CLAIM OF BENEFICIAL USE for Transfer Surface to **Groundwater POA**

OREGON Oregon Water Resources Department 725 Summer Street NE, Suite A Salem, Oregon 97301-1266 (503) 986-0900

A fee of \$230 must accompany this form for any Transfer final orders including a water right with a priority date of July 9, 1987, or later. Both rights involved in the transfer have priority dates earlier than 1987; therefore, no fee is required.

A separate form shall be completed for each transfer.

This form is subject to revision. Begin each new claim by checking for a new version of this form at: https://www.oregon.gov/OWRD/Forms/Pages/default.aspx

The completion of this form is required by OAR 690-014-0100(1) and 690-014-0110(4).

Please type or print in dark ink. If this form is found to contain errors or omissions, it may be returned to you. Every item must have a response. If any requested information does not apply to the claim, insert "NA." Do not delete or alter any section of this form unless directed by the form. The Department may require the submittal of additional information from any water user or authorized agent.

"Section 8" of this form is intended to aid in the completion of this form and should not be submitted.\

A claim of beneficial use includes both this report and a map. If the map is being mailed separately from this form, please include a note with this form indicating such.

If you have questions regarding the completion of this form, please call 503-979-9103.

The Department has a program that allows it to enter into a voluntary agreement with an applicant for expedited services. Under such an agreement, the applicant pays the cost to hire additional staff that would not otherwise be available. This program means a certificate may be issued in about a month. For more information on this program see:

https://www.oregon.gov/OWRD/programs/WaterRights/RA/Pages/default.aspx

SECTION 1 GENERAL INFORMATION

Type of Authorized Change

This Claim is being submitted for a transfer where the only authorized change was a change from surface water point(s) of diversion to groundwater point(s) of appropriation. YES If additional changes were authorized, you will need to select a different form.

SECTION 3

CLAIM DESCRIPTION

Note: The Claim <u>only</u> needs to describe the new point(s) of appropriation. This Claim does not need to provide information for the original point(s) of diversion involved in the transfer.

1. New point of appropriation name or number:

POINT OF APPROPRIATION (POA) NAME OR NUMBER (CORRESPOND TO MAP) WELL OR SUMP	WELL LOG ID # FOR ALL WORK PERFORMED ON THE WELL (IF APPLICABLE)	WELL TAG # (IF APPLICABLE)	SOURCE (IF LISTED IN TRANSFER FINAL ORDER)
Well 2	MARI 65476	105648	Deep Lake

Attach each well log available for the well (include the log for the original well and any subsequent alterations, reconstructions, or deepenings)

2. Variations:

Was the use developed differently from what was authorized by the transfer final order, or extension final?

YES NO

If yes, describe below.

(e.g. "The order allowed three new points of appropriation. The water user only developed one of the points.")

The order allowed two new POAs; only one of these POAs (Well 2) was developed.

3. Claim Summary:

NEW POA	MAXIMUM RATE	CALCULATED THEORETICAL	AMOUNT OF WATER MEASURED	
NAME OR #	AUTHORIZED	RATE BASED ON SYSTEM		
Well 2	1.65 cfs	1.74 cfs	1.0 cfs	

SECTION 4

SYSTEM DESCRIPTION

Are there multiple POAs?

YES NO

If "YES" you will need to copy and complete a separate Section 4 for each POA.

POA Name or Number this section describes (only needed if there is more than one):

Well 2

A. Groundwater Source Information (Well)

1. Is the appropriation from a well?

YES NO

If "NO", items 2 through 4 relating to this section may be deleted.

2. Describe the access port (type and location) or other means to measure the water level in the well:

Well 2 Half inch port west side of well.

3. If well logs are not available, provide as much of the following information as possible:

POA	CASING DIAMETER	CASING DEPTH	TOTAL DEPTH	COMPLETION DATE OF	COMPLETION DATES OF	WHO THE WELL WAS	WELL DRILLED BY
Well 2 MARI 65476	16in 12in	1.5-53.16in 2-90.83in	91ft	9/29/2014	N/A	Thomas Coleman	Grossen's Well Drilling

See Attachment C - Well Log

4. In addition to the information requested in item "3" above, provide any other information which may help the Department locate any well logs associated with this appropriation.

N/A

B. Groundwater Source Information (Sump)

Is the appropriation from a dug well (sump)?

YES NO

If "NO", items 2 through 4 relating to this section may be deleted. Items 2 through 4 were deleted. Reminder: Construction standards for sumps can be found in OAR 690-210-0400.

C. POA System Information

Provide the following information concerning the point of appropriation. Information provided must describe the equipment used to appropriate water from the point of appropriation.

1. Pump Information:

POA	MANUFACTURER .	MODEL	SERIAL NUMBER	TYPE (CENTRIFUGAL, TURBINE OR SUBMERSIBLE)	INTAKE SIZE	DISCHARGE SIZE

Well 2	318,700 gallons	421,400 gallons	4 hours	1.0 cfs

Reminder: For pump calculations use the reference information at the end of this document.

D. Additional notes or comments related to the system:

Pump capacity was measured on 4/28/23. The system has not been changed since it was installed in spring of 2015.

SECTION 5

CONDITIONS

All conditions contained in the transfer final order, or any extension final order shall be addressed.

Reports that do not address all performance related conditions will be returned by the condition will be returned by the conditions will be returned by the c

1. Time Limits:

3. Measurement Conditions:

a. Does the transfer final order, or any extension final order require the installation of a meter or other approved measuring device?

YES NO

If "NO", items b through f relating to this section may be deleted.

Reminder: If a meter or approved measuring device was required, the COBU map must indicate the location of the device in relation to the point of appropriation.

b. Has a meter been installed?

YES NO

c. Meter Information

POA NAME OR#	MANUFACTURER	SERIAL#	CONDITION (WORKING OR NOT)	CURRENT METER READING	DATE INSTALLED
Well 2	Seametrics	Q620045	Working	421,400	Spring 2015

If a meter has been installed, items d through f relating to this section may be deleted. Items d through f were deleted.

4. Recording and reporting conditions:

a. Is the water user required to report the water use to the Department?

YES NO

If "NO", item b relating to this section may be deleted. Item b was deleted.

5. Other conditions required by the transfer final order or extension final order:

YES NO

b. Was submittal of a ground water monitoring plan required?

a. Were there special well construction standards?

YES NO

c. Other conditions?

YES NO

If "YES" to any of the above, identify the condition and describe the water user's actions to comply with the condition(s):

AUG 02 2023 WR

SALEM, OREGON

Transfer T-10602 Conditions:

The quantity of water diverted at the new points of appropriation shall not exceed the quantity of water lawfully available at the original points of diversion.

The water right holder does not divert more water than is lawfully available at the original point of diversion and is in compliance with this condition.

The well from which water is taken under the right shall be constructed so that the use of the well will affect the surface water source similarly to the use of the original authorized point of diversion.

The wells were constructed to affect the surface water source similarly and the water right holder is in compliance with this condition.

Prior to diverting water, the water user shall install an in-line flow meter or other suitable device for measuring and recording the quantity of water diverted. The type and plans of the measuring device must be approved by the Department prior to beginning construction and shall be installed under the general supervision of the Department. The water user shall maintain and operate the measuring device as required by the Department.

An inline flow meter was installed in spring of 2015 and the water right holder is in compliance with this condition.

If, within five years after approval of the transfer, the Department finds that the transfer results in substantial or undue interference with an existing groundwater right due to use of the well, that would not have occurred in the absence of the transfer, the new point of appropriation shall be subordinate to the existing right injured by the transfer.

The Department has not found interference with an existing groundwater right. The water right holder is in compliance with this condition.

The original points of diversion of surface water shall not be retained as additional or supplemental points of diversion under the transferred portions of the rights. However, if within five years after approval of the transfer, the Department receives a transfer application to return to the last authorized surface water points of diversion, the application shall be approved.

The water right holder is in compliance with this condition.

CLAIM OF BENEFICIAL USE MAP

The Claim of Beneficial Use Map must be submitted with this claim. Claims submitted without the Claim of Beneficial Use map will be returned. The map shall be submitted on polyester film at a scale of 1'' = 1320 feet, 1'' = 400 feet, or the original full-size scale of the county assessor map for the location.

For the purpose of this Claim, the map identifying the location of the place of use does not require a new survey. The location of the place of use identified on the Claim map should be based on the original right of record at the time the transfer final order was issued. In transfers approved for additional points of appropriation, the original points must be identified the map based on the original right of record at the time the transfer final order was issued.

Provide a general description of the survey method used to prepare the map. Examples of possible methods include, but are not limited to, a traverse survey, GPS, or the use of aerial photos. If the basis of the survey is an aerial photo, provide the source, date, series and the aerial photo identification number.

The point of appropriation was visited during the site inspection. The location of the points of appropriation was located using a handheld GPS. The map was created using Geographic Information System (GIS) software and spatial datasets obtained from Marion County, ESRI, and United States Geological Survey. Additional data and information specific to the use of water under the water right described in this Claim of Beneficial Use report were obtained from the water right holder.

Map Checklist

Please be sure that the map you submit includes ALL the items listed below. (Reminder: Incomplete maps and/or claims may be returned.)

Authority

ORS 540.505 to 540.580 establishes the process in which a water right holder may submit a request to transfer the point of diversion, place of use, or character of use authorized under an existing water right. OAR Chapter 690, Division 380 implements the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

ORS 540.621 establishes the process for the owner of land to which a water right is appurtenant to certify under oath that the water right, or a portion thereof, has been abandoned and to voluntarily request that it be cancelled.

Applicant

ARROWHEAD FARMS, INC. WESTWOOD FARMS, INC. ECHO RIDGE FARMS, INC.

Attn: TOM COLEMAN

SAINT PAUL OR 97137

Findings of Fact

Background

- 1. On April 25, 2008, Tom Coleman, representing Arrowhead Farms, Inc. Westwood Farms, Inc. and Echo Ridge Farms, Inc., filed an application to change the point of diversion, from surface water points of diversion to ground water points of appropriation under Certificates 47856 and 61435. The Department assigned the application number T-10602.
- 2. The original application proposed the new points of appropriation (POA) to be greater than 500 feet from the original points of diversion (POD). Per OAR 690-380-2130(2)(e), the Applicants submitted analysis to support the fact that the new POAs would affect the surface water similarly. The Department conducted a groundwater review and found that the

This final order is subject to judicial review by the Court of Appeals under ORS 183.482. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.482(1). Pursuant to ORS 536.075 and OAR 137-003-0675, you may petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

proposed POAs, at more than 500 feet from the original PODs, would not affect the surface water similarly and therefore the new POAs must be within 500 feet of the original PODs. On September 5, 2008 the applicants submitted a revised map and survey coordinates for the proposed POAs, which are located within 500 feet of the original PODs.

3. The portion of the first right to be transferred is as follows:

- 8. Notice of the application for transfer was published on May 6, 2008, pursuant to OAR 690-380-4000. No comments were filed in response to the notice.
- 9. On October 1, 2008, the Department mailed a copy of the draft Preliminary Determination proposing to approve Transfer Application T-10602 to the applicants. The cover letter for the Preliminary Determination set forth a deadline of November 7, 2008, for the applicants to respond. The applicants were asked to provide additional information regarding buildings covering areas of the authorized place of use, as viewed from the submitted aerial photograph. The applicants submitted an affidavit for the partial cancellation of water right Certificate 61435, a revised map and the necessary information to demonstrate that the applicants are authorized to pursue the transfer, and requested that the Department proceed with issuance of a Preliminary Determination.
- 10. On February 10, 2009, the Department mailed a copy of a revised draft Preliminary Determination, based on the revisions to the application and map, proposing to approve Transfer Application T-10602 10602 to the applicants. The revised draft Preliminary Determination cover letter set forth a deadline of March 10, 2009, for the applicants to respond with any additional comments. The applicants did not submit any comments by the deadline.
- 11. On April 15, 2009, the Department issued a Preliminary Determination proposing to approve Transfer Application T-10602 and mailed a copy to the applicants. Additionally, notice of the Preliminary Determination for the transfer application was published on the Department's weekly notice on April 21, 2009, pursuant to ORS 540.520 and OAR 690-380-4020. No protests were filed in response to the notice.

Transfer Review Criteria [OAR 690-380-4010(2)]

- 12. Water has been used within the last five years according to the terms and conditions of the rights, and there is no information in the record that would demonstrate that the rights are subject to forfeiture under ORS 540.610.
- 13. A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing right were present within the five-year period prior to submittal of Application T-10602.
- 14. The proposed wells meet the requirements of ORS 540.531. Pumping of the well will cause a greater than 50 percent stream depletion in less than 10 days, in accordance with OAR 690-380-2130(2)(c) and (11)(b).

- 15. The proposed change would not result in enlargement of the rights.
- 16. The proposed change would not result in injury to other water rights.

Partial Cancellation of a Water Right

17. On January 8, 2009, an affidavit certifying that a portion of a water right has been abandoned and requesting cancellation of the right was received from the applicant. The portion of the right to be cancelled is as follows:

Certificate: 61435 in the name of PHILLIP H. GOULET (perfected under Permit

Conclusions of Law

The change from a surface water point of diversion to a groundwater point of appropriation proposed in application T-10602 is consistent with the requirements of ORS 540.505 to 540.580 and 690-380-2130 and OAR 690-380-5000 and the abandoned portion of the right should be cancelled.

Now, therefore, it is ORDERED:

- The change from a surface water point of diversion to a groundwater point of appropriation proposed in application T-10602 is approved. The portion of the right that has been abandoned is cancelled.
- Water right Certificates 47856 and 61435 are cancelled. A new certificate will be issued describing that portion of the right not affected by this transfer and cancellation.
- The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificates 47856 and 61435 and any related decree.
- 4. The quantity of water diverted at the new points of appropriation shall not exceed the quantity of water lawfully available at the original points of diversion.
- The well from which water is taken under the right shall be constructed so that the use of the well will affect the surface water source similarly to the use of the original authorized point of diversion.
- 6. Prior to diverting water, the water user shall install an in-line flow meter or other suitable device for measuring and recording the quantity of water diverted. The type and plans of the measuring device must be approved by the Department prior to beginning construction and shall be installed under the general supervision of the Department. The water user shall maintain and operate the measuring device as required by the Department.
- 7. The use of water under this right shall be subject to regulation consistent with other water rights from the surface water source and to all other applicable conditions and restrictions that existed at the original point of diversion.
- 8. If, within five years after approval of the transfer, the Department finds that the transfer results in substantial or undue interference with an existing ground water right due to use of the well, that would not have occurred in the absence of the transfer, the new point of appropriation shall be subordinate to the existing right injured by the transfer.
- 9. The original points of diversion of surface water shall not be retained as additional or supplemental points of diversion under the transferred portions of the rights. However, if within five years after approval of the transfer, the Department receives a transfer application to return to the last authorized surface water points of diversion, the application shall be approved.
- 10. The approved changes shall be completed and full beneficial use of the water shall be made on or before October 1, 2010. A Claim of Beneficial Use prepared by a Certified Water Rights Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the changes and full beneficial use of the water.

11. When satisfactory proof of the completed changes is received, new certificates confirming the rights transferred will be issued.

Dated at Salem, Oregon this 2157 day of 2009.

BEFORE THE WATER RESOURCES DEPARTMENT OF THE STATE OF OREGON

In the Matter of Application for Extension)	FINAL ORDER APPROVING AN
of Time for Transfer Application T-10602,)	EXTENSION OF TIME
Marion County)	

Applicant

ARROWHEAD FARMS, INC., WESTWOOD FARMS, INC., ECHO RIDGE FARMS, INC. Attn: TOM COLEMAN 4494 RAYBELL ROAD SAINT PAUL, OR 97137

Authority

OAR 690-380-6020 establishes an application process and criteria for the review of extensions of time for the completion of changes authorized under water right transfers.

Findings of Fact

- 1. On November 28, 2014, the Department received an application for extension of time for Transfer Application T-10602.
- 2. The Department issued an order approving Transfer Application T-10602 on May 21, 2009. The order was recorded in Special Order Volume 77, Pages 915-921. The order set a transfer completion date of October 1, 2010.
- 3. Economic conditions have delayed progress towards completion of the terms of Transfer Application T-10602.
- 4. The applicant has contracted a well driller to begin construction of the new points of appropriation.
- 5. To fully complete the change, it will be necessary for the applicant to finish construction of the proposed wells. Additionally, the applicant will need to install a delivery system from the wells to the authorized place of use and apply water to all authorized acres.
- 6. The applicant has requested that the time for completion of beneficial use be extended to October 1, 2019.

This is a final order in other than a contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-0080, you may petition for judicial review or petition the <u>Director for</u> reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

Conclusions of Law

Pursuant to OAR 690-380-6020, the Director of the Water Resources Department concludes the applicant has shown reasonable diligence to complete the transfer within the time period established by the order approving Transfer Application T-10602.

Now, therefore, it is ORDERED:

The time for completion of the changes in place of use authorized by T-10602 shall be extended to October 1, 2019.

Dated at Salem, Oregon this day of February, 2015.
