## Water-Use Permit Application Processing

FEB 18 2014

### 1. Completeness Determination

The Department evaluates whether the application and accompanying map contain all of the information required under OAR 690-310-0040 and OAR 690-310-0050 ([www.oregon.gov/owrd/law.our](http://www.oregon.gov/owrd/law.our)). The Department also determines whether the proposed use is prohibited by statute. If the Department determines that the application is incomplete, all fees have not been paid, or the use is prohibited by statute, the application and all fees submitted are returned to the applicant.

SALEM, OR

### 2. Initial Review

The Department reviews the application to determine whether water is available during the period requested, whether the proposed use is restricted or limited by rule or statute, and whether other issues may preclude approval of or restrict the proposed use. An Initial Review (IR) containing preliminary determinations is mailed to the applicant. The applicant has 14 days from the mailing date to withdraw the application from further processing and receive a refund of all fees paid minus \$200. The applicant may put the application on hold for up to 180 days and may request additional time if necessary.

### 3. Public Notice

Within 7 days of the mailing of the initial review, the Department gives public notice of the application in the weekly notice published by the Department at [www.oregon.gov/owrd](http://www.oregon.gov/owrd). The public comment period is 30 days from publication in the weekly notice.

### 4. Proposed Final Order Issued

The Department reviews any comments received, including comments from other state agencies related to the protection of sensitive, threatened or endangered fish species. Within 60 days of completion of the IR, the Department issues a Proposed Final Order (PFO) explaining the proposed decision to deny or approve the application. A PFO proposing approval of an application will include a draft permit, and may request additional information or outstanding fees required prior to permit issuance.

### 5. Public Notice

Within 7 days of issuing the PFO, the Department gives public notice in the weekly notice. Notice includes information about the application and the PFO. Protest must be received by the Department within 45 days after publication of the PFO in the weekly notice. Anyone may file a protest. The protest filing fee is \$350.00 for the applicant and \$700.00 for non-applicants. Protests are filed on approximately 10% of Proposed Final Orders. If a protest is filed the Department will attempt to settle the protest but will schedule a contested case hearing if necessary.

### 6. Final Order Issued

If no protests are filed, the Department can issue a Final Order within 60 days of the close of the period for receiving protest. If the application is approved, a permit is issued. The permit specifies the details of the authorized use and any terms, limitations or conditions that the Department deems appropriate.

**By my signature below I confirm that I understand:**

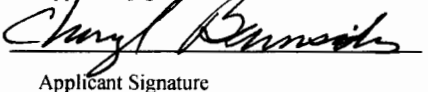

- I am asking to use water specifically as described in this application.
- Evaluation of this application will be based on information provided in the application packet.
- I cannot legally use water until the Water Resources Department issues a permit to me.
- The Department encourages all applicants to wait for a permit to be issued before beginning construction of any proposed diversion. Acceptance of this application does not guarantee a permit will be issued.
- If I begin construction prior to the issuance of a permit, I assume all risks associated with my actions.
- If I get a permit, I must not waste water.
- If development of the water use is not according to the terms of the permit, the permit can be cancelled.
- The water use must be compatible with local comprehensive land use plans.
- Even if the Department issues a permit, I may have to stop using water to allow senior water right holders to get water to which they are entitled.

**I (we) affirm that the information contained in this application is true and accurate.**

**SECTION 2: PROPERTY OWNERSHIP**

Please indicate if you own all the lands associated with the project from which the water is to be diverted, conveyed, and used.

- Yes
  - There are no encumbrances.
  - This land is encumbered by easements, rights of way, roads or other encumbrances.
  
- No
  - I have a recorded easement or written authorization permitting access.
  - I do not currently have written authorization or easement permitting access.
  - Written authorization or an easement is not necessary, because the only affected lands I do not own are state-owned submersible lands, and this application is for irrigation and/or domestic use only (ORS 274.040).
  - Water is to be diverted, conveyed, and/or used only on federal lands.

List the names and mailing addresses of all affected landowners (*attach additional sheets if necessary*).

**See Applicant Information on Page 1.**

*You must provide the legal description of : 1. The property from which the water is to be diverted, 2. Any property crossed by the proposed ditch, canal or other work, and 3. Any property on which the water is to be used as depicted on the map.*

**See Attached Warranty Deed , Document No. 93-22362, Jo. Co. Book of Records**

**SECTION 3: SOURCE OF WATER**

**A. Proposed Source of Water**

Provide the commonly used name of the water body from which water will be diverted, and the name of the stream or lake it flows into. If unnamed, say so:

Source 1: **Lost Creek Reservoir** Tributary to: **Rogue River**

If any source listed above is stored water that is authorized under a water right permit, certificate, or decree, attach a copy of the document or list the document number (for decrees, list the volume, page and/or decree name).

**B. Applications to Use Stored Water**

RECEIVED BY OWRD

Do you, or will you, own the reservoir(s) described in item 3A above?

FEB 18 2014

- Yes.
- No. (Please enclose a copy of your written notification to the operator of the reservoir of your intent to file this application, which you should have already mailed or delivered to the operator.)

SALEM, OR

If *all* sources listed in item 3A are stored water, the Department will review your application using the expedited process provided in ORS 537.147, unless you check the box below. Please see the instruction booklet for more information.

By checking this box, you are requesting that the Department process your application under the standard process outlined in ORS 537.150 and 537.153, rather than the expedited process provided by ORS 537.147. To file an application under the standard process, you must enclose the following:

- A copy of a signed non-expired contract or other agreement with the owner of the reservoir (if not you) to impound the volume of water you propose to use in this application.
- A copy of your written agreement with the party (if any) delivering the water from the reservoir to you.

**SECTION 4: WATER USE**

Provide the amount of water you propose to use from each source, for each use, in cubic feet-per-second (cfs) or gallons-per-minute (gpm). If the proposed use is from storage, provide the amount in acre-feet (af):  
*(1 cfs equals 448.8 gpm. 1 acre-foot equals 325,851 gallons or 43,560 cubic feet)*

SECTION 5: WATER MANAGEMENT

RECEIVED BY OWRD

A. Diversion and Conveyance

What equipment will you use to pump water from your source?

FEB 18 2014

Pump (give horsepower and type): **2 HP submersible pump**

SALEM, OR

Other means (describe):

Provide a description of the proposed means of diversion, construction, and operation of the diversion works and conveyance of water.

**A 2 hp submersible pump will be installed in the Rogue River each spring at the beginning of the irrigation season. Water will be conveyed via approximately 200 feet of 2" PVC and plastic pipe to the proposed place of use.**

B. Application Method

What equipment and method of application will be used? (e.g., drip, wheel line, high-pressure sprinkler)

**Pop-up sprinklers and drip systems will be used to apply the water to the proposed landscape and garden areas. The water will also be used for the initial filling each year and to makeup evaporation losses of the proposed landscape water feature which will have a recirculating system.**

C. Conservation

Please describe why the amount of water requested is needed and measures you propose to: prevent waste; measure the amount of water diverted; prevent damage to public uses of affected surface waters.

**The amount of water requested is the minimum amount of water that will be needed to provide viable maintenance of the plants in the landscaped and garden areas. The sprinklers will be controlled by zoned systems on timers. The timing of the irrigation together with drip systems will allow for a more efficient use of the water and will prevent waste by keeping the water applications confined to the desired places of use.**

SECTION 6: RESOURCE PROTECTION

In granting permission to use water from a stream or lake, the state encourages, and in some instances requires, careful control of activities that may affect the waterway or streamside area. See instruction guide for a list of possible permit requirements from other agencies. Please indicate any of the practices you plan to undertake to protect water resources.

Diversion will be screened to prevent uptake of fish and other aquatic life.

Describe planned actions:

**The foot valve intake at the proposed point of diversion will be provided with an ODFW approved fish screen.**

Excavation or clearing of banks will be kept to a minimum to protect riparian or streamside areas.

Describe planned actions:

**Construction will be limited to trenching from the house to a point located above the flood plain. An above-ground plastic pipe located in the flood plain will be used to convey water from the submersible pump to a riser at the end of the underground pipe placed in the trench. The pump and above-ground pipe will be removed at the end of each irrigation season.**

- Operating equipment in a water body will be managed and timed to prevent damage to aquatic life.  
Describe:

**See "planned actions" shown above.**

- Water quality will be protected by preventing erosion and run-off of waste or chemical products.  
Describe:

**After the initial installation each irrigation season, the water quality of the Rogue River will be unaffected by this irrigation pumping system. The on-site application areas are sufficiently far enough from the river and the control of the rate of application will be efficient enough to prevent run-off into the river.**

**SECTION 7: PROJECT SCHEDULE**

Date construction will begin: May, 2014

**SECTION 9: REMARKS**

Use this space to clarify any information you have provided in the application.

**This application for the use of surface water from Lost Creek Reservoir is being made concurrently with the application for contract water from the Bureau of Reclamation. As per the B.O.R. Contract Data Sheet, the map prepared for this application is also being used for the B.O.R. application. As of this date – there is no contract number.**

**The project schedule dates shown above are approximate. They are contingent upon the date of issuance of the surface water permit from the Water Resources Department.**

**The pump site is located within the Scenic Easement of the Rogue River – a national scenic waterway. The construction activity and construction materials will be under the review of the B.L.M. who is in charge of enforcing the conditions of the scenic easement.**

**Prior water rights exist on this parcel per Certificate No. 31994 which has a priority date of February 8, 1961. This right is for the domestic use of water from two springs that are still being used. However, the final proof survey plat shows a garden that is not mentioned in the certificate. There are times during the irrigation season when the water supply is not adequate for domestic use and irrigation. It is proposed that the contract water from this application will be used for the primary irrigation of this garden as well as the additional landscaped areas.**

## NOTE TO APPLICANTS

In order for your application to be processed by the Water Resources Department (WRD), this Land Use Information Form must be completed by a local government planning official in the jurisdiction(s) where your water right will be used and developed. The planning official may choose to complete the form while you wait, or return the receipt stub to you. Applications received by WRD without the Land Use Form or the receipt stub will be returned to you. Please be aware that your application will not be approved without land use approval.

**This form is NOT required if:**

- 1) Water is to be diverted, conveyed, and/or used only on federal lands; **OR**
- 2) The application is for a water right transfer, allocation of conserved water, exchange, permit amendment, or ground water registration modification, and **all** of the following apply:
  - a) The existing and proposed water use is located entirely within lands zoned for exclusive farm-use or within an irrigation district;
  - b) The application involves a change in place of use only;
  - c) The change does not involve the placement or modification of structures, including but not limited to water diversion, impoundment, distribution facilities, water wells and well houses; **and**
  - d) The application involves irrigation water uses only.

## NOTE TO LOCAL GOVERNMENTS

The person presenting the attached Land Use Information Form is applying for or modifying a water right. The Water Resources Department (WRD) requires its applicants to obtain land-use information to be sure the water rights do not result in land uses that are incompatible with your comprehensive plan. Please complete the form or detach the receipt stub and return it to the applicant for inclusion in their water right application. You will receive notice once the applicant formally submits his or her request to the WRD. The notice will give more information about WRD's water rights process and provide additional comment opportunities. You will have 30 days from the date of the notice to complete the land-use form and return it to the WRD. If no land-use information is received from you within that 30-day period, the WRD may presume the land use associated with the proposed water right is compatible with your comprehensive plan. Your attention to this request for information is greatly appreciated by the Water Resources Department. If you have any questions concerning this form, please contact the WRD's Customer Service Group at 503-986-0801.
