This reservoir was originally built by my brother George

Patrick Damm some time in the early 1860's. It was piped to the farm house and barn for protection and indoor water. The reservoir was used in this way until after 1946. My father George E. Damm had a contractor with a D. F. Oak clean it out and rebuild it, but it was left open (NOT DAMMED UP) until 1987 when I had it cleaned out and dammed up again. It has been used for fish and wild waterfowl up to this point. The springs that feed this reservoir are in the reservoir and up the dam above the dam. There are 4 springs that produce pure water until the 1940's when the home development and septic tanks polluted them. Until this year 1994 the springs produced about a 2" pipe full of water, this year the production fell to almost nil. I was born on this property in 1922 and have lived here most of my life. I am sure you will need other information for the proper completion of this form.
