REPORT AND RECOMMENDATIONS TO STATE WATER BOARD
By Representative Taking Proof.

This image shows a single, blank page from an old book. The paper is a light cream or off-white color, showing signs of age such as slight yellowing and some minor creases or wrinkles. There are very faint, horizontal ruling lines visible near the top edge of the page, suggesting it might have been part of a ledger or a notebook. The overall texture appears slightly grainy, typical of older paper stock.

Dear Sir:-

This is to acknowledge receipt of your letter of the 7th inst., together with check for \$3.00, examination fee on application No. 1057. For a small appropriation like yours, less than three second feet, I believe it will not be necessary for you to have a survey made.

I am enclosing a township plat upon which you can probably indicate the approximate location of your ditch, and also indicate by crosshatching the land to be irrigated. Kindly note in each forty acre tract the number of acres to be irrigated.

Dear sir:

Enclosed you will find the application of Clarence C. Page, who desires to appropriate under the new law a quantity of water for his premises in this county. I did not have the application blanks in the office and consequently have followed partial the old form of recording used in southern Oregon. Mr Page desires to complete the information concerning this application and I wish that you would please send blanks to Mr. Robt. Tucker Attoerny at Law in the Fenton B ilding at Portland, Oregon. Please place this informal application upon file that it may establish his right upon furnishing the required additional information necessary.

OFFICE OF STATE WATER BOARD

SALEM, OREGON.

Gentlemen,

Your letter for proof of appropriation of water concerning Appli No 1037 Permit No 586 received some days ago.

The ditch was completed and water used according to the original plans and within the allowed limits, however before sending in the signed proof sheets there is one point I want to take up with you.

After completing the ditch I found that after a certain season of year owing to the limited amount of water in the creek as well as to the nature of the soil that it was not an economical proposition to get the water on some of the farther points of the ditch so took the water from the creek at a point lower down and nearer the ground to be irrigated (using an old abandoned mining ditch) thus making it necessary to use two ditches in order to cover even less ground than

was originally applied for under the
one original ditch.

Would the permit granted cover the two
ditches or would it be better to make a
new sketch map showing the two ditches.

If it is best to make a new map would
you kindly send one of your regulation
blanks for same. Thanking you I am

Yours Truly

This proof appears to be in proper form and upon
receipt of the \$1.00 recording fee, will be presented to the
State Water Board for approval and issuance of certificate.

Clarence C. Page,

Grants Pass, Oregon.

aDear Sir:-

I am in receipt of yours of the 11th inst., and in reply beg to advise you that if no additional lands are to be irrigated, the original permit would cover the construction of both ditches.

Your proof should indicate there has been a change in your plans and should definitely describe the lands you have irrigated.

If any part of the lands described in the permit have not been irrigated, it should be excluded from your proof.. Neither the change in plans nor the fact that you have been unable to irrigate all the land described in your permit will affect your rights in any respect.

Very respectfully,

Assistant Secretary.
