

**CLAIM OF
BENEFICIAL USE
for Groundwater Permits
claiming more than 0.1 cfs**

Oregon Water Resources Department
725 Summer Street NE, Suite A
Salem, Oregon 97301-1266
(503) 986-0900
www.oregon.gov/OWRD

Received by OWRD

FEB 12 2021

Salem, OR

**A fee of \$230 must accompany this form for permits
with priority dates of July 9, 1987, or later.**

A separate form shall be completed for each permit.

In cases where a permit has been amended through the permit amendment process, a separate claim for the permit amendment is not required. Incorporate the permit amendment into the claim for the permit.

This form is subject to revision. **Begin each new claim** by checking for a new version of this form at:
<https://www.oregon.gov/OWRD/Forms/Pages/default.aspx>

The completion of this form is required by OAR 690-014-0100(1) and 690-014-0110(4).

Please type or print in dark ink. If this form is found to contain errors or omissions, it may be returned to you. **Every item must have a response.** If any requested information does not apply to the claim, insert "NA." **Do not delete or alter any section of this form unless directed by the form.** The Department may require the submittal of additional information from any water user or authorized agent.

"Section 8" of this form is intended to aid in the completion of this form and should not be submitted.

A claim of beneficial use includes both this report and a map. If the map is being mailed separately from this form, please include a note with this form indicating such.

If you have questions regarding the completion of this form, please call 503-979-9103.

The Department has a program that allows it to enter into a voluntary agreement with an applicant for expedited services. Under such an agreement, the applicant pays the cost to hire additional staff that would not otherwise be available. This program means a certificate may be issued in about a month. For more information on this program see
<https://www.oregon.gov/OWRD/programs/WaterRights/RA/Pages/default.aspx>

SECTION 1

GENERAL INFORMATION

1. File Information:

APPLICATION # G-13503	PERMIT # (IF APPLICABLE) G-12912	PERMIT AMENDMENT # (IF APPLICABLE) N/A
---------------------------------	--	--

2. Property Owner (current owner information):

APPLICANT/BUSINESS NAME Patton Ranch Management		PHONE NO. 909-731-3037	ADDITIONAL CONTACT NO.
ADDRESS 35440 Briggs Road			
CITY Murrieta	STATE CA	ZIP 92563	E-MAIL dkpatton@aol.com

If the current property owner is not the permit holder of record, it is recommended that an assignment be filed with the Department. ***Each*** permit holder of record must sign this form.

3. Permit holder of record (this may, or may not, be the current property owner):

PERMIT HOLDER OF RECORD Same as above		
ADDRESS		
CITY	STATE	ZIP

ADDITIONAL PERMIT HOLDER OF RECORD		
ADDRESS		
CITY	STATE	ZIP

4. Date of Site Inspection:

11/10/2023

5. Person(s) interviewed and description of their association with the project:

NAME	DATE	ASSOCIATION WITH THE PROJECT
Chris	11/10/2023	Ranch Hand

6. County:

Klamath

7. If any property described in the place of use of the permit is excluded from this report, identify the owner of record for that property (ORS 537.230(5)):

OWNER OF RECORD		
ADDRESS		
CITY	STATE	ZIP

Add additional tables for owners of record as needed

SECTION 3

CLAIM DESCRIPTION

1. Point of appropriation name or number:

POINT OF APPROPRIATION (POA) NAME OR NUMBER (CORRESPOND TO MAP)	WELL LOG ID # FOR ALL WORK PERFORMED ON THE WELL (IF APPLICABLE)	WELL TAG # (IF APPLICABLE)
Well 1	KLAM 10505	N/A

Attach each well log available for the well (include the log for the original well and any subsequent alterations, reconstructions, or deepenings)

2. Point of appropriation source, if indicated on permit:

POA NAME OR NUMBER	SOURCE BASIN LOCATED WITHIN	TRIBUTARY
Well 1	Sprague River Basin	N/A

3. Developed use(s), period of use, and rate for each use:

POA NAME OR NUMBER	USES	IF IRRIGATION, LIST CROP TYPE	SEASON OR MONTHS WHEN WATER WAS USED	ACTUAL RATE OR VOLUME USED (CFS, GPM, OR AF)
Well 1	Supplemental Irrigation	Pasture, Alfalfa, and Hay	March 1 – October 31	2.57 CFS
Total Quantity of Water Used				2.57 CFS

4. Provide a general narrative description of the distribution works. This description must trace the water system from each point of appropriation to the place of use:

Water is appropriated from Well 1 by a 100 HP turbine pump through a McCrometer flowmeter. From Well 1, water can be delivered to the west and east.

West

Water is pumped southwest approximately 700' through buried 10" steel pipe to a natural pool. A 20 HP centrifugal booster pump is installed and used if needed. From the pool, water can be diverted southwest via Ditch 1 for approximately 2,590' before turning north and traveling an additional 1,950' before terminating at Highway 140. Ditch 1 feeds into numerous smaller ditches on the property used for flood irrigating lands in the NW1/4 NE1/4, NE1/4 NE1/4, SW1/4 NE1/4, and SE1/4 NE1/4 of Section 23, as well as the SW1/4 NW1/4 and NW1/4 NW1/4 of Section 24.

East

Water is pumped east approximately 940' through above ground 6" aluminum pipe. From there, water can be diverted via 6" aluminum pipe south for approximately 1,350' or north-northeast for approximately 1,730'. The aluminum pipe is tied into wheel lines equipped with 3/16" sprinklers to irrigate lands in the NW1/4 NW1/4, NE1/4 NW1/4, SW1/4 NW1/4, SE1/4 NW/4, and NE1/4 SW1/4 of Section 24.

Reminder: The map associated with this claim must identify the location of the point(s) of diversion, Donation Land Claims (DLC), Government Lots (GLOT), and Quarter-Quarters (QQ).

Received by OWRD

FEB 12 2024

5. Variations:

Was the use developed differently from what was authorized by the permit, **YES**
permit amendment final order, or extension final order? If yes, describe below.

(e.g. "The permit allowed three points of appropriation. The water user only developed one of the points." or "The permit allowed 40.0 acres of irrigation. The water user only developed 10.0 acres.")

The permit allowed 192.8 acres of supplemental irrigation. The water user only developed 188.9 acres of supplemental irrigation.

6. Claim Summary:

POA NAME OR #	MAXIMUM RATE AUTHORIZED	CALCULATED THEORETICAL RATE BASED ON SYSTEM	AMOUNT OF WATER MEASURED	USE	# OF ACRES ALLOWED	# OF ACRES DEVELOPED
Well 1	2.41 CFS	2.57 CFS	N/A	Supplemental Irrigation	192.8	188.9

Received by OWRD

FEB 12 2024

Salem, OR

SECTION 4

SYSTEM DESCRIPTION

Are there multiple POAs?

NO

A. Place of Use

1. Is the right for municipal use?

NO

TWP.	RNG	MER	SEC	QQ	GLot	DLC	USE	IF IRRIGATION, # PRIMARY ACRES	IF IRRIGATION, # SUPPLEMENTAL ACRES
36S	12E	WM	23	NE NE	1		Supplemental Irrigation		16.9
36S	12E	WM	23	NE NE	8		Supplemental Irrigation		20.0
36S	12E	WM	23	NW NE	2		Supplemental Irrigation		4.3
36S	12E	WM	23	NW NE	7		Supplemental Irrigation		5.4
36S	12E	WM	23	SW NE	10		Supplemental Irrigation		11.6
36S	12E	WM	23	SW NE	15		Supplemental Irrigation		5.0
36S	12E	WM	23	SE NE	9		Supplemental Irrigation		17.1
36S	12E	WM	23	SE NE	16		Supplemental Irrigation		2.5
36S	12E	WM	24	NE NW			Supplemental Irrigation		24.0
36S	12E	WM	24	NW NW			Supplemental Irrigation		39.2
36S	12E	WM	24	SW NW			Supplemental Irrigation		6.9
36S	12E	WM	24	SE NW			Supplemental Irrigation		26.0
36S	12E	WM	24	NE SW			Supplemental Irrigation		10.0
Total Acres Irrigated									188.9

Reminder: The map associated with this claim must identify Donation Land Claims (DLC), Government Lots (GLot), Quarter Quarters (QQ), and if for irrigation, the number of acres irrigated within each projected DLC, GLot, and QQ.

B. Groundwater Source Information (Well)

1. Is the appropriation from a well?

YES

2. Describe the access port (type and location) or other means to measure the water level in the well:

0.75" access port on the south side of the well

Received by OWRD

FEB 12 2024

3. If well logs are not available, provide as much of the following information as possible:

CASING DIAMETER	CASING DEPTH	TOTAL DEPTH	COMPLETION DATE OF ORIGINAL WELL	COMPLETION DATES OF ALTERATIONS	WHO THE WELL WAS DRILLED FOR	WELL DRILLED BY

4. In addition to the information requested in item "3" above, provide any other information which may help the Department locate any well logs associated with this appropriation.

KLAM 10505

C. Groundwater Source Information (Sump)

1. Is the appropriation from a dug well (sump)? **NO**

D. Diversion and Delivery System Information

Provide the following information concerning the diversion and delivery system. Information provided must describe the equipment used to transport and apply the water from the point of appropriation to the place of use.

1. Is a pump used? **YES**

2. Pump Information:

MANUFACTURER	MODEL	SERIAL NUMBER	TYPE (CENTRIFUGAL, TURBINE OR SUBMERSIBLE)	INTAKE SIZE	DISCHARGE SIZE
Ingersoll Rand	Unknown	92076437	Turbine	10"	10"
Berkeley	3WP	7487230	Centrifugal	6"	6"

3. Motor Information:

MANUFACTURER	HORSEPOWER
General Electric	100
Gould Century	20

4. Theoretical Pump Capacity:

HORSEPOWER	OPERATING PSI	LIFT FROM SOURCE TO PUMP *IF A WELL, THE WATER LEVEL DURING PUMPING	LIFT FROM PUMP TO PLACE OF USE	TOTAL PUMP OUTPUT (IN CFS)
100	50 (assumed)	41.0'	0.0'	4.19 CFS
20	50 (assumed)	4.0'	0.0'	1.01 CFS

5. Provide pump calculations:

See Attachment E for theoretical pump capacity calculations.

6. Measured Pump Capacity (using meter if meter was present and system was operating):

INITIAL METER READING	ENDING METER READING	DURATION OF TIME OBSERVED	TOTAL PUMP OUTPUT (IN CFS)
N/A			

Reminder: For pump calculations use the reference information at the end of this document.

7. Is the distribution system piped?

YES
Received by OWRD

FEB 12 2024

8. Mainline Information:

MAINLINE SIZE	LENGTH	TYPE OF PIPE	BURIED OR ABOVE GROUND
10"	700'	Steel	Buried
6"	4020'	Aluminum	Above Ground

9. Lateral or Handline Information:

LATERAL OR HANDLINE SIZE	LENGTH	TYPE OF PIPE	BURIED OR ABOVE GROUND
N/A			

10. Sprinkler Information:

SIZE	OPERATING PSI	SPRINKLER OUTPUT (GPM)	TOTAL NUMBER OF SPRINKLERS	MAXIMUM NUMBER USED	TOTAL SPRINKLER OUTPUT (CFS)
3/16"	50 (assumed)	7.2	160	160	2.57 CFS

Reminder: For sprinkler output determination use the reference information at the end of this document.

11. Drip Emitter Information:

SIZE	OPERATING PSI	EMITTER OUTPUT (GPM)	TOTAL NUMBER OF EMITTERS	MAXIMUM NUMBER USED	TOTAL EMITTER OUTPUT (CFS)
N/A					

12. Drip Tape Information:

DRIPPER SPACING IN INCHES	GPM PER 100 FEET	TOTAL LENGTH OF TAPE	MAXIMUM LENGTH OF TAPE USED	TOTAL TAPE OUTPUT (CFS)	ADDITIONAL INFORMATION
N/A					

13. Pivot Information:

MANUFACTURER	MAXIMUM WETTED RADIUS	OPERATING PSI	TOTAL PIVOT OUTPUT (GPM)	TOTAL PIVOT OUTPUT (CFS)
N/A				

E. Storage

1. Does the distribution system include in-system storage (e.g. storage tank, bulge in system / reservoir)?

NO

F. Gravity Flow Pipe

(THE DEPARTMENT TYPICALLY USES THE HAZEN-WILLIAM'S FORMULA FOR A GRAVITY FLOW PIPE SYSTEM)

1. Does the system involve a gravity flow pipe?

NO

Received by OWRD

FEB 12 2024

Salem, OR

G. Gravity Flow Canal or Ditch

(THE DEPARTMENT TYPICALLY USES MANNING'S FORMULA FOR CANALS AND DITCHES)

1. Is a gravity flow canal or ditch used to convey the water as part of the distribution system?

YES

2. Complete the table:

CANAL OR DITCH TYPE (MATERIAL)	TOP WIDTH OF CANAL OR DITCH	BOTTOM WIDTH OF CANAL OR DITCH	DEPTH	"N" FACTOR	AMOUNT OF FALL	LENGTH OF CANAL / DITCH	SLOPE	COMPUTED RATE (IN CFS)
Ditch 1 – Bare Earth	29.0'	7.7'	1.6'	0.03	3.0'	4540'	0.1%	37.5 CFS

3. Provide calculations:

See Attachment E for gravity flow ditch calculations.

4. If an actual measurement was taken, provide the following:

DATE OF MEASUREMENT	WHO MADE THE MEASUREMENT	MEASUREMENT METHOD	MEASURED QUANTITY OF WATER (IN CFS)
N/A			

Attach measurement notes.

H. Additional notes or comments related to the system:

--

Received by OWRI

FEB 12 2024

Salem, OR

SECTION 5 CONDITIONS

All conditions contained in the permit, permit amendment, or any extension final order shall be addressed. Reports that do not address all performance related conditions will be returned.

1. Time Limits:

Permits and extension final orders contain any or all of the following dates: the date when the actual construction work was to begin, the date when the construction was to be completed, and the date when the complete application of water to the proposed use was to be completed. These dates may be referred to as ABC dates. Describe how the water user has complied with each of the development timelines established in the permit or permit extension order:

	DATE FROM PERMIT	DATE ACCOMPLISHED*	DESCRIPTION OF ACTIONS TAKEN BY WATER USER TO COMPLY WITH THE TIME LIMITS
ISSUANCE DATE	10/28/1996		
BEGIN CONSTRUCTION (A)	10/28/1997	6/9/1992	KLAM 10505 began being drilled.
COMPLETE CONSTRUCTION (B)	10/1/2014	7/4/2014	Full irrigation system ready, willing, and able to be used.
COMPLETE APPLICATION OF WATER (C)	10/1/2014	7/4/2014	Full irrigation system ready, willing, and able to be used.

* MUST BE WITHIN PERIOD BETWEEN PERMIT, OR ANY EXTENSION FINAL ORDER ISSUANCE AND THE DATE TO COMPLETELY APPLY WATER

2. Is there an extension final order(s)? YES

a. Did the Extension Final Order require the submittal of Progress Reports? NO

3. Initial Water Level Measurements:

a. Was the water user required to submit an initial static water level measurement? YES

b. What month was the initial measurement to be taken in?

March

c. Was the measurement submitted to the Department? YES

d. If the initial measurement was not submitted, provide that measurement now, if available:

DATE OF MEASUREMENT	MEASUREMENT MADE BY	METHOD	MEASUREMENT

4. Annual Static Water Level Measurements:

a. Was the water user required to submit annual static water level measurements? YES

b. Provide the month, or months, the static water level measurement(s) were to be made:

March

c. Were the static water level measurements taken in the month(s) required? YES

d. If "YES", were those measurements submitted to the Department?

Received by OWRD

FEB 12 2024

Salem, OR

e. If the annual measurements were not submitted, provide the measurements now:

DATE OF MEASUREMENT	MEASUREMENT MADE BY	METHOD	MEASUREMENT

5. Pump Test:

a. Did the permit require the submittal of a pump test?

YES

Ground water permits with priority dates on or after **December 20, 1988**, require the submittal of a pump test prior to issuance of a certificate. In some cases, the permit holder may qualify for a multiple well exemption or an unreasonable burden exemption.

For additional information regarding pump tests see:

<https://www.oregon.gov/OWRD/programs/GWWL/GW/Pages/PumpTestProgram.aspx>

Received by OWRD

FEB 12 2024

If "NO", items b through e relating to this section may be deleted.

Salem, OR

b. Has the pump test been previously submitted to the Department?

YES

c. Is the pump test attached to this claim?

NO

d. Has the pump test been approved by the Department?

YES

e. Has a pump test exemption been approved by the Department?

NO

**** Claims will not be reviewed until a pump test or exemption has been approved by the Department**

6. Measurement Conditions:

a. Does the permit, permit amendment, or any extension final order require the installation of a meter or approved measuring device?

YES

Reminder: If a meter or approved measuring device was required, the COBU map must indicate the location of the device in relation to the point of diversion or appropriation.

b. Has a meter been installed?

YES

c. Meter Information

POD/POA NAME OR #	MANUFACTURER	SERIAL #	CONDITION (WORKING OR NOT)	CURRENT METER READING	DATE INSTALLED
Well 1	McCrometer	00-3100-10	Not Working	N/A	Prior to June 2000
Well 1	McCrometer	23-04192	Working	0.01 acre-feet	12/29/2023

****The original flowmeter was installed prior to June 2000. The current water right owners purchased the property in 2006 and the flowmeter was not working at the time of purchase.**

7. Recording and reporting conditions:

a. Is the water user required to report the water use to the Department?

YES

b. Have the reports been submitted?

YES

8. Other conditions required by permit, permit amendment final order, or extension final order:

a. Were there special well construction standards?

NO

b. Was submittal of a ground water monitoring plan required?

NO

c. Was submittal of a water management and conservation plan required?

NO

d. Was a Well Identification Number (Well ID tag) assigned and attached

YES

to the well?

WELL ID #	DATE ATTACHED TO WELL
L-153447	1/18/2024

e. Other conditions?

NO

If "YES" to any of the above, identify the condition and describe the water user's actions to comply with the condition(s):

--

SECTION 6 ATTACHMENTS

Provide a list of any additional documents you are attaching to this report:

ATTACHMENT NAME	DESCRIPTION

Salem, OR

SECTION 7

CLAIM OF BENEFICIAL USE MAP

The Claim of Beneficial Use Map must be submitted with this claim. Claims submitted without the Claim of Beneficial Use map will be returned. The map shall be submitted on poly film at a scale of 1" = 1320 feet, 1" = 400 feet, or the original full-size scale of the county assessor map for the location.

Provide a general description of the survey method used to prepare the map. Examples of possible methods include, but are not limited to, a traverse survey, GPS, or the use of aerial photos. If the basis of the survey is an aerial photo, provide the source, date, series and the aerial photo identification number.

This Claim of Beneficial Use Map was prepared from field measurements, NAIP 2024 aerial photography, Klamath County tax maps, and Oregon GLO maps.

Map Checklist

Please be sure that the map you submit includes ALL the items listed below.

(Reminder: Incomplete maps and/or claims may be returned.)

- ☒ Map on polyester film
- ☒ Appropriate scale (1" = 400 feet, 1" = 1320 feet, or the original full-size scale of the county assessor map)
- ☒ Township, Range, Section, Donation Land Claims, and Government Lots
- ☒ If irrigation, number of acres irrigated within each projected Donation Land Claims, Government Lots, Quarter-Quarters
- ☒ N/A Locations of fish screens and/or fish by-pass devices in relationship to point of diversion
- ☒ Locations of meters and/or measuring devices in relationship to point of diversion or appropriation
- ☒ Conveyance structures illustrated (pumps, reservoirs, pipelines, ditches, etc.)
- ☒ Point(s) of diversion or appropriation (illustrated and coordinates)
- ☒ Tax lot boundaries and numbers
- ☒ Source illustrated if surface water
- ☒ Disclaimer ("This map is not intended to provide legal dimensions or locations of property ownership lines")
- ☒ Application and permit number or transfer number
- ☒ North arrow
- ☒ Legend
- ☒ CWRE stamp and signature

STATE OF OREGON
COUNTY OF KLAMATH

PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS PERMIT IS HEREBY ISSUED TO

MS. FERRIS M. STOTLER
PO BOX 38
BEATTY, OREGON 97621

(541)533-2491

The specific limits for the use are listed below along with conditions of use.

APPLICATION FILE NUMBER: G-13503

SOURCE OF WATER: ONE WELL WITHIN THE SPRAGUE RIVER BASIN

PURPOSE OR USE: SUPPLEMENTAL IRRIGATION OF 192.8 ACRES

MAXIMUM RATE: 2.41 CUBIC FEET PER SECOND

PERIOD OF USE: MARCH 1 THROUGH OCTOBER 31 OF EACH YEAR

DATE OF PRIORITY: AUGUST 26, 1993

POINT OF DIVERSION LOCATION: SW 1/4 NW 1/4, SECTION 24, T36S, R12E, W.M.; 1562 FEET SOUTH & 618 FEET EAST FROM NW CORNER, SECTION 24

THE PLACE OF USE IS LOCATED AS FOLLOWS:

NE 1/4 NE 1/4	36.9 ACRES
NW 1/4 NE 1/4	9.7 ACRES
SW 1/4 NE 1/4	16.6 ACRES
SE 1/4 NE 1/4	20.2 ACRES

SECTION 23

NE 1/4 NW 1/4	24.0 ACRES
NW 1/4 NW 1/4	40.2 ACRES

SECTION 24

TOWNSHIP 36 SOUTH, RANGE 12 EAST, W.M.

Received by OWRD

FEB 12 2024

Salem, OR

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order, shall keep a complete record of the amount of water used each month and shall submit a report which includes the recorded water use

Application G-13503 Water Resources Department

PERMIT G-12912

measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the permittee to report general water use information, including the place and nature of use of water under the permit.

- B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.

This right is limited to any deficiency in the available supply of any prior right existing for the same land.

If the lands requested under the Klamath Adjudication (96.5 acres) are not allowed, the same 96.5 acres requested as supplemental under this application shall be made primary.

The amount of water used for irrigation under this right, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second (or its equivalent) and 3.0 acre-feet for each acre irrigated during the irrigation season of each year.

If substantial interference with a senior water right occurs due to withdrawal of water from any well listed on this permit, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interferences.

To monitor the effect of water use from the well(s) authorized under this permit, the Department requires the water user to make and report annual static water level measurements. The static water level shall be measured in the month of March. Reports shall be submitted to the Department within 30 days of measurement.

Received by OWRD

Measurements must be made according to the following schedule:

FEB 12 2024

Before Use of Water Takes Place

Salem, OR

Initial and Annual Measurements

The Department requires the permittee to submit an initial water level measurement in the month specified above once well construction is complete and annually thereafter until use of water begins; and

After Use of Water has Begun

Seven Consecutive Annual Measurements

Following the first year of water use, the user shall submit seven consecutive annual reports of static water level measurements. The first of these seven annual measurements will establish the reference level against which future annual measurements will be compared. Based

on an analysis of the data collected, the Director may require that the user obtain and report additional annual static water level measurements beyond the seven year minimum reporting period. The additional measurements may be required in a different month. If the measurement requirement is stopped, the Director may restart it at any time.

All measurements shall be made by a certified water rights examiner, registered professional geologist, registered professional engineer, licensed well constructor or pump installer licensed by the Construction Contractors Board and be submitted to the Department on forms provided by the Department. The Department requires the individual performing the measurement to:

- (A) Identify each well with its associated measurement; and
- (B) Measure and report water levels to the nearest tenth of a foot as depth-to-water below ground surface; and
- (C) Specify the method used to obtain each well measurement; and
- (D) Certify the accuracy of all measurements and calculations submitted to the Department.

The water user shall discontinue use of, or reduce the rate or volume of withdrawal from, the well(s) if annual water level measurements reveal any of the following events:

- (A) An average water level decline of three feet per year for five consecutive years; or
- (B) A water level decline of 15 feet in fewer than five consecutive years; or
- (C) A water level decline of 25 feet; or
- (D) Hydraulic interference leading to a decline of 25 feet in any neighboring well with senior priority.

The period of non or restricted use shall continue until the annual water level rises above the decline level which triggered the action or until the Department determines, based on the permittee's and/or the Department's data and analysis, that no action is necessary because the aquifer in question can sustain the observed declines without adversely impacting the resource or senior water rights. The water user shall in no instance allow excessive decline, as defined in Commission rules, to occur within the aquifer as a result of use under this permit. If more than one well is involved, the water user may submit an alternative measurement and reporting plan for review and approval by the Department.

Use of water under authority of this permit may be regulated if analysis of data available after the permit is issued discloses that the appropriation will measurably reduce the surface water flows necessary to maintain the free-flowing character of a scenic waterway in quantities necessary for recreation, fish and wildlife in effect as of the priority date of the right or as those quantities may be subsequently reduced.

Application G-13503 Water Resources Department

Received by OWRD
PERMIT G-12912
FEB 12 2024

Salem, OR

STANDARD CONDITIONS

The wells shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine water level elevation in the well at all times.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

Prior to receiving a certificate of water right, the permit holder shall submit the results of a pump test meeting the department's standards, to the Water Resources Department. The Director may require water level or pump test results every ten years thereafter.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

The Director finds that the proposed use(s) of water described by this permit, as conditioned, will not impair or be detrimental to the public interest.

Actual construction of the well shall begin within one year from permit issuance, and shall be completed on or before October 1, 1998. Complete application of the water to the use shall be made on or before October 1, 1999.

Time Extension Final Order

Received by OWRD

FEB 12 2024

Salem, OR

Oregon Water Resources Department
Water Right Services Division

Water Rights Application
Number G-13503

FINAL ORDER

Extension of Time for Permit Number G-12912
Permit Holder: Patton Ranch Management; David and Gail Patton

Permit Information

Application:	G-13503
Permit:	G-12912
Basin:	14 – Klamath / Watermaster District 17
Date of Priority:	August 26, 1993
Source of Water:	One well within the Sprague River Basin
Purpose of Use:	Supplemental irrigation on 192.8 Acres
Maximum Rate:	2.41 cubic feet per second (cfs)

This Extension of Time request is being processed in accordance with Oregon Revised Statute 537.630 and 539.010(5), and Oregon Administrative Rule Chapter 690, Division 315

Appeal Rights

This is a final order in other than a contested case. This order is subject to judicial review under ORS 183.484. A request for judicial review must be filed within the 60 day time period specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-0080 you may either file for judicial review, or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

Application History

Permit G-12912 was issued by the Department on October 28, 1996. The permit called for actual construction to begin by October 28, 1997, completion of construction by October 1, 1998 and complete application of water to beneficial use by October 1, 1999. On November 14, 2014, Patton Ranch Management; David and Gail Patton submitted to the Department an Application for Extension of Time for Permit G-12912. In accordance with OAR 690-315-0050(2), on December 30, 2014, the Department issued a Proposed Final Order proposing to extend the time to complete construction to October 1, 2014, and the time to fully apply water to beneficial use to October 1, 2014. The protest period closed February 13, 2014, in accordance with OAR 690-315-0060(1). No protest was filed.

Received by OWRD

FINDINGS OF FACT

The Department adopts and incorporates by reference the findings of fact in the Proposed Final Order dated December 30, 2014.

At time of issuance of the Proposed Final Order the Department concluded that, based on the factors demonstrated by the applicant, any comments received, and information within the file, the permit may be extended subject to no additional conditions.

CONCLUSION OF LAW

The applicant has demonstrated good cause for the permit extension pursuant to ORS 537.630, 539.010(5) and OAR 690-315-0040(2).

ORDER

The extension of time for Application G-13503, Permit G-12912, therefore, is approved. The deadline for completing construction is extended to from October 1, 1998 to October 1, 2014. The deadline for applying water to full beneficial use within the terms and conditions of the permit is extended from October 1, 1999 to October 1, 2014.

DATED: February 20, 2015

Dwight French
Water Right Services Division Administrator, for
Thomas M. Byler, Director
Oregon Water Resources Department

Subject: RE: Permit G-12912

Hi Bryce-

I reviewed this property and its existing water rights. The owner does not need an additional water right for storage if it **remains in its current configuration**. However, if there is enlargement of the pool (e.g. the height of the erected dam is taller than 10' or the storage volume exceeds 9.2 acre-feet), or if the *use* specified in the water rights changes, then we'll need to re-examine this case.

When considering whether the pond is a bulge, I'm going to assume that there has always been a non-temporary pool at the springhead and that emptying or draining it to a minimum level is not hydrologically reasonable. I don't think this pool meets our definition of a bulge and I will stand behind that judgement unless or until my underlying assumptions are proven wrong.

There is no problem co-mingling surface and ground water in the pool.

Hey Tom,

I meant to tell you about another water right when we were on the phone. Just to give you some more information and paperwork to look at. The Klamath Adjudication Claim KA 119 is a water right with the authorized source being from that natural spring/reservoir on our client's property. I'm not sure how the Water Resources Department will view the mixing of the natural spring water in this reservoir with the appropriated groundwater. Hopefully this info helps you out.

Thanks,

Bryce McKinney

Hi Tom,

We posed the below questions to OWRD earlier this month and got a response back from Gerry Clark. Regarding the reservoir issue with an additional water source filling the pond, Gerry makes it sound like you would be the person to make a call on whether or not an additional water right is required for the stored water. Will you be able to look into this issue for us?

Thanks,

Bryce McKinney

Subject: RE: Permit G-12912

Bryce,

Essentially, the reservoir/pond/bulge is part of the delivery and conveyance system. There is not an issue with that. If other sources of water are filling and being stored in the reservoir, an additional water right or rights will most likely be required. A feature like this can be a bulge for this right, but due to the storage of water from a separate source, it could also be a reservoir thus requiring an additional water right. The Watermaster would be the best person to evaluate the feature to determine if any additional rights to store and potentially use the stored water are required.

As for the meter, the condition in the permit requires both the installation and maintenance of the meter. The water user is required to maintain the meter. If the meter has failed, the meter should be repaired or replaced. Since the condition is general, meaning that a specific type of meter is not required, a dedicated electrical meter would count as the meter. The Claim could describe the dedicated electrical meter. In the event that there is not a dedicated electrical meter, the meter should be repaired or replaced and the replacement meter should be described in the Claim. As long as a flow meter or dedicated electrical meter was timely installed, no extension of time would be necessary.

I pulled the file this morning and have attached a copy of the Extension Application for your reference.

Please let me know if you have any additional questions.

Subject: RE: Permit G-12912

Hey Gerry,

As I stated below, there's a few things going on with this water right that I was hoping we could get some explanations on. I've also CC'd Codi Holmes and the owner so that they can chime in with any questions or input.

The historical and current water delivery system consists of appropriating water from the well into a pond approximately 700' southwest, where that water is then immediately pumped to the mainlines that irrigate a portion of the authorized acres. According to the owner, this pond also gets incidentally filled with natural spring water. Can this be considered a bulge in the system for the purpose of completing a COBU? Or is this considered a reservoir?

When Adkins first did a COBU on the property in June 2000, there was a working flowmeter used during the pump test. From some time between June 2000 and when the current owners purchased the property in 2006, the flowmeter stopped working and has not worked since then. Would this be a situation where they simply need to fix the flowmeter or have a new one installed? Or will the owners need to complete an Application for an Extension of Time to complete the installation?

Lastly we have a question regarding the Time Extension that was granted in 2015. This might be a question for Codi. Sadly the owner of the property that took care of the paperwork side of the water right has passed away and the daughter of the owner is working to try and fill in some gaps. It sounds like the original Time Extension was completed in order to allow additional time to install mainlines to feed some wheel lines, but the owner and I are not totally sure on that. Codi: are you able to help us figure out what was proposed in the application that the owners were trying to achieve with the Time Extension?

I realize this is a lot to figure out, so any help would be appreciated.

Thanks,

Bryce McKinney

Gerry,

Thanks for the reply back. The claim submitted by John Geraud has been withdrawn and we're working on a new claim. I've corresponded with Codi Holmes and she granted some additional time to get this completed. We've done a site visit and there's a couple more things I think I'll need your advice on in the near future. For now, we're working with the client to see if they want to move forward with the COBU. I'll keep you posted on this.

Thanks again,

Bryce McKinney

Subject: RE: Permit G-12912

Bryce,

Thanks for your kind words. The Workshops are both challenging and rewarding. I appreciate you taking the time to provide this feedback.

Yes, I would agree with your interpretation of the following language in the permit related to the lands supplemental to the Klamath Adjudication:

If the lands requested under the Klamath Adjudication (96.5 acres) are not allowed, the same 96.5 acres requested as supplemental application shall be made primary.

We need to know where these 96.5 acres, supplemental to the Klamath Adjudication Claim, are located on the both the CBU map and in the listing portion of the CBU. This can be done by using different cross hatching. I do see in WRIS that John Geraud, of Adkins put together a CBU map back in October of 2000. That Claim map seemed to indicate which acres were under the Adjudication Claim, but seem to map more than the 96.5 acres (the map indicates 102.3 acres). You may be working on the map due to a request from Codi Holmes related to updating the map.

What should happen at the time of certificate issuance, is that the above language be carried into the confirming certificate.

Please let me know if you have any additional questions.

Subject: Permit G-12912

Hey Gerry,

Just wanted to take some time to thank you and your team again for putting on the CWRE workshop. I know it takes a lot of effort to put those on, and it's much appreciated.

On another note, we're working on a COBU for Permit G-12912 and I noticed the attached sentence on page 2 regarding some Klamath Adjudication acres. I'm interpreting this that once the adjudication is finalized and if those layered 96.5 acres are not approved, then those acres will be made into primary irrigation from the authorized well. Am I interpreting this correctly? If so, is there a certain way we should show/describe these acres in the claim and map?

Thanks,

Last Will and Testament of

GAIL S. PATTON

I, GAIL S. PATTON, a resident of Riverside County, California, declare this to be my Will.

FIRST: I revoke all wills and codicils that I have previously made.

SECOND: I declare that I am married and that my husband's name is DAVID K. PATTON, D.V.M.

THIRD: I have four children living, whose names are: AARON K. PATTON, ANITA C. DENNISON, MATTHEW W. PATTON, and PAIGE I. HUTCHINSON. I have no deceased children.

FOURTH: It is my intention to dispose of all real and personal property which I have the right to dispose of by Will.

I give my jewelry, clothing, household furniture and furnishings, personal automobiles, and other tangible articles of a personal nature, or my interest in any such property, not otherwise specifically disposed of by this Will or in any other manner together with any insurance on the property to my spouse if he survives me for thirty (30) days, and if he does not, then

to my children who survive for that period, per capita.

It is my request, which is precatory and not mandatory, that the terms of an instructional letter (which I may leave along side this Will regarding preferences in the distribution of certain items of a personal nature) be followed by the beneficiaries.

FIFTH: I give the residue of my estate to the trustee of that trust, designated as the DAVID K. PATTON, D.V.M. AND GAIL S. PATTON REVOCABLE TRUST, established on December 8, 2014.

I direct that the residue of my estate shall be added to, administered, and distributed as part of that trust, according to the terms of the trust and any amendment made to it before my death. To the extent permitted by law, it is not my intent to create a separate trust by this Will or to subject the trust or the property added to it by this Will to the jurisdiction of the probate court except to the extent provided for in the trust mentioned above or in California Probate Code Sections 15200 through 15209.

If the disposition in this Paragraph is not operative or is invalid for any reason, or if the trust referred to in this Paragraph fails or has been revoked, then I hereby incorporate by reference the terms of that trust, as executed on December 8, 2014, without giving effect to any amendments made subsequently, and I bequeath and devise all of my estate to the trustees named in the trust as trustee, to be held, administered, and distributed as provided in that instrument.

FEB 20 2024

SIXTH: In the event any provision of this Will is or is **Salem, OR** adjudged to be for any reason unenforceable, the remainder thereof, disregarding such provision, shall be carried into effect.

SEVENTH: I nominate my spouse as Executor of this Will, **to** serve without bond. If my spouse shall for any reason fail to qualify or cease to act as Executor, I nominate my son AARON K. PATTON, as Executor hereof, to serve without bond. If AARON K. PATTON shall for any reason fail to qualify or cease to act as Executor, I nominate my daughter PAIGE I. HUTCHINSON, as Executor hereof, to serve without bond. The term "my Executor" as used in this Will shall include any personal representative of my estate.

I authorize my Executor to sell at public or private sale, with or without notice, and to lease any property belonging to my estate, subject only to such confirmation of court as may be required by law.

I subscribe my name to this Will this 8th day of December, 2014, at Hemet, California.

GAIL S. PATTON
