REFERENCE: File 57714

According to the terms of your Permit 43556, for the use of water from Greggs Creek for domestic use for one family, stock and for irrigation of 4.0 acres in Curry County, complete application of water was to have been made by October 1, 1981.

Complete application of water means the application of water to a beneficial use under the permit to the full extent intended. In the case of irrigation, it means beneficial irrigation of all the lands the permittee intends to cover under the terms of the permit. If the water has been used, you should promptly submit notice describing the extent of completion as set forth in the letter accompanying your permit and also in our postal card of October 28, 1981.

ORS 537.260 provides that: "Whenever the time within which any appropriation under a permit should have been perfected has expired and the owner of the permit fails or refuses within three months thereafter to submit to the Water Resources Director proof of completion of the appropriation as required by ORS 537.230 and 537.250, the Water Resources Director may, after 60 days notice by registered mail, order the cancellation of the permit. . ."

In accordance with the provisions of ORS 537.260, you are hereby notified that unless proof of beneficial use is recieved within 60 days from the date of this letter, the permit(s) may be canceled without further notice.

If, for any reason, you are no longer interested in the project described by the permit, we would appreciate it if you would so advise. If the property involved has changed hands and any part of the project has been completed, you should immediately assign the permit to the new owner and advise us of his name and address. An assignment form will be furnished upon request.

Sincerely,

BRUCE A. ESTES, Supervisor  
Survey/Certificate Section

Dear Mr. Covey:

Your application for a permit to use water from Greggs Creek for domestic use, stock water and irrigation of 4.0 acres has been filed as No. 57714. Also received were your map, legal descriptions and fees in the amount of \$60.00.

The amount of water you propose to appropriate for the various purposes, as listed in items 4 and 5 of the application, were as follows: 0.05 cubic feet per second for stock water, 0.05 for domestic use and 0.125 for irrigation. The quantity of water which can be allowed in your permit are: 0.005 for domestic use, 0.005 for stock water and 0.0125 for the irrigation of 4.0 acres. It appears that the decimal point was misplaced by one digit in each instance. The permit will be issued for a total of 0.06 cubic feet per second, distributed among the various uses as noted above.

You indicate under your "description of works" that domestic use will be supplied for one family with a possible three in the future. The statutes provide that a beginning of construction must be made within one year from the time a permit is issued. I presume that the time element involved in the construction of the additional homes is greater than that; the permit will be issued for domestic use for one family unless you indicate otherwise. If the permit is to be issued to cover more than one household, would you please so inform us. If this is the case, the map will have to be amended so as to show the locations of all the houses.

The application otherwise appears to be in satisfactory form, and a permit will be issued under the terms outlined above.

Very truly yours,

Ralph H. Jackson  
Water Rights Engineer
