BEFORE THE WATER RESOURCES DEPARTMENT
OF THE STATE OF OREGON

IN THE MATTER OF THE CANCELLATION OF)
CERTAIN PERMIT(S) TO APPROPRIATE WATER) ORDER
UNDER THE PROVISIONS OF ORS 537.260)

Findings of Fact

1. The time within which the appropriations under the following water right permit(s) must have been perfected has expired. The owners of such permit(s) have failed or refused within the period of three months thereafter to submit proof of the completion of such appropriations as required by ORS 537.260. Consequently, notices have been addressed to each of the owners of said permit(s) by certified mail in accordance with the provisions of ORS 537.260 and ORS 174.160. The sixty-day time limit allowed in those notices has elapsed, and the owners of such permit(s) have failed or refused to submit proof of the completion of the appropriations under the terms and conditions of their respective permit(s).

PERMIT(S) TO USE SURFACE WATER:

<u>Name</u>	<u>Basin Number</u>	<u>Watermaster District</u>	<u>Application Number</u>	<u>Permit Number</u>
CITY OF PORT ORFORD	17	14	S-80464	S-53919

Conclusions of Law

1. Proof of appropriation of water under the terms and conditions of the permit(s) listed has not been made to the satisfaction of the Water Resources Director as required under ORS 537.260.

Order

1. NOW, THEREFORE, it is hereby ORDERED that the permit(s) are canceled in accordance with the provisions of ORS 537.260.

Dated at Salem, Oregon on JUL 28 2023

Dwight French, Water Right Services Administrator
For Douglas E. Woodcock, Acting Director

PLACED IN U.S. MAIL JUL 28 2023
BY OREGON WATER RESOURCES DEPARTMENT

This is a final order in other than contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-0080 you may petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

Dear Permit Holder:

This letter is in regard to your water use permit as referenced above. Your permit required you to complete the development of your water use by October 1, 2007.

In order for the Department to consider issuance of a certificate of water right, you are required by law to hire a certified water right examiner to prepare and submit a claim of beneficial use that includes a final proof survey map of the development. The map and claim of beneficial use were to have been submitted to our Department within one year of October 1, 2007. The fee for submitting a claim of beneficial use is \$230.00. Please see the enclosed 'Resource Sheet' for our current database of CWRE's.

If you are not finished with the development of your permit, you need to file an application for an extension of time to complete your development. The fee for filing an extension of time is \$780.00. Please see the enclosed 'Resource Sheet' to access the extension of time form.

In the event that you are no longer using water as allowed by this permit, you should cancel it so that we may clear our records. Please see the enclosed 'Resource Sheet' to access the cancellation form, if you are interested in this option.

If you have not submitted either a Claim of Beneficial Use or a request for an extension of time for your permit within 60 days of the date of this letter (February 9, 2022) the Department may issue a Final Order to cancel your permit without further notice. If the Department issues a Final Order to cancel your permit, and you request reconsideration of the final order and reinstatement of your permit, there is a \$610.00 reinstatement fee that is charged in addition to the claim of beneficial use or extension of time fee.

Should you have any questions, please contact me at Codi.N.Holmes@oregon.gov, the address above or by telephone at 503-979-3184. Due to Covid-19, email may be the best way to reach me.

RE: Application R-80463, Permit R-13589
Application S-80464, Permit S-53919

Dear Terrie,

On September 8, 2015, the Department received the Claim of Beneficial Use that you submitted for the above two referenced files.

The Department is returning your Claim at this time for the following reasons:

1. You submitted a single Claim for both of the two permits. Unfortunately, a separate Claim is required for both of the permits.
2. You submitted a Claim of Beneficial Use on a form specified for reservoir permits processed under ORS 537.409. Unfortunately, the reservoir permit was not filed or processed under this statute and therefore does not qualify for the permit holder to prepare their own Claim. The Claim of Beneficial Use for each of the two referenced permits must be prepared by a Certified Water Right Examiner.

Enclosed you will find your Claim materials and check in the amount of \$175.00.

The Department will delay action related to the cancellation of the file until February 1, 2016. If you need additional time, please contact Jerry Sauter at 503-986-0817.

If you have any additional questions, please feel free to contact me at 503-986-0811.

Sincerely,

Gerry Clark

If you have not submitted either a Claim of Beneficial Use or a request for an extension of time for your permit within 60 days of the date of this letter (September 11, 2015) the Department may issue a Final Order to cancel your permit without further notice. If the Department issues a Final Order to cancel your permit, and you request reconsideration of the final order and reinstatement of your permit, there is a \$450.00 reinstatement fee that is charged in addition to the claim of beneficial use or extension of time fee.

Should you have any questions, please contact Corey Courchane by telephone at 503-986-0825, Machelle Bamberger by telephone at 503-986-0802, or myself at the address above or by telephone at 503-986-0817.

Sincerely,

Jerry Sauter

Attn: Dallas Miller, Water Rights Specialist

Re: City of Port Orford, R 80463 - Weir construction for Wetlands Enhancement.
R 80464 - Surface Water Appropriation for impounding flow behind
weirs and for municipal consumptive use.

Dear Dallas,

This letter, and attachments, is meant to act as an addendum to the water rights applications referenced above. Issues addressed here are those that you raised in letter to Port Orford dated October 18, 1995. There has been some confusion regarding the requirement for notifying property owners near the water bodies which would be effected by the proposed weirs. In our last phone conversation you pointed out that the regulations actually indicate that notification must be given to those residents which are within a quarter mile and adjacent to the effected water body. Limiting the number of residents to those who own property immediately adjacent to the water bodies effected by these weirs reduces the number of effected residents considerably. With this new information Port Orford will continue to pursue all nine weirs and will notify the appropriate property owners as soon as possible.

In your letter you asked for the water surface area to be effected by each weir project and the height of each weir. The weirs will be adjustable in height with a maximum height of 1.5 feet above summer levels. Please note that the 1.5 feet above summer levels approximately equals natural winter high water levels, per watershed committee measurements. Enclosed is a revised Attachment E, which gives the maximum surface area effected by each weir based on a 1.5 foot weir height.

Also enclosed is a revised Attachment D, which clarifies the rate at which water can be impounded by these weirs and eliminates the language for adding 1 cfs to Port Orford's old consumptive use permit (42566). Port Orford still wants this application to include the 1 cfs for consumptive use but we realize that this cannot be added to an existing permit. The weir impoundment rates have also been reduced to 0.33 cfs per weir so that they will be a fraction of the instream flow. This will allow Port Orford to slowly fill the volume held by the weirs in the summer while still maintaining significant down stream flows.

Water Resources Department
February 14, 1996
Page 2

RECEIVED

FEB 20 1996

WATER RESOURCES DEPT.
SALEM, OREGON

Since the amendment will reduce the total flow being applied for beneficial use, item 2 on application 80464 will have to be changed. For the nine weirs potentially retaining flow at a rate of 0.33 cfs the total flow is 2.97 cfs. The flow for City consumptive use is 1.0 cfs. The total flow that should be entered on this line is 3.97 cfs or 1,781.7 gpm.

With these modifications we hope these applications will be approvable by your agency. Port Orford is proceeding with notifying the required property owners and the City should have a letter to you soon stating that the notification process has been completed. If you have any questions please call me at 269-1166.

Sincerely,

H.G.E. Inc., Engineers & Planners

Application # 80464 Name PORT ORFORD

The above application was submitted for consideration under the

WATER USE REGISTRATIONS FOR WETLAND, STREAM OR RIPARIAN AREA
ENHANCEMENT OR STORM WATER MANAGEMENT
(HB 2107, 1993; ORS 537.015 - 032)

As required in ORS 537.025, the agency identified below:

____ ODFW ____ DEQ X ODA ____ ODSL ____ OEDD

OTHER AGENCY: _____

determines the project is reasonably expected to result in one or more of the wetland, stream or riparian area enhancement or stormwater management benefits, as follows (please circle letter):

- (A) Decreased pollutant loads to streams;
- (B) Reduced soil or bank erosion;
- (C) Reduced summer stream temperatures;
- (D) Improved riparian conditions;
- (E) Improved habitat conditions for aquatic or terrestrial species;
- (F) Decreased peak or storm flows;
- (G) Increased storage capacity in the watershed;
- (H) Increased streamflows during the low-flow season; or
- (I) Other (please describe): _____

Remarks

The City of Port Orford is in the process of applying to the State Water Resources Department for a Water Use Registration for Wetland and Stream Enhancement.

The application is being made pursuant to HB 2107.

The Water Use will include Application for Storage in the Existing Wetland Areas as shown on the Application Map.

Wetlands Weir Project:

The project goal is primarily to raise the wetland water levels to maintain typically higher winter levels through the summer periods. This needs to be accomplished in order to enhance infiltration of the water to Garrison Lake by increasing the flow time in the individual wetlands to allow greater biofiltration and sediment trapping.

Project Description:

Construction of a timber or concrete wall in front of the existing Culverts. The wall will be fastened to the existing Culvert and create a baffle that the waters will run over and then back into the original flowline of the existing culverts. This will create an artificial dam and maintain a higher water level for storage into summer when in stream flows are typically lower.

The Surface Water Application is to include an increase pertaining to Permit 42566. Presently that wate right is perfected only to 1.0 cfs. The Applicant would like to request an additional 1.0 cfs. to provide for existing and future municipal requirements. This would provide a total of 2.0 cfs available.

Water Right, Port Orford

ATTACHMENT E RESERVOIR VOLUME AND SURFACE AREA

	VOLUME	SURFACE AREA
LOCATION 1	5.1 Acre Feet	3.4 Acres
LOCATION 2	1.5 Acre Feet	1.0 Acres
LOCATION 3	12 Acre Feet	8.0 Acres
LOCATION 4	7.7 Acre Feet	5.1 Acres
LOCATION 5	32 Acre Feet	21.3 Acres
LOCATION 6	2.9 Acre Feet	1.9 Acres
LOCATION 7	5.0 Acre Feet	3.3 Acres
LOCATION 8	4.3 Acre Feet	2.9 Acres
LOCATION 9	15 Acre Feet	10 Acres
LOCATION 10	Not Applicable - A weir is not being constructed at this location.	

Note: Maximum weir height will be 1.5 feet above normal summer time water surface levels.

I (We) make application for a permit to appropriate the following described waters of the State of Oregon:

1. **SOURCE OF WATER** for the proposed use: See Source of Water, Attachment C,
a tributary of _____.
2. **TOTAL AMOUNT OF WATER** to be applied to beneficial use: 42.85 cubic feet per
second, OR 19,882,400 gallons per minute. If water is to be used from more than one source,
give the quantity of water from each: _____
See Attachment D
3. **INTENDED USE(s) OF WATER:** Wetland Enhancement, Providing a higher quality
water supply for residents.
If for more than one use, give the quantity of water from each source for each use; _____
See Attachment D
If for **DOMESTIC** use, state the number of households to be supplied; _____
If for **MUNICIPAL OR QUASI-MUNICIPAL** use, state the present population to be served,
and an estimate of the future requirements; (List population projections, water needs, anticipated areas
to be provided water.)
Present Population - 1,025
Future requirements rising at 1% per year.
If for **MINING** use, state the nature (gold, silver, etc.) of the mines to be served; _____
If for **IRRIGATION**, or other land area use, state the **TOTAL** number of acres to be developed
under each use;

Irrigation _____

Other (describe) _____

727 8 1982

4. **DESCRIPTION OF WATER DELIVERY SYSTEM:** *Include dimensions and type of construction of diversion works, length and dimensions of supply ditches or pipelines, size and type of pump and motor. If for irrigation, describe the type of system (i.e., flood, wheel line, hand line, drip, other).*

Municipal use to supply existing customer base

in and near City of Port Orford. See Attachment "A".

5. **PROJECT SCHEDULE:** *(List month and year)*

Proposed date construction work will begin 6-1-95

Proposed date construction work will be completed 6-1-96

Proposed date water use will be completed 6-1-96

NOTE: A map prepared by a Certified Water Right Examiner (CWRE) and a complete legal description of the subject property are required under ORS 537.140 and OAR 690 as a part of your application. The legal description may be copied from your deed, title insurance policy, or land sales contract.

6. a) *In the event any deficiencies are noted involving the application map enclosed herein, please return the map with instructions for correction to (check one):*

 Applicant X CWRE Other (Identify in REMARKS section)

b) *In the event any deficiencies are noted involving the application, please return the application with instructions for correction to (check one):*

 Applicant X CWRE Other (Identify in REMARKS section)

7. *Are all lands involved (including the proposed diversion site, place of use, and access for conveying the water) under your ownership? N/A . If not, list in the REMARKS section below, or on an attached sheet, the names and mailing addresses of the legal owners of all property involved in the proposed development.*

Measurement recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order.

- B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.
- C. The Director may require the permittee to keep and maintain a record of the amount (volume) of water used and may require the permittee to report water use on a periodic schedule as established by the Director. In addition, the Director may require the permittee to report general water use information, the periods of water use and the place and nature of use of water under the permit. The Director may provide an opportunity for the permittee to submit alternative reporting procedures for review and approval.

Diversion screening or fish passage facilities shall be designed, installed, and operated to Oregon Department of Fish & Wildlife specifications.

If the riparian area is disturbed in the process of developing a point of diversion, the permittee shall be responsible for restoration and enhancement of such riparian area.

The use may be restricted if the quality of the source stream, namely the Mill Creek, decreases to the point that it no longer meets state and federal water quality standards due to reduced flows.

STANDARD CONDITIONS

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water allowed herein may be made only at times when sufficient water is available to satisfy all prior rights, including prior rights for maintaining instream flows.

The Director finds that the proposed use(s) of water described by this permit, as conditioned, will not impair or be detrimental to the public interest.

Complete application of the water to the use shall be made on or before October 1, 2007. Within one year after complete application of water to the proposed use, the permittee shall submit a claim of beneficial use, which includes a map and report, prepared by a Certified Water Rights Examiner (CWRE).

Issued May 1, 2003

Paul R. Cleary, Director
Water Resources Department

REAL ESTATE TRANSACTIONS: Pursuant to ORS 537.330, in any transaction for the conveyance of real estate that includes any portion of the lands described in this permit, the seller of the real estate shall, upon accepting an offer to purchase that real estate, also inform the purchaser in writing whether any permit, transfer approval order, or certificate evidencing the water right is available and that the seller will deliver any permit, transfer approval order or certificate to the purchaser at closing, if the permit, transfer approval order or certificate is available.

CULTURAL RESOURCES PROTECTION LAWS: Permittees involved in ground-disturbing activities should be aware of federal and state cultural resources protection laws. ORS 358.920 prohibits the excavation, injury, destruction or alteration of an archeological site or object, or removal of archeological objects from public and private lands without an archeological permit issued by the State Historic Preservation Office. 16 USC 470, Section 106, National Historic Preservation Act of 1966 requires a federal agency, prior to any undertaking to take into account the effect of the undertaking that is included on or eligible for inclusion in the National Register. For further information, contact the State Historic Preservation Office at 503-378-4168, extension 232.

Measurement recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order.

- B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.
- C. The Director may require the permittee to keep and maintain a record of the amount (volume) of water used and may require the permittee to report water use on a periodic schedule as established by the Director. In addition, the Director may require the permittee to report general water use information, the periods of water use and the place and nature of use of water under the permit. The Director may provide an opportunity for the permittee to submit alternative reporting procedures for review and approval.

Diversion screening or fish passage facilities shall be designed, installed, and operated to Oregon Department of Fish & Wildlife specifications.

If the riparian area is disturbed in the process of developing a point of diversion, the permittee shall be responsible for restoration and enhancement of such riparian area.

The use may be restricted if the quality of the source stream, namely the Mill Creek, decreases to the point that it no longer meets state and federal water quality standards due to reduced flows.

STANDARD CONDITIONS

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water allowed herein may be made only at times when sufficient water is available to satisfy all prior rights, including prior rights for maintaining instream flows.

The Director finds that the proposed use(s) of water described by this permit, as conditioned, will not impair or be detrimental to the public interest.

Complete application of the water to the use shall be made on or before October 1, 2007. Within one year after complete application of water to the proposed use, the permittee shall submit a claim of beneficial use, which includes a map and report, prepared by a Certified Water Rights Examiner (CWRE).

Issued May / , 2003

Paul R. Cleary, Director
Water Resources Department

REAL ESTATE TRANSACTIONS: Pursuant to ORS 537.330, in any transaction for the conveyance of real estate that includes any portion of the lands described in this permit, the seller of the real estate shall, upon accepting an offer to purchase that real estate, also inform the purchaser in writing whether any permit, transfer approval order, or certificate evidencing the water right is available and that the seller will deliver any permit, transfer approval order or certificate to the purchaser at closing, if the permit, transfer approval order or certificate is available.

CULTURAL RESOURCES PROTECTION LAWS: Permittees involved in ground-disturbing activities should be aware of federal and state cultural resources protection laws. ORS 358.920 prohibits the excavation, injury, destruction or alteration of an archeological site or object, or removal of archeological objects from public and private lands without an archeological permit issued by the State Historic Preservation Office. 16 USC 470, Section 106, National Historic Preservation Act of 1966 requires a federal agency, prior to any undertaking to take into account the effect of the undertaking that is included on or eligible for inclusion in the National Register. For further information, contact the State Historic Preservation Office at 503-378-4168, extension 232.

RE: Applications R-80463 and S-80464

On August 28, 1997, the Department issued a Final Order for application R-80463 and S-80464. The Final Order for R-80463 identified the issuance of a permit was contingent upon submittal of recording fees in the amount of \$109.00. The Final Order for S-80464 identified the issuance of a permit was contingent upon submittal of recording fees in the amount of \$250.00. As of the date of this letter, the Department has not yet received recording fees in the total amount of **\$359.00**.

Please submit this information by **May 27, 2003**. If we do not receive the information requested by this date or a request for additional time out, we will reject the above referenced application consistent with ORS 537.153. If your application is rejected, the priority date associated with your application will be lost.

Should you have any questions regarding your application or the required materials listed above, or if you need to request an extension of time, please call me at (503) 378-8455 extension 458.

Sincerely,

Jerry W. Gainey

Water Rights Application
Number S-80464

Final Order

Application History

On JUNE 16, 1995, CITY OF PORT ORFORD submitted an application to the Department for a water use permit. Pursuant to ORS 537.020, the Department issued a Water Use Registration on September 5, 1996. A 60 day objection period followed.

The Department has not received objections related to the possible issuance of the attached permit.

The project is reasonably expected to result in wetland, stream or riparian area enhancement or storm water management benefits.

The use, as described on the attached permit, will not result in injury to any existing water rights and does not pose potential detrimental impacts to existing fishery resources.

The proposed use would not impair or be detrimental to the public interest.

Order

Upon payment of outstanding permit recording fees in the amount of \$250.00, Application S-80464 shall be approved as proposed by the Proposed Final Order and as provided on the attached draft permit.

Permit recording fees shall be submitted no later than 60 days from the date of this Final Order. Failure to pay the required permit recording fees within 60 days from the date of this Final Order will result in the proposed rejection of Application S-80464.

DATED August 28, 1997

Martha O. Pagel
Director

Appeal Rights

No changes have been made to the findings of the Proposed Final Order and no protests were filed during the protest period following the Proposed Final Order, therefore, there is no opportunity for appeal or judicial review of this final order. (690-310-160(5)).

SECTION 5

NE 1/4 NE 1/4

SECTION 6

TOWNSHIP 33 SOUTH, RANGE 15 WEST, W.M.

Measurement recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order.
- B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.
- C. The Director may require the permittee to keep and maintain a record of the amount (volume) of water used and may require the permittee to report water use on a periodic schedule as established by the Director. In addition, the Director may require the permittee to report general water use information, the periods of water use and the place and nature of use of water under the permit. The Director may provide an opportunity for the permittee to submit alternative reporting procedures for review and approval.

Diversion screening or fish passage facilities shall be designed, installed, and operated to Oregon Department of Fish & Wildlife specifications.

If the riparian area is disturbed in the process of developing a point of diversion, the permittee shall be responsible for restoration and enhancement of such riparian area.

The use may be restricted if the quality of the source stream, namely the Mill Creek, decreases to the point that it no longer meets state and federal water quality standards due to reduced flows.

STANDARD CONDITIONS

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water allowed herein may be made only at times when sufficient water is available to satisfy all prior rights, including prior rights for maintaining instream flows.

The Director finds that the proposed use(s) of water described by this permit, as conditioned, will not impair or be detrimental to the public interest.

Actual construction work shall begin within one year from permit issuance. The reservoir shall be filled and complete application of the stored water to the use shall be made on or before October 1, 2001.

PORT ORFORD, OR 97465

Reference: Water Use Registration, File # 80464

The Water Resources Department has finished the first stage of its analysis of your application for a water right filed under Water Use Registrations for Wetland, Stream or Riparian Area Enhancement or Storm Water Management, ORS 537.020 (HB 2107, 1993).

The first stage is a review of the Department's legal and scientific analysis of the application, including a calculation of the expected availability of water for your proposed use, an analysis of whether the use would conflict with other existing water rights, and if the use is compatible with local land use plans and the Department's river basin programs.

In consultation with the Oregon Departments of Fish and Wildlife, Environmental Quality, Agriculture, Division of State Lands, and Economic Development, the Water Resources Department is required to determine whether there is reasonable expectation that your development qualifies for a Registration submitted under ORS 537.020.

In the case of your application, the first stage review was satisfactory, and it concluded that water would be reliably available for this use for the time period described in the attached report. The analysis also included other conditions which may be placed in the water right permit to protect other water users, the public or fish and wildlife habitat.

Hence, enclosed please find a copy of the resulting Water Use Registration, which authorizes you to begin water use, as conditioned, for your project.

Commerce Building
158 12th Street NE
Salem, OR 97310-0210
(503) 378-3739
FAX (503) 378-8130

Your application is continuing within the second stage of review. In the second review, State regulations require that other water users and the general public be given an opportunity to object to the Registration of your proposed water use. Satisfactory reviews up to this point do not represent any commitment by the Department ultimately to approve your application. If objections to the Registration warrant further review, the Registration will be rescinded and your application will be placed in line with all other applications.

You also may object to any of the Department's findings or proposed permit conditions contained in the Registration. If you wish to object, you must file your objection with the Department in writing by 5 p.m. on **November 7, 1996**. Interested parties must also submit their objections before the same deadline.

If you have questions, please telephone me or any of the Department's Water Rights Division staff members. My telephone number is 503-378-3739, ext. 272 in Salem, or please call toll-free from within the state, 1-800-624-3199.

Sincerely,

A handwritten signature in cursive script, appearing to read "Dallas Miller".

TECHNICAL REVIEW FOR REGISTRATION UNDER HB 2107
APPLICATION # 80464

This report of technical review is an analysis by the Water Resources Department of the proposed water use . The following findings have been made:

- a) Based upon consultations with the Departments of Fish and Wildlife, Environmental Quality, Agriculture, Economic Development and the Division of State Lands, the project is reasonably expected to result in **fish and wildlife** benefits.
- b) The proposed project qualifies as a water use for **wetland enhancement** and is eligible for processing under HB 2107.
- c) No written comments were received that warrant further review.
- d) The application is free of defects.
- e) The proposed use is not restricted or prohibited by statute.
- f) There **are no** existing rights from this point of diversion.

There **are no** existing water rights appurtenant to the lands described in the application.
- g) Water is likely available in excess of needs for all existing rights and scenic waterway needs 80% of the time during each monthly period proposed by the technical review. Water availability tables are available in the application file and may be reviewed in the office of the Water Resources Department in Salem.
- h) The registration sets out the amount of water proposed to be allocated.
- i) The local government where the proposed water use is located has acknowledged receipt of the Land Use Information Form and has filed no objections to the proposed appropriation.

- j) No public interest issues were identified during the Director's technical review of the proposed water use that warrant further review.

REPORT CONCLUSIONS:

The Director has determined that your proposed project meets the above criteria for a registration under its administrative rules (OAR Chapter 690, Division 11).

PROPOSED PERMIT CONDITIONS

Application: 80464

The following conditions will apply to water use under the permit, and will appear in the permit, if issued.

1. Use of water under this permit is subject to all prior rights.
 2. Period of allowed use: water may be appropriated for storage from November 1 through May 30 of each year.
 3. Volume of flow: 3.97 CUBIC FEET PER SECOND, BEING 0.33 CFS POD'S 1 THROUGH 8, AND 1.0 CFS POD 9.
 4. Water use development requirements:
 - A. Begin construction by (one year from issuance of permit).
 - B. Complete construction by October 1, 1997.
 - C. Completely apply the water to beneficial use by October 1, 1998.
 5. Measurement recording and reporting conditions:
 - A. Before water use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order.
 - B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.
 - C. The Director may require the permittee to keep and maintain a record of the amount (volume) of water used and may require the permittee to report water use on a periodic schedule as established by the Director. In addition, the Director may require the permittee to report general water use information, the periods of water use and the place and nature of use of water under the permit. The Director may provide an opportunity for the permittee to submit alternative reporting procedures for review and approval.
 6. Failure to comply with any of the provisions of the
-

3-2-4

permit may result in action including, but not limited to, restrictions on the use, penalties, or cancellation of the permit.

7. The permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.
8. The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.
9. Diversion screening or fish passage facilities shall be designed, installed, and operated to Oregon Department of Fish & Wildlife specifications.
10. If the riparian area is disturbed in the process of developing a point of diversion, the permittee shall be responsible for restoration and enhancement of such riparian area.
11. The use may be restricted if the quality of the source stream, namely the Mill Creek, decreases to the point that it no longer meets state and federal water quality standards due to reduced flows.

WATER RESOURCES DEPARTMENT CONSULTATION FORM
Application # 80464 Name PORT ORFORD

The above application was submitted for consideration under the

WATER USE REGISTRATIONS FOR WETLAND, STREAM OR RIPARIAN AREA
ENHANCEMENT OR STORM WATER MANAGEMENT
(HB 2107, 1993; ORS 537.015 - 032)

As required in ORS 537.025, the agency identified below:

____ ODFW ____ DEQ ____ ODA ____ ODSL ____ OEDD

OTHER AGENCY: OWRD

determines the project is reasonably expected to result in one or more of the wetland, stream or riparian area enhancement or stormwater management benefits, as follows (please circle letter):

- (A) Decreased pollutant loads to streams;
- (B) Reduced soil or bank erosion;
- (C) Reduced summer stream temperatures;
- (D) Improved riparian conditions;
- (E) Improved habitat conditions for aquatic or terrestrial species;
- (F) Decreased peak or storm flows;
- (G) Increased storage capacity in the watershed;
- (H) Increased streamflows during the low-flow season; or
- (I) Other (please describe): See comments (F) & (G) for R-80463

5. Measurement recording and reporting conditions:
 - A. Before water use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order.
 - B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.
 - C. The Director may require the permittee to keep and maintain a record of the amount (volume) of water used and may require the permittee to report water use on a periodic schedule as established by the Director. In addition, the Director may require the permittee to report general water use information, the periods of water use and the place and nature of use of water under the permit. The Director may provide an opportunity for the permittee to submit alternative reporting procedures for review and approval.
6. Failure to comply with any of the provisions of the

permit may result in action including, but not limited to, restrictions on the use, penalties, or cancellation of the permit.

7. The permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.
8. The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.
9. Diversion screening or fish passage facilities shall be designed, installed, and operated to Oregon Department of Fish & Wildlife specifications.
10. If the riparian area is disturbed in the process of developing a point of diversion, the permittee shall be responsible for restoration and enhancement of such riparian area.
11. The use may be restricted if the quality of the source stream, namely the Mill Creek, decreases to the point that it no longer meets state and federal water quality standards due to reduced flows.

Fish District: Lower Rogue/South Coast

Application #

5-80464

Applicant Name

City of Port Orford

Date: March 26, 1996

AREA

☐ Source Watershed

☐ Senior instream water right application to junior out-of-stream application

☐ No water availability information

INFORMATION/CONDITIONS

1. Are there water quality concerns related to salmon/steelhead/trout? Y N

Should the application be denied? Y N

Should the application be restricted? Y N

Jan	Feb	Mar	Apr	May	Jun 1-15	June 16-30	Jul	Aug	Sep 1-15	Sep 16-30	Oct	Nov	Dec

2. Are there adequate flows to protect salmon/steelhead/trout? Y N

Should the application be denied? Y N

Should the application be restricted? Y N

☒ Based on water availability

Jan	Feb	Mar	Apr	May	Jun 1-15	June 16-30	Jul	Aug	Sep 1-15	Sep 16-30	Oct	Nov	Dec

3. Domestic

Should domestic use be conditioned to human consumption? Y N ☐ Based on water availability

4. Fish Screening and Passage

- X A. Requires fish screening and passage, with ODFW certification (applications > 0.5 cfs).
- B. Requires fish screening and passage, without ODFW certification (applications < 0.5 cfs).
- C. No dam or obstruction without a fishway.

5. Miscellaneous

- A. Reservoir Filling
- B. Water Quality Permits
- C. Return Flow
- D. Time Limited Water Right
- E. Other

6. Measurement and Reporting

- A. Small diversions (<0.1 cfs or <9.2 ac/ft. may/may)
- B. Medium diversions (0.1 cfs or >9.2 and <1.5 cfs or <100 ac/ft. shall/may)
- C. Large diversions (1.5 cfs or >100 ac/ft. shall/shall)

FINDINGS

☐ Permit is proposed for denial prior to interagency team review for fishery concerns.

☐ Deny permit due to fishery concerns, except for

- A. Domestic (which may be limited to human consumption, see above)
- B. Livestock
- C. Unless water is from storage

☐ Do not condition further due to fishery concerns.

☒ Condition permit due to fishery concerns listed above.

PO BOX 310
PORT ORFORD, OR 97465

REFERENCE: File R 80463

While processing your application for storage of water under HB 2107 (Wetlands), it came to my attention that we need more information.

You need to supply the maximum depth of each reservoir. We need a description of each dam, weir or structure for impounding water at each location. The application requires the dam height at each location from the bottom to the top of dam, weir or impoundment. You told us that each weir would be 1.5 feet above water line, but that is not sufficient, we need to know the height of structure from the ground under the water to the top of the weir, dam or impoundment.

If you have any questions please call me at 541-378-3739 ext 272.

Sincerely,

DALLAS S. MILLER

REFERENCE: R 80463, 80464 Wetlands project

We received the list of names and addresses of those people within 1/4 mile of the project. It is necessary for you to also notify those people of this project. If you have done so please send us a statement that the notification has taken place.

The application must include the area submerged under each storage area and dam height at each location.

Also at location #10 on surface water application 80464 you ask for an increase in permit 42566 to 2.0 cfs. It is not possible to increase the amount of water allowed on an existing permit. Are you applying for appropriating water from that location on this application? If so, how much water are you applying for at that location.

If you have any questions please call me at 503-378-3739 ext 272.

COMPLETED

A checkmark (✓) indicates that the item is incomplete or defective.

- ☐ 1. Examination fees.
- ☐ 2. Name and address of the applicant, and title if applicable.
- ☐ 3. Source of water.
- ☐ 4. Use of water.
- ☐ 5. Amount of water.
- ☐ 6. Location & description of delivery system.
- ☐ 7. A statement that the applicant either owns all lands or has written authorization or easements permitting access to lands owned by others.
- ☐ 8. Name(s) and address(es) of the owners of any lands involved, but not owned by the applicant.
- ☐ 9. Proposed dates of beginning and completion of construction, and complete application of water.
- ☐ 10. If for **municipal use**, the present population to be served and expected future water requirements.
- ☐ 11. If for **mining use**, the type of mines and methods of supplying & utilizing the water.
- ☐ 12. If for a **reservoir**:
 - ☐ a. The height of the dam.
 - ☐ b. The storage capacity.
 - ☐ c. The area submerged.
 - ☐ d. The maximum depth.
 - ☐ e. The construction method (earthfill, concrete, flashboard, etc.).
 - ☐ f. A description of the outlet conduit.
 - ☐ g. A description of the spillway.
- ☐ 13. If for **groundwater**, the horizontal distance from the well to the nearest surface water source (if within one mile), and the difference in land surface elevation between them.
- ☐ 14. If the application was made under **HB 2107**:
 - ☐ a. Name and address of each adjacent property owner and verification that each owner has been mailed a copy of the completed notice.
 - ☐ b. A description of the proposed water used and related project, the condition it will address, and the benefits that are expected to result from the project.
 - ☐ c. The number of reservoirs per application is appropriate as per OAR 690-11-049 (3)(b)
- ☐ 15. An oath that the application information is true and correct.
- ☐ 16. The signature of the applicant(s).
- ☐ 17. A satisfactory map of the proposed POD & POU.
- ☐ 18. A Land Use Information Form or receipt signed by appropriate planning official.

RE: Water Right Registration Application R-80463, S-80464

We have received your application to appropriate water for a wetland enhancement project (HB 2107). Unless a receipt was sent to you at the time you filed your application, one is enclosed herewith. Your application has been assigned the above-referenced file number; please refer to this number when contacting our office about your application.

The filing of an application does not create a water right. Water may not be used until a Registration for the proposed use has been issued by the Department.

Applications for projects which are eligible under HB 2107 will receive a processing preference over other water use applications and will be processed as quickly as possible.

Public notice of this application will be published in the Department's weekly notice of new applications. The public and interested agencies will have 30 days to submit written comments on this application. During the public comment period, we will be consulting with other state agencies concerning the wetland, riparian, or storm water management benefits which could be provided by your proposed water use.

Following the comment period, we will determine if your application provides wetland, stream or riparian restoration and/or storm water management benefits. If a favorable determination is made, a water use registration will be issued. Upon receipt of the Registration, you may begin water use for your project as authorized.

Objections to the proposed water use as described in the Registration may be filed with the Water Resources Department within 60 days of issuance of the Registration. Should objections be filed, the Water Resources Director will determine if the objections warrant further review.

If the Director determines that there are valid public interest issues that must be addressed, **the Registration will be rescinded**. If your application is rescinded, it will be removed from the HB 2107 program and will be placed in line with other water right applications for routine review.

If you have any questions about the process described above or the status of your application, you may call me at (503) 378-3739. If I am not available, please leave a message and I will return your call.

Sincerely,

A handwritten signature in cursive script, appearing to read "Carol Lewis Spence".

ACKNOLDG.L-2 (080494)

Land Use Information Form: Permits, Hydroelectric Licenses, Water Uses in Addition to Classified Uses

This information is needed to determine compatibility with local comprehensive plans as required by ORS 197.180. The Water Resources Department will use this and other information to evaluate the water use application. DO NOT FILL OUT THIS FORM IF water is to be diverted, conveyed, and/or used only on federal lands.

Applicant's Name: City of Port Orford WATER RESOURCES DEPT. JUN - 6 1995
 Address: P.O. Box 310 SALEM, OREGON
 City: Port Orford State: OR Zip: 97465 Day Phone: (503) 332-3681 OREGON

Please provide information as requested below for all tax lots on or through which water will be diverted or used. (Attach extra sheets as necessary.) Applicants for municipal use, or irrigation uses within irrigation districts, may substitute existing and proposed service area boundaries for the tax lot information requested below.

Tax Lot or Local I.D.#	Plan Designation/Zoning (e.g. Rural Residential/RR-5)	Check All That Apply		
		Water Diverted	Water Conveyed	Water Use
Entire				
Service				
District	Mixed	X	X	X

Please list all counties and cities within which water is proposed to be diverted, conveyed, and/or used. Curry County, Port Orford

The following section must be completed by a planning official from each county and city listed unless your project will be located entirely within city limits. In this case, only the city planning agency must complete this form. Please request extra forms as needed.

For Local Government Use Only

Application No. 80464
 Permit No.

Local planning officials are to complete the remainder of this form. If it cannot be completed while the applicant waits, sign and detach the receipt as instructed below. You will receive notice when the applicant's water right request is filed with the Water Resources Department (WRD). You will have 30 days from the notice date to return this completed land use form to WRD. If no land use information is received from you within that period, WRD may presume the land use associated with the proposed water right is compatible with your comprehensive plan.

a) Check the appropriate box below and provide requested information.

☒ Land uses to be served by proposed water uses (including proposed construction) are allowed outright or are not regulated by your comprehensive plan. Cite applicable ordinance section(s): MCZO SECTION 3.111. Go to section b) on reverse side.

☐ Land uses to be served by proposed water uses (including proposed construction) involve discretionary land use approvals as listed in the table below. Note: Please attach documentation of applicable local land use approvals which have already been obtained. (Record of Action plus any accompanying findings is sufficient.)

Type of Land Use Approvals Needed (e.g.: plan amendments, rezones, conditional use permits, etc.)	Cite Most Significant, Applicable Plan Policies & Ordinance Section References	Please check the box that applies:

WATER RESOURCES DEPT.
SALEM, OREGON

Oregon

WATER
RESOURCES
DEPARTMENT

NOTE TO LOCAL GOVERNMENTS

Application No. 80464
Permit No.

The person presenting the attached request for land use information is applying for a water right. The Water Resources Department (WRD) requires its applicants to obtain land use information to be sure water rights do not result in land uses that would violate your comprehensive plan.

WRD will not accept applications which are not accompanied by this completed land use form or the signed, dated receipt stub detached from the bottom of the land use information form.

You will receive notice once the applicant formally submits his or her request to WRD. The notice will give more detailed information about WRD's water rights process and comment opportunities. If you give the applicant the receipt stub in lieu of completing the form, you will have 30 days from the date of the notice mentioned above to complete the form and return it to WRD. If no land use information is received from you within that 30 day period, WRD may presume the land use associated with the proposed water right is compatible with your comprehensive plan.

Your attention to this request for information is greatly appreciated by both the applicant and WRD. If you have questions concerning the form, please contact WRD at 378-3739.

Commerce Building
158 12th Street NE
Salem, OR 97310-0210
(503) 378-3739
FAX (503) 378-8130

Description of Water Use

Note to Applicant: This sheet will provide local planning staff with a basic description of your proposed water use. Please fill out this sheet before bringing the attached land use form to your local planning office. It will help local planning offices complete your land use information form quickly.

Note to Local Planning Officials: Please initial this sheet. Do not separate it from the land use information form. If needed, please make a separate copy for your records.

Applicant Name: City of Port Orford
 Address: P.O. Box 310
Port Orford, OR 97465
 Phone: (503) 332-3681

JUN - 6 1995

WATER RESOURCES DEPT.
SALEM, OREGON

Port Orford, Oregon 97465

The Department has received an application to use water. However, the application needs to be signed before we can accept, file and review the application.

I am returning the application, supporting data and your check number 7304 in the amount of \$200.00.

We will begin our analysis when the completed application is received. Please feel free to contact the Water Rights Information Group at 378-3739 if you have any questions.

Sincerely,

Anita M. McLoud
Water Rights Specialist
