We have received your notice of beginning of construction of the project described in your permit 44430 wherein you stated you have 100 feet of aluminum pipe.

Under the terms of your permit, a substantial beginning of construction of the project is to be made by October 17, 1980. We are interested in the irrigation equipment which you have purchased and the length and diameter of pipe for your domestic water system. It is doubtful that 100 feet of aluminum pipe would satisfy the statutory requirement of making a substantial beginning of construction of the water system for the project described in your permit.

I am returning your notice of beginning of construction along with the new form to give you the opportunity to more fully advise us of any irrigation equipment and length and diameter of pipe or storage tank for your domestic water system.

Sincerely,

THOMAS E. SHOOK
Water Rights Engineer
