

WATERMASTER

WATER RIGHT PERMIT APPLICATION REVIEW

Application Number: R-89424

Applicant's Name: Nickel Bush Enterprises, LLC.

Evaluation of potential for injury to other water rights:

1. Would the proposed water allocation have the potential for injury to other water rights?
☐ Yes ☒ No
2. If the proposed water allocation will cause injury, can the permit be conditioned to avoid injury?
☐ Yes ☐ No ☒ N/A

If "Yes", please list conditions necessary to avoid injury:

Evaluation of appropriate Measurement, Recording and Reporting Condition:

3. Please select the measurement device(s) required for any permit issued under this application.
☐ Totalizing Flow Meter ☐ Other/None – please describe below:
☒ Staff Gage
4. Please select your recommended reporting requirement for any permit issued under this application. Please consider site-specific information, including but not limited to potential for injury to other water rights, regulation history of the area, and level of stakeholder interest in the application.
☐ Require recording of volume of water diverted each month and require submission of a report to the Department annually.
☒ Do not require recording and reporting at this time.
5. Please provide any additional information or permit conditions that are necessary for this application:
This application is for a pond served by two springs (Springs have repective water rights associated with them - 25198, 25769) It appears many years ago this pond was constructed as a collection system at the point of diversion for the spring water at one of the authorized point of diversions under the above certificates. The system in place today allows any unused spring water to pass the structure and enter Camp Creek. In my opinion requiring reporting for the water stored is not necessary.
6. Would you like to review a draft of any permit that might be issued under this application?
☒ Yes ☐ No
