Dear Mr. Osborne:

REFERENCE: File 62750

Your Application 62750 describing the proposed use of 2.515 cubic feet of water per second from an unnamed stream, being 0.205 cfs for irrigation of 8.2 acres of cranberry bogs, 1.73 cfs for temperature control and 0.58 cfs for flood harvesting on 11.5 acres of cranberry bogs, together with the supporting map, print of the final proof map made in connection with Permit 23069 and print of a portion of a topographic map, have been reviewed.

I apologize for the delay in responding to you about your application.

Will you please review the location of your proposed project. According to the information illustrated on your supporting map, the point of diversion is located within Section 36, Township 29 South, Range 15 West, WM, instead of Section 21, Township 30, Range 15 as presently noted in the latter part of Item 2.

Also, according to your map, the place of use of water is located in Township 29 South, Range 15 West, Section 25 instead of Township 30, Range 15 presently noted in Item 3.

If your map correctly represents the place of use, Items 2 and 3 must be amended to be in agreement.

The original map from which the print was prepared should also be submitted to support your application so that we will be insured of clear copies for our records and distribution.

I am returning your application and map for correction and completion. The application is endorsed so that in order to retain its priority date, it must be received in this office on or before April 26, 1982.

Dear Mr. Osborne:

REFERENCE: File 62750

We have received your application for use of water for irrigation, temperature control and flood harvest along with the supporting data and fees. Our Receipt 27169 is enclosed. Your application has been filed and assigned number 62750.

Because of the many applications which have been filed in recent months, we are temporarily behind in our processing. Your application will be examined in detail as soon as possible. We will contact you if we need any additional information. If a permit is required to satisfy the conditions of a loan or land sale or if other emergency conditions exist, please let us know and we will attempt to process your application in the shortest possible time.

After examining your application, a permit may be issued without further correspondence if no additional information is required and it does not conflict with existing rights. The proposed appropriation will be subject to the Water Policy Review Board's Basin Program Statements, existing minimum flows, and demands of prior rights during periods of low water.

Thank you for your patience.

Sincerely,
