 35, township 3N, range 22E. Source of water is Columbia River. The reservoir on the Columbia River.

Pipe locations and diameters are approximate based on owners map. All lines to pivot pipes are typically 12 inch diameter minimum.

Only circles which were surveyed are identified on the map.

This map was prepared for the purpose of identifying the location of a water right only and is not intended to provide legal dimensions or location of property ownership lines.
