RE: Permit R-15388

To whom it may concern,

Oregon Department of Fish and Wildlife has reviewed the fish screen associated with your point of diversion on Coyote Creek, 43.965253, -123.314117, for Permit R-15388. This site was inspected virtually with photos submitted by diversion owner.

The fish screen to be used at this point of diversion is a Pump Rite SCS6-DD self-cleaning end of pipe screen. This self-cleaning screen when installed and maintained properly is capable of screening up to 1.06 cfs or 479 gpm, while protecting all age classes of native fish present from entrapment and impingement. ODFW concludes that this screen will meet criteria. A by-pass device is not required at this point of diversion as this is an end of pipe screen.

This approval is contingent on the following: the screens are regularly inspected and maintained to ensure they remain in working order, including removing debris as necessary, and the screen is annually inspected when not in use.

If there are any questions, please contact me at 541-296-8026.

Sincerely,

Toby Schuyler
