Subject: RE: Historical Imagery as proof of Beneficial Use

John and Lorissa:

Given the recent email from Gerry, have you had an opportunity to discuss how you'd like to move forward with G-5254 and G-10702?

The Department can move forward with the proposed documents previously sent. OR
The landowner/Agent can:

1. Submit an extension of time and withdraw the original claims
2. If the extension is approved, complete development within the terms and conditions of the permit
3. Then, hire a new CWRE to complete a new claim of beneficial use and map (this will allow you to include the additional rates/acres)

Please advised by March 1, 2024.

Thank you.

Subject: RE: Historical Imagery as proof of Beneficial Use

John,

Sorry for the delayed response. I hope you all had a wonderful Holiday Season.

The permits that you are requesting reconsideration of were inspected by the Department in December of 2000. The permits had "C" Dates of October 1, 1977 (G-5254) and October 1, 1989 (G-10702). For the purpose of the 2000 Field Inspection, the Field Inspector relied on a variety of information including appropriately dated aerial photos (photos around the time of the "C" Date) and interviews with people knowledgeable with the use of water on the property.

As you have described, in cases where we are past a "C" Date by a few years or many years, one method to establish a place of beneficial use would be to locate an appropriately dated photo that may show the location of the irrigation. A Department Field Inspector normally would have looked at the lands to see how the irrigation pattern matched the aerial photo. That being said, if the person interviewed, or the Field Inspector found that certain areas previously irrigated are no longer irrigated, they may not include those areas on the Final Proof map.

In order to overcome a reduction in acreage, we need more than just an appropriated dated photo that shows possible irrigation. We need other information to document that the use was occurring on all the acres that you are asserting were irrigated. In this case, this may be difficult as the "C" Dates were in 1977 and 1989. The Field Inspection in 2000 was closer to the "C" Date than we are today.

I am unfortunately going to be out of the office until January 16th. I can certainly follow up with any additional question that you may have at that time.

Subject: Historical Imagery as proof of Beneficial Use

OK Gerry & Codi, please clarify!

Below, Codi states that historical imagery is not an acceptable form of proof of beneficial use for a claim. Since we typically inspect years or even decades after c-dates, are we to use as proof whatever is on the ground when we inspect even if installed after the c-date? Or are we to only prove up what historical imagery shows as irrigated within the Permit window???

Significant ramifications!

Thanks,

John

John and Lorissa.... I had previously sent this back in August; and made myself paper copies. I was intending to follow-up today with you guys on how you'd like to proceed and discovered that my email did not even send. I apologize, this was not intentional. That being said, please review my initial email and let me know.

Hi John (& Lorissa)-

I am back in the office and had a chance to review these file remaining 4 files.

Lorissa indicated that G-13698 as proposed- this file is currently in extension process. You'll need to complete that process to over come the current 'Proposed Order of Certificate'. Jeffrey is working on this and will follow up with you in the next week or so. I can not issue the proposed certificate until the extension process is done.

S-504370 I can issue the certificate in the next few weeks.

For the other two files (G-5254 and G-10702):

I am unable to accept the evidence John has submitted for review. 1. Since this is a new landowner and different CWRE, the original claim can not be "amended". 2. Historical imagery is not an acceptable form of proof of beneficial use for a claim (however, other processes allow it)- therefore for we can not utilize that to make beneficial use.

The process for a new landowner to make additional development and beneficial use under an existing permit is to:

1. Assign the permit to themselves at the time of property transfer (this is done)
2. To submit an extension of time and withdraw the original claim submittal
3. Once the extension is approved, complete the development and use of the water under the permit.
4. Then, hire a new CWRE to complete the claim report and map.

At this time, if you would like the additional information to be reviewed and included on the certificate- please use the above process. If not, the Department will move forward with the previously proposed documents based on the original claim/FPS. Please advise the Department on how you'd like to proceed.

If you have questions or concerns, please let me know.

Subject: Re: Files:

Good morning,

I wanted to get back with you on the certificate proposals. Permit G-13698 looks good as proposed. Permit S-50437 also looks good as proposed.

John Short, has already requested a meeting with you to discuss the other water rights to make revisions. If you have questions please let me know, 541-410-3790.

Thank you,
Lorissa Singhose

Currently, I believe just these 3 files are waiting for final review.

G-6727, Permit G-5254 (new items from John Short)

G-11037, Permit G-10702 Previously proposed cert mail 2016

OK S-65353, Permit S50437 Previously proposed cert mail 2016

It also looks like:

OK G-14798, Permit G-13698 proposed cert mailed 2020, ext until 10/2023- is also waiting for final review. I think this is ready to issue docs on as well as you're in compliance now.

I will need to review the new items from John on G-6727, to provide better feedback on that.

Please review the attached proposed docs (2016, 2016, 2020); if you agree with them, let me know and we can issue final certificates.

Hello Codi,

Next week is very flexible for me. Could we please schedule to meet and come to agreement on Permits G-5254 Singhose, G-10702 Singhose, and G-12276 Fairview Trucking?

Just let me know time/day and I'll be there.

Thank you!

Sincerely,
John

STATE OF OREGON

COUNTY OF HARNEY

CERTIFICATE OF WATER RIGHT

THIS CERTIFICATE ISSUED TO

LORISSA SINGHOSE
PHILLIP SINGHOSE
PO BOX 55
RILEY OR 97758

confirms the right to the use of water perfected under the terms of Permit G-10702. The amount of water used to which this right is entitled is limited to the amount used beneficially, and shall not exceed the amount specified, or its equivalent in the case of rotation, measured at the point of diversion from the source. The specific limits and conditions of the use are listed below.

APPLICATION FILE NUMBER: G-11037

SOURCE OF WATER: THREE WELLS IN THE SILVER CREEK BASIN

PURPOSE or USE: IRRIGATION OF 371.4 ACRES AND SUPPLEMENTAL IRRIGATION OF 122.0 ACRES, BEING IRRIGATION OF 104.0 ACRES FROM SOUTH WELL AND IRRIGATION OF 267.4 ACRES FROM PIVOT WELL, AND SUPPLEMENTAL IRRIGATION OF 122.0 ACRES FROM BOOSTER WELL

MAXIMUM RATE: 5.73 CUBIC FEET PER SECOND (CFS), BEING 1.53 CFS FROM BOOSTER WELL, 1.3 CFS FROM SOUTH WELL AND 2.9 CFS FROM PIVOT WELL

DATE OF PRIORITY: JULY 25, 1983

The wells are located as follows:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
24 S	27 E	WM	23	SE NE	SOUTH WELL – 1350 FEET SOUTH AND 1210 FEET WEST FROM NE CORNER, SECTION 23
24 S	27 E	WM	24	NE NW	BOOSTER WELL – 20 FEET SOUTH AND 1350 FEET EAST FROM NW CORNER, SECTION 24
24 S	28 E	WM	18	SW SW	PIVOT WELL – 600 FEET NORTH AND 200 FEET EAST FROM SW CORNER, SECTION 18

The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands shall be limited to ONE-EIGHTIETH of one cubic foot per second per acre, and shall be further limited to a diversion of not to exceed 3.0 acre-feet per acre for each acre irrigated during the irrigation season of each year, provided further that the right allowed herein shall be limited to any deficiency in the available supply of any prior right existing for the same land and shall not exceed the limitation allowed herein.

NOTICE OF RIGHT TO PETITION FOR RECONSIDERATION OR JUDICIAL REVIEW

This is an order in other than a contested case. This order is subject to judicial review under ORS 183.484 and ORS 536.075. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.484(2). Pursuant to ORS 183.484, ORS 536.075 and OAR 137-004-0080, you may petition for judicial review and petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied. In addition, under ORS 537.260 any person with an application, permit or water right certificate subsequent in priority may jointly or severally contest the issuance of the certificate within three months after issuance of the certificate.

A description of the place of use is as follows:

IRRIGATION – PIVOT WELL					
Twp	Rng	Mer	Sec	Q-Q	Acres
24 S	28 E	WM	18	NE SW	6.3
24 S	28 E	WM	18	NW SW	40.0

24 S	28 E	WM	18	SE SW	37.5
24 S	28 E	WM	18	SW SE	32.0
24 S	28 E	WM	18	SE SE	23.7
24 S	28 E	WM	19	NE NE	21.5
24 S	28 E	WM	19	NW NE	30.0
24 S	28 E	WM	19	NE NW	18.7
24 S	28 E	WM	19	NW NW	19.9

IRRIGATION – SOUTH WELL					
Twp	Rng	Mer	Sec	Q-Q	Acres
24 S	27 E	WM	23	NE NE	31.4
24 S	27 E	WM	23	NW NE	31.4
24 S	27 E	WM	23	SW NE	31.4
24 S	27 E	WM	23	SE NE	9.8

SUPPLEMENTAL IRRIGATION – BOOSTER WELL					
Twp	Rng	Mer	Sec	Q-Q	Acres
24 S	27 E	WM	13	NE SW	6.0
24 S	27 E	WM	13	NW SW	36.0
24 S	27 E	WM	13	SW SW	40.0
24 S	27 E	WM	13	SE SW	40.0

The well shall be maintained in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall include an air line and pressure gauge or an access port for measuring line, adequate to determine water level elevation in the well at all times.

The water user shall maintain a weir, meter, or other suitable measuring device, and shall keep a complete record of the amount of ground water withdrawn.

This right is for the beneficial use of water.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The right to the use of the water for the above purpose is restricted to beneficial use on the place of use described.

24 S	27 E	WM	24	NW SW	39.3	2U
24 S	27 E	WM	24	SW SW	30.7	2U
24 S	27 E	WM	24	SE SW	2.4	2U

Measurement, recording and reporting conditions:

- A. The water user shall maintain the meter or other suitable measuring device approved by the Director in good working order, shall keep a complete record of the amount of water used each month, and shall submit a report which includes the recorded water use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the water user to report general water-use information, including the place and nature of use of water under the right.
- B. The water user shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.

If substantial interference with a senior water right occurs due to withdrawal of water from any well listed on this right, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interferences.

The well(s) shall be maintained in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine the water level elevation in the well at all times.

The Director may require water level or pump test results every ten years.

Failure to comply with any of the provisions of this right may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the right.

This right is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

The right to the use of the water for the above purpose is restricted to beneficial use on the place of use described.

Reference: Application G-11037 Permit G-10702

The Department has been reviewing the Final Proof Survey Report completed by the Department on February 16, 2000, for the above referenced ground water application involving Permit G-10702 (priority date of July 25, 1983), the Department identified an issue with the related underlying primary right permit G-5254 that must be resolved before the issuance of a certificate confirming the use under this permit.

Related groundwater application file G-6727 is the primary underlying right for a portion of this permit for the place of use served by the Booster Well. When Application G-6727 is certificated for the lands that are underlying primary irrigation to permit G-10702, a proposed certificate will be issued for permit G-10702.

The place of use in which Permit G-10702 is supplemental irrigation to is as follows:

SUPPLEMENTAL IRRIGATION BOOSTER WELL					
Twp	Rng	Mer	Sec	Q-Q	Acres
24 S	27 E	WM	13	NW SW	36.0
24 S	27 E	WM	13	SW SW	40.0
24 S	27 E	WM	13	SE SW	40.0

I have enclosed a **Draft Certificate** for your review. If you have any questions please contact me at 503-986-0814.

Sincerely,

Jessica Joye

PURPOSE or USE: IRRIGATION OF 371.4 ACRES AND SUPPLEMENTAL IRRIGATION OF 122.0 ACRES, BEING SUPPLEMENTAL IRRIGATION OF 122.0 ACRES FROM BOOSTER WELL, IRRIGATION OF 104.0 ACRES FROM SOUTH WELL AND IRRIGATION OF 267.4 ACRES FROM PIVOT WELL

MAXIMUM RATE: 5.73 CUBIC FEET PER SECOND (CFS), BEING 1.53 CFS FROM BOOSTER WELL, 1.3 CFS FROM SOUTH WELL AND 2.9 CFS FROM PIVOT WELL

DATE OF PRIORITY: JULY 25, 1983

The wells are located as follows:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
24 S	27 E	WM	23	SE NE	SOUTH WELL - 1350 FEET SOUTH AND 1210 FEET WEST FROM NE CORNER, SECTION 23
24 S	27 E	WM	24	NE NW	BOOSTER WELL - 20 FEET SOUTH AND 1350 FEET EAST FROM NW CORNER, SECTION 24
24 S	28 E	WM	18	SW SW	PIVOT WELL - 600 FEET NORTH AND 200 FEET EAST FROM SW CORNER, SECTION 18

The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands shall be limited to ONE-EIGHTIETH of one cubic foot per second per acre, and shall be further limited to a diversion of not to exceed 3.0 acre-feet per acre for each acre irrigated during the irrigation season of each year, provided further that the right allowed herein shall be limited to any deficiency in the available supply of any prior right existing for the same land and shall not exceed the limitation allowed herein.

NOTICE OF RIGHT TO PETITION FOR RECONSIDERATION OR JUDICIAL REVIEW

This is an order in other than a contested case. This order is subject to judicial review under ORS 183.484 and ORS 536.075. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.484(2). Pursuant to ORS 183.484, ORS 536.075 and OAR 137-004-0080, you may petition for judicial review and petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied. In addition, under ORS 537.260 any person with an application, permit or water right certificate subsequent in priority may jointly or severally contest the issuance of the certificate within three months after issuance of the certificate.

A description of the place of use is as follows:

The well shall be maintained in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall include an air line and pressure gauge or an access port for measuring line, adequate to determine water level elevation in the well at all times.

The water user shall maintain a well, meter, or other suitable measuring device, and shall keep a complete record of the amount of ground water withdrawn.

This right is for the beneficial use of water.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The right to the use of the water for the above purpose is restricted to beneficial use on the place of use described.

Issued _____.

 Dwight French
 Water Right Services Division Administrator, for
 Thomas M. Byler, Director
 Oregon Water Resources Department

 J. Miller 12-12-2000

February 29, 2000
FINAL PROOF SURVEY
A # G-11037, P # 10702

I conducted the final proof for this survey on February 16, 2000. Bill Beal assisted me in this survey.

The permit has been assigned to Denny Land and Cattle Co., LLC
address 500 Boylston Street # 1880
Boston, MA 02116
phone# 617-536-6602

Bob de Braga is the manager for Denny Land
HC 73, Box 13838, Burns, OR Phone # 541-573-2878. He asked me to contact Mr. Beal to assist with the final proofs on the Silver Creek lands, as Bill is their consultant.

The permit is for primary and supplemental irrigation from **three wells.**

Booster Well is located in the NE NW, Sec 24, Well ID # L21467
I found no well log for this well, Information that Mr. Beal gave me is that the well was drilled 245', and cased to 105'
static level is 11 ½ feet
yield is 930 GPM

There is a 50HP Submersible Staylite pump, sets 138 feet down the well. The discharge on the well head is 8". Down the main line about 10' is a 30 HP CDD Booster pump in line. From the booster the discharge is 4 inch out to 8" buried steel main line. The main line is laid north from the well. The application map indicates the main line is ½ mile.
There are no meters or and no assess port on the well.
The well has 16" casing.

Irrigation of the SW 1/4, Section 13 is with four 4" wheel lines with an assortment of sprinkler heads. 1332 sprinkler heads total. Each wheel line is 1/4 mile long. They are laid west to east. The north portion of the quarter is irrigated with a CP. The corner are not irrigated where the CP irrigates.

The underlying primary for this 1/4 section is P # G-5254

There are also two surface water rights, on the Salem plat card report, for 10 acres in the NE SW. These are certs # 29360 and #61053. No surface water is used for irrigation here and should be canceled..

Use: Oats and alfalfa hay was grown here last year.

Aerial survey # 41025-179-132B, indicated the land in the SW 1/4 section 13 is irrigated. This is

1979-1980 series photo.

South well - is located in the NE NE, Sec. 23.

I found no well log for this well. The well ID tag # L21468 is on the well.

The year 1981 is engraved in the concrete pad the well head is in.

The well has a 75 HP US Electric motor with an Aurora turbine pump mounted on the well head.

There is a 2 inch steel **air port** to the well.

I could not see the size of the casing because of the turbine pump. The discharge from the pump is 8 inch out to 12" steel main line.

Irrigation is with a 10 tower center pivot with and extension on the end another 15 feet. This is a low pressure pivot. No name brand was found on the pivot.

There was a volume meter on the well reading 800952 GPM

Irrigation is as mapped on the application map. This is primary irrigation here in Section 23.

Use: Alfalfa hay was grown here last year.

Tie: Intersection of dirt roads at corners of sections 14/13.
23/24

Aerial survey photo # 41025-179-132B

also copy of 1990 photo from FSA # Napp 41025-1211-101R. This photo indicates the land in the NE 1/4 section 23 was irrigated with the pivot by the C-date on the permit. There are more acres irrigated with this pivot than the permit allowed.

Pivot Well - is located in the SW SW, Section 18. Well ID tag # L-21465 is on the well.

info from the well log -

drilled 176 feet deep

cased with 18" to 25 ½ feet, then 16" to 150 feet

Static level 19 feet

yield 800 GPM

The well was completed in 12/21/1979. The well was deepened in 6-26-1982.

The log for the deepening shows the well was drilled to 300 feet.

Yield 900 GPM

Static 30' 2"

installed a 14 inch liner from 1 ½ feet to 251 ½ feet.

The well has a 250HP General Electric motor with a Worthington turbine pump mounted on the well head. There was a PSI guage on this system. However, no irrigation was taking place on the day of this survey. The discharge from the pump is 12 inches. This tees into 12" main line. The main line is buried. The application map shows the 12" main line laid to the east about a mile and 10" buried steel main line lying to the north a ½ mile.

Irrigation is with two center pivots in the south end of section 18 and the north end of section 19. One pivot is a 10 tower pivot and one is a 9 tower pivot. There are no name brands on the pivots. They are low pressure type. They also have three 4 inch wheel lines with 33 sprinkler heads on each line. The sprinkler heads are a combination of rainbird 30's 5/32, 9/64, and 11/64. The wheel lines lie to the north of the ten tower pivot, which is on the west side of the sections, along the west side of section 18. The land in the SW NW, Sec 18 was not applied for, but is irrigated with a wheel line.

The 1990 series photo from the FSA office indicates the acres under the pivots were irrigated by the C-date. The corners are not irrigated and will not be included on the final proof map. This same photo shows the acres the wheel lines are on and the photo indicates these acres had some type of cultivation by the C-date, but do not indicate if they were irrigated or not. (I Need to contact the manager or irrigator for the lands here).

Use: On the pivot areas alfalfa hay was grown here last year and on the wheel line portion, oats were grown last year.

Tie: Intersection of the dirt road going south along the section line between Section 13 and 14 and a dirt road going west and east along section line 13 and 14 and 23 and 24.

Aerial survey # 41025-179-132B, and Napp 41025-1213- 56

June Miller
Field Inspector

comments: I did not complete the preliminary final proof map for Booster well, as the surface water right needs to be taken care of then permit G-5254 made as primary for portion of section 13 with permit G-10702 supplemental.

I did not discuss the part of the permit of records kept of the ground water withdrawn. Land owner is in Boston. Shephard was the manager for 20± years of the south ranch, but not now.

Abstract of Permit

179
G-10702

This is to certify that I have examined APPLICATION G-11037 and do hereby grant the same SUBJECT TO EXISTING RIGHTS and the following limitations and conditions:

This permit is issued to Jim Towery (South Silver Creek Ranch), PO Box 377, Mill City, Oregon, 97360, phone 769-5616 or 769-6795, for use of the waters from three wells, being 2.0 cubic feet per second from Booster well, 1.3 cfs from South Well and 2.9 * for the PURPOSE of Irrigation of 319.0 acres and supplemental irrigation of 160.0 acres, being supplemental irrigation of 160.0 acres from Booster Well, irrigation of 104.0 acres from South Well and irrigation of 319.0 acres from Pivot Well, that the PRIORITY OF THE RIGHT dates from July 25, 1983,

Need
L32B

See attached for # acres.

and is limited to the amount of water which can be applied to beneficial use and shall not exceed 6.2 cubic feet per second,

measured at the point of diversion from the wells, or its equivalent in case of rotation with other water users.

The well is to be LOCATED: Pivot Well: 630 feet North and 150 feet East from the Southwest corner of Section 18; Booster Well: 25 feet South, 1325 feet East from Northwest corner Section 24; South Well: 1380 feet South 1310 feet West from the Northeast corner of Section 23 being within the being within the (Pivot Well) SW 1/4 SW 1/4 **
A description of the PLACE OF USE under the permit, and to which such right is appurtenant, is as follows:

- * cfs from Pivot Well,
- ** Section 18, Township 24 South, Range 28 East; (Booster Well) NE 1/4 NW 1/4 Section 24, Township 24 South, Range 27 East; (South Well) NE 1/4 NE 1/4 Section 23, Township 24 South, Range 27 East, WM, in the County of Harney.

G-6730, P # 5257	A # 65353, P # 50437

I met with Jim Shephard yesterday to discuss the development of the irrigation systems on the Silver Cr. permits, assigned to Denny Land and Cattle Co.

Jim was the manager of the place these permits are on for about 20 years. He left in 1994 when when this place was sold to Denny Land.

Dusenberg well, Stock well and Big Well ^{Boosted} are all connected with main line. and irrigate the acres on the West side of section 13, the south ½ of section 14 and the South ½ of section 15.

He used the surface water sources in 1979. And flood irrigated the lands on the west side of section 2 , 14 and the east side of section 15. The surface rights can still be used in the west side of Sec 2 and in section 3. The rest of the surface rights have not been used since Jim left.

Fish and game, assisted with funding to put in a lot of the wells on this place and the pumps and irrigation equipment. Frank Cluster, prior land owner made agreement with fish and game.

The groundwater development started in the last 1960's.

Pivot well was drilled in about 1979 and irrigates the lands in section 18 and 19. The land in the sw nw of 18 was not irrigated with Jim was here. This area now has as Wheel Line on it. The land owner should make application for irrigation ground water here. Both center pivots and 3 wheel lines can all be operated at the same time from this well.

Sanders well irrigates the East side of section 13. The high spot on the west side of NW NE, has been irrigated with the center pivot since the 1980's. The center pivot and the wheel lines on this can all be operated at the same time. The SW SE and the S ½ of the NW SE, Section 13. Were never irrigated when Jim managed this place.

Middle well irrigates the N ½ of section 14 and the strip along the east side of NE section 15. All this can be irrigated at the same time.

Corral Well and Lower Dam well are teed together with 12" main line and irrigates SE section 2, small strip in SW section 2 and North portion in section 11. Lower dam well was down for a while and not used. Denny Land has it back on line and use this and Corral together.

The pivots in section 2 and 3 have been there since the late 1980s.

All the pivots are low pressure type. Name brands are Pierce , Zimmatic and Rain cats. These To

operate between 20 and 30 PSI and use 800 to 900 GPM. The wheel lines predominately have 1 1/64 size sprinkler heads and operate between 38 and 42 psi at 6 GPM.

The surface water from Silver Cr .has been canceled in some areas. However, there are more lands that should be canceled, along with the supplemental from Chickahominy.

Info from MR. Bill Beal on the date of the surveys was that the surface water is only used now in sections 2 and 3 and 11. The ditches to deliver these sources are no longer maintained to carry the flow.

The supplemental ground water permits need to be primary on the lands; the surface water is not delivered to any longer.

June Miller
Field Inspector

MEMO – 2014-2015 Certificate Project Proof to Satisfaction (Aug 7, 2014)

Determination

I've determined that the permit/transfer was fully developed as authorized and that a **FINAL** Certificate should be issued.

I've determined that the permit/transfer was not fully developed as authorized and that a **PROPOSED** Certificate should be issued. A proposed Certificate should be issued for the following reason(s):

Authorized 583[±] AC @ 6.2CFS; Developed 487.4 AC @ 5.65CFS.
Reduced acreage and rate.

I've determined that beneficial use was NOT made within the terms and conditions and that a **Proposed Order of Certification** (denial) should be issued. A proposed Order of Certification should be issued for the following reason(s):

Processing

Stamp PROPOSED or Assign CERT# _____ or ORDER OF CERTIFICATION (circle one)

Draft Certificates or Proposed Order of Certifications are available in the Application directory.

Prepare Mailing List. Include Applicant(s); Receiving Landowner(s); Current Owner(s); Water Organizations; CWRE. Indicate records to be marked.

<input type="checkbox"/> Record marking:	App _____	Permit _____	Cert _____
	App _____	Permit _____	Cert _____
	App _____	Permit _____	Cert _____
	App _____	Permit _____	Cert _____

NOTES:

1- The Dept. Survey states that the 21[±] Acres in the 'SE NE of Sec. 23 should have a new application submitted for these add'l lands.

* 2- Need to go draft, pending Permit G-5254
1^o right for NWSW 36[±] AC; SWSW 40[±] AC; SESW 40[±] AC
* send draft w/ G-5254 to show waiting for certification.

Pump Capacity Calculator

using Department designed formula: Booster Well

$(hp)(\text{efficiency}) / (\text{lift} + \text{psi head}) = \text{capacity in cfs}$

Efficiency:

Centrifugal = 6.61

Turbine = 7.04

Data Entry (fill in underlined blanks)

HP = 50
Efficiency = 7.04
Lift = 19
PSI = 42

Results Calculated

(hp)(efficiency) = 352
Head based on psi = 106.7
Total dynamic head = 125.7
(head + lift)

Pump Capacity = **2.800 cubic feet per second**

$(116^0 \text{ ACRES})(1/80) = 1.45 \text{ CFS} < 2.73 \text{ CFS (SURVEY)}$

Center Pivot + 4 wheel lines

well yields:
930gpm (2.07 CFS)

Pump Capacity Calculator

using Department designed formula: SOUTH WELL

$(hp)(\text{efficiency}) / (\text{lift} + \text{psi head}) = \text{capacity in cfs}$

Efficiency:

Centrifugal = 6.61

Turbine = 7.04

Data Entry (fill in underlined blanks)

HP = 75
Efficiency = 7.04
Lift = 19
PSI = 42

Results Calculated

$(hp)(\text{efficiency}) = 528$
Head based on psi = 106.7
Total dynamic head = 125.7
(head + lift)

Pump Capacity = 4.201 cubic feet per second

$(104^{\circ} \text{Ac})(\frac{1}{80}) = 1.3 \text{ CFS} < 5.55 \text{ CFS (survey)} > 1.3 \text{ CFS (permit)}$

Center pivot capacity 800-900 gpm (178 CFS - 2.00 CFS)

Pump Capacity Calculator

using Department designed formula: Pivot Well

$(hp)(\text{efficiency}) / (\text{lift} + \text{psi head}) = \text{capacity in cfs}$

Efficiency:

Centrifugal = 6.61

Turbine = 7.04

Data Entry (fill in underlined blanks)

HP = 250
Efficiency = 7.04
Lift = 30
PSI = 45

Results Calculated

$(hp)(\text{efficiency}) = 1760$
Head based on psi = 114.3
Total dynamic head = 144.3
(head + lift)

Pump Capacity = 12.195 cubic feet per second

12.57 CFS - Survey ✓

$(267^4 \text{ AC})(1/80) = 3.34 \text{ CFS } (2.9 \text{ CFS}) \text{ permit}$

2 - Center pivot - 1800 gpm = 4.01 CFS

4 - wheel lines - 594 gpm = 1.32 CFS

YIELD: 900 gpm (2.0 CFS)

PERMIT TO APPROPRIATE THE PUBLIC WATERS

This is to certify that I have examined APPLICATION G-11037 and do hereby grant the same SUBJECT TO EXISTING RIGHTS and the following limitations and conditions:

This permit is issued to Jim Towery (South Silver Creek Ranch), PO Box 377, Mill City, Oregon, 97360, phone 769-5616 or 769-6795, for use of the waters from three wells, being 2.0 cubic feet per second from Booster well, 1.3 cfs from South Well and 2.9** for the PURPOSE of Irrigation of ~~319.0~~ ^{371.4} acres and supplemental irrigation of 160.0 ^{122.0} acres, being supplemental irrigation of 160.0 acres from Booster Well, irrigation of 104.0 acres from South Well and irrigation of 319.0 acres from Pivot Well, that the PRIORITY OF THE RIGHT dates from July 25, 1983, ²⁶⁷⁴

and is limited to the amount of water which can be applied to beneficial use and shall not exceed ^{5.73} 6.2 cubic feet per second,

measured at the point of diversion from the wells, or its equivalent in case of rotation with other water users.

The well is to be LOCATED: Pivot Well: 630 feet North and 150 feet East from the Southwest corner of Section 18; Booster Well: 25 feet South, 1325 feet East from Northwest corner Section 24; South Well: 1380 feet South 1310 feet West from the Northeast corner of Section 23 being within the being within the (Pivot Well) SW 1/4 SW 1/4 ** A description of the PLACE OF USE under the permit, and to which such right is appurtenant, is as follows:

- * cfs from Pivot Well,
- ** Section 18, Township 24 South, Range 28 East; (Booster Well) NE 1/4 NW 1/4 Section 24, Township 24 South, Range 27 East; (South Well) NE 1/4 NE 1/4 Section 23, Township 24 South, Range 27 East, WM, in the County of Harney.

ASSIGNED. See Misc. Rec., Vol. 8 Page 78

February 29, 2000
FINAL PROOF SURVEY
A # G-11037, P # 10702

I conducted the final proof for this survey on February 16, 2000. Bill Beal assisted me in this survey.

The permit has been assigned to Denny Land and Cattle Co., LLC
address 500 Boylston Street # 1880
Boston, MA 02116
phone# 617-536-6602

Bob de Braga is the manager for Denny Land
HC 73, Box 13838, Burns, OR Phone # 541-573-2878. He asked me to contact Mr. Beal to assist with the final proofs on the Silver Creek lands, as Bill is their consultant.

The permit is for primary and supplemental irrigation from **three wells.**

Booster Well is located in the NE NW, Sec 24, Well ID # L21467 *Supplemental*
I found no well log for this well, Information that Mr. Beal gave me is that the well was drilled 245', and cased to 105'
static level is 11 ½ feet
yield is 930 GPM

There is a **50HP** Submersible Staylite pump, sets 138 feet down the well. The discharge on the well head is 8". Down the main line about 10' is a **30 HP CDD Booster pump** in line. From the booster the discharge is 4 inch out to 8" buried steel main line. The main line is laid north from the well. The application map indicates the main line is ½ mile.

There are no meters or and no assess port on the well.

The well has 16" casing.

Irrigation of the SW 1/4, Section 13 is with four 4" wheel lines with an assortment of sprinkler heads. 1332 sprinkler heads total. Each wheel line is 1/4 mile long. They are laid west to east. The north portion of the quarter is irrigated with a CP. The corner are not irrigated where the CP irrigates. *PREDOMINANTLY 11/64 @ 38-42 PSI (6gpm)*

The underlying primary for this 1/4 section is P # G-5254

There are also **two surface** water rights, on the Salem plat card report, for **10 acres in the NE SW.** These are certs # 29360 and #61053. **No surface water is used for irrigation here and should be canceled..**

Use: Oats and alfalfa hay was grown here last year.

Aerial survey # 41025-179-132B, indicated the land in the SW 1/4 section 13 is irrigated. This is

1979-1980 series photo.

South well - is located in the NE NE, Sec. 23. **PRIMARY**

I found no well log for this well. The well ID tag # L21468 is on the well.

The year 1981 is engraved in the concrete pad the well head is in.

The well has a **75 HP US Electric** motor with an Aurora **turbine pump** mounted on the well head.

There is a 2 inch steel **air port** to the well.

I could not see the size of the casing because of the turbine pump. The discharge from the pump is 8 inch out to 12" steel main line.

Irrigation is with a 10 tower center pivot with and extension on the end another 15 feet. This is a low pressure pivot. No name brand was found on the pivot.

There was a **volume meter** on the well reading 800952 GPM

Irrigation is as mapped on the application map. This is primary irrigation here in Section 23.

Use: Alfalfa hay was grown here last year.

Tie: Intersection of dirt roads at corners of sections 14/13.
23/24

Aerial survey photo # 41025-179-132B

also copy of 1990 photo from FSA # Napp 41025-1211-101R. This photo indicates the land in the NE 1/4 section 23 was irrigated with the pivot by the C-date on the permit. There are more acres irrigated with this pivot than the permit allowed. *

Pivot Well - is located in the SW SW, Section 18. Well ID tag # L-21465 is on the well. **PRIMARY**

info from the well log -

drilled 176 feet deep

cased with 18" to 25 ½ feet, then 16" to 150 feet

Static level 19 feet

yield 800 GPM

The well was completed in 12/21/1979. The well was deepened in 6-26-1982.

The log for the deepening shows the well was drilled to 300 feet.

Yield 900 GPM

Static 30' 2"

installed a 14 inch liner from 1 ½ feet to 251 ½ feet.

The well has a **250HP General Electric** motor with a Worthington **turbine pump** mounted on the well head. There was a **PSI guage** on this system. However, no irrigation was taking place on the day of this survey. The discharge from the pump is 12 inches. This tees into 12" main line. The main line is buried. The application map shows the 12" main line laid to the east about a mile and 10" buried steel main line lying to the north a ½ mile.

Irrigation is with two center pivots in the south end of section 18 and the north end of section 19. One pivot is a 10 tower pivot and one is a 9 tower pivot. There are no name brands on the pivots. They are low pressure type. They also have three 4 inch wheel lines with 33 sprinkler heads on each line. The sprinkler heads are a combination of rainbird 30's 5/32, 9/64, and 11/64. The wheel lines lie to the north of the ten tower pivot, which is on the west side of the sections, along the west side of section 18. The land in the SW NW, Sec 18 was not applied for, but is irrigated with a wheel line.

The 1990 series photo from the FSA office indicates the acres under the pivots were irrigated by the C-date. The corners are not irrigated and will not be included on the final proof map. This same photo shows the acres the wheel lines are on and the photo indicates these acres had some type of cultivation by the C-date, but do not indicate if they were irrigated or not. (I Need to contact the manager or irrigator for the lands here).

Use: On the pivot areas alfalfa hay was grown here last year and on the wheel line portion, oats were grown last year.

Tie: Intersection of the dirt road going south along the section line between Section 13 and 14 and a dirt road going west and east along section line 13 and 14 and 23 and 24.

Aerial survey # 41025-179-132B, and Napp 41025-1213- 56

June Miller
Field Inspector

comments: I did not complete the preliminary final proof map for Booster well, as the surface water right needs to be taken care of then permit G-5254 made as primary for portion of section 13 with permit G-10702 supplemental.

I did not discuss the part of the permit of records kept of the ground water withdrawn. Land owner is in Boston. Shephard was the manager for 20± years of the south ranch, but not now.

June Miller

P-10702 IRRIGATED ACRES.

Booster well -

used AS supplemental to G-5254

36° AC in NE SW not X-hatched on map because of a conflicting surface water right underlying. Need decision from Salem staff if GW migration allowed as primary and supplemental in areas where old surface water right are certificated for. Don't know when WA dies in 11/4/14

Land Owner signed affidavits to cancel SW rights, however we needed additional info. See letter from department staff on cancellation stuff.

Subject: Reconsideration of Draft Cert for Permit G-5254

Hello Gerry,

We respectfully request a reconsideration of the Draft Cert provided 3/4/2016 for Permit G-5254. Attached, please find dated aerial imagery showing the POU fully irrigated before, during and after the valid dates of the permit. This is because it was originally fully developed under Permit G-4250 which was cancelled due to a misunderstanding (per Ap G-6727). For reference, Section 14 is the fully irrigated section in all images and dark Silver Creek

Subject: Postponement of Certificate Issuance Request

Hello Jessica,

I've been asked by Phillip and Lorissa Singhose to assist them in preparing application forms and maps to arrange their water rights of record with the fields they either currently irrigate or plan to irrigate in the future. These applications would be to transfer certificated rights or offset permitted rights.

Last week, Lorissa Singhose and I met with Dwight French, Kim French, and J.R. Johnson in Burns regarding permit application G-17916. The application was proposed for denial. However, Division 512 rules may allow the Singhoses to be issued a permit if they're able to offset the credits needed and meet all other mitigating conditions specified. The following listed permits below could be used for offset credits before they are certificated:

G-5253
G-5254
G-5255
G-5257
G-8406
G-10862
G-10702

S-50437

We request that you suspend processing the permits into certificates until we have time to prepare applications and maps to offset credits for the new permit.

Please let me know if you have any questions or concerns regarding this matter.

Sincerely,

*Scott Montgomery, Owner/Principal
All Points Engineering and Surveying, Inc.

Subject: COBU drafts hold

Good morning,

We have some proposed certificates and COBU claims that need changes that have been sent to use for approval and changes. We would like to request a hold for all the water rights listed below. We are working on sorting them out and making changes, and possible offset credits.

Permits:

G-10862

G-5257

S-50437

G-8406

G-15158

G-5253

G-5254

G-5255

G-15032

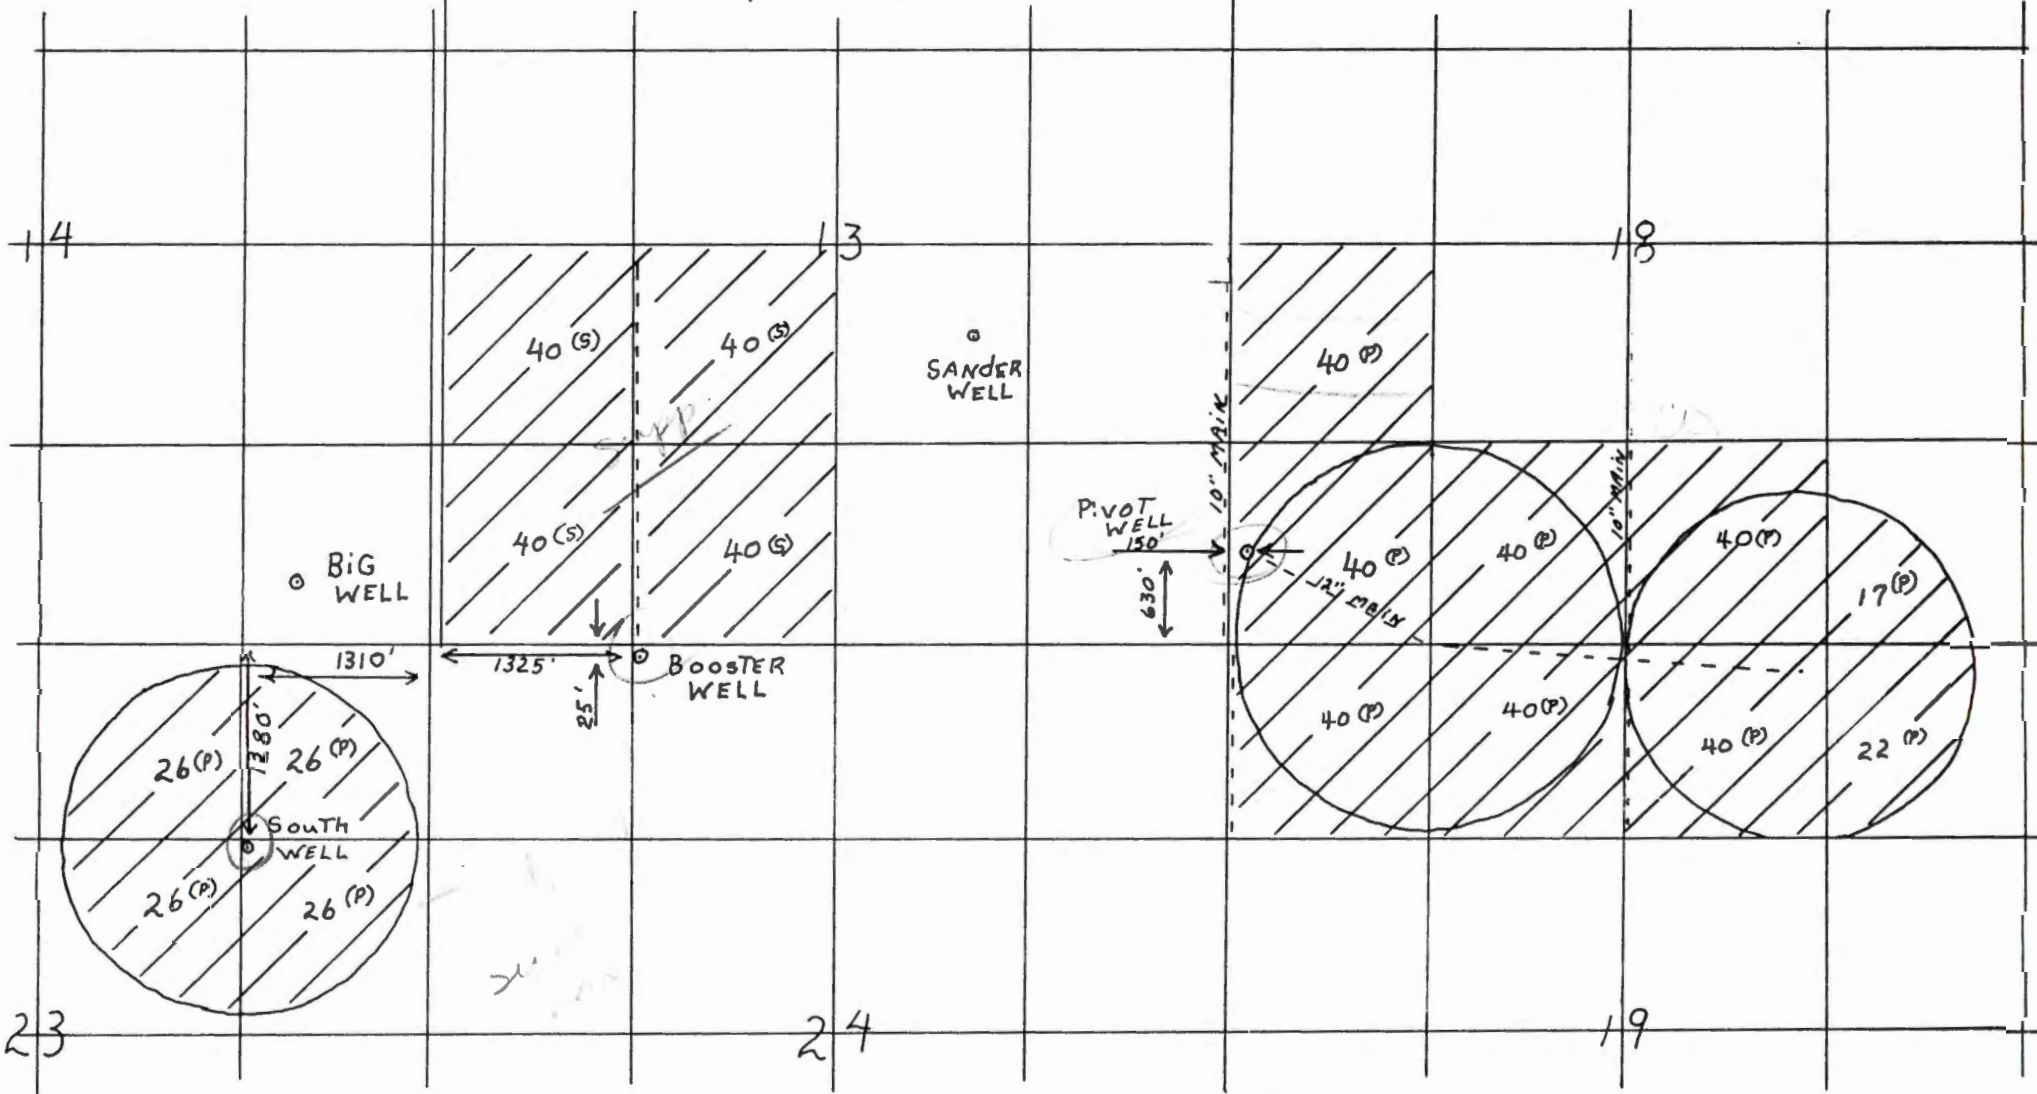

Let me know if you need anything else for putting them on hold.

Thank you,
Phillip and Lorissa Singhose

As a representative for the Denny Land
and Cattle Co owner of the South Silver Creek
Ranch near Riley I am requesting a
six week extension of time to resolve
some cancellations, applications and transfers
because.

G-14901

I helped June Miller February 17th 2000
do final proof surveys on permits, G-5253,
G-5254, G-5255, G-5256, G-5257, G-10862,
G-8406, 50437, G-10702, G-12129.

We have to have her final proof map
in order to file on lands reaching water
rights, canceling water rights that are subject
to cancellation from non use and changing
Supplemental rights to primary rights.

I am sending you this request as per
our telephone conversation this morning.

PROPOSED CERTIFICATE OF WATER RIGHT

THIS CERTIFICATE ISSUED TO

DENNY LAND AND CATTLE COMPANY, LLC
550 BOYLSTON STREET # 1880
BOSTON, MASSACHUSETTS 02116

confirms the right to use the waters of THREE WELLS in the HARNEY BASIN for IRRIGATION OF 371.4 ACRES AND SUPPLEMENTAL IRRIGATION OF 152 ACRES; BEING IRRIGATION OF 104.0 ACRES FROM SOUTH WELL AND 267.4 ACRES FROM PIVOT WELL AND SUPPLEMENTAL IRRIGATION OF 152.0 ACRES FROM BOOSTER WELL.

This right was perfected under Permit G-10702. The date of priority is JULY 25, 1983. The amount of water to which this right is entitled is limited to an amount actually beneficially used and shall not exceed 6.1 CUBIC FOOT PER SECOND, or its equivalent in case of rotation, measured at the wells; BEING 1.3 CFS FROM SOUTH WELL, 2.9 CFS FROM PIVOT WELL AND 1.9 CFS FROM BOOSTER WELL.

The wells are located as follows:

BOOSTER WELL - NE 1/4 NW 1/4, SECTION 24, T 24 S, R 27 E, W.M.; 20 FEET SOUTH AND 1350 FEET EAST FROM THE NORTHWEST CORNER OF SECTION 24.

SOUTH WELL - SE 1/4 NE 1/4, SECTION 23, T 24 S, R 27 E, W.M.; 1350 FEET SOUTH AND 1210 FEET WEST FROM THE NORTHEAST CORNER OF SECTION 23.

PIVOT WELL - SW 1/4 SW 1/4, SECTION 18, T 24 S, R 28 E, W.M.; 600 FEET NORTH AND 200 FEET EAST FROM THE SOUTHWEST CORNER OF SECTION 18.

The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, is limited to ONE-EIGHTIETH of one cubic foot per second per acre, or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 3.0 acre-feet per acre for each acre irrigated during the irrigation season of each year.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

A description of the place of use to which this right is appurtenant is as follows:

BOOSTER WELL - SUPPLEMENTAL IRRIGATION

NE 1/4 SW 1/4	36.0 ACRES
NW 1/4 SW 1/4	36.0 ACRES
SW 1/4 SW 1/4	40.0 ACRES

The AMOUNT OF WATER used for irrigation, together with the amount secured under any other right existing for the same lands shall be limited to $\frac{1}{80}$ of one cubic foot per second per acre, and shall be further limited to a diversion of not to exceed 3.0 acre-feet per acre for each acre irrigated during the irrigation season of each year, provided further that the right allowed herein shall be limited to any deficiency in the available supply of any prior right existing for the same land and shall not exceed the limitation allowed herein, and shall conform to such reasonable rotation system as may be ordered by the proper state officer.

The well shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works constructed shall include an air line and pressure gauge or an access port for measuring line, adequate to determine water level elevation in the well at all times. The permittee shall install and maintain a weir, meter, or other suitable measuring device, and shall keep a complete record of the amount of ground water withdrawn.

Actual construction work shall begin on or before **May 27, 1988**, and shall thereafter be prosecuted with reasonable diligence and be completed on or before October 1, 1989.

Complete application of the water to the proposed use shall be made on or before October 1, 1990.

Witness my hand this **27th** day of **May**, 1987.

/s/ WILLIAM H. YOUNG
WATER RESOURCES DIRECTOR

This permit is for the beneficial use of water. By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan. It is possible that the land use you propose may not be allowed if it is not in keeping with the goals and the acknowledged plan. Your city or county planning agency can advise you about the land-use plan in your area.

Amerititle

attn: Leslie Odam

111 W. Washington St.

Burns, Oregon 97720

Reference: Assignment of Water Rights from Denny Land and Cattle Co. LLC., to Scott and Margie Runels.

Dear Amerititle:

The assignment from Denny Land and Cattle Co. LLC., to Scott and Margie Runels regarding the following water rights, has been recorded in the records of the Water Resources Department:

- | | |
|-------------------------------|--------------------------------|
| 1) App. G-15168, Per. G-15158 | 7) App. G-11036, Per. G-10862 |
| 2) App. G-11037, Per. G-10702 | 8) App. G-14798, Per. G-13698 |
| 3) App. G-6726, Per. G-5253 | 9) App. G-6727, Per. G-5254 |
| 4) App. G-6728, Per. G-5255 | 10) App. G-6730, Per. G-5257 |
| 5) App. G-8947, Per. G-8406 | 11) App. G-14901, Per. G-15032 |
| 6) App. S-65353, Per. S-50437 | |

Our records have been changed accordingly and the original request is enclosed. Receipt number 74987 covering the recording fee of \$100.00 is also enclosed.

Research on the following rights showed that certificates have been issued and an assignment is not needed, but an ownership update may be submitted:

- 1) App. S-24780, Per. S-19525, Cert. 29360
- 2) App. S-26456, Per. S-20743, Cert. 61053
- 3) App. S-24497, Per. S-19162, Cert. 61054

The assignment of Permits 50437, G 10862, G 10702, G 5253, G 5254, G 5255, G 5257 from South Ranch to Denny Land and Cattle Co, LLC can be assigned.

Two of the permits in the area are in other names than South Ranch and the assignment form should be signed by the permit holder. If that isn't possible you can provide us with a copy of the deed or contract that puts your company in title to the land under the permits. The two permits are in the following names.

Permit G 12129 Sheldon Arnett

Permit G 8406 Connecticut General Life Insurance Co

The rest of the water rights on the property outlined are certificated and decreed rights. Certificated and Decreed rights are perfected and cannot be assigned. And it isn't necessary to assign them to another name, because under Oregon Water Law the rights are appurtenant to the land and whoever owns the land owns the rights.

ANNUAL INSPECTION REPORT

South Ranch 1980 A-40

August 8, 1983 Ves Garner

On August 8, 1983 I met with Jim Shephard to inspect the South Ranch project near Riley.

The project is two wells, pumps, buried mainline, two wheel lines, and three center pivots for grain, alfalfa and pasture irrigation.

All of the equipment is on the property and was in use. The equipment appears in good repair and crops appeared good to excellent.

The two pivots in Sections 18 and 19 are both now seeded to alfalfa with oats as a nurse crop. The oats have been swathed but not baled.

The pivot in Section 23 has been seeded to alfalfa and orchard grass pasture. The pivot was operating this date and appeared to be doing a good job with an adequate water supply.

INSPECTION REPORT

South Ranch 1980 A-40

On October 15, 1982 I inspected the South Ranch irrigation project near Riley in Harney County. No one was available at the time of my inspection.

The project consists of two wells, two turbine pumps, buried PVC mainline and three center pivots. The completed project is to irrigate about 402 acres in alfalfa and grain production.

As of this date, the pump on the well in Section 23 has been reinstalled. The land is seeded to a pasture mix. It still appears that the well is not producing an adequate amount of water. The pasture stand is good near center of pivot and declines from about sixth tower on out.

Balance of project is as previously inspected. It appears the crops were good.

Well Installation

Gary Williams

INSPECTION REPORT

South Ranch 1980 A-40

June 14, 1982 Ves Garner

On June 14, 1982 I met with Jim Shepard to inspect the South Ranch project near Riley. Jim is the ranch manager.

I inspected the land and equipment in Sections 18 and 19 and found excellent crops of spring barley under the pivots and alfalfa under wheel lines. This equipment appears to be well maintained with service work being completed on the pump motor this date.

The well in Section 23 produced sand and declining yields last year so was being redeveloped this date. Well driller, Neil Miller (#967), was operating a cable tool drill machine this date. He said the well had sanded in and he was cleaning it and deepening it to about 320 feet (60 feet more depth). He said he would install a liner and sand screen. He said he was going to install the turbine pump and test yield with the irrigation pump.

I informed Mr. Shepard that I had discussed the water right with Mr. Towery and informed him that the water rights on the two wells had not been filed. I gave Mr. Shepard an application.

The project should be inspected for well capacity and crop at a later date.

INSPECTION REPORT

South Ranch 1980 A-40

10/27/81 Ves Garner

On October 27, 1981 I again inspected the project of South Ranch near Riley in Harney County. Jim Shephard, the manager, was not available during the inspection.

That portion of the project in Sections 18 and 19 is as last inspected. The barley crop appeared to be sparse.

The pivot in Section 23 is as last inspected; however, the pump has been pulled. (See photo.) I could not tell if any work had been done on the well, but there does not appear to have been any.

This project should be inspected again when it is confirmed that the well has been improved and the pump re-installed.

INSPECTION REPORT

South Ranch # 129

On July 21, 1981, I Met with Jim Shepherd, ranch manager, to inspect the South Ranch irrigation project near Riley in Harney County.

The project involves constructing two wells, two turbine pumps, 1,400' of 8" pvc mainline and three $\frac{1}{4}$ mile center pivots.

As of the date of this inspection, the pivots and wheel lines in Section 18 and 19 are as previously reported. They are both seeded to barley which appears to an excellent stand, estimate $2\frac{1}{2}$ to 3 ton per acre. An additional wheel line has been added to the SE $\frac{1}{4}$ of Section 19 and is seeded to Barley, the wheel line was put together from misc. parts ^{from} for existing scrapped lines, the wheel line is connected to the well in Section 18.

The new well in Section 23 is complete and the pump has been installed. The pivot was operating, however, there is not enough water to satisfactorily operate the pivot. At the present Mr. Shepherd is alternating shutting off the two end towers to operate the pivot. Mr. Shepherd said that they were planning to rework the well this winter to improve the yield. The pivot was seeded to barley, late, but crop appears to be maturing, expect yield to be 1 to $1\frac{1}{2}$ ton per acre.

Equipment Summary

Pump and Motor on New Well Section 23.

Motor: U.S. Electric, 75 hp.

Pump: Aurora, Serial: 81-71810

Type: 12 pl, 10" bowls and columns

Pivot operating at 40 psi at 1st nozzle

The Project will need reinspected after the new well is reworked.

Engineer: Gary Williams

Dated July 21, 1981.

INSPECTION REPORT
South Ranch 1980 A-40
5/1/81 V.G.

On May 1, 1981 I again inspected the project of South Ranch near Riley. Mr. Shepherd was loading hay trucks so I did not talk with him.

The easterly system, Sections 18 and 19, are as last reported.

Development of the westerly portion of the project has begun. A new 16 inch diameter well has been constructed at what I believe is near the center of the NE1/4, Section 23, but I am not certain of the location.

A Pierce towable center pivot has been installed to irrigate most of the NE1/4, Section 23.

Pierce Towable Serial #5101200-71258
low pressure - 11 Tower

This pivot, like the other two, appears to be a used pivot.

As of this date, no pump or power has been installed.

INSPECTION REPORT
South Ranch #129
9-24-80 V.G.

On September 24, 1980 I again met with Jim Shepard, ranch manager, to inspect the project of South Ranch near Riley.

The easterly systems of the project are now complete and in use. This portion of the project was described in my last inspection report as follows:

Section 18 and 19

one well and pump
two pivots
Pipe: 1700' 10" pvc
2500' 8" pvc
3/8 mi 8" and 6" aluminum
two wheel lines

All land is cleared and cultivated. The land under the west pivot and wheel lines is seeded in rye cover crop to hold the soil until spring planting of alfalfa

No work has begun on the westerly well and pivot.

INSPECTION REPORT
South Ranch #129

On July 25, 1980, I met with Jim Shepard, manager of South Ranch, to inspect their project near Riley in Harney County.

The project has changed in location since originally approved. It is a little difficult to sort out just what is really happening on this project.

Mr. Shepard showed me a well that he says is a newly constructed well, however, it is in the same location where the owner, Mr. Towery, had stated there was an existing well. Under the original proposal, this well was to receive a new 100 hp motor.

Summary :

Well - located at NW corner SW $\frac{1}{4}$ SW $\frac{1}{4}$ Section 18, T.24S., R.28E.
said to be 16" x 150' deep, said to be 15' SWL and tested
at 4,000 gpm

Motor - G.E. 250 hp
Serial #CNJ 316106

Pump - Worthington Turbine
Size 154277-3
Serial #46192

Pipe - 10" buried pvc
125 psi Johns Manville
runs from well to a pivot located at the SE Corner SW $\frac{1}{4}$ SW $\frac{1}{4}$
Section 18

Pivot - at the SE Corner SW $\frac{1}{4}$ SW $\frac{1}{4}$ Section 18 - will cover S $\frac{1}{2}$ SW $\frac{1}{4}$
Section 18 and N $\frac{1}{2}$ NW $\frac{1}{4}$ Section 19, T.24S., R.28E.

Pierce 10 Tower (128'/span)
#5101200 75458
appears to be used yet in new condition

From this pivot 8" pvc pipe is layed out for $\frac{1}{2}$ mile due east to a pivot site where a 9 Tower Pierce pivot is to be installed. The tower is there but no pad or system.

Pierce 9 Tower 128/span (yet to be delivered)
#5101200 71358

this pivot will operate on the S $\frac{1}{2}$ SE $\frac{1}{4}$ Section 18 and the N $\frac{1}{2}$ NE $\frac{1}{4}$ Section 19, T.24S., R.28E

Note: South Ranch does not own the SE SE Section 18 but are negotiating a trade involving the SE NW Section 19 with BLM.

Mr. Shepard stated that they plan to construct another well in the NW $\frac{1}{4}$ Section 24, T.24S., R.27E., and install an 11 Tower pivot (128/span) that will irrigate 155 acres. If this plan is to develop, South Ranch must purchase or lease the W $\frac{1}{4}$ of Section 24 from Leathus Ranch. If they cannot obtain the land, the pivot and well will be placed in the NE $\frac{1}{4}$ Section 23.

In addition to the well and two pivots now being developed, about 3/8 mile of aluminum mainline (8" and 6") and two $\frac{1}{4}$ mile wheel lines will irrigate the N $\frac{1}{2}$ SW $\frac{1}{4}$ Sec. 18 as part of the project.

All project land in Sec. 18 and Sec. 19 is cleared and partially cultivated. Alfalfa will be grown.

Your MO8128-1

The assignment of permits 50437, G-5253, G-5254, G-5255, G-5257, G-10862, and G-10702 from James R. Towery to South Ranch, a partnership consisting of Robert C. Young and Vernon R. Morgan, has been recorded in the records of the Water Resources Department.

Our records have been changed accordingly and the original assignment is enclosed along with our receipt 58139 covering the \$10 recording fee.

Application 8947, permit 8406 was not assigned.

Under the terms of permit 50437, a substantial beginning of construction of the water system must be made by January 31, 1990. An adequate irrigation system is to be on hand or completed by October 1, 1990 and water used from Silver Creek to the fullest extent intended on or before October 1, 1991.

Under the terms of permit G-10862, water from two wells is to be used to the fullest extent intended on or before October 1, 1991.

Forms for reporting are enclosed.

Sincerely,

Thomas E. Shook
Water Right Specialist

Mill City, OR 97325

Dear Mr. Towery:

REFERENCE: Files 65353, G-11036 and G-11037

Pursuant to our telephone discussion last week, I am enclosing two statements one of which needs to be completed before a notary public. Upon receipt of these statements properly completed, they will provide for clearing our records of that portion of existing water rights and a permit conflicting with your Applications 65353 and G-11036 which were filed in July of 1983 along with another Application G-11037.

Application 65353 describes the proposed use of 4.6 cubic feet of water per second from Silver Creek for the supplemental irrigation of 367.3 acres. A print of the map supporting this application is enclosed.

Application G-11036 describes the proposed use of 4.4 cubic feet per second from 2 wells being 2.2 cubic feet per second from Corral Well and 2.4 cubic feet per second the stock well for the primary irrigation of 265 acres and supplemental irrigation of 160 acres. A print of a map supporting this application is enclosed.

Application G-11037 describes the proposed use of 7.3 cubic feet per second, being 2.7 cubic feet per second from the Booster Well for the supplemental irrigation of 160 acres, 1.7 cubic feet per second from South Well for the primary irrigation of 104.0 acres and 2.9 cubic feet per second from the Pivot Well for the primary irrigation of 319.0 acres. A print of the map supporting this application is enclosed.

Application G-11037 appears to be in proper form and will be placed with the group to be considered for approval. We will continue to hold action on Applications G-11036 and 65353 for a reasonable length of time pending receipt of the affidavit and statement to provide for clearing our records of the existing rights and the permit involved.

Sincerely,

WAYNE J. OVERCASH
Senior Water Rights Examiner

South Ranch
P. O. Box 377
Mill City, OR 97360

ATTENTION: Jim Towery

Dear Mr. Towery:

The use of water for irrigation on project lands financed by Water Development Loan number 1980 A-40 requires a water right permit.

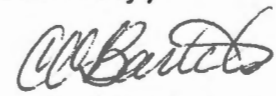

Our financial commitment letter dated March 20, 1980 sets forth conditions of the loan including obtaining the necessary water right permit. We granted the loan and disbursed funds based on your agreement to the terms of the commitment letter and subsequent loan agreement.

Jim Shepard has contacted the Water Rights Division about the needed permit and some work apparently is in progress; however, an application for the water right permit has not been filed.

Failure to obtain the permit places you in violation of the commitment letter, your loan agreement and Oregon Water Law. Continued use of the water without a water right permit will not be allowed and may result in your loan being called and made immediately due and payable in its entirety.

If you have questions or if you or Mr. Shepard require assistance, please contact this office, the Water Rights Division, or Bill Beal, the Watermaster in Burns.

Sincerely,

C. O. Bartels, Program Manager
Water Development Loan Program

Application No. G-11037

Permit No.

STATE OF OREGON WATER RESOURCES DEPARTMENT

Application for a Permit to Appropriate Ground Water

RECEIVED

JUL 25 1983

I, Jim Towery (South Silver Creek Ranch)

WATER RESOURCES DEPT.

(Name of Applicant)

SALEM, OREGON

of P.O. Box 377

Mill City

(Mailing Address)

(City)

State of Oregon 97360

Phone No. 769-5616 or 769-6795

(Zip Code)

do hereby

make application for a permit to appropriate the following described ground waters of the State of Oregon:

1. The development will consist of (3 wells) Pivot, Booster and South wells

(Give number of wells, tile lines, infiltration galleries, etc.)

having a diameter of .16" pivot and an estimated depth of 176' feet.

2. The well or other source is to be located 630 ft. N and 150 ft. E

(N. or S.)

(E. or W.)

from the S.W. corner of sec. 18 T-24-S R-28-E
 Booster Well=16" 280' deep, 25' south, 1325' (Public Land Survey Corner) east from N.W. cor.
 sec. 24 T-24-S R-27-E within N.E. $\frac{1}{4}$ N.W. $\frac{1}{4}$ sec. 24. South Well= 1380' south
 1310' west N.E. cor. sec 24
 N.E. $\frac{1}{4}$ sec. 23. 18" 300' deep being within the S.W. $\frac{1}{4}$ of the S.W. $\frac{1}{4}$ $\frac{1}{4}$ of

Sec. 18 Tp. 24-S R. 28-E, W. M., in the county of Harney

3. Location of area to be irrigated, or place of use if use other than irrigation.

Township	Range	Section	List $\frac{1}{4}$ $\frac{1}{4}$ of Section	List use and/or number of acres to be irrigated
24-S	27-E	13	NE SW	40.0 sup. booster well

				<u>583</u>

4. It is estimated that 150 feet of the well will require steel casing.

(Kind)

5. Depth to water table is estimated 19' Well drilled by Orvail Buckner

(Feet)

9690D

40.00 ex
 20.00 10 ac
 573.00 573 ac
 633.00

6. The amount of water which the applicant intends to apply to beneficial use is 7.3 cubic feet
Booster Well=2.7 cfs, South Well=1.7 cfs, Pivot Well=2.9 cfs
per second or gallons per minute.

7. The use to which the water is to be applied is irrigation

8. If the flow to be utilized is artesian, the works to be used for the control and conservation of the supply when not in use must be described.

9. If the location of the well, or other development work is less than one-fourth mile from a natural stream channel, give the distance to the channel and the difference in elevation between the stream bed and the ground surface at the source of development.

10.

DESCRIPTION OF WORKS

Include length and dimensions of supply ditch or pipeline, size and type of pump and motor, type of irrigation system to adequately describe the proposed distribution system.

Pivot Well ,250 H.P. 12" discharge (1) 1280' pivot and (1) 1080' pivot
plus hand lines and wheel lines

Booster Well ,30 H.P. submersible, wheel lines

South Well , 75 H.P. turbin, 8" main, 1280' pivot

11. Construction work will begin on or before March 28, 1981

12. Construction work will be completed on or before September 15, 1982

13. The water will be completely applied to the proposed use on or before May 1, 1983

14. If the ground water supply is supplemental to an existing supply, identify the supply and existing water right.

This permit, when issued, is for the beneficial use of water. By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan. It is possible that the land use you propose may not be allowed if it is not in keeping with the goals and the acknowledged plan. Your city or county planning agency can advise you about the land-use plan in your area.

Permit to Appropriate the Public Waters of the State of Oregon

This is to certify that I have examined the foregoing application and do hereby grant the same, SUBJECT TO EXISTING RIGHTS INCLUDING THE EXISTING MINIMUM FLOW POLICIES ESTABLISHED BY THE WATER POLICY REVIEW BOARD and the following limitations and conditions:

The right herein granted is limited to the amount of water which can be applied to beneficial use and shall not exceed 6.2 cubic feet per second measured at the point of diversion from the

well or source of appropriation, or its equivalent in case of rotation with other water users, from three wells being 2.0 cfs from booster well, 1.3 cfs from South well, & 2.9 cfs from Pivot Well

The use to which this water is to be applied is irrigation and supplemental irrigation, ^{of 319.0 ac} being ~~irrigation from booster well~~ supplemental irrigation

If for irrigation, this appropriation shall be limited to of one cubic foot per second or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed acre feet per acre for each acre irrigated during the irrigation season of each year;

6.1 (5) supplemental irrigation

of 160.0 acres from booster well
of 104.0 acres use of water from South well for irrigation
of 319.0 acres from Pivot well

and shall be subject to such reasonable rotation system as may be ordered by the proper state officer.
The well shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon.
The works constructed shall include an air line and pressure gauge or an access port for measuring line, adequate to determine water level elevation in the well at all times.
The permittee shall install and maintain a weir, meter, or other suitable measuring device, and shall keep a complete record of the amount of ground water withdrawn.

The priority date of this permit is July 25, 1983

Actual construction work shall begin on or before and shall thereafter be prosecuted with reasonable diligence and be completed on or before October 1, 19.....

Complete application of the water to the proposed use shall be made on or before October 1, 19.....

WITNESS my hand this day of, 19.....
