RE: Reclaimed Municipal Water Use Registration R

G-2629

102492

Dear Iseli Nursey management:

The Oregon Water Resources Department ("OWRD") has received your registration of Reclaimed Municipal Water Use form on October 30, 2015. The Registration form is complete, signed by all the appropriate parties, and meets the requirements of ORS 537.131 and 537.132. OWRD assigned record RM-207 to your Registration, which will be managed as a physical file in Salem and viewable online at: http://apps.wrd.state.or.us/apps/wr/wrinfo_stage/ as an "RM" type Application.

This Registration allows the use of reclaimed municipal water under an exemption provided by ORS 537.132 rather than completing the process to obtain a formal water use permit. The Registered exempt use is allowed only while the corresponding Department of Environmental Quality (DEQ) facility discharge permit is in effect, which is currently pending renewal. This Registration must be renewed with OWRD when the DEQ facility discharge permit is renewed again in the future for the exempt use to continue.

If reclaimed municipal water use occurs instead of exercising existing water rights at the same location, ORS 540.610(2)(h) provides protection of those existing water rights from potential forfeiture due to extended non-use. It is prudent to document and maintain a record of your annual use of reclaimed municipal water.

Oregon's *Integrated Water Resources Strategy* encourages additional use of reclaimed municipal water to help keep our streams clean and reduce the demand on limited water supplies. Thank you for putting the strategy into action and using water wisely.

If you have questions regarding this Registration letter, please contact me directly at 503-986-0919, Steve.W.Parrett@wr.state.or.us, or call 503-986-0900 and ask for the *Water Reuse Coordinator*.

Gentlemen:

This will acknowledge receipt of your notice to the effect that complete application of water has been made under permit No. G-2439.

Pursuant to your report and in line with the general practice of this office, a survey will be made at a later date.

After this survey, proof may be made and certificate issued covering the actual use of water as found by the engineer. In case of irrigation, any lands described in the permit that have not been irrigated will be automatically eliminated from the water right.

In the meantime, the permit which you hold will be valid evidence of the water right in question so long as you continue to use the water.

Very truly yours,

Dear Sir and Madam,

This will acknowledge the receipt of your application for a permit to appropriate 1.25 cubic feet of water per second from a well for irrigation of 107 acres and domestic use, the accompanying tracing, legal description, and fees in the sum of \$38.85 for which our receipt numbered 38431 is enclosed.

Your application has been examined and filed under file numbered G-2629. Upon examination of your application, it is noted that you wish to appropriate water for household domestic use. We cannot authorize the appropriation of water for this purpose by issuance of a permit as the provisions of the law with respect to permits does not apply to appropriation of ground water for any single or group domestic purpose in an amount not exceeding 15,000 gallons per day. The use of ground water for single or group domestic purposes to the extent that the use is beneficial constitutes a right to appropriate ground water equal to that established by a ground water right certificate. Unless we hear from you regarding this matter within ten days from the date of this letter, we will proceed toward approval of your application authorizing the appropriation of 1.25 cubic feet of water per second from the well for irrigation purposes only.

WATER RESOURCES DEPT
SALEM, OREGON

Proof of Appropriation of Water

38250 Burgo Lane
of ~~Route 3, Box 332, Sandy~~ , State of Oregon
has applied beneficially the waters of
a well

WERNER W. AND GERMAINE ISELI
97055

a tributary of Tickle Creek (Clackamas River) for the purpose of
irrigation of 74.0 acres

under Permit No. G-2439 of the State Engineer, and that the use of said waters has been
completed under the terms of said permit; that the priority of the
right dates from June 11, 1963

that the amount of water for the purposes aforesaid, has been actually beneficially used in the
amount of
0.93 cubic foot per second

or its equivalent in case of rotation, measured at the point of diversion from the stream.
The point of diversion is located in the SE $\frac{1}{4}$ NW $\frac{1}{4}$, Section 8, T. 2 S., R. 4 E., W. M.,
50 feet North and 2350 feet East from W $\frac{1}{2}$ Corner, Section 8.

The amount of water used for irrigation, together with the amount secured under any other
right existing for the same lands, shall be limited to one-eightieth of one cubic foot per second
per acre, or its equivalent for each acre irrigated and shall be further limited to a
diversion of not to exceed 2 $\frac{1}{2}$ acre feet per acre for each acre irrigated during the
irrigation season of each year;

and shall conform to such reasonable rotation system as may be ordered by the proper state officer.

A description of the place of use under the right, and to which such right is appurtenant, is
as follows:

7.9 acres SW $\frac{1}{4}$ NE $\frac{1}{4}$
30.3 acres SE $\frac{1}{4}$ NW $\frac{1}{4}$
24.0 acres NE $\frac{1}{4}$ SW $\frac{1}{4}$
11.8 acres NW $\frac{1}{4}$ SW $\frac{1}{4}$
Section 8
T. 2 S., R. 4 E., W. M.

I have read the above and foregoing proof of appropriation of water; I know the contents
thereof, and that the facts therein stated are true.

IN WITNESS WHEREOF, I have hereunto set my hand this 3 day of December, 1975
